ABOUT ARTGLASS

ARTGLASS Ltd. is a purely Czech pro-export corporation that is growing dynamically without foreign capital. The company operates in 45 global markets and is continuously working towards entering new ones with humility and respect. ARTGLASS has been active in the market for almost 30 years with great success, and has the vision to become a world producer of original and design-led lighting made from high-quality materials with a high proportion of manual craftsmanship. The company currently employs around 100 qualified employees and works very closely with renowned Czech glassmakers and world-famous designers. ARTGLASS's great strength is the company's in-house team of progressive designers, whose original and unique ideas in terms of high-quality design now adorn countless interiors around the world. After years of continuous development it is currently possible to divide the production programme at ARTGLASS Ltd. into three branches: firstly, the production of traditional Czech crystal chandeliers – we are a proud follower of more than 500 years of tradition in chandelier production in the Czech Republic; secondly, custom lighting – lighting projects for private residences, religious buildings (churches, temples, mosques), restaurants, hotels, etc. We offer our clients a comprehensive solution for lighting, from the design and consultation phase through to advice and assembly. We have a specially trained team of assemblers who install our products in clients' premises around the world. Finally, modern design collections – our original vision of transforming a project installation into a smaller model that will suitably complement a modern home. These contemporary design collections are displayed in all their glory in our new „Vision“ catalogue, which you have in front of you.

PRODUCTION

ARTGLASS is constantly investing in its development, new technologies and the skills of its employees. Lighting designs and models are created in our own design studio, which is equipped with state-of-the-art technology. Using 3D software we are able to visualise the entire installation in its interior. We then elaborate on this proposal down to the last detail, including the preparation of technical documentation for production itself.

We can be proud of the fact that the majority of the manufactured parts are the result of work by our skilled craftsmen. The company has a modern metal workshop where our specialists are able to construct even the most demanding metal structures for our installations. ARTGLASS is equipped with a modern ultrasonic washer, which ensures high quality cleaning of even the most complicated parts while also being environmentally friendly. In 2017 our new galvanizing plant and paint shop were completed, which significantly expanded the range of surface finish options we offer.

We also produce fittings and connecting accessories on automated machines. We produce approximately 25 kinds of chains and joints in various surface finishes, for our own use or for sale.

ARTGLASS cooperates with most Czech glassworks, both in the production of chandeliers with classic trimmings or when working on special installations. Czech glass masters create custom glass components for us, including arms, bowls, vases, stems; and unique design components such as flowers, butterflies, snowflakes and abstract elements that later create unique installations.

We use trimmings from renowned companies such as Swarovski, Preciosa and Asfour Crystal to decorate our lighting fixtures.

Our lighting installations use modern lighting technology and lighting control to enhance the beauty of our glass while meeting all the lighting requirements of the room. All of our products meet the required standards and regulations and are certified by renowned global testing laboratories. Our goal is to introduce the beauty of Czech glass and the art of our people, whose work we are so proud of, to the whole world.

PARTICLES

COLLECTION

What unites all the lighting fixtures in this collection is the multiplication or repetition of basic or finely modified elements. This creates unique fixtures that can be configured in almost unlimited ways. These lighting fixtures fit into large spaces in the form of custom-designed installations. For smaller interiors, our designers have also created more versatile variants.

SPARKLING FROST

This lighting fixture captures the beauty of ice and frost. Just as blades of grass are covered by ice crystals on a cold winter's day, the Sparkling Frost model is covered with glass hoar frost. The supporting and lighting part of the fixture is a central puck, from which a circle of stainless steel rod emerges. It is covered with a variety of large, clear trimmings, which can be complemented by blue or grey trimmings. The lighting fixture glitters beautifully and is the perfect addition to any modern interior.

Lighting fixtures are shown here for the purposes of illustration only and the designs can be tailored depending on the client's requirements and technical feasibility. Likewise, the full range of surface finishes and colour designs may be more extensive than those shown.

CARA

Cara is the journey, the shift in concept: it is a fantastic wild flower that hides the spirit of blooming summer meadows. The basis is a wire construction that carries glass components, the effect elements of the whole design. It is a rich and impressive lighting fixture that does not deny the playfulness and variability of its essence. It is certain to be the star feature in any interior.

NOTE

CARA is a combination of a metal wire frame and blown glass parts, which are individually coloured to form a pattern.

