DEKTON

DEKTON® SLIM  
Designed by COSENTINO

# Dekton® Slim Protek

## Minimum 4 mm thickness 4 mm →←

Dekton® Slim Protek is the ultra-thin 4 mm thickness in large format that offers unlimited design options and incredible ease of installation and transport. Ideal for covering walls of bathrooms and kitchens, as well as all kinds of furniture. If the product needs mesh (Dekton Slim) due to technical necessity, please consult conditions with Cosentino Group.

## 01 → Large format and minimal joints

Its large format of up to 326x146 cm covers large surfaces, avoiding as much as possible the number of joints and therefore minimising cleaning.

## 02 → Easy installation

Having such a lightweight format, but with so many possibilities, simplifies everything. Its thin thickness allows for quick cutting and on-site adjustments with ceramic tile tools.

## 03 → Design with no limits

Dekton® Slim Protek is very easy to make and can be cut to size. It adapts to all spaces.

## 04 → Maximum resistance to humidity

Dekton® Slim Protek is the ultra moisture and stain resistant covering ideal for bathrooms. A high-performance product that requires no more maintenance than a simple damp cloth.
