WHAT'S NEW WITH KREG

At Kreg, it's always been our goal to create wood project solutions that make building fun and approachable for anyone. Many of us are woodworkers, with skill levels ranging from DIY newbies to seasoned pros. Our products are designed to fit your project needs, no matter who you are or how long you've been building. And this year we have a lot of exciting new offerings for you.

We're continuing to build on our legacy of pocket-hole joinery with the launch of our newest generation of pocket-hole jigs. You've never seen jigs like these before - they're sure to bring best-in-class speed, simplicity, and efficiency to your projects. I can't wait for you to discover your new favorite pocket-hole jig.

This year we're also introducing some new ways to solve your cutting challenges. Our latest guided cutting products will show you how easy it is to get straight, accurate, repeatable cuts using just a circular saw. And with these products, guided cutting is more versatile than ever - so you can cut down material exactly how you need it, wherever you build.

No matter what skill level you're at in your project building journey, Kreg will be there to guide you.

Todd Sommerfeld, President and CEO

POCKET-HOLE JIGS THAT MATCH YOUR PROJECT-BUILDING NEEDS

When your projects call for joinery that's fast, strong, and easy to execute, Kreg® has you covered. With our complete line of pocket-hole jigs, you can easily find one that matches your building style, your budget, and your needs.

POCKET-HOLE JIG 720PRO

€ 229.00

ITEM# KPHJ720PRO

The Pocket-Hole Jig 720PRO is the most advanced jig yet from Kreg® with features that make project building incredibly efficient. One-motion clamping with Automaxx™ automatically adjusts to the exact material thickness and clamps seamlessly.

Included with the 720PRO are the Kreg® Docking Station material support wings with a repeatable stop, as well as a Pocket-Hole Jig Clamp. Use the Pocket-Hole Jig Clamp to secure the jig to a workstation, while material support wings add support when drilling into large pieces. Best of all, the wings fold up and stow away easily when not in use. These premium additions provide more storage, more material support, and more stability.

With the Pocket-Hole Jig 720PRO, you get the Kreg Docking Station material support wings with a repeatable stop, a Pocket-Hole Jig Clamp, 160 Kreg pocket-hole screws, and a free project plan so you can start building right away.

INCLUDES

- Docking Station material support wings, repeatable stop, and Pocket-Hole Jig Clamp
- 160 Kreg® pocket-hole screws and project plan
- Easy-set drill bit and driver bits (76mm and 152mm)
- Material thickness gauge
- Dust collection attachment

BUILD POCKET-HOLE PROJECTS FASTER THAN EVER

FEATURES

GripMaxx™ anti-slip holds material in place for worry-free clamping

Multi-featured jig for creating pocket-hole joints in materials from 13-38mm thick

Material support wings add more storage and enhanced support for large pieces

720PRO also includes the Pocket-Hole Jig Clamp to secure the jig to a workstation

On-board storage keeps accessories close at hand

Dual-action clamping with Automaxx® automatically clamps and adjusts to the proper material thickness

POCKET-HOLE JIG 720

The Pocket-Hole Jig 720 was designed for efficient project building with advanced features like one-motion Automaxx™ clamping and automatic material thickness setting for pieces from 13-38mm thick. With the Pocket-Hole Jig 720, you get 60 Kreg pocket-hole screws and a free project plan so you can start building right away.

€ 187.00

ITEM# KPHJ720

INCLUDES

- 60 Kreg® pocket-hole screws and project plan
- Easy-set drill bit (152mm) and
- Driver bits (76mm and 152mm)

GripMaxx™ anti-slip holds material in place for worry-free clamping

POCKET-HOLE JIG 520PRO

€ 142.00

ITEM# KPHJ520PRO

The Pocket-Hole Jig 520PRO is the most versatile jig yet from Kreg® with features that adapt to different project-building needs. VersaGrip™ makes clamping intuitive – just squeeze the handle until the material is clamped securely. It also rotates 360° for convenient use of the jig in multiple orientations.

Preset material thickness settings make setup fast, and an adjustable stop offers repeatability when drilling pocket holes in multiple pieces of similar thickness.

The Pocket-Hole Jig 520PRO includes a 51mm face clamp, 100 Kreg pocket-hole screws, and a free project plan.

INCLUDES

- 50mm Kreg® clamp
- 100 Kreg® pocket-hole screws and project plan
- Easy-set drill bit and driver bit (152mm)
- Material thickness gauge

BUILD POCKET-HOLE PROJECTS ANYTIME, ANYWHERE

FEATURES

Versatile jig for creating pocket-hole joints in materials from 13mm to 38mm thick

GripMaxx™ anti-slip holds material in place to prevent shift while drilling

Intuitive clamping with VersaGrip™ and a 360°-rotating handle

Durable construction with steel-reinforced spine and lifetime drill guide warranty

Sets up fast with easy-to-use material thickness settings

Includes 51mm face clamp

DOCKING STATION

Expand the capability of the Kreg® Pocket-Hole Jig 520PRO with the Docking Station – complete with material support wings, added storage, and a Pocket-Hole Jig Clamp to secure the jig to a workstation. All these together create the ultimate benchtop joining station for the Pocket-Hole Jig 520PRO.

FEATURES

- Create a premium benchtop joining station by docking the 520PRO jig into the base
- Get enhanced support for long pieces with repositionable material support wings
- Material support wings also provide additional storage for your bits, screws, and more
- Adjustable Stop adds repeatability and speed to pocket-hole positioning
- Includes the Pocket-Hole Jig Clamp to secure your jig to a work surface
- Also works with Pocket-Hole Jig 720
- Material support wings fold up when not in use

INCLUDES

- Material Support Wings
- Adjustable Stop
- Pocket-Hole Jig Clamp (KPHA760)
- Dock Connection Adapters for KPHJ720
- Base Connection for KPHJ520PRO

POCKET-HOLE JIG 320

€ 58.00

ITEM # KPHJ320-INT

The Kreg® Pocket-Hole Jig 320 makes it easier than ever to build wood projects — whether you're building your first DIY project, or you've been working with wood for years. The Pocket-Hole Jig 320 uses a simple, easy-to-understand setup process that gives you the versatility you need to build with boards and plywood of any thickness between ½" and 1½". The 320 features two drill guides, a removable spacer, and convenient material-thickness stops.

The included material thickness gauge and easy-set drill bit make setup simple, while the convenient clamp adapter and anti-slip base hold the jig precisely in position while you drill perfectly positioned pocket holes every time. The jig and its included components store in a durable, compact case that even has space to store Kreg Pocket-Hole Screws—with 40 sample screws included. Durable construction and hardened-steel guides with a lifetime warranty ensure that the Kreg Pocket-Hole Jig 320 will deliver the years of project-building and home-repair satisfaction and value you expect from the #1 pocket-hole brand—Kreg®.

SPECS:

- Works with materials from ½" to 1½" (13-38mm)-thick; adjustable stops at ½", ¾", 1½" (12, 19, 38mm)
- Two ⅜" (9mm) diameter Drill Guides
- ¾", 1½" (19mm, 38mm), pocket-hole spacing, unlimited when guides separated
- Compatible with 300-Series accessories

INCLUDES:

- | | |
|--|--------------------------------|
| (2) Drill Guides with Material Thickness Stops | (1) Thickness Gauge/Hex Wrench |
| (1) Drill Guide Spacer | (1) 6" Square-Drive Bit |
| (1) Clamp Adapter | (1) Carrying Case |
| (1) Easy-Set Drill Bit and Stop Collar | (40) Sample Screws |

THE COMPLETE POCKET-HOLE KIT FOR BUILDING DIY WOOD PROJECTS

FEATURES:

TWIST-APART DESIGN
Drill Guides and Spacer twist and lock to make it easy to set pocket-hole spacing.

EASY-SET DRILL BIT
Engraved bit markings and stop collar with sight window make bit setup simple.

CLAMP ADAPTER
Convenient attachment for simple and quick clamping using Kreg® and other clamps.

POCKET-HOLE JIG MICRO

NEW

€ 58.00

ITEM# KPHJ230-INT

Creates a 33% smaller pocket hole for strong joints in drawer boxes, mitered corners, and more

Like our other micro drill guides and accessories, the Kreg Pocket-Hole Jig Micro creates a 33% smaller pocket hole. These smaller pocket holes are perfect for working with thin and narrow stock when building drawer boxes, working on smaller craft projects, or for making repairs. This new stand-alone jig is easy to use, and like our other 300-series jigs is incredibly versatile. With a twist-apart design for thickness settings of 12 mm and 19 mm, easy-set drill bit, and hardened steel drill guides, this is the perfect solution when working with thin and narrow stock.

The included material thickness gauge and easy-set drill bit make setup simple, and the GripMaxx™ anti-slip base holds the jig precisely in position while you drill perfectly positioned pocket holes every time. Durable construction and a lifetime drill-guide warranty ensure that the Kreg Pocket-Hole Jig Micro will deliver the years of project-building and home-repair satisfaction you expect from the #1 pocket-hole brand - Kreg.

INCLUDES

- (3) Drill Guides with Material Thickness Stops
- (1) Easy-Set Drill Bit and Stop Collar
- (1) Material Thickness Gauge/Hex Wrench
- (1) Universal Clamp Adapter
- (1) Driver Bit

300-SERIES ACCESSORIES

POCKET-HOLE JIG EXPANSION PACK ITEM# KPHA110-INT

Expand the capability of your Pocket-Hole Jig 310 or 320 by adding another drill guide to drill more holes, plus a spacer that adds more hole-spacing options. The Pocket-Hole Jig Expansion Pack includes one hardened-steel drill guide with convenient material-thickness stops, so you can add a second guide to your Pocket-Hole Jig 310, or add a third to the Pocket-Hole Jig 320. This kit also includes a Pocket-Hole Jig Spacer that provides more pocket-hole spacing options.

€ 30.00

EASY-SET POCKET-HOLE DRILL BIT ITEM# KPHA300

The Easy-Set Pocket-Hole Drill Bit is the same $\frac{3}{8}$ "-diameter stepped bit that comes with Kreg® 300-Series Pocket-Hole Jigs. If you have a worn bit, or if you want to add another bit to your pocket-hole tool collection, this is the perfect choice. This bit works with materials from $\frac{1}{2}$ " to $1\frac{1}{2}$ " thick, and features engraved markings for $\frac{1}{2}$ ", $\frac{3}{4}$ ", and $1\frac{1}{2}$ " materials to match up with the Easy-Set Stop Collar. A $\frac{1}{4}$ " hex shank fits standard quick-change chucks. Compatible with all Kreg Pocket-Hole Jigs.