Lighting fixtures are shown here for the purposes of illustration only and the designs can be tailored depending on the client's requirements and technical feasibility. Likewise, the full range of surface finishes and colour designs may be more extensive than those shown.

MANHATTAN

Manhattan is a ceiling installation inspired by the city's silhouette, a city landscape full of modern skyscrapers. It consists of a number of detailed glass and metal elements that refer to the technical construction of the modern period. The play on individual, triangular-like elements reminiscent of beam construction has an extraordinary charm.

NOTE

MANHATTAN features triangular base elements made from a metal cut frame or sandblasted flat glass.

Lighting fixtures are shown here for the purposes of illustration only and the designs can be tailored depending on the client's requirements and technical feasibility. Likewise, the full range of surface finishes and colour designs may be more extensive than those shown.

REFLECTION

This installation, consisting of several segments of irregular shapes, is inspired by the image of a single drop falling onto the water's surface. The living surface of the water is simulated by lines on unusual innovative material, the subject of everyday use, which gives it a new artistic use. Its reflection mirrors not only the glittering stone, but also the moment of presence, the surrounding world, the record of the situation that is the reflection / capture of today's society. The transformation of this shape also resulted in metal segments, in which the intentional deformation emphasises the dynamics of movement.

NOTE

REFLECTION's quintessential elements are sandblasted mirrors, which are paired with cut metal frames or other glass elements to achieve the perfect look.

Lighting fixtures are shown here for the purposes of illustration only and the designs can be tailored depending on the client's requirements and technical feasibility. Likewise, the full range of surface finishes and colour designs may be more extensive than those shown.

LUMINIS

The light of the sea, a proof of the sophistication of nature, is the inspiration for a lighting installation that shows the elusiveness of the beauty of glowing organisms that can light up the oceans. They possess great fragility and, at the same time, strength. All these aspects are hidden in the glass, which has become the core material of the installation. Nature is an inexhaustible well of inspiration and it is up to us whether we appreciate it.

NOTE

LUMINIS is a light fitting composed of subtle parts: blown and coloured glass bowls, slumped glass circles and finely cut metal elements.

Lighting fixtures are shown here for the purposes of illustration only and the designs can be tailored depending on the client's requirements and technical feasibility. Likewise, the full range of surface finishes and colour designs may be more extensive than those shown.

DOMINO

The common element of the Domino collection is a wide variety of metallic segments with LED stripes. These segments can be composed as shapes, creating chains and those can then be branched further. The designs can be installed on both walls and ceilings, and even moving from wall to wall or ceiling, making this collection unique. The fixtures are designed especially for modern interiors, both as the main light source or as indirect lighting. Due to their very minimal drop measurements they are suitable for spaces with low ceilings where it is not possible to fit conventional light fittings.

NOTE

DOMINO has a simple metal base and is a treasured light source. These geometric elements throw shadow patterns onto the walls or ceiling.

Lighting fixtures are shown here for the purposes of illustration only and the designs can be tailored depending on the client's requirements and technical feasibility. Likewise, the full range of surface finishes and colour designs may be more extensive than those shown.

ART OF NATURE COLLECTION

We're pleased to share with you a collection, this time inspired by nature. Mother Nature is a powerful and eternal force, making each season a breathtaking spectacle. Our team of designers, together with our skilled craftsmen, have infused the beauty, diversity and resilience of nature into unique lighting designs.

ROSÉE

This unique lighting fixture features a net made of beads cast over different glass shapes. The combinations of colours, shapes and design of the beaded nets are endless.

QUARTZ

These lighting fixtures are inspired by mountain quartz and make an elegant addition to any modern interior. The ceiling light and wall light share the same design, consisting of optical glass rods of the highest quality, cut by hand and carefully positioned to imitate how quartz crystals form in nature.

CHANDELIERS

SNOWFLOWER

This lighting fixture represents purity and the birth of life, locked in a never-ending cycle. The inspiration for this design was a spring flower that comes to life at the end of winter, symbolising the approach of spring. Snowflower is constructed out of overlapping glass petals. The centre of the light, which represents the heart of the flower, features crystal trimmings and chains.

GEOMETRY

COLLECTION

The inspiration for this collection was geometry; one of the oldest scientific disciplines dealing with shapes, formations, their sizes and proportions. The lighting fixtures from this collection are simple, elegant and fresh, and will be a unique addition to decorate all interiors, not just modern ones.

