HORECA | MEDICAL | BEAUTY | CLEANING

Uniforms that inspire

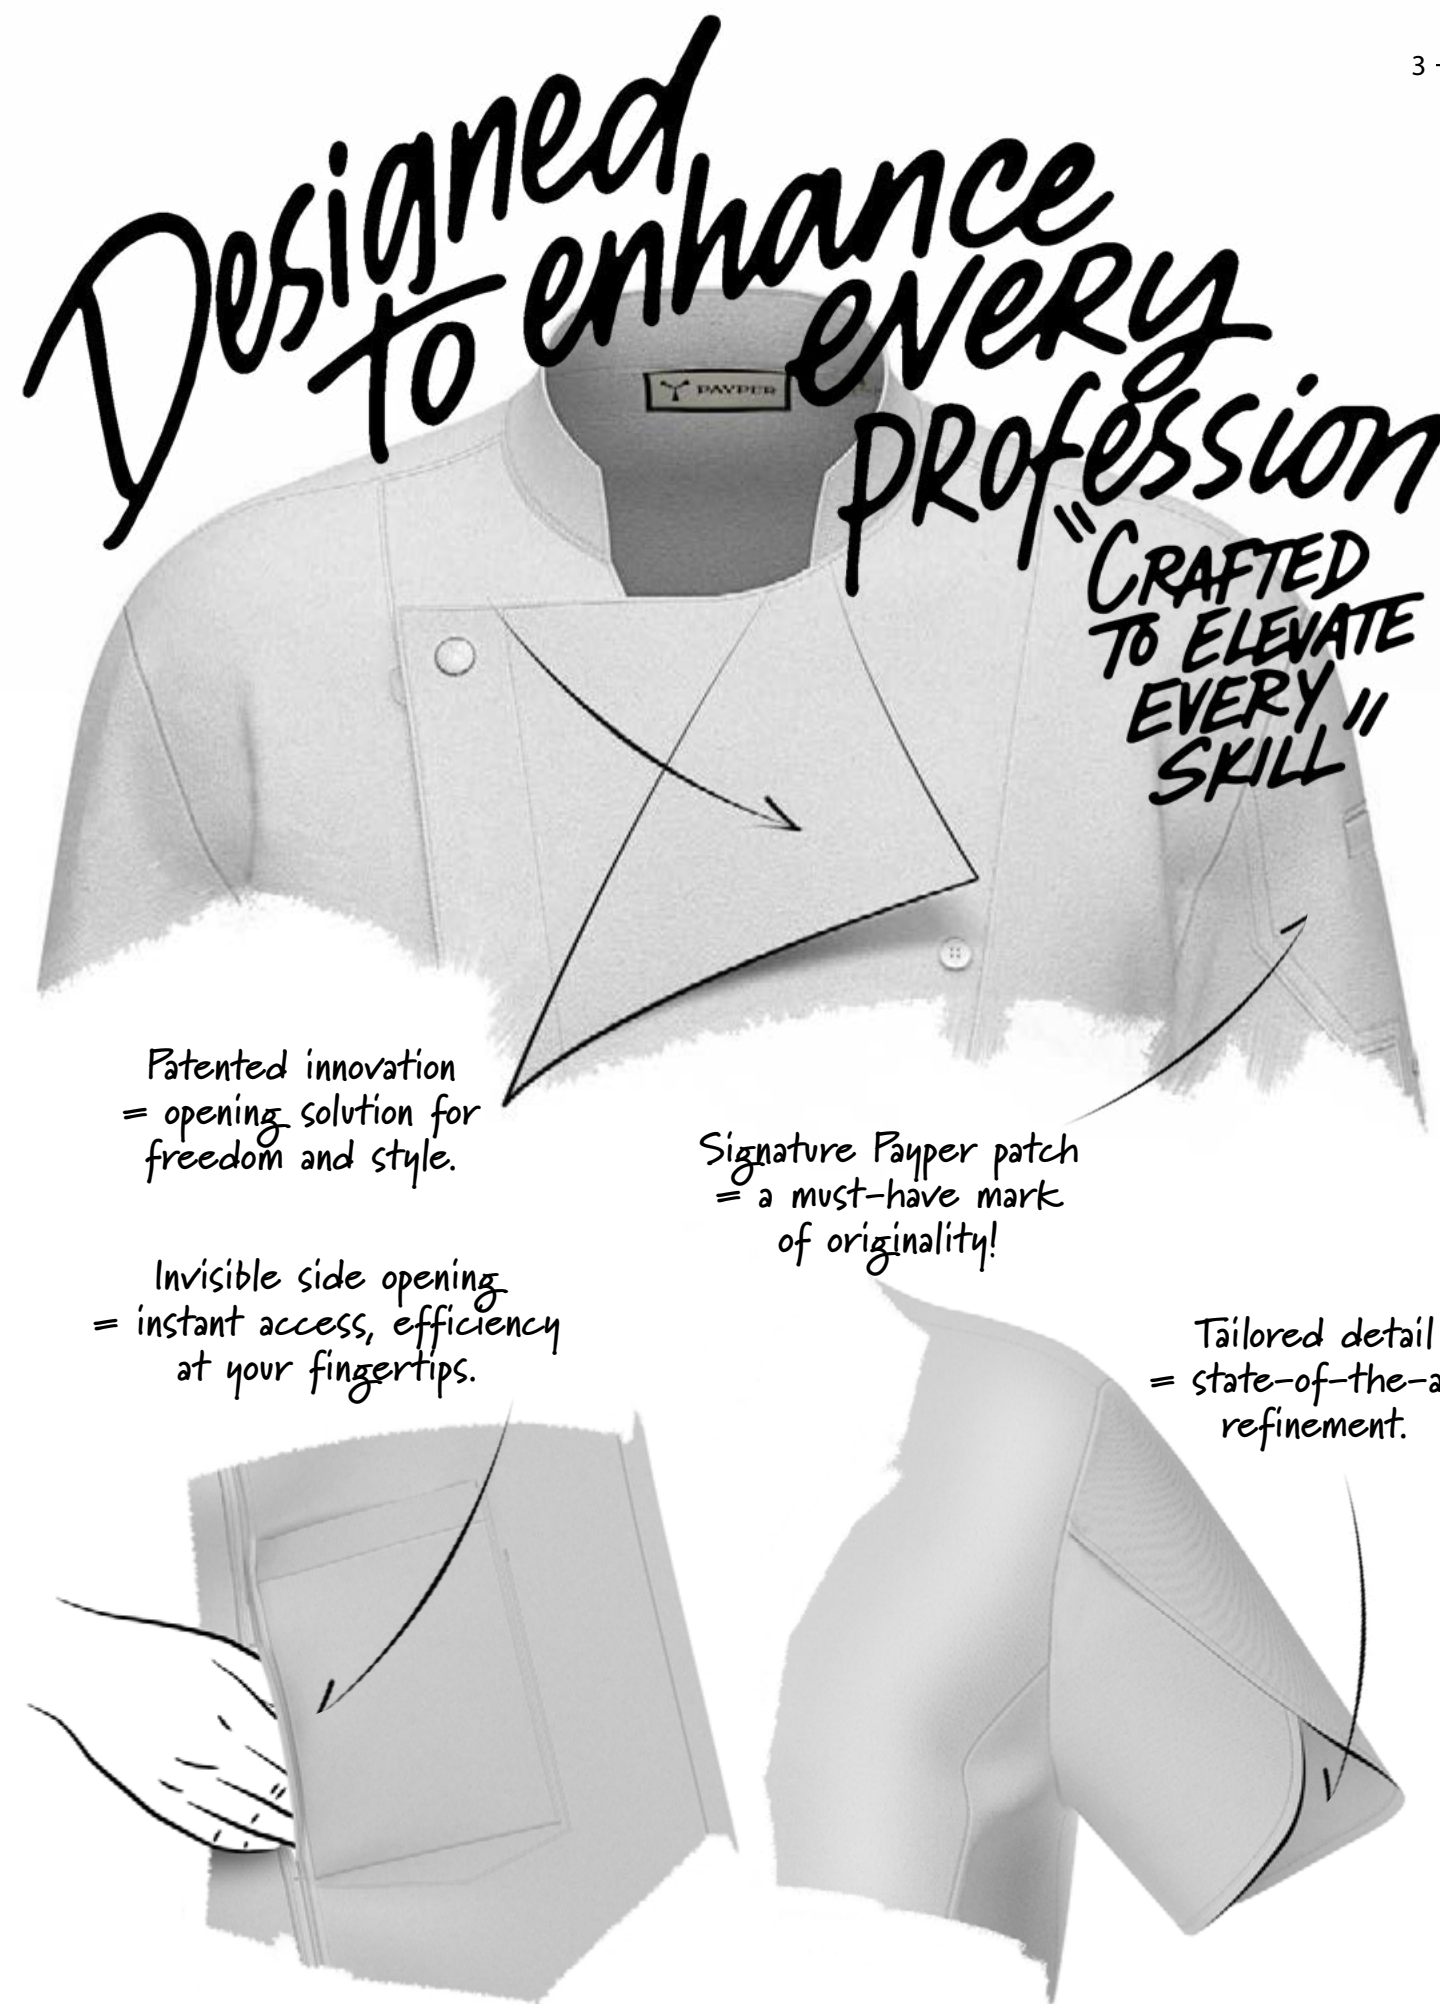

Research, innovation, and attention to detail: these are the distinctive features of the **new Payper** creations, dedicated to professionals in the **Horeca, Medical, Beauty and Cleaning** sectors.

The Professional collection offers **tailored** garments, with **design** solutions specifically created **to measure** in order to satisfy the tastes and needs of those who turn their passion into a profession and this into a mission.

A commitment that is reflected in every detail of the Payper garments, such as the **Lockable Rever**, the ingenious patented opening system that distinguishes the jackets of "**starred**" **chefs** and **beauty artists**, as well as the side pocket designed for **healthcare professionals** and the tulip sleeves that embellish the uniforms of **cleaning specialists**.

