Where Efficiency Meets Style and Satisfaction

Niagara Conservation, Evolve & Simply Conserve

Energy conservation should not come at the expense of comfort.

Our innovative products empower customers to effortlessly save water and energy without compromising on performance or convenience. Niagara Conservation's diverse range of faucet aerators, bathroom and kitchen faucets, and showerheads features various finishes and body types which complement any décor, while Evolve showerheads' built-in thermostatic valves grant residents the flexibility needed for a comfortable, water-conserving shower routine. Simply Conserve's comprehensive line of energy-saving accessories spans weatherization, residential and commercial lighting, providing solutions for every aspect of responsible living. And to ensure our customer's peace of mind, our commitment to quality is backed by comprehensive warranties on all products.

AM Conservation

Leading the Clean Energy Transition

AM Conservation has been an industry-leading manufacturer for over 35 years.

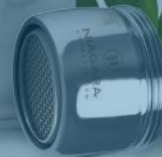

From seamless product ordering and efficient fulfillment to personalized concierge-level customer service, our commitment to your satisfaction extends long after the sale. Our products are not only competitively priced, but also represent a commitment to value for your business and customers alike. Simplify procurement with our bulk ordering option and enjoy the convenience of direct shipping from our warehouse to your site or store.

NIAGARA
CONSERVATION®

Enjoy Powerful Savings

Discover a wealth of options with Niagara Conservation's showerheads and faucet aerators, tailored to meet every need and enhance any setting. Whether you prefer fixed-mount, handheld, rainfall, or combo showerheads, our diverse range and powerful flow ensures there's a perfect fit for you, complete with an array of finishes to match your style. Meanwhile, our faucet aerators feature needle, bubble, or combination sprays, along with the choice of fixed or swivel heads.

Fixed-Mount Showerheads

Niagara Conservation ShowerRail

Niagara's ShowerRail transforms ordinary showers into spa-like experiences. Equiforce® technology delivers high-pressure, energy-saving sprays. Installs in 5 minutes with a suction cup, adhesive, or screw-in option. Relax with an 8" rain showerhead or a 6-spray handheld showerhead with adjustable height. Comes in chrome, brushed nickel, or matte black finishes.

Niagara Conservation Earth® Luxe

Our Earth Luxe showerhead features an adjustable 9-jet turbo massage that easily rotates from a gentle needle spray to a forceful jet. With a non-aerated stream, the showerhead experiences less temperature loss, translating to maximum energy savings. Our pressure-compensated technology guarantees a consistent flow rate across a wide range of pressures, ensuring end-user satisfaction. The 30% larger face diameter and new, transitional look of the Earth Luxe complements many styles of décor.

Niagara Conservation Earth® Pause

Our Earth Showerheads with an on/off Soap & Soak® Valve use up to 75% less water than traditional “low-flow” showerheads on the market. They ensure drastic water usage reductions with patented pressure-compensating technology that also guarantees a powerful, consistent flow rate regardless of available water pressure. The showerhead features a 9-jet adjustable turbo massage that easily rotates from a gentle needle spray to a forceful jet. As the stream is non-aerated, the showerhead experiences less temperature loss — translating to reduced water heating costs.

N2915C-V	Chrome	1.5 GPM	50	10 year
N2920-V	White	2.0 GPM	50	10 year

Niagara Conservation Tri-Max™

Our Tri-Max showerhead features three adjustable flow settings for optimal task performance and maximum water savings. The Tri-Max produces a luxurious shower with an even, vacillating spray that requires less water usage than typical “low-flow” showerheads. Simply twist the showerhead to match the desired task: 0.5 GPM for soaping, 1.0 GPM for showering, and 1.5 GPM for a powerful rinse mode.

MODEL NUMBER	FINISH	FLOW RATE	CASE QTY.	WARRANTY

Niagara Conservation HealthGuard® Handheld

The HealthGuard handheld showerhead features a removable, anti-microbial faceplate for easy cleaning. Ideal for hospitals, healthcare facilities and consumers who value cleanliness, the HealthGuard is designed to perform like a luxury showerhead while empowering maximum health and safety. In addition to a traditional handheld model, a pause-switch version is also available.

MODEL NUMBER	FINISH	FLOW RATE	CASE QTY.	WARRANTY
N9415CH-HH	Chrome	1.5 GPM	12	10 year

Niagara Conservation Earth® Handheld

Our Earth handheld showerheads feature a 9-jet adjustable turbo massage that easily rotates from a gentle needle spray to a forceful jet. The Earth handheld showerheads are corrosion-resistant and constructed of high-impact ABS thermoplastic body with metal ball joint. Includes 72" stainless steel hose for all models. All models also include a matching showerhead bracket.