ARCTIC

This lighting fixture is inspired by an icy landscape, where ice floes and ice crystals provide stark architectural and geometric details. The glass segments call to mind stylised flowers etched by ice on frosty windows.

CHANDELIERS

ARCTIC 01 – CH
W 420 x D 420 x H 260

NOTE

KINGDOM OF ICE's effective parts are flat, structured glass in combination with beaded cubes.

Lighting fixtures are shown here for the purposes of illustration only and the designs can be tailored depending on the client's requirements and technical feasibility. Likewise, the full range of surface finishes and colour designs may be more extensive than those shown.

ANNULUS

The inspiration behind Annulus was two expanding rings centred around one point, which is also our company logo. The simple shapes are complemented by sparkling, intertwining chains of trimmings.

NOTE

ANNULUS is a combination of a metal fixture covered with coloured diffusers and chains of glass trimmings.

Lighting fixtures are shown here for the purposes of illustration only and the designs can be tailored depending on the client's requirements and technical feasibility. Likewise, the full range of surface finishes and colour designs may be more extensive than those shown.

ARS ILLUSTRANDI

COLLECTION

Unique design and precise processing is what all of the lighting fixtures introduced have in common. The whole collection, whose name comes from the Latin meaning “art of illumination”, carries the pure beauty of combining unique glass elements with classical trimmings.

ALIA

Alia is based on a simple concept, but wants to be interesting and different. The main element here is a glass ball whose shape is deliberately cut off at the sides to reveal the inside. This step opens up new possibilities for playing with internal and external space. The lighting fixture offers both a clean design, when the ball is complemented by a light source only, and a version where the ball is filled with glittering glass trimmings passing through it.

NOTE

ALIA is based on a cut, blown glass sphere and can be combined with chains of glass trimmings.

Lighting fixtures are shown here for the purposes of illustration only and the designs can be tailored depending on the client's requirements and technical feasibility. Likewise, the full range of surface finishes and colour designs may be more extensive than those shown.

ICICLE

As the name suggests, the inspiration for this lighting fixture was the winter landscape. There is nothing more beautiful than a snowy, glittering country in the rays of the sun. Icicle tries to bring a beautiful piece of winter into the warm and cosy environment of your home. The ring of stones is a fluffy cloud from which snowflakes are falling and its icy beauty is accentuated by growing crystal icicles.

NOTE

ICICLE draws on handmade glass elements in combination with rings and chains from glass trimmings.

Lighting fixtures are shown here for the purposes of illustration only and the designs can be tailored depending on the client's requirements and technical feasibility. Likewise, the full range of surface finishes and colour designs may be more extensive than those shown.

ICEFALL

Icefall is a picture of winter, cold, which creates a unique and transient icy beauty. The design is reminiscent of the struggle of ice and water, the moment when the glacier reluctantly succumbs to the ocean. The lighting fixture itself consists of coloured glass elements featuring sharp lines that change in the centre in a flood of shining trimmings. Just like glaciers that, on the brink of their strength, melt and disappear in the ocean.

NOTE

ICEFALL is arranged from slumped, coloured glass waves complemented by trimmings.

Lighting fixtures are shown here for the purposes of illustration only and the designs can be tailored depending on the client's requirements and technical feasibility. Likewise, the full range of surface finishes and colour designs may be more extensive than those shown.

CRYSTALLINE

This lighting fixture is inspired by the soothing atmosphere of a gurgling waterfall, bringing a sense of harmony and tranquillity to the whole space. The waving water surface that reflects the rays of the sun is one of Nature's beauties that can be compared to the glitter of cut glass. This lighting fixture clearly shows us how to capture the essence of these beauties and bring them into the interior with the help of glass and crystal trimmings.

ART OF WATER

COLLECTION

The Art of Water collection combines the accurate and skilful production you've come to expect from our lighting fixtures with modern design elements inspired by the wonders of nature that never fail to draw the eye, whatever the form. Ice, waterfalls, glistening dew drops... all of these natural wonders have been woven throughout the whole collection.

EMBRACE

A waterfall of fine droplets cleverly contrasts with the stark lines of the central squares, guaranteed to be an eye-catching addition to any interior.

