

ORTHOCANADA

Massage Therapy Solutions

OrthoCanada was founded in 1989 and has grown to become one of Canada's leading suppliers for massage therapy clinics. Through careful screening and selection, we offer capital equipment and clinic supplies that meet Canadian safety standards, are affordable and durable. From our Sukha massage tables to quality supplies like Biotone, linens, and K-Tape, we ensure that products are safe and will help therapists achieve optimal clinical outcomes.

Get Expert Advice

Expert advice is essential at OrthoCanada. Our talented group of professionals have the background and skill sets to help massage therapists make the right product selection.

Industry Partners & Innovation

OrthoCanada has forged strong partnerships with industry leaders and manufacturers who are in the vanguard of product innovation and development, and who provide good working conditions for their workforce, follow best manufacturing practices, and minimize environmental footprint.

Large Inventory & Logistic Solutions

Our inventory of over 3000 products is managed by a procurement team of professional buyers, planners, logistic operators, shipping, receiving and quality control staff. Together they use a state-of-the-art system that optimizes our supply chain operations and ensures orders are filled quickly.

Regulatory & Technical Support

OrthoCanada ensures its products comply with Canadian electrical safety standards and Health Canada's Medical Device License standards. Additionally, a repair and preventive maintenance program can be provided, to help streamline operations, optimize equipment performance, and minimize downtime.

Education

OrthoCanada has partnered with course providers like the K-Taping Academy, Shockwave Training Canada and Embodia to help therapists expand available treatment options for effective and efficient care.

Clinic Setup Expertise

OrthoCanada has been a trusted partner in helping therapists across Canada open and expand their practices for over 30 years. We have built a team of dedicated, experienced, professionals and have developed a turnkey solution to ensure that new and expanding clinics receive everything they need, on time. We offer:

- Product selection and quality
- Innovative equipment
- Expert advice
- Financial advice
- Large inventory & logistic solutions
- Post sale and technical support

Secure e-Commerce

Online shopping should be reliable and worry-free. OrthoCanada is committed to safeguarding our customers' sensitive data and ensures safe online transactions through our secure payment gateways. Our company is fully compliant with PCI standards, Quebec loi 25 and Canada's Consumer Privacy Protection Act C-27.

Financing & Leasing

Leasing equipment is becoming increasingly popular among therapists. It offers a simple way to invest in quality equipment, open or expand a practice, while avoiding large upfront costs. Leasing also provides flexibility for upgrading or changing equipment as needed. Benefits of leasing include:

- Preserve your cash and line of credit
 - No down payment required
- Tax payments are spread over the term
- Monthly payments are tax deductible
 - Simplified clinic budgeting

Sukhā

Enriched with
Aloe Vera & Vitamin E
Balanced Glide & Grip
Paraben & Fragrance-free
Hypoallergenic

The Sukha Professional Multipurpose Massage Lotion is a water and natural oil-based lotion and has been carefully formulated for a variety of massage therapy techniques. Its exceptionally light, smooth, silk-like feel, creamy texture and slow absorption rate provide an ideal and gentle drag across the soft tissues and delivers a nice balance between glide and grip for both superficial and deeper treatment across all body parts. Non-greasy, soothing formula enriched with Aloe Vera and Vitamin E leaves skin feeling soft, nourished, and moisturized. Free of fragrance, dyes, and nut oils to reduce the incidence of allergies. Made in Canada.

How to Choose the Right Massage Medium

Introducing the right massage medium requires careful consideration. Selecting the appropriate massage oil, lotion or cream can significantly impact the overall experience and effectiveness of the massage. By taking into account key considerations, such as intended use, glide & grip requirements, and absorption rate, you can select the product that meets the specific needs of your patient and the techniques involved.

	Massage Oil	Massage Lotion	Massage Cream
Intended use	For superficial massage, used for long gliding strokes	For most massage techniques, superficial and deep	Ideal for deep tissue massage
Viscosity	Low	Medium	High
Absorption	Slow	Moderate > High	Moderate
Glide	High	Moderate	Low
Grip	Low	Moderate	High
Moisturizing	Low	Moderate > High	High
Nourishing	Low	Moderate	High
Ingredients	Typically oil-based	Water-based with added oils, botanical extracts	Water-based with added oils, emollients, and butters

Sukhā

Sukha Towel Collection

Ideal for use in a clinical setting, our lightweight Sukha towel collection includes face, hand and bath towels. Made of 100% soft and durable ring spun cotton. The ring spun method uses mechanical twisting and thinning to strengthen and soften the cotton towels. It provides a tighter weave, softer, silkier, more comfortable feel and extends the life of the towels compared to open end cotton towels. Includes full terry (no decorative borders).