True signature choices to wear with pride every day.

Sustainable
cotton, innovative
fibre, next-level
technology.

LYCRA®, T400® and COOLMAX®
are trademarks
of The LYCRA Company

Latest generation,
high-performance fabrics
featuring the extraordinary
combination of sustainable
cotton, **Lycra® T400®** fibre,
unparalleled **COOLMAX®**
technology, and **Silvadur™**
antimicrobial treatment.

As with every creation,
attention to detail
makes the difference.

Payper has selected excellent raw materials to create garments with high aesthetic and functional value. The **Lycra® T400®** fibre, with its intrinsic elasticity and shape-recovery properties, the **PRO-LABEL** certification, guaranteeing durability even after industrial washing, the **COOLMAX®** technology, the maximum expression of breathability, the **Silvadur™** treatment, ensuring hygiene and antibacterial protection, and the **twill**, with a soft and refined diagonal structure, **ripstop** with a resistant and lightweight checked weave, and **poplin**, compact and naturally breathable, fabrics make Payper's **PROFESSIONAL** lines unique.

Stretch

Fresh'n' Soft

Super Strong

Xtreme Wash

Odor Control

SILVADUR

The fabrics thus ensure incredible
freedom of movement, a pleasant feeling
of **freshness and softness** to the touch and
a high **resistance to tearing and intense
washing**, for a uniform that maintains its
performance over time and an impeccable fit.

Horeca

In every recipe, every ingredient counts.