€ 23.00

EASY-SET POCKET-HOLE DRILL BIT WITH STOP COLLAR & GAUGE/HEX WRENCH ITEM# KPHA308-INT

Add a second bit to your 300-Series Pocket-Hole Jig, or update any Kreg Jig to make working with boards and plywood even easier. This bit works with materials from $\frac{1}{2}$ " to $1\frac{1}{2}$ " thick, and has markings for $\frac{1}{2}$ ", $\frac{3}{4}$ ", and $1\frac{1}{2}$ ", to match the Easy-Set Stop Collar. Material Thickness Gauge allows you to easily measure materials. A $\frac{1}{4}$ " hex shank fits standard quick-change chucks. Compatible with all Kreg Pocket-Hole Jigs.

€ 21.80

POCKET-HOLE JIG SPACERS ITEM# KPHA120

Expand the capability of your Pocket-Hole Jig 320 by adding more hole-spacing options. This kit includes two Pocket-Hole Jig Spacers that fit between the drill guides, so you can easily increase the spacing between holes by $\frac{3}{4}$ " increments to match your project needs. The spacers fit in place beside the drill guides, or beside another spacer, and lock into place with a simple twist.

€ 15.70

UNIVERSAL CLAMP ADAPTER ITEM# KPHA150

Make it even easier to hold your 300-Series Pocket-Hole Jig in position as you work using the Universal Clamp Adapter. The Universal Clamp Adapter fits into the drill guide and accepts any Kreg Clamp, as well as most trigger-action clamps. The adapter locks onto the clamp, so the jig is held securely, and you can move and position the jig using just one hand.

€ 7.90

FOREMAN

ITEM# DB210-EUR

€ 530.00

The Foreman Pocket-Hole Machine offers all of the features and capabilities of our professional-grade machines in a tool that's versatile, portable, and extremely affordable. From contractors and cabinet shops to dedicated hobbyists, the Foreman DB210 is perfect for anyone who is serious about pocket-hole joinery. In no time, you will be building with twice the speed and half the effort of a standard pocket-hole jig.

With the Foreman, just squeeze the trigger and pull the handle to start the motor, clamp your workpiece, and drill a perfect pocket hole. The adjustable fence positions the workpiece for precise pocket-hole depth, and adjustable stops provide repeatable accuracy. Built-in dust collection minimizes the mess and speeds the drilling process.

A 120-volt motor enables fast drilling, and a quick-change chuck allows for fast, tool-free bit changes. Plus, the Foreman creates all three types of Kreg® pocket holes: Standard, Micro-Pocket™, and HD (Heavy-Duty). Micro and HD bits and bushings sold separately.

INCLUDES

- (1) Foreman Pocket-Hole Machine
- (1) Adjustable Fence with Spring-Loaded Stop
- (1) Dust-Collection Attachment
- (1) Kreg Stepped Pocket-Hole Bit
- (1) Drill Bit Setting Block
- (1) Hardened-Steel Drill-Bit Guide
- (1) Owner's Manual

DECK JIG™

ITEM# KJDECKSYS20

€ 74.00

With the Kreg® Deck Jig™ and a few simple tools you already own, you can create a beautiful, functional deck surface that is completely free of exposed fasteners and painful splinters. Concealed-decking systems utilize awkward steel fasteners or thin plastic clips to hold your deck boards in place. The Deck Jig™ utilizes a more straightforward approach, creating an incredibly strong wood-to-wood bond through precisely-placed self-tapping screws.

INCLUDES:

- (1) Deck Jig™
- (1) 6" (152mm) Deck Jig™ Drill Bit
- (1) 6" (152mm) KTX Square-Drive Bit
- (3) ¼" (6mm) Deck Jig Spacer Rings
- (2) Stop Collars
- (1) Hex Wrench

SPECS:

- Spacers set distance between deck boards for consistent spacing
- Standard deck screws work with 4/4 to 5/4 (¾" to 1½") stock
- 2½" deck screws are required for use with 2x material, including 2x4s, 2x6s, 2x8s, etc.

WATCH VIDEO

FUNCTIONAL

An oversized, ergonomic, easy-grip handle gives you a secure hold and complete control over each and every hole you drill.

PRECISE

Three hardened-steel Kreg® drill guides keep the specialized stepped drill bit and driver bit at the precise, optimal angle.

ACCURATE

Six handy spacer rings – three ¼" (6mm) and three ⅝" (8mm) – ensure accurate deck board spacing for proper drainage and a longer deck life.

KREG DRILL BITS

EASY-SET POCKET-HOLE DRILL BIT ITEM# KPHA300

This bit features engraved markings for 1/2", 3/4", and 1 1/2" materials to match up with the Easy-Set Stop Collar. A 1/4" hex shank fits all standard quick-change chucks. Compatible with all Kreg Pocket-Hole Jigs.

DRILL BITS

Kreg® drill bits feature a one-piece design that eliminates clogging and provides a much smoother, faster drilling stroke than the drill bits with replaceable center drills. The Easy-Set Bit for our manual Pocket-Hole Jigs is made of high-speed steel, while the DKDB Machine bit is made of cobalt-steel to increase bit life. Because the DKDB Bit is 3/8" (10mm) in diameter, it can be used in any manual Kreg Jig® as a premium replacement. Be sure to order the left-handed drill bit (LH-DKDB) for the center spindle of the DK3100 fully-automatic machine.

DRIVERS

Kreg square-drive bits have deep tips that greatly reduce cam-out when driving screws. #2 drivers (for all except HD screws) come in 3" (76mm) and 6" (152mm) lengths. The 6" length is easiest to use in most applications, while the 3" is perfect for working in tight spots. The #3 HD (Heavy Duty) driver comes in 6" length only.

#DDS-INT 3" (76mm) & 6" (152mm) Driver Set	€ 6.30
#D6X2 Two 6" (152mm), #2 Square Driver Set	€ 8.80

CHOOSING THE RIGHT SCREW LENGTH

Selecting the correct screw length is easy, and is based on the thickness of your material. Use this handy chart as a guide to select the correct screw when joining like-sized workpieces.

KREG SCREW
SELECTOR TOOL

Material Thickness	13mm*		16mm	19mm	22mm	25mm	29mm	32mm	35mm	38mm
Kreg Screw Length	19mm*	25mm*	25mm*	32mm*	38mm*	38mm*	38mm*	51mm*	51mm*	64mm*

SELECTING SCREWS FOR 13MM THICK MATERIAL

Pan-Headed pocket-hole screws are recommended for all 13mm thick materials.

When using the optional Micro-Pocket Drill Guide with 13mm thick material, select 19mm Pan-Headed screws.

When using the standard Kreg Jig Drill Guide with 13mm thick material, select 25mm Pan-Head screws.

KREG SCREWS

These new Kreg® Screw containers feature labels that make it easy to select the correct screw for every Kreg Joinery™ application. Screw size, thread type, head type, screw material, and recommended usage are clearly shown with bold graphics and color-coding that are easy to recognize and understand.

As always, Kreg Screws are packaged in containers that offer extra value because they're durable, resealable, stackable, and even reusable.

The new Kreg Screw containers make it easier than ever to merchandise Kreg Screws as the premium, specialty products that they are. Customers are sure to appreciate the variety of screw sizes, package quantities, and the reusable design of the new containers. For more information, contact Kreg or your Kreg Representative.

HOW TO READ THE KREG SCREW BOX

(A) Suggested Usage: Indicates appropriate wood types

(B) Screw Size: Shows correct length

(C) Thread Type: ● for coarse, ● for fine

(D) Composition: Indicates suitable environments

(E) Images: Provides easy visual reference

(F) Screw Count: Shows quantity contained

YOUR KREG® PROJECTS DEMAND KREG® SCREWS

Kreg® screws are built with specialized features that work together to ensure the strongest joint possible. They also make driving easy and help to reduce wood splitting. Choosing Kreg® Screws will give you the best results possible. To get these great results, you need to choose the best Kreg screw for your particular project. Choosing the right screw is easy once you understand the features of each screw type and how these features will impact the success of your project. Learn more about how to select the correct Kreg Screw for your project at www.kregtool.com/kregscrows.

KREG SCREW SELECTOR TOOL

Our stainless screws are specially designed for high-moisture applications, excessive exposure to water, and other exceedingly corrosive environments, such as pressure-treated lumber.

Item#	Thread	Length	Head Style	Qty.	Diameter
SML-C125S5	Coarse	1 1/4" (32mm)	Maxi-Loc™	100	#8
SML-C150S5	Coarse	1 1/2" (38mm)	Maxi-Loc™	100	#8

SCREW SELECTOR WHEEL

€ 15.00

The Screw Selector Wheel makes it easier than ever to build projects with Kreg Joinery™. Just dial in the thickness of each piece to be joined—whether those thicknesses are the same or different—and the Wheel shows you the correct screw length and Kreg Jig® setting.

ITEM# SSW

FEATURES:

- Two-sided: shows face joints and edge joints
- Works with 1/2", 5/8", 3/4", 7/8", 1", 1 1/8", 1 1/4", 1 3/8", 1 1/2" (13mm, 16mm, 19mm, 22mm, 25mm, 28mm, 31mm, 35mm, 38mm) material
- Compatible with all Kreg® Pocket-Hole Jigs
- Durable .5mm polypropylene construction
- Tab with hole makes wheel easy to hang

CUTTING SOLUTIONS

CIRCULAR SAW CUTTING ***22-28***

MITER SAW CUTTING ***29-30***

BAND SAW CUTTING ***32***

QUALITY PROJECTS START WITH QUALITY CUTS

Kreg® cutting solutions make it easy to get the straight, accurate cuts you need to create quality projects. They transform your circular saw, miter saw, band saw, table saw, or jigsaw into a precision cutting tool that delivers accurate, repeatable results every time.

CROSSCUT STATION

€ 72.00

ITEM# KMA4100

The Crosscut Station delivers the capabilities of a miter saw with just a circular saw. Crosscut boards wider than most compound miter saws can handle (up to 305mm at 90°). Make a variety of angle and miter cuts from 0° to 45° with the Adjustable Fence.

An MDF base and SureCut™ backboard act as a sacrificial surface for splinter-free cutting results. The MDF base also functions as a kerf line to clearly show the blade's path.