Understanding Towel Weight

Towels are classified by their weight categories – light, medium, and heavyweight. Towel weight is one of many quality indicators and is measured in pounds per dozen of a given size. The weight directly correlates to the absorbency and luxurious feel of the towel.

Light Weight

Light weight towels are an excellent cost-effective option for clinics and institutions with high towel usage, as they dry quickly.

Medium Weight

towels are a popular choice for institutions seeking a balance between absorbency and practicality. They are ideal for hotels, guests, and spas.

Heavy Weight

towels represent a luxurious choice, particularly for upscale hotels and resorts. These towels are denser, thicker, and offer the highest level of absorbency.

OC-020180-12	A	12" x 12"	Face Towels	12 pk	1 lb Weight
OC-020182-12	B	16" x 27"	Hand Towels	12 pk	3 lb Weight

How to Choose the Right Sheets for Your Clinic

Not only do sheets protect your massage table from stains and wear, they're an essential component of patient comfort and should be chosen carefully. To assist you in making an informed decision, we have developed a comprehensive comparison of three popular fabrics: Percale, Microfiber, and Flannel. From fabric composition to breathability, durability, warmth, wrinkle and stain resistance, this guide will help you select sheets that combine a luxurious feel, practicality, and longevity, and are perfect for your clinic.

	Microfiber	Flannel	Percale
Fabric	Polyester	Cotton blend	Cotton blend
Texture	Soft & smooth	Soft & fuzzy	Crisp & cool
Breathability	Moderate	Low	High
Durability	Moderate	High	High
Warmth	Low	High	Low
Wrinkle resistance	High	Moderate	Moderate
Stain resistance	High	Low	Moderate

Therabath Pro Paraffin Bath

Discover the therapeutic benefits of the Therabath Pro for managing arthritis, chronic joint inflammation, muscle stiffness, and various joint conditions. Paraffin therapy effectively decreases pain, provides soothing heat to soft tissues, and promotes circulation in the hands, wrists, elbows, and even the feet and ankles. With the ability to uniformly deliver moist heat, the Therabath is an ideal adjunct to treatments for joint mobilization and active range of motion exercises, while also assisting in the softening of adherent scar tissue prior to treatment.

The Therabath Pro meets Class II medical device standards and is assembled by hand to ensure safety and durability. Made of anodized aluminum, lightweight and energy efficient, with integrated handles for ease of transport. Tank holds 6 lb of wax to permit deep immersion and features automatic temperature control to keep wax between 121 - 130 F. MDALL 6330

Targeted Radiofrequency Therapy – Tecar Therapy

TR-Therapy also known as TECAR, or Targeted Radiofrequency Therapy, distributes high-frequency energy into tissue selectively, resulting in a targeted heating effect to deep muscle, ligament, joint or superficial tissue. TR-Therapy will reduce pain and edema, relax tense muscles, and help regenerate damaged tissue. Used in combination with manual therapy, passive stretching techniques, or active muscle contraction, treatment effectiveness is enhanced, bringing immediate and long-lasting clinical results. MDALL 96043

Features and Benefits

- Tissue selectivity with capacitive and resistive modes
- Dynamic Impedance Control (Automatically regulates the power throughout the therapy by measuring tissue impedance)
- Continuous and pulsed therapy options
- Intuitive operation with colour touchscreen
- 30 preset protocols and therapeutic encyclopaedia
- Optional trolley

BTL-TR-PRO BTL-6000 TR-Therapy PRO

Massage Technique

TR-Therapy in combination with soft tissue techniques enhances the therapeutic effect by increasing the blood flow, nutrients and oxygen to treated tissues. The combination leads to faster release of hypertonus muscles and pain relief.

Muscle Activation Technique

Combining TR-Therapy with isometric or isotonic muscle contraction focuses the hyperthermy into the contracted muscle. Delivered radiofrequency energy facilitates these fibers and leads to faster healing and recovery.

Passive Motion Technique

TR-Therapy helps relieve painful trigger points and muscle spasms that limit range of motion. The use of this therapy in combination with passive stretching of shortened tissues leads to rapid improvement in ROM and pain relief.

Mechanism of Action

Scientifically proven, TR-Therapy transfers high frequency electromagnetic energy through tissue using either capacitive or resistive electrodes.

The capacitive mode is used to treat superficial structures, such as skin and muscles, while the resistive mode treats deep structures, such as deep muscles, tendons, and bones. Its bimodal capacity allows multiple tissue healing.

