**MILES**  
MILITARY | LAW ENFORCEMENT | SECURITY

Miles is our standard for advanced professional Military, Law Enforcement and Security clothing and Gear. We've taken everything we've learned about quality, comfort and performance over the last 25 years to develop Miles.

Miles' goal is to be the best apparel money can buy. The result is a line that meets uncommon standards of uncompromising performance, every step of the way. That is when we decided to fill this gap, we started by researching for manufacturers and partners that were producing for leading outdoor companies to acquire enough knowledge behind the technology of modern fabric construction and material functionality, and how important high quality trims can be.

*Dare to be Tactical*

- Triple stitched stress points
- Re-enforced fillets on hand pockets
- Adjustable cargo pockets
- Kneepad pocket
- Re-enforced seat and knees
- 2 back pockets
- Utility leg calf pocket

The new special edition of the **ACU 2.0** uniform codenamed "MILES" offers NIR (Near Infrared) protection properties through the **ASPIDA™** system but also a new fabric composition based on CVC organic cotton.

This is a special treatment of the thread of the fabric through which the maximum masking ability against infrared imaging is achieved. With the process of synchronizing the yarn in the spectrum range applied by infrared imaging, we can achieve high coverage over a longer period of time, even after continuous use and multiple washes.

Thread processing covers the following categories: **NIR, VIS, SWIR, IRA, LWIR.**