Niagara Conservation

Faucet Aerators

Niagara Conservation Dual-Spray Swivel Aerators

Our dual-spray swivel aerators offer two stream options: a full-force multiple stream and a splash-free bubble stream that can be changed by twisting the body. The dual-spray swivel aerators produce a pressure-compensated stream that performs well at any water pressure. They contain a 360° swivel to direct the water flow where it's needed and soft rubber nozzles for easy cleaning and decalcification. These aerators are dual-threaded to fit both male and female threaded faucets: Male: 15/16-27, Female: 55/64-27.

MODEL NUMBER	FINISH	FLOW RATE	CASE QTY.	WARRANTY
N3126P-C	Chrome	1.5 GPM	200	10 year
N3126VP-C (pause valve)	Chrome	1.5 GPM	200	10 year

Niagara Conservation Dual-Spray Swivel Faucet Aerators

Our dual-spray swivel faucet aerators offer two stream options: a full-force multiple stream and a splash-free bubble stream. Two versions of the aerator offer a pause-action valve that reduces flow to a trickle while keeping water temperature constant. All versions of the aerator contain a 360° swivel to direct the water flow where it's needed. The dual-spray swivel aerators produce a pressure-compensated stream that performs well at any water pressure. This aerator is dual-threaded to fit both male and female threaded faucets: Male: 15/16-27, Female: 55/64-27.

Niagara Conservation Tri-Max™ 3-Flow Rate Aerators

Our Tri-Max aerators feature three adjustable wide-stream spray settings for optimal task performance and maximum water savings. The Tri-Max aerators produce a pressure-compensated stream that performs well at any water pressure. Simply twist the faucet aerator to match the desired task: 0.5 GPM flow rate for soaping, 1.0 GPM for washing, and 1.5 GPM for a powerful rinse mode. These aerators are dual-threaded to fit both male and female threaded faucets: Male: 15/16-27, Female: 55/64-27. Model N3610CH includes a non-stripping thread component (dual-thread connection) which includes an install key. Threaded inserts are removable to hide threads when installing with female connections.

Toilet & Water-Saving Products

Niagara Conservation Pipe Tape Sealants

Our pipe tape sealant permits quick, clean and economical sealing of male pipe threads of all sizes. This virgin PTFE (polytetrafluoroethylene) pipe tape sealant self-lubricates joints, making them easy to assemble and disassemble. Pipe tape sealant extends the fatigue life of sealed connections and effectively eliminates system contamination common with messy liquid and paste sealants.

MODEL NUMBER	DIMENSIONS	CASE QTY.	WARRANTY
PT060	0.5" x 60"	1500	10 year

Niagara Conservation Rain Gauge

Our rain gauge is a quick and accurate way to measure rainfall and adjust watering practices accordingly. The rain gauge's increments are both English and metric units of measurement up to 5.0 cm / 2.0 in.

MODEL NUMBER	CASE QTY.
N3179	200

Niagara Conservation Adjustable Toilet Flapper

Our adjustable toilet flapper is an easy-to-use and quick-to-install replacement for leaky flappers. It features an adjustable timer dial that allows the user to fine-tune the water usage from tank to bowl. This toilet flapper fits most 1.6-, 3.5-, 5- and 7-gallon toilets, is chlorine- and chloramine-resistant, and is guaranteed to prevent leaks for at least 5 years.

MODEL NUMBER	CASE QTY.
N3145	96

Toilet Tank Bank

Our toilet tank bank is a water-saving product that's effective, low-cost, maintenance-free and user-friendly. The tank bank saves up to 0.8 gallons per flush and includes an anti-evaporation airlock so it never needs refilling. It is constructed of non-corrosive materials that resist microbes and fungal growth.

MODEL NUMBER	CASE QTY.
N3137	400

Fill Master™ Fill Cycle Diverter

Our Fill Master fill cycle diverter is a water saving product for the toilet tank that saves 1/2 to 1-1/2 gallons of water per flush. It diverts the majority of water that would normally flow down the toilet overflow tube back into the toilet tank during the filling cycle. Tune up the toilet with the Fill Master fill cycle diverter to prevent excess water from needlessly flowing down the drain. Available in bulk quantities or individually packaged with installation instructions.