OUR TEAM OF DESIGNERS

"Let me introduce you to our team of designers who can turn the lighting fixtures of your dreams into reality. It is our aim to design lighting fixtures down to the very last detail which, when complete, will make an elegant addition to your interior. Naturally, we put a significant emphasis on functionality and safety when designing our fixtures. With hundreds of successful projects under our belt, we have a proven ability to work to a wide range of designs. This ability, combined with our exceptional manufacturing capabilities, mean that we can produce lighting fixtures that chime perfectly with your individual interiors, be they traditional or modern, taking into account the requirements of different cultures."

Jiří Vencl, Head of Design

Jiří Vencel

Jiří Vencel, the head of the creative team, has trodden a different career path to get to where he is today. He has worked in his field for more than 20 years without having formally studied art, glass or technology. Possessing imagination, as well as manual skills and a technical mindset, he seeks out new forms and solutions. The designer's creations epitomise the constructive look and are complemented by a sense of beauty that refines his realistic view of design.

Petra Vondráčková

Petra Vondráčková is a versatile artist. She first gained experience as a goldsmith and subsequently came to work on designing jewellery and glass. Her curiosity and searching for further possibilities for development and discovering new materials have led her to her present interest in designing lighting fixtures. She is not afraid to use different combinations of materials and to look for interesting design solutions. The inspiration for her work comes mostly from observations of the surroundings, whether it is nature or man-made objects. In her work she uses simple and precise shapes that mirror the young artist's own approach. She perceives today's world and tries to adapt her works to its changes.

Žaneta Čižmárová

Žaneta Čižmárová studied textile and clothing design. Her interests, however, also include designing interiors and interior accessories. She is keen on minimalism, airiness and cleanliness. That brought her to Artglass and to the production of crystal lighting fittings. In her work she avails herself of geometric elements and she is also not afraid of industrial designs. She seeks inspiration in everything that surrounds her and that affects her in some way. She draws inspiration from history, architecture, art, films and books. Great themes are found in nature and in natural elements. For the lighting fixtures she likes the feeling of simplicity with a hidden non-traditional element, and she also likes to experiment with unusual silhouettes.

Tereza Pivrcová

Tereza Pivrcová has been devoted to drawing since her childhood. She subsequently developed her drawing skills at art school, where she also gained rich experience working with jewellery, which she continues to project into her work. The popular aspect in its creation is mostly pure lines and simplicity of shape, blending with the tradition of chandelier trimmings. Inspiration for her luminaires is found in everyday moments of life. The designer does not dismiss an architectural approach, but the predominant elements in her work are the forces of nature.

Jana Chvojková

Jana Chvojková started out as a designer of wooden toys. Now her work focuses on modern glass lighting fixtures. Her work reflects the playfulness of her original focus. It emphasises the manual work associated with costume jewellery. The main materials in her production process are glass beads and small trimmings, which are incorporated within various nets and which can be used on a variety of shapes. She uses familiar and accessible materials to create new and fresh designs inspired by nature. This inexhaustible source of inspiration shines through all her work.

Linda Jůnová

Linda Jůnová extended the design team and added new ideas. During her studies she created glass and design objects, highlighting them with new and fresh decor. At present she is focusing on the purity of glass and the beauty of the décor, creating modern lighting to underline these aspects. Her inspiration is not only taken from precise, geometric lines; her creations are also influenced by nature, its fine curves and the variety of shapes it presents.

Veronika Janda Šindelářová

Veronika Janda Šindelářová considers the lighting fixture a jewel decorating the interior of a room; the central decoration of the space, which is an integral part of the room. The viewer should be captivated by it at first glance. This thinking stems from her experience and training in jewellery and glass craftsmanship. These aspects are clearly visible in her creation of small segments composed in a whole, or the use of materials typical for these fields. Fineness and variability characterise her contemporary work as a lighting designer. Apart from this, she also specialises in her own work and explores the boundary between art and design. Participation in domestic exhibitions such as Designblok and Designweek brings her the experience in contemporary design thinking. She perceives design as innovative and unique.

Monika Šilhánová

Monika Šilhánová brings her creativity and practical approach to the design team. Her designs are often a combination of purity of shape and fine detail. Her work is recognisable for its abundant use of colour, which adds individuality and turns the lighting fixtures she designs into statement pieces. She works primarily with glass, which she has recently successfully combined with metal structures. Monika's sophisticated compositions are created by multiplying several elements; and her individual residential lighting fixtures are equally impressive.
