# CLASSEQ P 500

Introducing the  
**NEW**

Classeq's digital P500 Pass-through Dishwasher is perfectly suited to any busy kitchen with a cleaning capacity of 720 plates per hour. Running costs are kept to a minimum and features such as continuous hood cleaning and removable wash arms ensure that they are easy to clean.

## Easy to Operate

*Universally recognised symbols and logical controls make operating our machines clear across all languages, meaning better results, less mistakes and minimal training required.*

## Easy to Clean

*Easily removable components, a continuous hood clean system and an automatic self-drain and clean down program assists operators during regular cleaning.*

## Hood Clean System

*Ensures cleaner water for longer periods and reduces water and chemical consumption.*

## Eco Friendly

*39 litre wash tank for efficient usage and minimal running costs.*

## Built-in Components

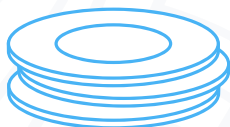

*The P500 comes with a built-in drain pump and chemical pump ensuring it meets all installation regulations and requirements. Integral water softener and built-in chemical dispenser are available as optional extras.*

# winterhalter®

Winterhalter offers machines for perfect cleanliness and hygiene. With a range of handy accessories, advice and personal support as well as wireless connectivity for monitoring and service.

## UC Series

Plates

Cups

Bristo

Bottles

Glasses

Cutlery

### VARIABLE WASHING PRESSURE ADJUSTMENT

Every UC comes with variable water pressure regulation as standard: »VarioPower« adjusts the washing pressure precisely to the type of wash items and how dirty they are. Fine glasses and fragile crockery are washed at low water pressure, while sturdy dishes are washed at a higher water pressure.

### HEAT RECOVERY

Intelligent use of energy: as an option, the UC can be fitted with »Energy« integrated circulating air heat recovery. This uses the energy from the hot steam to pre-heat the cold inlet water. Resulting in lower running costs and ensuring that minimum steam escapes when the machine is opened.

### SMART TOUCH DISPLAY

A smart touch display works as the navigation of the UC. Single-button operation. A clear user interface with self-explanatory pictograms. The display responds sensitively and is also easy to use when wearing gloves. The surface is made of glass and is very robust: it has been tested under extreme conditions.

### INNOVATIVE WASH FIELD

The UC Series is very economical to operate: the optimised wash field reduces water consumption by up to 25 % compared to the previous model. Consumption of electricity and chemicals also drops, further minimising overall operating costs. All this with first-class wash results.

#### SMART TOUCH DISPLAY

for intuitive and simple operation

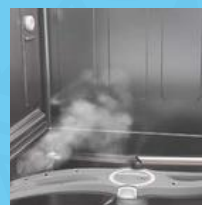

#### CONNECTED WASH

digital connectivity for greater safety and efficiency

#### INNOVATIVE WASH FIELD

flow-optimised and with new nozzle geometry: reduces water consumption by up to 25 %

## HEAT RECOVERY OPTION

After the wash cycle, the warm steam is automatically extracted from the interior of the machine.

In the heat exchanger, the cold inlet water is pre-heated by the energy from the warm steam.

The pre-heated inlet water is transferred to the boiler and no longer needs to undergo a full heating cycle.

# What your dishwashers can do for you...

**Reduced Cleaning Time**

**Get rid of germs**

**Cleaner crockery**

**Reduced Damages**

**Kinder to your hands**

**HOBART**

**PROFI AMXW-10B Hood Dishwasher**