MODEL NUMBER	CASE QTY.
FCD010	1000

Niagara Conservation Leak Detection Tablets (2 Pack)

Our leak detection toilet dye tablets are used to rapidly identify a leaky toilet, which can save thousands of gallons of water per year. Damaged flappers can leak water undetected down your drain. Simply place the leak detection tablets into the toilet’s tank, and if blue water appears in the bowl, there is a damaged flapper that needs to be replaced. These dye tablets are nontoxic, packaged in moisture-resistant packs and include easy-to-follow bilingual directions.

MODEL NUMBER	CASE QTY.
N3140	3000

Niagara Conservation Shower & Faucet Flow Meter Bag

Our shower and faucet flow meter bag helps measure the flow of showerheads and faucet aerators. The flow meter bag is a calibrated, reusable and low cost way to calculate fixture flow in gallons per minute. Readings on the flow meter bag for both the showerhead and faucet flow rate are indicated as low as 0.5 GPM.

MODEL NUMBER	CASE QTY.
DPB010	1000

Niagara Conservation Shower Timer

Our shower timers are an easy, inexpensive way to save water and energy by providing a way to monitor and reduce showering time. The hourglass-style sand timer runs for approximately 5 minutes and affixes to the shower wall with a suction cup.

Niagara Conservation Garden Hose Timer

Our garden hose timer makes it possible to water the yard without the waste. Set the timer to water early in the morning during times of least evaporation and when it doesn't interfere with a schedule. Setting the timer prevents over-watering. The timer will automatically shut off when it has completed the watering cycle. It is constructed of a durable plastic housing and includes a brass connector. Ideal for watering the lawn, garden and micro-watering hanging baskets and potted plants.

MODEL NUMBER	CASE QTY.
62018-I	50

Niagara Conservation Moisture Meters

Our moisture meters promote healthier lawns, gardens and shrubs and help save water by eliminating improper watering, a major cause of water waste. Our moisture meters accurately measure the moisture in the soil at the root level where it counts.

evolve™

Elevate Your Shower Experience

Evolve's patented technologies are designed to eliminate water waste while preserving your daily routine and comfort. Our offerings encompass fixed-mount and handheld showerheads, tub and shower systems, as well as thermostatic shut-off valve devices. Evolve products allow you to embrace efficiency without compromising on convenience, ensuring a seamless experience while reaping the benefits of powerful savings on your water consumption.

Thermostatic Valves

Evolve ShowerStart® TSV³

This clever device offers more convenience and freedom during get-ready-routines and lowers utility bills—all without changing your showerhead's feel or flow. ShowerStart TSV effortlessly saves the hot water that's used while waiting for your shower to get warm. It reduces the flow to a trickle when hot water arrives. Just pull the cord when you're ready to get in.

Evolve ShowerStart® Express Tamper Resistant

This clever system speeds hot water delivery 2X-3X faster, then auto-diverts hot water to the showerhead. The ShowerStart Express is tamper-resistant and installs securely on the shower arm with an included specialized wrench. A thermostatic seal prevents hot water leaks from the tub spout as water is diverted to the showerhead via the specialized WaterSense® labeled device. The system is not compatible with in-wall diverters; refer to EV3746-CP150-SB.

Simply Conserve® Battery Backup with Hook

A power outage shouldn't mean complete darkness. That's why the Simply Conserve® Battery Backup Lamp functions like a normal light bulb — until it's needed most. When the power goes out, the bulb stays on by operating in back-up battery mode. It charges when the light is on, so it's always ready to shine. Fully portable and rechargeable, the Battery Backup Lamp is ideal for home, office and commercial uses. Its damp-rated functionality also makes it a popular choice for outdoor usage in gardens, camping trips and more.

Simply Conserve® Wall Pack Photocell Switch

The wall pack photocell switch automatically adjusts lighting based on sunlight exposure. Effortlessly and reliably control street lighting, passage lighting, doorway lighting and more without lifting a finger. With a wide voltage range, the switch is broadly applicable for almost any power supply level. The 3-10-second time delay prevents unnecessary lighting adjustment affected by rapidly changing conditions. Eliminate waste by only operating your wall packs when necessary with our UL-listed wall pack photocell switch.

SIMPLY CONSERVE®

Simply Conserve® Windjammer-Style Weatherstripping

Our windjammer foam weatherstripping retains its original shape year after year, remains pliable from -40°F and meets ASTM, BSI, DIN and ISO standards. The windjammer is an easy-to-cut cellular polyvinyl chloride (PVC), which has become widely accepted as a substitute for wood due to its superior performance characteristics. It resists water, rot, warping, and splintering, meaning it lasts longer than wood and results in less waste. The tops are precut for a uniform fit, efficient installation and superior air-sealing. The windjammer comes ready to install and can be painted. It has a nail-up installation so no screws are necessary (nails are not included).