Common Indications

Chronic Back Pain

Muscle Regeneration

Post Traumatic Edema

Muscle Spasms

Myofascial Syndrome

BTL-6000 Radial Shockwave

BTL-6000 ELITE Shockwave

Offering the most powerful radial shockwave device on the market with an intensity of up to 6 bars and ultralight Intelligent MAGNUM applicator, the BTL-6000 Elite shockwave unit is a clinical solution for sub-acute and chronic musculotendinous conditions. The intensity of 6 bars will deliver successful treatment of deeper tissues while the ultralight Intelligent MAGNUM applicator accommodates parameter adjustments seamlessly.

MDALL 106498

- Includes Magnum applicator
- Intensity up to 6 bars
- Frequency up to 22 Hz

BTL-6000 ELITE Shockwave

BTL-RSWT-ELITE BTL-6000 ELITE Shockwave

Mechanism of Action

Radial shockwave is an acoustic wave that carries high energy to myoskeletal tissue. It causes mechanical stimulation that promotes tissue regeneration and repair in injured tendons and other soft tissue. It is the first-choice treatment for chronic conditions such as superficial tendinopathies, calcifications, and persistent pain of musculotendinous origin.

Lymphatic Drainage & Pressotherapy System

BTL-6000 Lymphastim

Unrivalled system for pressotherapy

Lymphatic drainage is a well established and clinically proven therapeutic method that delivers immediate and visible results. BTL's Lymphastim is based on the pneumatic pressotherapy principle. Special applicator sleeves with multiple overlapping chambers provide gentle massage that encourages the natural circulation of the lymph through the body. Medical Device License 81320

Common Indications

- Chronic oedema
- Obstruction of lymph vessels
- Venous insufficiency and ischemic diseases

Features

- Available with 6 or 12 channels
- Electronic pressure control system
- Range of sleeves available with overlapping chambers
- Connectors for easy applicator change
- Automatic sleeve emptying after treatment
- Preset programs that can be modified by the user
- Pressure setting from 20 to 160mmHg
- Chamber activity shown on display
- Available applicator sleeves: trousers, leg and arm

Lymphastim Topline

BTL-6000
Lymphastim Easy

Circulatory System Support

The Lymphastim enhances blood circulation by applying continuous pressure waves on peripheral veins. More oxygenated blood helps skin look younger.

Digestive System

The Lymphastim massages and compresses the abdomen, resulting in abdominal relaxation and digestive tract stimulation.

Skin

The aesthetic therapy preset program improves oxygenated blood flow to the skin for a healthier look and improved tone.

Muscles

Pressure waves of the overlapping chambers relax muscles, remove excess liquids with metabolic products, and calm muscle spasms.

Lymphatic System

The Lymphastim stimulates lymphatic flow in peripheral and deep lymph nets. This evacuates metabolic residuals from the interstitial spaces and enhances immunological system response.

Always a Step Ahead

Recommended by the K-Taping Academy Canada, K-Tape is an innovative product that has gained global recognition for its exceptional quality and performance. The Kumbrink-developed K-Tape combines the best natural, raw materials with the most advanced manufacturing process available. Its impact on generating positive clinical outcomes has been profound, introducing a wide array of new possibilities for therapeutic interventions across many healthcare providers.

Cotton & Dyes

K-Tape uses high-quality cotton from a single supplier ensuring uniform thread density and knot-free manufacturing. To maintain consistent elasticity throughout its use, the tape incorporates premium elastane thread while dyes used are supplied by Dystar, known for their safety and adherence to the OEKO-TEX Standard 100 label.

Backing Paper

K-Tape is pre-stretched to the optimal level of 10% during its application to the backing paper. This ensures that it has the ideal amount of pre-stretch required for muscle technique taping.

Physiobond Adhesive

K-Tape features professional-grade Physiobond adhesive, exclusively used for K-Tape. The adhesive undergoes a meticulous manufacturing process, creating long polymer chains for effective skin adhesion. A complex temperature-time procedure removes any skin-irritating residual monomers, resulting in a top-notch tape that sets a new industry standard.

K-Taping

K-Taping is a non-pharmaceutical therapy technique that is effective for an extremely wide range of clinical conditions. K-Tape's high-quality fabric is water resistant and breathable, and designed to provide longer wear and comfort. K-Tape is pre-stretched and is ideal for muscle technique taping. Professional training is essential for effective application of K-Tape therapy. For more information visit www.k-taping.ca.

Epicondylitis (Tennis Elbow)

Sanctband™

The Cleaner Band

Sanctband's powder-free and reduced latex protein exercise bands address the dissatisfaction with the messiness of conventional, powdery bands, and the concerns for latex allergies with latex exercise bands.

