Over engineered to out perform their purpose, Targus products exceed military standards of quality and assurance to ensure educational institutions uphold their own levels of safety and social responsibility.

# THE TARGUS RESPONSIBILITY HERE'S WHY.

We're pioneers of the laptop carry case category, having worked closely with schools, corporations and education resellers to constantly improve and evolve our product designs for over 40 years.

Targus cases are over engineered to include military standards with specifically selected materials, padding and fittings that are superior in longevity and durability compared to standard laptop cases.

We independently have our products drop and compression tested to provide unmatched protection, reduce student down time and alleviate the hassle of repairing or replacing devices.

## ENVIRONMENTALLY RESPONSIBLE

Targus is committed to conducting business in accordance with standards of business ethics, human rights, and applicable laws, and expect its vendors and manufacturing facilities to comply with our corporate values.

Targus Group only use reputable, law-abiding manufacturers with labour practices that meet our rigorous code of conduct standard.

We expect our suppliers to operate in a fair and ethical manner.

All Targus suppliers are required to comply with local environmental legislation, actively aiming to reduce waste and emissions.

## Doing more to impact less

## T.A.N.C.™ THE BEST PROTECTION

WITH 5 SHOCK ABSORBING LAYERS

- ❶ **Heavy-duty fabric:** Protects against wear and tear
- ❷ **Honeycomb shell:** Withstands up to 120kgs of pressure
- ❸ **Shock-absorbing foam:** Absorbs drop impacts
- ❹ **Padded foam:** Holds and cushions laptop
- ❺ **Durable lining:** For laptop scratch resistance

## STRENGTH TESTED

### COMPRESSION TESTED

Protects against school yard drops and pressures of up to 40kg\*\* caused by typical day to day student usage. T.A.N.C. can even hold up to 120kg\*\* fully distributed load, making it our most protective case yet.

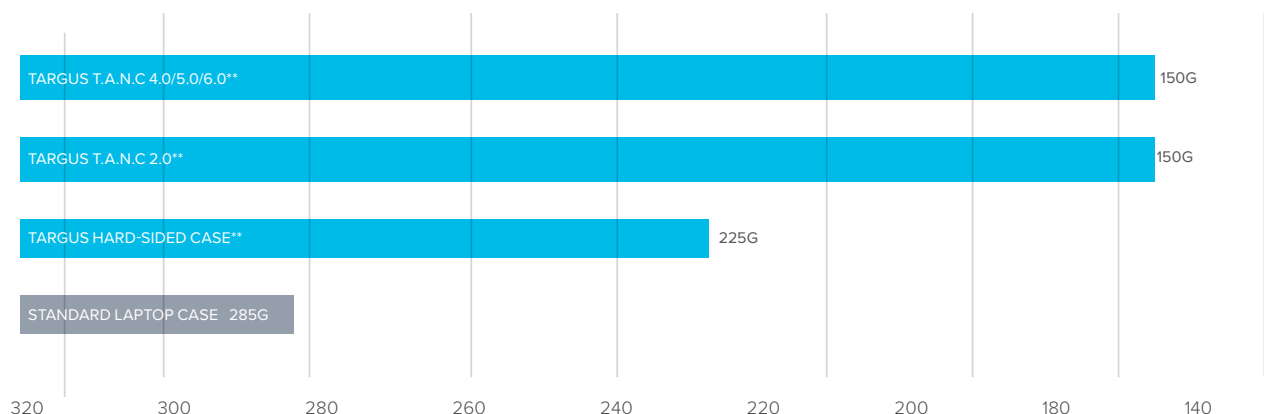

### DROP TESTED

At Targus we're so confident in the strength of our carry cases that we commissioned Access UTS Pty Ltd, wholly owned by University of Technology Sydney (UTS), to independently test our cases.

LOW PROTECTION

MAXIMUM PROTECTION

Drop tests were conducted using a tri-axial accelerometer inserted into the carry cases. Each case was subject to 3-5 drops (12 drops for T.A.N.C. 4.0/5.0/6.0) at the height of no less than 0.8 metres (the approximate height of a standard desk or carried with a strap over the shoulder) to measure their cushioning and protective performance. Responses were measured in "Gs" as a value of force, tabulated and averaged. The lower the G-force measurement, the better the protection.

\*\* Testing undertaken through Access UTS Pty Ltd, wholly owned by the University of Technology Sydney. All gs quotes are rounded values.