Use material support wings and the detachable blocks to cut long boards safely by supporting offcuts. They pull out easily when more support is needed, and tuck back in when not in use. The Crosscut Station is quick to set up and easy to store away. Its compact design even makes it portable for accurate crosscuts and angle cuts on the go.

HIGH-PERFORMANCE

INCLUDES

- Crosscut Station with Guide Rails
- Built-in Material Hold-Down Clamps
- Adjustable Fence

WATCH VIDEO

Crosscut up to 305mm wide and make a variety of miter cuts from 0° to 45°

FEATURES

MDF base and backboard act as sacrificial surface for splinter-free cutting

Material support wings with detachable blocks add material support for long pieces

A kerf line you cut into the MDF base shows exactly where your saw will cut

Works with left- or right-blade circular saws

PORTABLE CROSSCUT

€ 34.00

ITEM# KMA4000

The Portable Crosscut allows you to quickly and precisely crosscut boards up to 203mm wide and make accurate cuts at a 45° angle using just a circular saw. See exactly where the saw will cut every time thanks to the retractable cutline indicators. Simply align them to a pencil mark and cut with confidence.

The saw support ledge starts off every cut with stability and precision, while GripMaxx™ holds the guide steady throughout the entire cut. It's all part of the guided cutting advantage that delivers high-quality cuts using only a guide and a circular saw. With the Portable Crosscut, set up cuts in no time and get to work

WATCH VIDEO

ADD SPEED AND ACCURACY TO YOUR CIRCULAR SAW

Quickly and accurately crosscut up to 203mm wide

Also makes precise 45° cuts

Take the guide anywhere your projects take you

Cutline indicators show exactly where your saw will cut

STRAIGHT EDGE GUIDE

Cut sheet goods down to size with precision and ease by using the Kreg® Straight Edge Guide. Work with material up to 121cm and get the cuts you need – using a circular saw, jigsaw, or even a trim router. Guided cutting makes it easier than ever to see exactly where the saw will cut to deliver accurate results every time.

Align cuts quickly and precisely with the cutline indicators. Secure the guide to the material using low-profile GripMaxx™ clamps that are built right into the guide. Then simply make a cut.

Aluminum guide rail leads cuts precisely along a straight line

Works with left- and right-blade circular saws, as well as jigsaws and trim routers

€ 69.00

ITEM# KMA4500

INCLUDES

- (2) 711mm Guide Rails
- (2) Paired Connector Bars
- (2) Cutline Indicator Arms
- Adjustable GripMaxx™ Clamp Handle

STRAIGHT EDGE GUIDE XL

Cut full sheets of plywood down to size with precision and ease by using the Kreg® Straight Edge Guide XL. Work with material up to 8 feet using a circular saw, jigsaw, or even a trim router. Guided cutting makes it easier than ever to see exactly where the saw will cut to deliver accurate results every time.

Aluminum guide rail leads cuts precisely along a straight line

Crosscut and rip cut material up to 8 feet

INCLUDES

- (2) 711mm Guide Rails
- (2) 610mm Guide Rails
- (6) Paired Connector Bars

€ 144.00

ITEM# KMA4700

WATCH VIDEO

- (2) Cutline Indicator Arms
- Adjustable GripMaxx™ Clamp Handle

STRAIGHT EDGE GUIDE EXTENSION

Add two extra feet to the Kreg® Straight Edge Guide to make even longer cuts in sheet goods with most circular saws, jigsaws, and trim routers.

INCLUDES

- 610mm Guide Rail
- (2) Paired Connector Bars

€ 40.00

ITEM# KMA4600

Add 610mm to your Straight Edge Guide to crosscut and rip cut sheet goods

ACCUCUT™

The Accu-Cut™ allows you to make straight, accurate, splinter-free cuts with your circular saw. It rips and crosscuts up to 50" long in plywood, MDF, and panels with amazing control. The Accu-Cut guides your circular saw along an aluminum track that keeps the saw moving in a straight line, and it makes setup easy by just aligning the track with your cut line. Anti-Chip and Anti-Slip Guide Strips hold the track in place without clamps, and support the wood fibers to prevent splintered cuts.

Simply mount your saw to the Universal Sled—it accepts most left-blade or right-blade saws. Set the sled on the track, and you're ready to cut. Because the Accu-Cut™ is portable, you can take your saw to the workpiece and cut with precision, rather than having to handle heavy sheets on a table saw. Optional Track Clamps can be used with slick materials such as melamine or pre-finished plywood.

Take your projects to the next level with more precision from your circular saw than you ever thought possible.

€ 125.00

ITEM# KMA2700

INCLUDES:

- (1) Universal Saw Sled
- (1) Starting Block
- (2) 26.5" Aluminum Track Sections
- (2) Aluminum Connectors with Set Screws
- (4) Anti-Chip and Anti-Slip Guide Strips
- (1) Owner's Manual

SPECS:

- Aluminum & impact-resistant polymer construction
- Anti-Chip, Anti-Slip
- Guide Strips
- Universal Saw accepts left- and right-blade saws
- Starting Block aligns saw at start of cut
- Cut length up to 50"

A Starting Block in the Accu-Cut™ track aligns and supports your saw to ensure that you can start every cut accurately. Plus, the Starting Block allows normal blade-guard operation to ensure safety as you start each cut, and helps guide the saw cord while cutting.

The Accu-Cut™ sled attaches easily to your circular saw, and accepts most left- or right-blade saws. A stop ensures repeatable alignment, so you can remove the saw from the sled for freehand cutting, and then reinstall it on the sled quickly and easily. This sled also works with the Rip-Cut™.

Eliminate the guesswork by simply aligning the track with your reference marks. Guide Strips on each edge of the Accu-Cut™ show you exactly where your saw will cut, so you can make every cut with confidence.

The track stays in place on your marks thanks to an anti-slip, anti-chip surface on the underside of the Guide Track, so no clamps are needed for most cuts. Optional clamps (below) are available for use on materials with a slick surface, melamine or pre-finished plywood.

WATCH VIDEO

ACCESSORIES:

Accu-Cut™ Replacement Guide Strips

Replace the original strips on your Accu-Cut™ if they ever get damaged or worn, or you switch to a different circular saw that requires a different setup. Includes two Guide Strips (enough for one side of the track) with peel-and-stick adhesive, plus installation instructions.

ITEM# KMA2699

€ 16.50

Track Clamps

Track Clamps attach to the underside of the Accu-Cut™ Track and Starting Block to offer additional holding power when needed—such as with slick-surfaced sheet goods like melamine or pre-finished plywood, or when cutting with a single length of track. Sold as a pair, hardware included.

ITEM# KMS7520

€ 32.70

ACCU-CUT™ XL

ITEM# KMA3700

€ 250.00

Transform your circular saw into a high-performance track-guided cutting tool for breaking down full sheets of plywood. Set your projects up for success by making straight, accurate, splinter-free cuts with the Accu-Cut™ XL Circular Saw Track Guide. It rips and crosscuts up to 100" long in plywood, MDF, and other large panels with accuracy and control.

The Accu-Cut™ XL guides your circular saw along an extended-length aluminum track that holds the saw steady and keeps your cuts straight. The track guide is designed for simplicity: just mount your saw to the Universal Sled, align the Accu-Cut XL track to the cut line, and make the high-quality cuts you need. The Anti-Chip Guide Strips prevent splintering and tearout through the entire length your cut. The same strips also feature an Anti-Slip surface that holds the track in place without clamps.

INCLUDES:

- (1) Universal Saw Sled
- (1) Starting Block
- (4) 26.5" Aluminum Track Sections
- (6) Steel Track Connectors with Set Screws
- (8) Anti-Chip and Anti-Slip Guide Strips
- (1) Owner's Manual

HIGH-PERFORMANCE TRACK-GUIDED CUTTING

SPECS:

- Aluminum & impact-resistant polymer construction
- Anti-Chip, Anti-Slip Guide Strips
- Universal Saw accepts left- & right-blade saws
- Starting Block aligns saw at start of cut
- Cut length up to 100"

The Accu-Cut™ XL turns your circular saw into a precision cutting tool to make straight, accurate, splinter-free cuts. The extended-length track allows cuts up to 100" long in panels and plywood. The track is lined with Anti-Chip, Anti-Slip Guide Strips that prevent splintering and tearout while holding the track in place without clamps.

FEATURES:

CAPABLE

Extended-length track breaks down plywood and panels up to 100" long.

ACCURATE

Make straight, accurate cuts with repeatable track-guided precision for perfect results.

PORTABLE

You can take your saw to the workplace to make accurate cuts anywhere.

PRECISE

Anti-Chip, Anti-Slip Guide Strips protect cuts from tearout and hold track in place.

ACCU-CUT™ EXPANSION PACK

ITEM# KMA2750

Double the cutting capacity of your Accu-Cut™ with the Accu-Cut Expansion Pack. It connects easily to your Accu-Cut to deliver the same straight, accurate, splinter-free performance on cuts up to 100" long.

INCLUDES:

- (2) 26.5" Aluminum Track Sections
- (6) Steel Track Connectors with Set Screws
- (8) Anti-Chip & Anti-Slip Guide Strips
- (1) Owner's Manual

€ 148.00

The Rip-Cut™ turns your circular saw into a precision edge-guided cutting tool that makes straight, accurate, repeatable cuts in plywood and other large sheets. With the Rip-Cut™, you don't have to measure, mark, or struggle to keep the saw on the cut line, thanks to a long edge guide that follows the edge of the sheet you are cutting. Just lock the saw in at the measurement you want—up to 24" (610 mm)—using the built-in measuring scale, and then make your cut.

Simply mount your saw to the Universal Sled—it accepts most left- or right-blade saws—and then slide the sled onto the aluminum rail. The edge guide is reversible for use whether you're left- or right-handed. The Rip-Cut™ is an easy, accurate, and affordable way to cut plywood and sheets down to size.

Make cuts wherever you want to by taking your saw to the workpiece rather than taking your workpiece to the saw.

WATCH VIDEO

INCLUDES:

- (1) Universal Saw Sled
- (1) Aluminum Guide Rail
- (1) Precision Edge Guide
- (1) Owner's Manual

SPECS:

- Aluminum & impact-resistant polymer construction
- Guide Rail locks in the measurement on a built-in scale
- Accepts left- & right-blade saws
- Has built-in index stop & precision cursor
- Cut width up to 24"

No measuring or marking required thanks to a built-in measuring scale and precision cursor. Just lock in your cut size, and go.