Simply Conserve® Aluminum Weatherstripping

Our KC600 aluminum weatherstripping features a medium-duty extruded aluminum carrier with notched tops for accurate and trouble-free installation. The gasket tops are bevel-cut at the factory for better fit. The thermoplastic rubber sealing gasket has excellent compression set resistance and the ability to consistently spring back into shape, resulting in significant energy conservation. This weatherstripping will seal gaps up to 0.75".

SIMPLY CONSERVE®

Simply Conserve® Wedge-Style Aluminum Weatherstripping

Our wedge-style aluminum weatherstripping features a medium-duty extruded aluminum carrier that has notched sides for better fit and trouble-free installation. The Santoprene™ sealing gasket stays pliable in sub-zero temperature and won't crack, shrink, or become brittle or stiff. This weatherstripping works well on warped and inconsistent doors. It also features slotted screw holes for easy adjustment and includes screws.

SIMPLY CONSERVE®

Simply Conserve® Low-Temperature TPR Weatherstripping

Our low-temperature TPR weatherstripping features a medium-duty extruded aluminum carrier and slotted holes for easy adjustment and trouble-free installation. Our low-temperature weatherstrip's sealing gasket is made of a pliable thermoplastic rubber (TPR), which will remain pliable in subzero temperatures. That means superior weather sealing when it's needed most.

SIMPLY CONSERVE®

Simply Conserve® Kerfed Door Frame Seal Weatherstripping

Our kerfed door frame seal weatherstripping fits easily into most door kerfs and can be removed without damaging the jamb or seal. It is composed of open-celled foam with a polyethylene liner, which provides maximum long-term performance, low compression force and resistance against compression set. That means it retains its original shape year after year.

SIMPLY CONSERVE®

Simply Conserve® Closed-Cell Polyethylene Hot Water Pipe Insulation

Our closed-cell polyethylene hot water pipe insulation is used to insulate residential and commercial hot water non-steam pipes, providing improved thermal efficiency and protecting personnel from heat and burns. Insulating hot water pipes reduces heat loss and can raise water temperature 2°F – 4°F. It also prevents freezing and sweating for cold water pipes. Our pipe insulation provides excellent resistance to water and water vapor and has a temperature range of -160° to 200°. The insulation is flexible and is 100% pre-slit for easy installation.

MODEL NUMBER	R VALUE	DIMENSIONS	CASE QTY.

Simply Conserve® Heat Shrink Film Window Insulation Kit

Our easy-to-use heat shrink film window insulation kit contains plastic shrink film and two-way tape to insulate and weatherize average-size windows. The insulation kit seals windows airtight and eliminates condensation, cold drafts and heat loss. The tape securely holds the plastic film in place while a hair dryer shrinks plastic film to form smooth, tight, clear-as-glass coverage inside the storm window.

Simply Conserve® Chill-Stopper Air Conditioner Covers

Our chill stopper air conditioner covers are rigid air covers that are designed to insulate through-the-wall air conditioners. The chill stopper air conditioner Covers seal out 100% of drafts, have a high R-value and also eliminate condensation. They attach easily from the inside without the need for duct tape, caulking or mess. These air conditioner covers fit most major brands of air conditioners and come with all necessary hardware. When choosing a size for your chill stopper air conditioner cover, it is important that you add 1" to the dimensions of the air conditioner unit after measuring to give you accurate measurements. The chill stopper air conditioner covers are made to order. Additional sizes are available.

Home Accessories & Air Quality

SIMPLYCONSERVE®

Simply Conserve® 7-Outlet Advanced Power Strip

The Simply Conserve advanced power strip (APS) allows users to reduce excess energy usage and trim utility bills by intelligently cutting off power to connected devices while they're not in use, eliminating phantom and standby power losses without ever unplugging the equipment. Load-sensing technology detects the current being drawn through the Master Outlet, which is plugged into a primary device like your TV or desktop computer. Then, peripheral devices like game consoles, DVD players or monitors are plugged into the Switched Outlets, which only become energized when a high current is detected in the Master Outlet, indicating the TV or desktop computer is powered on. Always-On Outlets provide power at all times, so they can be used for devices that need power constantly, like modems and cable boxes.
