**ÎLE-DE-FRANCE**

DISCOVER THE REGION THROUGH ITS 8 DEPARTMENTS

**HAUTS-DE-SEINE**  
EDITION

**ENGLISH VERSION**

# ÉDITORIAL

Students in the fourth year of Biotechnology and Chemistry at the CYTech engineering school in Cergy, we spent several months to realize our project: the creation of a series of magazines highlighting the cultural and tourist heritage of the Île-de-France region. In total, we created 8 magazines, each corresponding to a department of this region.

Aware of the challenges involved in discovering such a rich territory, we have undertaken this project to promote our region during our student mobility in Italy. The magazines "Don't miss anything about Île-de-France" have the objective of listing the must-see sites of each department, while highlighting lesser known but equally interesting places to explore. Of course, this selection is not exhaustive!

This edition focuses on the department of Hauts-de-Seine. As far as possible, **you will find the website of each place and its access on Google Maps by hovering over its title and address respectively.**

To find out more about the other departments of the region, we invite you to go to the last page of this magazine: you will find a list of all available magazines, as well as a link to our website and Instagram account.

*Enjoy your reading!*

# HAUTS-DE-SEINE

## HISTORY & GEOGRAPHY

In the Middle Ages, the present territory of the Hauts-de-Seine was part of the French royal domain and therefore included many villages and seigneurial domains. But in the 17th and 18th centuries, the proximity of Paris favored the development of aristocratic residences and country houses for the Parisian nobility. This led to the development of large estates, such as the castle of Saint-Cloud and the castle of Malmaison.

The blazon of the Hauts-de-Seine is "gone from azure to a golden lily flower, and gueule to a silver ship sailing; all summed up of a head of money charged with a first wave fascia".

Geographically, the department of Hauts-de-Seine, located west of Paris, is characterized by its geographical diversity and significant urbanization.

The department covers an area of about 176 km<sup>2</sup>, making it one of the smallest departments in France. It is composed of hills, valleys and plains crossed by the Seine.

Despite its strong urbanization, the department has many parks and green spaces, such as the park of Saint-Cloud, the park of Sceaux and the forest of Meudon. These offer places for relaxation and recreation and contribute to the quality of life in the department.

While visiting the park, you can also visit the Pavillon de l'Aurore, a small building located in a quiet part of the park and decorated with magnificent frescoes, but also the Tapis Vert, a wide grassy driveway offering an unobstructed view of the castle and its gardens.

The Saint-Cloud National Domain is an ideal place for walks, sports and picnics, but it is also very popular for its spectacular views of Paris and the Seine.

The house of Chateaubriand, a manor surrounded by romantic gardens, is today a museum dedicated to the author and his time.

The estate also houses an arboretum with a remarkable collection of over 500 species of trees and shrubs.

Each place in the domain has its own schedule. Check them [here](#).