Make quick, accurate adjustments by simply sliding the saw sled along the rail, and then locking it down. No tools necessary. The sled also works with the Accu-Cut™.

Easy repeatability lets you make multiple parts of the same size, and eliminate errors caused by incorrectly sized parts.

Straight cuts are easy thanks to an oversize edge guide with a hand-hold that provides control through the entire cut by following the edge of your sheet.

PRECISION TRAK & STOP KIT

ITEM# KMS8000M

€ 227.00

Take the guesswork—and your tape measure and pencil—out of cutting wood to length. Our Precision Trak and Stop Kit allows you to turn a miter saw into a precise cutting system. Simply position the stop at the dimensions you'd like to cut using the Precision Lens Cursor, place the board against the stop, and cut to that exact length every time. You build the support wings out of plywood (or another sheet material), and then add the Trak. The 2' (610mm) long Trak sections give you options. Includes four 2' (610mm) long sections that can be used on the right or left side of the saw, or split between both sides. Outfitting your saw to cut perfectly-sized workpieces couldn't be simpler!

INCLUDES:

- (4) 2' pieces of Trak
- (1) Swing Stop™
- (1) Production Stop
- (1) 12' length of left-to-right reading self-adhesive tape
- (1) 12' length of right-to-left reading self-adhesive tape
- (1) Owner's Manual
- (1) Mounting Hardware

SPECS:

- Anodized aluminum construction
- Can be configured in multiple ways
- Precision left-to-right and right-to-left measuring rules
- Swing Stop™ and Production Stop ensure accuracy, repeatability
- Detailed instructions show how to build a platform to fit your saw

WATCH VIDEO

Position all 8 feet (2440mm) of Trak on one side.

Center your saw with 4 feet (1220mm) of Trak on each side.

Place 6 feet (1830mm) of Trak on one side and 2 feet (610mm) on the other side.

PERFECT FOR A WIDE VARIETY OF APPLICATIONS

The most common setup for the Precision Trak & Stop Kit is with a miter saw. But, many people find it useful to add to their radial arm saw or drill press. No matter where you use the Precision Trak & Stop Kit, you'll find it far more accurate and much quicker than a tape measure and pencil.

PRODUCTION STOP #KMS7800

Designed to stand up to the rigors of repetitive cuts in an industrial environment, the Production Stop mounts onto the top of the fence and features dual lens cursors for convenient use on either side of the blade.

SWING STOP™ #KMS7801

The Swing Stop™ features bushings that reduce "play" in the stop to increase accuracy. The stop sets the distance between the end of the board and the blade for accuracy and repeatability, and flips out of the way when not in use.

RIGID ALUMINUM FENCE

The anodized aluminum Trak features an L-shaped foot that makes alignment and mounting to any 3/4" (19mm) thick board a snap. Trak is designed with a groove across the top to accept the included self-adhesive measuring tape.

SIMPLE SUPPORT WINGS

Build simple plywood or MDF extensions to match the height of your saw, and then add a back fence that reaches 2 1/4" (57mm) above the saw height. Instructions for building the wings and mounting hardware for the Trak are included.

PRECISION STOPS

PRODUCTION STOP ITEM# KMS7800 € 43.00

This heavy-duty, highly accurate stop is built for rugged use. Dual lens cursors allow for use on either side of the blade. The Production Stop fits on top of the Top Trak and Heavy-Duty Trak. Can be removed and repositioned easily.

SWING STOP™ ITEM# KMS7801 € 57.00

Add repeatable accuracy to your miter saw, band saw, or table saw fence with this versatile Swing Stop™. It holds your desired measurement precisely, and swings out of the way easily when you want to cut without it.

TRAK COMPONENTS

JIG AND FIXTURE BAR € 46.00

This durable bar fits standard 3/4" x 3/8" miter slots. Eight nylon screws along the length of the bar adjust to take up any play in the slot. Mounting holes are located every 5" (127mm) along the length of the bar. Perfect for building workshop jigs and fixtures.

#KMS7303 Jig and Fixture Bar (762mm)

HEAVY-DUTY TRAK € 142.00

Our Heavy-Duty Trak is an L-shaped, anodized-aluminum extrusion that is extremely straight and perfect for heavy-duty commercial applications. Contains four T-slots that accommodate the head of a standard 1/4" (6mm) bolt.

#KMS7704 Heavy-Duty Trak (1219mm)

COMBO-TRAK € 76.00

Building your own router table? This combination Miter-Trak and Mini-Trak works with your miter gauge, featherboards, and other accessories to add flexibility to your table top.

#KMS7448 Combo-Trak (1219mm)

TOP TRAK € 250.00

This track features a self-aligning L-shaped mounting foot for easy installation to a shop-made fence. Just drill 1/8" (3mm) holes through the back of the extrusion and secure with the included mounting screws.

#KMS7712 Top Trak (610mm) € 43.30
#KMS7714 Top Trak (1219mm) € 66.40

TRACK CLAMPS € 32.70

Track Clamps have a T-bolt that fits the Accu-Cut™, Adaptive Cutting System 62" Guide Track, Mini Trak, Top Trak, HD Trak, Clamp Trak, and Mobile Project Center. Great for making jigs and fixtures. Sold as a pair, hardware included.

#KMS7520 Track Clamps

MINI TRAK 48" (1219mm) € 57.30

Mini Trak can be used to produce countless types of woodshop jigs and fixtures such as taper jigs and cut-off sleds. An adaptation of our other popular styles of Trak, Mini Trak features a T-slot that captures the head of a standard 1/4" (6mm) hex bolt.

#KMS7509 Mini-Trak (1219mm)

PRECISION MITER GAUGE

Why spend your time calibrating a miter gauge when you can get factory-calibrated accuracy right out of the box? Our Precision Miter Gauge requires no calibrating, and features positive stops at 0°, 10°, 22½°, 30° and 45°, making it easy to cut miters quickly.

When you want to cut at a different angle, the super-accurate, easy-to-use Vernier scale allows for fast adjustments to 1/10th of a degree.

You can choose the Precision Miter Gauge, or the Precision Miter Gauge System, which includes a 24" (610mm) fence and a Swing Stop™ (see Buying Options below).

SPECS:

- Fence: 24", anodized aluminum construction
- Guide bar: 26" long, 3/8" thick by 3/4" wide
- Positive stops at: 0°, 10°, 22½°, 30° & 45°
- Factory calibrated

Vernier Scale adjusts to 1/10th of a degree.

PERFECT MITERS, FAST!

Precision is the name of the game for this CNC-milled miter gauge. We build accuracy into every feature of this product from the adjustable miter bar to the easy-to-use, incredibly accurate Vernier scale. With all of its great features, this miter gauge will give you better, more accurate cuts to ensure project success.

FEATURES:

PRECISION LENS CURSOR

Similar to the type of lens found on a quality table saw rip fence, the clear lens features a high-visibility red line that makes it easy to set the Swing Stop™ for precise cuts, time after time.

NO PLAY IN MITER SLOT

Our extremely straight 24" (610mm) anodized-aluminum bar is 3/8" (9.5mm) thick by 3/4" (19mm) wide and features five bar adjusters that eliminate "play" in the miter slot.

MULTIFUNCTION SWING STOP™

Adds repeatable accuracy to your Miter-Gauge Fence. This versatile Swing Stop™ holds your desired measurement precisely, and swings out of the way easily when you want to cut without it.

ITEM# KMS7101

PRECISION MITER GAUGE

Precision Miter Gauge only.

PRECISION MITER GAUGE SYSTEM

Precision Miter Gauge, 24" (610mm) aluminum fence, and Swing Stop™.

€ 240.00

ITEM# KMS7102

PRECISION BAND SAW FENCE

ITEM# KMS7200

€ 258.00

Most band saw blades don't run perfectly perpendicular to the front of your table. There's always just a little bit of "drift" that prevents you from getting precise cuts, even with a fence. The Precision Band Saw Fence easily adjusts to your blade's drift angle to provide you with a new level of band saw accuracy. This fence mounts to most 14" (355mm) band saws right out of the box, and can be modified to fit many others by drilling a single hole in the aluminum mounting rail.

SPECS:

- Anodized aluminum construction
- Precision lens cursor for accurate cuts
- Mounting rail: 26" long
- Easy adjustments for squareness to the table and for blade drift
- Fence: 18" long
- Pre-drilled holes fit most 14" band saws

EXACT ALIGNMENT

Set the fence exactly square with your table surface, and adjust the angle to compensate for blade drift easily with set screws that adjust simply and hold securely for dependable results.

EASY TO REMOVE

Remove the fence in seconds, with no tools required! Just loosen the locking knob and lift the fence from the mounting rail. The rail sits out of the way below the table surface.

RIGID DESIGN

The aluminum fence is incredibly strong, straight, and built to last for years. The face and top edge of the fence contain T-slots for adding stops, resaw guides, and more.

TWO-POSITION FENCE

Quickly and easily switch from a tall fence to a low fence for cutting thin pieces without throwing off squareness or blade drift settings. The switch back just as easily.

PRECISION LENS CURSOR

Magnified and easy-to-read for even the smallest adjustments, the Precision Lens Cursor lets you accurately set up the fence for cutting veneer, tenons, and more.

ACCEPTS A STOP

Add a Swing Stop™ or a Production Stop to the fence to simplify making accurate, repeatable cuts to a set depth, such as when cutting tenons.

ACCESSORIES:

4.5" Resaw Guide
(114mm)
Adjust for blade drift as you resaw.

CLAMP TABLE & COMPONENTS 42

THE HELPING HAND YOU NEED TO MAKE PROJECT BUILDING EASIER

Kreg Clamping Solutions provide versatile, powerful ways to hold your projects whether you are cutting, joining, sanding, or assembling.

Available in a variety of styles and sizes to suit your needs, most feature Automaxx® Auto-Adjust Technology that adjusts the clamps automatically to match the material you need to hold.

AUTOMAXX[®]

AUTO-ADJUST TECHNOLOGY

Automaxx[®] Technology makes clamping fast and foolproof by adjusting the clamp automatically to match the material thickness. Whether it's thick, thin, or in between, Automaxx[®] holds every time with the clamping pressure you set.

without readjusting the Clamp!

WOOD PROJECT CLAMPS AUTOMAXX[®]

Wood Project Clamps are perfect for Kreg Joinery[™], project assembly, general clamping, and more. Available in two sizes—3" (76mm) reach and 6" (152mm) reach—these versatile clamps have large clamp faces that distribute clamping force evenly and won't mar delicate surfaces. They are compatible with the 300-Series Pocket-Hole Jig Universal Clamp Adapter, the R3's Clamp Pad Adapter, and with the Kreg[®] Portable Base.