Refined lines, sophisticated tailoring, and breathable fabrics bring to life a collection designed to stand out, both inside and outside the kitchen. Each model, the result of a **careful stylistic study**, is conceived to enhance every individual personality, ranging from **exquisitely elegant options to more casual styles**.

A complete menu of **jackets, work coats, trousers, aprons and headgear**, created by blending the finest raw materials and exploring design solutions for unparalleled functionality. This is how the **Lockable Rever** was born, an ingenious opening system protected by a **patent**, which distinguishes the jackets of "starred" chefs. With one simple movement, the unbuttoned flap locks precisely on the opposite side, offering a professional, neat and distinctive look.

The collection's garments offer excellent quality fabrics, enhanced by **high-performance, breathable, and durable weaves**:

- 190 g/m² twill
- 160 g/m² twill
- 150 g/m² ripstop

Each garment is synonymous with excellence, an expression of the decisive taste of those who know how to leave a mark.

Performance and style, for those who care every day.

Caring for others is an act of total generosity. It requires precision, concentration and dedication. For this reason, Payper's Medical line is designed to support medical professionals in their everyday routine, offering **garments with the perfect balance of aesthetics, functionality and comfort**. Lightweight and breathable fabrics such as **poplin**, stretchy and durable **Lycra® T400®** fibre, **COOLMAX®** technology, with its unparalleled moisture management, and the **Silvadur™** antimicrobial treatment, ensure **freshness, hygiene and protection for those who have chosen to dedicate themselves to others**. Every lab coat, tunic and pair of trousers is designed to offer freedom of movement, resistance to frequent washing and a **perfect fit**.

From **invisible solutions** to the meticulous choice of materials, the Medical line meets the needs of those who care for the well-being of others, preserving quality and performance over time.

Care means attention and dedication, a commitment that makes the difference.

Beauty

Elegance and comfort for beauty lovers.

Personal enhancement is what **image and wellness professionals care about**. Every detail conveys attention, harmony, and style. Payper's Beauty line is a beauty revolution, designed to naturally enhance the silhouette of those who interact with others every day, bringing out authentic personalities through gestures, colours, and scents. Work blouses and trousers are made with lightweight, durable, and breathable fabrics. The combination of premium elements such as the **Lycra® T400®** fibre, the **COOLMAX®** technology and the **Silvadur™** antimicrobial treatment creates garments that ensure freedom of movement, a well-groomed appearance, and maximum hygiene and cleanliness.

Distinctive style and refined details transform professional clothing into an **ally capable of conveying confidence and enhancing those who make beauty their mission**.

Style and character, to best express your personality.

Cleaning

Refined design for hospitality professionals.

Versatile, lightweight, and breathable garments, with clean lines and functional details, define Payper's Cleaning line, ideal for housekeeping professionals. Welcoming suites and rooms are the result of the meticulous work of those who dedicate themselves every day to cleaning, hygiene, and looking after spaces, offering unique and relaxing experiences. To enhance these skills and make their work easier, we have created **work coats and aprons in lightweight and comfortable fabrics, with an excellent fit**, capable of ensuring freshness and hygiene even during long shifts. They are also designed to be combined together, creating authentic and harmonious looks.

A selection of **high-quality, aesthetically pleasing garments**, perfect for conveying **neatness, professionalism**, and the **impeccable image** that every guest deserves.

Cleanliness and comfort, for impeccable service.

Symbols

Each item in the catalogue is accompanied by graphic symbols that offer an overview of the stylistic features and the technical properties of the garment. For these to have greater durability, keeping their performance intact, we recommend washing, drying and ironing after having viewed the maintenance symbols shown on the internal label (care label). To make it easier to understand all the symbols, the explanatory legends are shown below.

