Target Markets

Creative Professionals

Our hubs are essential for creatives to streamline workflows. With a variety of ports for connecting devices like cameras, monitors, and external hard drives.

Students & Educators

Connecting a range of modern and older peripherals, such as external monitors, printers, and storage devices.

Small & Midsize Businesses

Our user-friendly and pro-grade connectivity solutions provide future-proof tech for small businesses with minimal IT involvement.

Commitment to Quality and Safety

Hyper products undergo extensive testing to ensure they meet industry standards for quality, performance, and safety.

Our hubs and docking stations are certified for FCC, CE, and RoHS compliance by third-party labs, our power banks and chargers are certified for UL, CE, and PSE compliance.

Depending on the country and requirements, we will conduct additional testing to ensure that every Hyper product reliable, efficient, and safe to use.

Partnerships

Commitment to Innovation

Hyper has won many design awards and patents for its innovative designs and functionality.

What's Next for Hyper

eco/smart®

The EcoSmart line is made from recycled materials and is designed to reduce the environmental impact of the manufacturing process while still providing high-quality hubs, docks, and power solutions.

Hyper's packaging is eco-friendly and sustainable, as it is FSC certified and made from 100% recyclable materials with no plastics.

Additionally, the use of soy ink further reduces the environmental impact of the packaging, making it a responsible choice for consumers.

HyperDrive® Next

Hyper's commitment to developing future-proof products with cutting-edge specifications contributes to environmental sustainability.

This approach prolongs the relevance of their products, resulting in less electronic waste and allowing customers to benefit from high-quality products for an extended period.

ecovadis
Business Sustainability Ratings

We are committed to minimizing our waste generation and adhering to a roadmap, partnering with EcoVadis for reporting and certifications.

Currently, we are creating baselines for all our emissions and waste.

Target: Substantially reducing energy consumption and waste by 2025.