Thanks to Automaxx[®] Auto-Adjust Technology, Wood Project Clamps adjust to match material thickness automatically with a simple squeeze of the handles—whether the material is thick, thin, or in between. These clamps also feature easy-to-regulate clamping pressure with a simple thumbscrew.

€ 64.00

BENCH CLAMPS[™] AUTOMAXX[®]

Bench Clamps offer the perfect solution for benchtop clamping. These versatile clamps are perfect for creating flush-fitting assemblies with Kreg Joinery[™], and they're great for project assembly, routing, cutting, sanding, drilling, and more. Bench Clamps work with Clamp Trak and Bench Clamp Base, the Clamp Table, Mobile Project Center, and more to secure workpieces using an extra-large padded clamp face that evenly distributes clamping force.

Thanks to Automaxx[®] Auto-Adjust Technology, Bench Clamps adjust to match material thickness automatically with a simple squeeze of the handles—whether the material is thick, thin, or in between. These clamps also feature easy-to-regulate clamping pressure with a simple thumbscrew.

90° CORNER CLAMP

ITEM# KHCCC

AUTOMAXX®

€ 72.00

The Kreg® 90° Corner Clamp makes it easier than ever to successfully assemble boxes, cabinets, drawers, and cases by giving you the extra hand you need to hold these assemblies at perfect 90° angles. This handy clamp makes alignment of the project parts easy, while Kreg Automaxx® Technology makes clamp operation fast and foolproof. When you are assembling projects using Kreg Joinery™, the Kreg 90° Corner Clamp offers the fastest, easiest-to-use corner clamp you can buy.

WATCH VIDEO

SPECS:

- Works on 90° corners and "T" joints
- Cast aluminum "V" and wedge pads
- 1" maximum thickness capacity
- Automaxx® auto-adjust technology
- Easy-to-regulate clamping pressure with thumbscrew
- Cutout allows driving a pocket-hole screw without removing clamp
- Padded, ergonomic handles

THE EASY WAY TO HOLD 90° CORNER JOINTS & "T" JOINTS

Get the helping hand you need to hold 90° corners and "T" joints together securely when you're assembling boxes, drawers, cabinets and cases. The 90° Corner Clamp leaves both of your hands free to add your fasteners as you assemble your projects using Kreg Joinery™.

FEATURES:

ADJUSTABLE

Easy-to-regulate clamp pressure provides appropriate pressure for all materials and assemblies.

PRECISE

Cast-aluminum "V" wedge clamp pads hold pieces at true 90° angles and help ensure edge alignment during assembly.

VERSATILE

Clamp jaw design securely holds corner and "T" joints at 90° angles, which leaves your hands free to work while the assembly stays together.

EASY-TO-USE

Automaxx® technology adjusts automatically to material thickness—up to 1"—and maintains clamping pressure

BENCH CLAMP WITH BENCH CLAMP BASE

€ 102.00

ITEM #KBC3-BAS

AUTOMAXX®

This handy kit contains a 3" (76mm) Kreg® Bench Clamp and a Bench Clamp Base together. The clamp is equipped with Kreg Automaxx® technology, so all you have to do is attach the base to your work surface, insert the clamp, and then squeeze the clamp handles. The clamp adjusts to match the thickness of your workpiece—up to 3½" (89mm).

INCLUDES:

- (1) 3" (76mm) Bench Clamp with Automaxx®
- (1) Bench Clamp Base

WATCH VIDEO

Steel clamp and cast aluminum base hold large pieces in place securely.

Bench Clamp keeps pieces perfectly aligned to create tight-fitting joints.

Versatile design provides clamping capability for a wide variety of tasks.

Movable base is easy to position wherever needed on your work surface.

BENCH CLAMP BASE

€ 35.30

ITEM #KBCBA

Bring the power and convenience of Kreg Bench Clamps to any work surface, and create a versatile clamping station almost anywhere. The Bench Clamp Base is a perfect companion to the Kreg Mobile Project Center, and it allows you to get more from any work surface with ¾" or 20mm bench dog holes. Or drill a hole in any work surface to easily attach the Bench Clamp Base, and just as easily remove it when not in use, or to move it.

- Cast aluminum base
- Heavy-duty ½" anchor bolt
- Easy-to-grip knob
- Works with all Kreg Bench Clamps—from earliest versions to current Automaxx® models
- Movable to allow use on more than one work surface
- Includes base, knob, hardware, and instructions

BENCH CLAMP WITH HEAVY-DUTY CLAMP PLATE

ITEM #KBC3-HDSYS

€ 130.00

AUTOMAXX®

For versatile clamping on the go, check out the Heavy-Duty Bench Clamp System. It combines a 3" (76mm) Bench Clamp with a thick 10" x 10" (254mm x 254mm) powder-coated steel plate. The clamp is equipped with Kreg Automaxx® technology, so all you have to do is set the base where you want it (rubber feet keep it in place), insert the clamp, and then squeeze the clamp handles. The clamp adjusts to match the thickness of your workpiece—up to 3½" (89mm).

INCLUDES:

- (1) 3" Bench Clamp with Automaxx®
- (1) ¼" x 10" x 10" Powder-Coated Steel Plate
- (4) Rubber Feet

WATCH VIDEO

IN-LINE CLAMP

ITEM# KBCIC

By applying pressure from the side, the In-Line Clamp stays out of the way as you work. A peg fits into any 3/4"-diameter hole holds the clamp in place, so this clamp makes it possible to get more from any bench with dog holes—or any work surface where you can drill holes. The In-Line Clamp also makes a perfect companion to the Mobile Project Center.

Get the helping hand you need, when you need it, with the versatility and power you want for a wide variety of do-it-yourself and woodworking tasks from sanding to glue-ups, sanding painting and finishing, routing, project assembly, and more. This clamp applies up to 250 lbs. of clamping force, and swivels to clamp from any angle on almost any shape workpiece.

Low-profile design keeps clamp out of the way while working.

Clamp shoe holds flat and rounded shapes, as well as 90°.

Works on any bench with ¾" bench dog holes—or drill your own.

AUTO-ADJUST BAR CLAMPS AUTOMAXX®

When you want the durability and auto-adjust convenience of Automaxx® clamping, but you need more clamping capacity, turn to Auto-Adjust Bar Clamps with Automaxx® Technology. Just like other Kreg Clamps, these bar clamps adjust automatically when you change material sizes.

Just slide the clamp jaws against your workpiece, and then squeeze the handles. Automaxx® Technology does the rest, closing the clamp with predictable, dependable clamping pressure every time. That clamping pressure is easy to regulate, as well, thanks to a simple thumbscrew that dials in the pressure you need, from gentle to highly powerful clamping.

Auto-Adjust Bar Clamps are available in three lengths—8", 16", 24"—to suit a variety of project needs. Whether the job requires holding large pieces during assembly, keeping workpieces in place on your bench, or any number of other project processes, Auto-Adjust Bar Clamps are up to the task.

Sliding clamp jaw moves to any position on bar.

Available in three different capacities to match your needs.

Padded jaws grip securely without marring.

CLAMP VISE AUTOMAXX®

ITEM# KBC3-VISE

Thanks to Automaxx® Auto-Adjust Technology, the Bench Clamp adjusts to match the material automatically with a simple squeeze of the handles—whether the material is thick, thin, or in between. The clamp allows easy regulation of clamping pressure with a simple thumbscrew.

€ 117.00

INCLUDES:

- (1) Bench Clamp with Automaxx®
- (1) Clamp Vise™ Plate
- (2) Clamp Blocks™
- (2) Bench Dogs with Bench Brakes
- (1) Mounting Hardware
- (1) Instructions

RIGHT ANGLE CLAMP AUTOMAXX®

ITEM# KHCRA-INT

The Right Angle Clamp makes projects with 90° joints faster and easier by giving you the helping hand you need to hold the parts in position during assembly. Just slip the pin on the Right Angle Clamp into a pocket hole, close the clamp, and it draws the mating pieces tightly together. The swiveling clamp pad grabs the mating piece securely.

Automaxx® Auto-Adjust Technology adjusts the Right Angle Clamp to match the material automatically with a simple squeeze of the handles. Designed for use with standard-size Kreg® pocket holes only. Not compatible with Micro-Pocket™ holes.

VersaGrip™ Clamps

NEW

Quick, one-handed clamping

Fast, versatile clamping for any wood project. The VersaGrip's patent-pending adaptable clamp head is repositionable along the bar and is also reversible so it can be used in a variety of clamping applications. The soft, non-marring clamp pads are also removable. The handle features an easy-release trigger for quick unclamping. A 83 mm jaw depth makes VersaGrip Clamps the ideal choice for use with Kreg jigs or thicker workpieces.

Each VersaGrip clamp also comes with a Pocket-Hole Jig Adapter to pair easily with Kreg

300-Series and XL Pocket-Hole Jigs. VersaGrip Clamps are available in four lengths — 152 mm, 305 mm, 610 mm, and 914 mm — to suit all your different project needs.

SPECS:

- 83 mm jaw depth
- 136 kg clamping pressure

FEATURES:

- Removable clamp head can slide along the bar or be reversed for additional functionality
- easy-release trigger and ergonomic handle
- GripMaxx anti-slip material on clamp faces

INCLUDES:

- (1) VersaGrip Clamp
- (1) Pocket-Hole Jig Adapter

CLASSIC FACE CLAMPS

Classic Face Clamps™ are designed for creating perfectly flush Kreg Joints™. They also work great for lots of other shop and project tasks that require solid clamping without marring. These clamps feature large clamp pads that distribute clamping force evenly, and hold pieces flush during assembly. When used in Kreg Joinery™, the extra-large clamp face gets positioned on the “show” side of the joint.

Classic Face Clamps are available in two sizes: 2" (51mm) reach and 3" (76mm) reach. Both have a simple screw that adjusts the clamp to match material thickness, plus comfortable padded handles. Both are compatible with Clamp Adapter on 300-Series Pocket-Hole Jigs and the Kreg Jig R3.

CLASSIC 2" FACE CLAMP

2" (51mm) reach; clamps materials up to 2¼" (57mm) thick. This easy-to-use, compact clamp fits easily into tight spaces.

€ 43.50

ITEM# KHC-PREMIUM

CLASSIC 3" FACE CLAMP

3" (76mm) reach; clamps materials up to 2¾" (70mm) thick. Offers increased reach and clamping capacity.