	Man: identifies an item with a male design.
	Lady: identifies an item with a female design.
	Match Man + Lady: identifies the availability of the product as matching for men and women.
	Big Size: identifies the availability of at least one size bigger than XXL.
	Professional Regular Fit: identifies a product with a regular fit, adapted to the needs of "professional" products.
	Sartorial Style: identifies a product made with tailored details and finishes.
	Stretch: identifies a material that is at least partially elastic, making the product more flexible and comfortable.
	Fresh' n' Soft: identifies a product made with soft and breathable fabrics.
	Odour Control: identifies a product made with fabrics that prevent and reduce unpleasant odours.
	Super Strong: identifies a product made with particularly resistant fabrics.
	Xtreme Wash: identifies a product that is extremely resistant to high washing temperatures.
	COOLMAX®: identifies a product made with Lycra® T400® fibre, whose special structure ensures great breathability, freshness, elasticity and durability.
	Silvadur™: identifies a product made with an antimicrobial treatment, ideal for ensuring hygiene and antibacterial protection.
	Pro Label: industrial drum washing and drying. Process number 8.

Registered Community Design

Identifies a product whose design or model has been registered with EUIPO, the European Union Intellectual Property Office. Registered Community Design (RCD) is an exclusive right conferred for "the design of a product or part thereof, resulting in particular from the characteristics of the lines, outlines, colours, shapes, surface structure, materials and/or embellishments". The exclusive right absolutely prohibits the use of the design by other manufacturers in all States of the European Union.

Lockable Rever designed by Payper®

Innovative closure system for double-breasted jackets, patented by PAYPER as a utility model. The jacket flap can be opened and secured to the chest on the opposite side with a button, transforming the elegant Mandarin collar into a modern and comfortable V-neck. Thus, the user who feels the need to cool off can undo the jacket, moving freely and without hindrance, while maintaining an elegant and neat look. The meticulous sartorial calculation for positioning all the buttons, for both the men's and women's versions, ensures the perfect fit for each size.

Certifications

Regulation (EU) 2016/425 establishes the requirements for the design and manufacture of Personal Protective Equipment (PPE) made available on the market and sets rules for free circulation within the European Union. The CE marking certifies that the product has been assessed by the manufacturer and that it complies with EU requirements regarding user health and safety, and environmental protection. The United Kingdom has established its own conformity mark (UKCA) but has also extended the recognition of the CE marking indefinitely. The self-declaration procedures for the CE marking therefore also apply to the UKCA marking. However, where mandatory conformity assessment by notified bodies is required, this must also be specifically issued for the UKCA marking.

Items classified as Category I PPE comply with current European standards and are designed to protect workers from minimal risks. The requirements that characterise them are: safety, mechanical resistance, and dimensional adjustment.

HARMLESSNESS

Protective clothing must not adversely affect the health and hygiene of the user. For years, we have mainly collaborated **with partners who use fabrics conforming to STANDARD 100 by OEKO-TEX®**, who favour materials free from harmful substances.

MECHANICAL RESISTANCE

The tests carried out on our items show values higher than those required by the standard in terms of resistance to bursting, tearing and traction, the result of a careful selection of materials, which are robust and protective.

SIZE VARIATION

The size variation, at the end of 5 washing cycles, of items classified as PPE must not exceed 3% for woven fabrics and 5% for knitted fabrics. In addition to obtaining excellent levels in terms of size variation, Payper garments allow washes at 40°C and guarantee high colour fastness over time.

The difference between the sizes is smaller than that of traditional Payper size charts, to offer elegant garments that meet the wearer's needs. If in doubt between two sizes, we recommend choosing the slightly larger one for greater comfort. We recommend trying on the desired item before purchasing and customising. Fits may in fact vary depending on the model, fabric, and treatment.

Wearing the correct size of a garment means feeling comfortable in any situation. To identify it, we recommend taking your measurements in direct contact with the body and then consulting the following tables, which also show the conversions between the different size scales. Items in the PROFESSIONAL lines are designed with a "regular professional" fit, featuring a tailored cut and sharper, more defined lines to harmoniously follow the body's contours.