STURDY

Classic Face Clamps™ are designed for creating perfectly flush Kreg Joints™. They also work great for lots of other shop and project tasks that require solid clamping without marring.

VERSATILE

Classic Face Clamps make it easier to build using Kreg® 300-Series Pocket-Hole Jigs, as well as the Kreg® Jig R3, by locking securely onto the Clamp Adapter.

CLAMP TABLE AUTOMAXX[®]

ITEM# KCT-COMBO

€ 768.00

The Clamp Table is the ultimate clamping solution for Kreg Joinery™ and works with the entire family of Kreg® Bench Clamp products. Now this versatile table is even better with the addition of Automaxx® Clamping.

If you've ever struggled to get perfectly flush Kreg Joints™, failed to get your clamps positioned exactly where you need them, or needed an extra set of hands around the workshop, the Clamp Table is the perfect solution.

Made from glue-resistant melamine, this large 21¾" (552mm) x 33¾" (857mm) work surface is perfect for sanding, sawing, drilling, routing, joining, and almost any other woodworking task.

Available two ways: As a complete system with a heavy-duty stand, or with everything except the stand.

CLAMP TABLE with AUTOMAXX[®]

- Large 21¾" (552mm) x 33¾" (857mm) clamping surface
- Glue-resistant melamine surface
- Clamp Trak™ on two sides of the table provides endless flexibility
- Clamp Blocks™ allow for fast, accurate, and consistent registration of work pieces
- Can be used for a variety of woodworking functions, including sanding, routing, and layout

MULTI-PURPOSE SHOP STAND

- Heavy-duty 12- & 16-gauge steel
- Adjustable: 31" (787mm) to 39" (990mm)
- Four stable leveling feet
- Highly durable powder coated steel
- Fast and easy assembly

The Clamp Table holds workpieces securely and provides solid support for Kreg Joinery™, drilling, sawing, sanding, routing, and more!

MULTI-PURPOSE SHOP STAND

The Kreg® Multi-Purpose Shop Stand is the perfect foundation for all Kreg table top solutions, including the Clamp Table and the Precision Router Table Top. You can also use it to create a custom tool or work stand for your shop. Includes four (4) leveling feet and assembly hardware. 20" (508mm) x 28" (711mm)

UNIVERSAL CLAMP TRAK™ KITS

Create your own clamping system that securely holds workpieces in place on your bench as you work. The Universal Clamp Trak™ Kit accepts Kreg® Bench Clamps (sold separately) that you can use to lock workpieces down while creating Kreg Joints™, sanding, routing, drilling, and much more. The long Traks™ allow you to position one, two, or more Bench Clamps exactly where you need them.

Kits are available in two sizes—27" x 45" (686mm x 1143mm) or 27" x 69" (686mm x 1752mm)—that you can mount to an existing workbench, or incorporate into a new bench you are building. That way, you can create a clamping system that suits your needs and your space.

FEATURES:

- Heavy-duty anodized aluminum construction
- 0.695" (17mm) thickness allows Trak™ to sit just below a ¾" (19mm)-thick surface
- Works with Kreg® Bench Clamps™
- Works with Clamp Blocks™

ROUTING SOLUTIONS

ROUTER TABLE SYSTEMS 46

TRUE-FLEX™ FEATHERBOARD 49

ROUTER TABLE INSERT PLATES 50

ROUTING ACCESSORIES 53

FULL LINE OF PRODUCTS FOR TRUE PRECISION ROUTING

Kreg Routing Solutions offer the capability, versatility, and durability you need for true precision routing. We offer everything you need, whether you want a complete router table system for your shop, a portable model for use on the go, or you'd like to select your own components and accessories, and then build a router table yourself.

PRECISION ROUTER TABLE SYSTEM

ITEM# PRS1045

€ 880.00

The Kreg® Precision Router Table System combines unmatched versatility with incredible adjustability and ease of setup to take your woodworking projects to the next level. This powerful system offers a one-of-a-kind T-square style fence, a large, durable table top, and a sturdy steel stand that work together to create a router table that meets all of your precision routing needs.

Our exclusive Easy-Slide™ surface, Precision Insert Plate with Level-Loc Reducing Rings and uniquely designed accessories ensure that you get the best possible routing experience on each and every pass.

 WATCH VIDEO

SYSTEM INCLUDES:

- Multipurpose, Self-Squaring Router Table Fence System
- High-Performance Table Top with Precision Insert Plate System
- Heavy-Duty, Adjustable Steel Stand
- Fence Micro-Adjuster

MAKE IT MOBILE:

ITEM# PRS3090

€ 102.00

Heavy-Duty Casters

Add mobility to your Precision Router Table. Includes four heavy-duty casters. Dual-locking mechanism protects against caster roll and pivot. Weight capacity is 150 lbs. each. Includes all necessary hardware.

TABLE SAW FUNDAMENTALS

Table saw-style T-square adjustment system ensures the fence will always stay parallel to the miter-gauge slot. The fence adjusts easily and locks firmly in place with dual locks.

UNPARALLELED PRECISION

Magnified measuring system with an adjustable scale allows accurate setup with any bit. Included Micro-Adjuster allows you to dial in precision measurements exactly.

BUILT-IN JOINTING FEATURE

Two jointing rods are included with the system. Just slide them into position behind the outfeed fence face, and the fence doubles as a jointer for putting perfect edges on boards.

INDEPENDENT ADJUSTABLE FACES

Sliding fence faces can be positioned exactly where needed to provide workpiece support close to the bit, and to maximize chip collection into the fence's built-in dust port.

LOW-FRICTION EASY-SLIDE™ SURFACE

Durable, high-pressure laminate surface offers a low-friction Easy-Slide™ surface. Thick edgbanding protects the top against bumps and abrasions. Top has predrilled holes for mounting Precision Insert Plate Levelers.

PRECISION COMBINED WITH DURABILITY

Four Precision Insert Plate Levelers allow you to set the plate flush for smooth, accurate routing. Steel reinforcing struts keep the 1" (25mm)-thick MDF table flat, even under the weight of heavy routers and lifts.

VERSATILE COMBINATION TRAK

The anodized-aluminum Combination Trak works with standard 3/8" x 3/4" (9.5mm x 19mm) miter gauge guide bars, and it accepts featherboards and other accessories. The T-track offers another way to mount jigs and fixtures for custom routing setups.

FEATURE-PACKED INSERT PLATE

The heavy-duty 3/8" (9.5mm) x 9 1/4" (235mm) x 11 3/4" (298mm) compression-molded insert plate handles large routers with ease. Level-Loc Reducing Rings lock in level and flush with the plate surface using the included ring wrench. A starter pin ensures controlled bit contact during freehand routing.

SPECS:

Plate Opening Dimensions	Table Surface	Fence Length	Fence material	Overall Dimension	Weight	Multi-Purpose Shop Stand
(9.5mm x 235mm x 298mm)	(609mm x 813mm) with a 1"-thick (25mm) core	(914mm)	Heavy-duty anodized aluminum	(927mm)H x (952mm)W x (648mm)D	(39kg)	<ul style="list-style-type: none"> • Heavy 12- & 16-gauge steel construction • Adjustable height: 31" (78.7cm) to 39" (99cm) • 4 stable leveling feet • Durable powder-coated finish • Fast and easy assembly

BUYING OPTIONS:

PRECISION ROUTER TABLE SYSTEM

This powerful system offers a large, durable table top, a one-of-a-kind T-square style fence, and a durable steel stand that work together to create a router table that meets all of your precision-routing needs. Includes Item #s PRS1025, PRS1015, and KRS1035.

ITEM# PRS1025

€ 340.00

PRECISION ROUTER TABLE TOP

This 24" x 32" table top has a 1"-thick MDF core that absorbs vibration and offers mass to help create a stable router table. A tough Easy-Slide™ surface helps workpieces glide easily. Steel-reinforcing struts ensure that the table will stay flat.

ITEM# KRS1035

MULTI-PURPOSE SHOP STAND

This stand makes the perfect foundation for the Clamp Table™ and the Precision Router Table Top, and is great to create a custom shop stand. Includes four (4) leveling feet and assembly hardware. 20" (508mm) x 28" (711mm) footprint, 31" (787mm) to 39" (990mm) adjustable height.

€ 252.00

ITEM# PRS1015

€ 305.00

PRECISION ROUTER TABLE FENCE

This anodized-aluminum fence features a T-Square adjustment system that ensures the fence stays parallel to the miter-gauge slot. The fence adjusts easily and locks firmly in place with dual locks: a large paddle lock on the infeed end, and a quarter-turn lock on the outfeed end that prevents fence deflection.

PRECISION BENCHTOP ROUTER TABLE

€ 453.00

ITEM# PRS2100

The Precision Benchtop Router Table offers features that give it the capability of a full-size, industrial router table in a portable package.

The top is made from an edgebanded, vibration- and noise-resistant MDF, and features an Easy-Slide™ surface. The skin is constructed from a custom-textured laminate, which allows you to easily slide workpieces across the table.

The Precision Router Table Insert Plate measures 3/8" x 9 1/4" x 11 3/4" to support even the biggest routers, and it features Level-Loc Reducing Rings. These rings twist into place and lock in flush with the plate surface every time.

The heavy-duty aluminum fence features quarter-turn locking levers. They allow quick fence adjustment and confident locking, plus they are sized so they're easy to use but stay out of the way behind the fence. The fence also has independent sliding faces that provide increased workpiece support around the bit, and allow the table to be used as a vertical jointer.

WATCH VIDEO

Lightweight yet durable, compact yet feature-packed, this router table is perfect for anyone who needs a router table on the jobsite or for anyone who wants all the features of a full-sized router table in a portable package.

SPECS:

Insert Plate Dimensions	Table Surface	Fence Length	Fence material	Overall Dimension	Weight
3/8" (9.5mm) x 9 1/4" (235mm) x 11 3/4" (298mm) Level-Loc Reducing Rings	406mm x 609mm x 25mm	(609mm)	Aircraft-grade aluminum Anodized for easy cleanup	(508mm)H x (717mm)W x (514mm)D	(12kg)

EASY-SLIDE™ ROUTER TABLE TOP

This router's tabletop features the same Easy-Slide™ skin, made from the same impact-resistant, high-pressure laminate that is used on our full-size router table. This skin allows workpieces to glide across the table's surface easily.

BUILT-IN JOINTER

Fully-independent fence faces and depth-setting rods quickly turn your portable router table into a vertical jointer. Depth rods are stored on the fence and can be positioned behind the faces, allowing for jointing depth adjustments of 1/16" (1.6mm) and 1/32" (0.80mm).

FULL-SIZE LEVEL-LOC INSERT PLATE & LEVELERS

This full-size insert plate is the same compression-molded plate used in the large Kreg® router table, which means you never

have to compromise on functions or features. The plate is equipped with Level-Loc Reducing Rings that simply twist into place and lock in level and flush with the plate surface every time. Three rings are included: 1" (25mm), 1 3/16" (30mm) (for use with universal-style guide bushings), and 2 5/8" (67mm). The plate is mounted using Kreg® Precision Insert Plate Levelers, making it easy to set the plate exactly flush with the table surface.

TRUE-FLEX™ FEATHERBOARD

The True-FLEX™ Featherboard gets its name from the careful engineering that went into its design. Many featherboards on the market today apply too much pressure or not enough pressure to the workpiece, which results in imperfect cuts and less-than-safe operation.

The True-FLEX™ Featherboard provides a consistent and optimum pressure, and will stand up to years of heavy use in your woodshop. The Featherboard is made from an extremely durable plastic composite body and includes a Wedge-Lock™ System that allows the Featherboard to be secured to a variety of shop tools without the need for additional hardware.

Whether you're using a miter slot or a T-slot, working on a table saw or a router table, the Wedge-Lock™ System adjusts accordingly and lets you work with confidence. Designed for use in standard $\frac{3}{8}$ " x $\frac{3}{4}$ " (9.5mm x 19mm) miter slot.

TRUE-FLEX™ FEATHERBOARD

Single Featherboard. Comes with Wedge-Lock hardware that works in T-slots or miter slots on table saws, router tables, and band saws.

ITEM# PRS3010

€ 35.30

TRUE-FLEX™ FEATHERBOARD TWIN PACK

Comes with an extended version of the Wedge-Lock hardware, perfect for stacking. When used together, they provide additional support for tall workpieces, resulting in higher-quality cuts.

ITEM# PRS3020

€ 54.40

True-FLEX™ fingers apply optimum pressure to your workpiece. Unique wedge-lock hardware works in $\frac{3}{8}$ " x $\frac{3}{4}$ " miter slots on tablesaws, router tables, and band saws.

Wedge-lock hardware allows the featherboards to be separated and used in two ways: in a miter slot on the table, and in a T-slot on the fence.

PRECISION ROUTER TABLE INSERT PLATE LEVELERS

ITEM# PRS3040

These levelers are the easiest way to add an insert plate to a shop-built router table. They eliminate the need for a supporting rabbet and feature a unique bottom-mount design that includes eight adjustable contact points, four-corner lock-downs for stability, and locating tabs for easy installation.

€ 32.00

Plate Levelers mount easily to the underside of the table. Eliminates the need for a rabbeted opening.

Two adjustable set screws on each Leveler make it easy to set the router plate flush with the table surface.

PRECISION ROUTER TABLE INSERT PLATE

Equip your router table with an insert plate that offers the features and durability you demand. The Precision Router Table Insert Plate is made from compression-molded phenolic, which is 30% stronger, and 20% more rigid than standard phenolic, meaning it starts out flat and stays flat, even when used with a large, heavy router.

The plate is equipped with Level-Loc Reducing Rings that simply twist into place using an included ring wrench to lock in level and flush to easily change the size of the opening around the router bit. Three Level-Loc Rings: 1" (25mm), 1 $\frac{3}{16}$ " (30mm) for use with universal-style guide bushings, and 2 $\frac{5}{8}$ " (67mm) rings are included.

LEVEL-LOC REDUCING RINGS

Change the size of the opening around your bit easily using these rings that simply twist into place and lock-in level and flush with the plate surface every time. Includes three rings: 1" (25mm), 1 $\frac{3}{16}$ " (30mm) (for use with universal-style guide bushings), and 2 $\frac{5}{8}$ " (67mm).

MOLDED-IN ALIGNMENT MARKS

The undrilled Insert Plate comes without pre-drilled holes, unlike so-called "universal" plates. Instead, it has molded alignment marks on the underside that make it extremely easy to center and mount your router.

WORKS WITH MOST ROUTERS

This $\frac{3}{8}$ " x $9\frac{1}{4}$ " x $11\frac{3}{4}$ " (9.5mm x 235mm x 298mm) plate is designed to easily accept most routers, and is built tough to resist sagging with even the largest, heaviest routers.

REMOVABLE STARTING PIN

This removable starting pin gives you the safety and control you need while routing freehand—without a fence to guide the workpiece past the bit—by providing a surface to rest your workpiece against before you pivot the workpiece against the bit.

Insert Plate without predrilled holes. Has shallow "starter holes" molded into the underside for popular router patterns, as well as a molded centering pattern.

Includes: Precision Router Table Insert Plate, three Level-Loc Reducing Rings, ring wrench, starting pin, and router mounting screws.

PRECISION ROUTER TABLE LIFT

NEW

€ 510.00

ITEM# PRS-RL2.0K

The Precision Router Lift RL2.0K from Kreg is the perfect choice for anyone looking for a high-quality and reliable router lift. Thanks to its high-quality aluminum and steel construction, you can count on a long service life and low maintenance. The RL2.0K is extremely precise thanks to its fine height adjustment down to 1/10 mm. The scale on the reduction plates is precise and the spindle lock ensures easy operation. The reducing plates give you more choice and control when selecting the right hole size for your workpieces. Magnetism on the reducer plates is distributed throughout the plate, allowing additional accessories to be securely attached. An additional recessed handle allows you to easily replace the reducing plates. All in all, the Kreg Precision Milling Lift RL2.0K offers numerous advantages that make it an indispensable tool for every craftsman.

FEATURES:

- Quality made of high-quality aluminium and steel.
- Height fine adjustment to 1/10mm: extremely precise adjustment, with exact scaling and effective spindle lock, easily operated via hexagon socket screw.
- Smooth-running spindle columns: allow for continuous and exact fine height adjustment.
- Routing without rip fence: 2 drill holes for the rip fence pin enable free routing of e.g. round workpieces without rip fence.
- Easy mounting: mount the router to the RL2.0K using pre-drilled mounting holes (hole pattern in operating instructions).
- Absolutely flat: easy levelling of the RL2.0K by means of levelling screws in the insert plate.

SPECS:

- Dimension insert plate: 298 x 235 x 9 mm
- Corner radius of insert plate: 19 mm
- Distance from the top edge of the inlay plate to the base plate of the mounted router: 15 mm (loss of routing depth)
- Height adjustment travel/rotation: 4 mm
- Height router lift (max. extended): 240mm
- Max. cutter diameter: 86 mm
- Max. adjustment travel: 105 mm
- Weight: 4,5 kg

INCLUDES:

- 1x router lift RL2.0
- 2x reduction plates Ø 32 and 68 mm
- 1x hexagon screwdriver 5x150 mm
- 4x fixing screws M6x50, washers and nuts
- 18x mounting screws (various sizes)
- 8x levelling screws M5x8
- 1x instruction manual (german & english)

ADD THE FINISHING TOUCH TO YOUR PROJECTS EASILY

Kreg Hardware Installation Solutions make it easy to add the perfect final touch to your projects by allowing you to confidently install knobs and pulls, concealed door hinges, drawer slides, and adjustable shelves with accurate, repeatable, professional-quality results every time.

ONE-PERSON CABINET INSTALLATION

Position and hang cabinets easier than ever

Hanging and aligning cabinets can be a tall task especially when you are working independently. We now have a solution that simplifies the process by allowing you to pre-hang wall brackets that temporarily hold the cabinets until you set them in their permanent location.

NEW

 WATCH VIDEO

4 EASY STEPS

Mount wall brackets to the wall anywhere—as close as 25 mm from the ceiling.

Screw cabinet brackets to the top of the cabinets as temporary hangers.

Hang cabinets on wall brackets. The cabinet tops will all align.

Align the cabinet faces, and then attach cabinets to wall studs.

2,44 m - Cabinet Installation System

NEW

The 2,44 m section of mounting bracket simplifies the positioning and installation of wall cabinets by temporarily holding the cabinets in place for you. Position up to 2,44 m of wall cabinets until you can permanently mount them to wall studs. The 2,44 m Cabinet Installation System is great for small pantries, office cabinets or bathroom cabinets.

USES

- Customizable 61 cm sections up to 2,44 m
- 14-gauge steel
- Allows for cabinet placement as close as 25 mm to ceiling
- Works with varying sizes of cabinets
- For use with runs of cabinets weighing 27 kg each or or less

INCLUDES

- (4) 14-gauge steel wall brackets
- (13) 14-gauge steel cabinet brackets
- Mounting screws, wall anchors

€ 52.50

ITEM# KCS-100

7,9 m - Cabinet Installation System

NEW

The 7,9 m section of mounting bracket simplifies the positioning and installation of longer runs of wall cabinets by temporarily holding the cabinets in place for you. Position up to 7,9 m of wall cabinets until you can permanently mount them to wall studs. The 7,9 m Cabinet Installation System is great for full kitchen projects or adding long runs of garage cabinets.

USES

- Customizable 61 cm sections up to 2,44 m
- 14-gauge steel
- Allows for cabinet placement as close as 25 mm to ceiling
- Works with varying sizes of cabinets
- For use with runs of cabinets weighing 27 kg each or or less

INCLUDES

- (13) 14-gauge steel wall brackets
- (39) 14-gauge steel cabinet brackets
- Mounting screws, wall anchors

CONCEALED HINGE JIG

€ 48.00

ITEM# KHI-HINGE-INT

The Concealed Hinge Jig takes the guesswork out of installing cabinet doors using concealed hinges. With this easy-to-use jig, you get drill-press accuracy using an ordinary hand drill. The jig ensures accurate hinge alignment for doors that fit perfect and work well. Plus, the Concealed Hinge Jig comes with a high-quality carbide-tipped bit with a built-in stop collar that ensures smooth, clean holes that are always drilled to the perfect depth.

The Concealed Hinge Jig consists of a glass-filled nylon base with a hole that receives a drill guide. Indexing cams ensure that the jig positions the bit to drill a hole at the required offset—which is dictated by each hinge—and an included stop collar ensures that the cup depth is correct every time. A pair of smaller holes also allow drilling perfectly-positioned holes for the hinge mounting screws, ensuring that the hinge will fit accurately every time.

INCLUDES:

- (1) Jig Base with Index C
- (1) Drill Guide
- (1) 35mm Carbide ripped Drill Bit
- (1) Stop Collar with Hex wrench
- Owner's manual

SPECS:

- Construction: Glass-filled nylon
- Compatible with 35mm cup-style concealed hinges
- Works with 3mm, 4mm, 5mm, 6mm hinge offsets
- Four-cutter, carbide-tipped drill bit with stop collar
- 2" (50mm) to unlimited hinge offset from door end

WATCH VIDEO

EASY

Use the cams and measuring scale to easily set the jig to position the hinge cup precisely, and then drill a hole precisely using any drill.

ACCURATE

Drill holes for the hinge mounting screws, as well, using guide holes in the jig to ensure accurate results.

REPEATABLE

Confidently install hinges that fit perfectly every single time for doors that fit right and look great.

ACCESSORIES:

35mm CONCEALED HINGE BIT:

This high-quality carbide-tipped drill bit is the same one that comes with the Concealed Hinge Jig. It features four carbide cutters: Two large cutters that create a smooth, flat-bottomed hole, plus two spur cutters that shear the hole sides cleanly for a straight, smooth hinge cup. Stop collar not included.

SHELF PIN JIG

ADD PERFECTLY SPACED ADJUSTABLE SHELVES TO YOUR PROJECTS

Create shelf-pin holes at the perfect spacing and depth using the Shelf Pin Jig's hardened-steel guides, high-quality brad-point bit, and stop collar.

Create perfectly spaced shelf-pin holes with the Kreg® Shelf Pin Jig. It has six hardened-steel guides on 32 mm centers and at backspacing that matches the 32 mm cabinet system. A dual-position fence aligns the jig or can be removed to work inside a structure. This jig can also simplify installing concealed hinges and drawer slides in frameless cabinets. Comes with a 5mm brad-point bit.

**DRILL GUIDE
LIFETIME
WARRANTY**

Snap two or more jigs together without using tools to quickly drill more holes in one run.

32 mm cabinet system compatible for locating hinges and drawer slides.

SPECS:

- Hardened-steel drill guides, brad-point bit
- 32 mm system compatible
- Jig extension and alignment pin
- Aligns cabinet hinges and drawer slides
- Onboard storage

INCLUDES:

- (1) Shelf Pin Jig
- (1) 5 mm Drill Bit
- (1) Locating Pin
- (1) Depth Collar with Hex Wrench
- (4) 5 mm Shelf Pins

Kreg Cabinet Door Mounting Jig

GET AN EXTRA HAND TO SIMPLIFY INSTALLING CABINET DOORS

Get a much-needed helping hand for installing cabinet doors with the Kreg Cabinet Door Mounting Jig offers. The jig features a support arm that helps you hold the door with one hand, while your other hand is free to mount the hinges to the cabinet. The Cabinet Door Mounting Jig allows you to mount left-hand and right-hand cabinet doors in any of nine different positions—from inset to 25 mm overlay at 6 mm increments. The jig works with face-frame and frameless cabinets. Included 1.6 mm and 3,2 mm shims allow micro-adjustment up to 4,8 mm during installation.

NEW

Magnetic shims

Magnetic shims provide fine-tuning of door position in 1,6 mm and 3,2 mm increments.

SPECS:

- Supports cabinet door during installation
- Adjusts in 6,35 mm increments from inset to 50,8 mm overlay
- Clamps in place easily for left- or right-hand doors
- Magnetic 1,6 mm and 3,2 mm shims provide micro-adjustment
- Works with face-frame and frameless cabinets

INCLUDES:

- (1) Cabinet Door Mounting Jig
- (1) Support Arm
- (1) 1,6 mm Magnetic Shim
- (1) 3,2 mm Magnetic Shim

Easily align and install cabinet doors by supporting each door in the exact same position while you attach the hinges. Simply place the support arm in any of nine positions, clamp the jig to the cabinet, and then set the door in place. Shims provide fine-tuning for an exact fit.

- (1) Owner's Manual

NOTE: $\frac{3}{16}$ " (4.5mm) drill bit required. Not Included.

EASY

Easily set the jig to locate knobs or pulls exactly where desired.

ACCURATE

Drill straight mounting holes accurately using built-in hardened-steel drill guides that keep the bit straight.

REPEATABLE

Confidently mount hardware after drilling the holes, knowing that it will fit correctly every single time.

WATCH VIDEO

DRAWER SLIDE JIG

ITEM# KHI-SLIDE-INT

€ 35.00

Whether you're updating cabinets or you're building a project from scratch, mounting drawers is always a challenge. The Drawer Slide Jig takes the guesswork out of installing drawer slides, ensuring drawers that fit perfectly and slide smoothly. The Drawer Slide Jig works with slides of all kinds—ball-bearing, epoxy-coated, and undermount—and can be used in face-frame and frameless cabinets.

This easy-to-use jig has two brackets that hold slides in position as you drill mounting holes in the cabinet. Built-in tabs make the brackets easy to align on cabinets with face frames, or with your designated marks on frameless cabinets. Of course, mounting slides inside the cabinet is only half the battle. That's why the Drawer Slide Jig brackets are reversible, as well, to support drawer boxes while mounting slides to the drawer.

INCLUDES:

- (2) Brackets with Adjustment Tabs
- (1) Owner's Manual

SPECS:

- Polycarbonate/ABS construction
- Dual-position Indexing Tabs
- Works with face-frame and frameless cabinets at least 14" deep
- Works with ball-bearing, epoxy-coated, and undermount slides

WATCH VIDEO

ACCURATE

Tabs register the jig to the cabinet side and frame for foolproof positioning.

ADAPTABLE

Works with face-frame cabinets, cabinets without frames, and on cases of other types, such as chests and dressers.

VERSATILE

Also supports the drawer box during installation to make the process easy.

DRAWER FRONT MOUNTING KIT

NEW

Whether you're building from scratch, renovating, or repairing, our Drawer Front Mounting Kit is the simple, effective way to mount and align drawer fronts. Removing the need to use one hand to hold pieces in place as you work, the thick steel design features large clamp pads, GripMaxx™ anti-slip surface, and ribbed corners to minimize flex and maintain project stability.

INCLUDES

- (1) Left Drawer Mounting Tool
- (1) Right Drawer Mounting Tool

Kreg Workspace Solutions allow you to make any place your workspace. Whether you work in a dedicated shop, in your garage, or on your driveway or patio, Kreg offers a solution that makes it easy to create a hardworking, sturdy workspace that suits your space, your tasks, and your needs.

Universal Bench

Mobile Project Center

Track Horse

MOBILE PROJECT CENTER

ITEM# KWS1000-INT

€ 250.00

The Mobile Project Center gives you the freedom to work on projects wherever, whenever, and however you want. The Mobile Project Center sets up in no time, and can be used in multiple ways—as a workbench, a sawhorse, an assembly table, and a clamping station. Plus, the Mobile Project Center is a perfect companion for Kreg Joinery™. When not in use, the Mobile Project Center stows away quickly and stores flat.

Whether you work in the garage, out on the driveway or patio, or in a workshop, the Mobile Project Center is ready for whatever tasks you can throw at it. If you need more work space, you can pair up two Mobile Project Centers by attaching them together with connecting keys to create a larger table surface, use the included support brackets and 2x4s to create a cutting platform, or throw a sheet of plywood on those 2x4s to create an extra-large work table.

- ✓ **Workbench**
- ✓ **Assembly Table**
- ✓ **Sawhorse**

- (2) Trak Bushings
- (2) Connection Keys

BONUS ACCESSORIES:

KREG® BENCH CLAMP
+ 4 BENCH DOGS

TRACK HORSE

€ 175.00

ITEM# KWS500

The Track Horse makes it easy to set up a sturdy work support anywhere to make any place your workspace. The Track Horse offers an array of features that give it capabilities beyond an ordinary sawhorse.

Sturdy steel and aluminum construction makes the Track Horse sturdy, and gives it a capacity of 2,200 lbs. (997 kg) per pair, so it can handle large, heavy projects and materials with ease. Dual-mode clamping (with an included Kreg Bench Clamp) makes it easy to secure those items on the Track Horse—by holding them down on the long track on top, or using keyhole brackets on the ends for vise-style clamping.

The track also accepts a sacrificial surface, which allows cutting without damaging the Track Horse or saw. When more cutting space is needed, just pair with another Track Horse or the Mobile Project Center to create a large cutting platform. Or set up an extra-large work table just as easily.

Adjustable legs feature six working heights to match any task. The legs also fold completely away, which allows the Track Horse to function as a ground-level work platform, and to store compactly away.

Track Horse can be adjusted to the following working heights: 6.63"/168mm (*ground-level with legs folded), 24.65"/626mm, 31.65"/804mm (matches height of Kreg Mobile Project Center), 32.65"/829mm, 33.65"/855mm, 34.65"/880mm, 35.65"/906mm.

INCLUDES:

- (1) Track Horse
- (1) Kreg 3" Bench Clamp
- (2) Support Brackets
- (2) Track Bushings with screws
- (1) Owner's Manual

SPECS:

- Works alone, paired, or with the Mobile Project Center
- Made of heavy-gauge steel
- Adjustable legs offer six working heights
- Aluminum track accepts Kreg 3" Bench Clamp (included)

Universal Bench Legs and Rails

Create a custom workbench to fit your space and needs.

Universal Bench Legs combine with Universal Bench Rails (available in five lengths) and Hardwood Bench Tops to create a heavy-duty, custom workbench to fit specific space and project needs.

These legs are made from heavy-duty, 12-gauge steel, and are predrilled for all assembly hardware, plus have additional holes for attaching shop-built enclosures and other customizations.

Legs are adjustable from 787 mm to 991 mm (Standard Height) or 438 mm to 591 mm (Low Height). For added mobility, 76 mm Dual-Locking Casters are available (sold separately).

Universal Bench Rail Sets are available in five options to accommodate a wide variety of project needs: 356 mm, 508 mm, 711 mm, 1118 mm, and 1626 mm. Universal Bench Rail Sets are made from heavy-duty, 16-gauge steel for added durability.

RAILS

SPECS:

- available in five sizes: 356 mm, 508 mm, 711 mm, 1118 mm, and 1626 mm

FEATURES:

- Square-shoulder bolts for easy, accurate assembly
- H heavy-duty 16-gauge steel

INCLUDES:

(4) Universal Bench Rails
Note: Assembly hardware is included with Universal Bench Legs.