Sanctband Exercise Band and Dispensers

Sanctband exercise bands are specially treated to remove most of the proteins found in latex and washed to remove the excess powder. This process reduces the possibility for any remaining powder to transport proteins to the user's skin, making it safer to handle and use. Band colour is strength progressive, from extra light to super heavy.

K-Taping Academy Canada

Founded by Birgit Kumbrink, author and physiotherapist, the K-Tape Academy courses are based on extensive testing and collaboration with research institutes, such as the Charité in Berlin and the Florida Hospital Innovation Lab. The courses provide experienced guidance to healthcare professionals interested in learning taping applications that will broaden treatment options and improve clinical outcomes. In person and online courses available.

Shockwave Training Canada

Presented by physiotherapist Rosen Kolev, Shockwave Training Canada courses are patient-centered and evidenced-based. The courses provide experienced guidance to healthcare professionals interested in learning techniques that will expand treatment options for a wide range of soft-tissue conditions.

- In-person workshop
- In-person advanced course
- Virtual advanced course

Shockwave Delivers Enormous Benefits for Clinic Owners

- Attract New Patients
- New Source of Income
- Improve Patient Retention

College Student Kits

Students enrolled in massage therapy programs understand that having the right tools is essential for a successful practice. OrthoCanada offers a comprehensive range of products and customizable kits designed to meet massage therapy students' unique needs as they begin their professional career.

Contact us for more information at info@orthocanada.com or 1-800-561-0310 ext 1710.

Sustainability

OrthoCanada is proud to announce that it has been awarded the Net Zero Carbon Performance certification by the Canada Green Building Council (CaGBC). This certification recognizes OrthoCanada's commitment to achieving net-zero greenhouse gas emissions in its operations.

The Net Zero Carbon Performance certification is a rigorous standard that requires organizations to measure, report, and reduce their carbon emissions to zero. OrthoCanada has demonstrated its commitment to sustainability by investing in renewable energy, implementing energy-efficient technologies, and adopting sustainable practices in its operations.

We have also implemented numerous initiatives aimed at reducing our daily environmental impact, such as:

- Offering professional grade products designed to last
- Partnering with manufacturers that have environmentally friendly and ethical practices
- Partnering with transporters that aim at reducing their carbon footprint
- Using energy efficient equipment
- Implementing a paperless work process environment
- Reducing packaging waste; and
- Recycling and composting

We Make
Shipping a
Positive
Experience

We ship anywhere in Canada!
Our objective is to provide the best possible delivery service, at an affordable price. Getting your order to you promptly is our priority.

Free Shipping on Orders Over \$250*

Standard shipping rate for Healthcare Professionals, Institutions, and Distributors/Dealers is \$12.95. The standard shipping rate for Northwest Territories, Nunavut and Yukon Territory is \$24.95* and \$19.95* for Newfoundland & Labrador.

*Standard rates apply unless affected by weight, size, or remote destination factors. In such instances, our customer service team will reach out to confirm shipping costs before dispatch. We utilize FedEx and Canada Post for standard deliveries, with larger items sent via surface freight. Please note that OrthoCanada's shipping services are exclusive to Canadian locations. For detailed Terms & Conditions, please visit our website at orthocanada.com/en/shipping-info.[†] Dealers/Distributors are excluded from drop ship deliveries.

Terms & Conditions for Healthcare Professionals, Institutions and Distributors/Dealers

Order Policy

The methods of payment accepted are cheque, electronic funds transfer (EFT), Visa, MasterCard, or American Express. We offer Net 30-day terms for qualifying accounts. Any balance due over 30 days will be subject to a 2% service charge. A confirmation email is sent for ecommerce orders confirming your order has been placed via our online store. A separate confirmation email is sent once your order is shipped, which will include a copy of your receipt or invoice and tracking information. Shipment errors or damage must be reported to Customer Service immediately upon receipt of the order.

Pricing

Please refer to orthocanada.com or contact our team for pricing. Healthcare professionals have access to discounted pricing on applicable products. Prices are subject to fluctuation and may change without notice. Prices do not include taxes or shipping fees.

Promo codes are exclusively for healthcare professionals, clinics, institutions, and the general public. They are not valid on past orders or purchases, cannot be combined with other offers, transferred, nor exchanged for cash or credit. Use promo codes online at checkout only; they do not apply to capital equipment or quoted products. Discounts are applied pre-shipping and taxes.

Non-Returnable Items

Special or custom orders, equipment delivered by freight, as well as pillows, towels, linens, unsealed topicals and lotions, used electrotherapy, all support garments and braces worn next to the skin do not qualify for a return. Please be certain before ordering a support or brace for a patient that you have precisely measured the body part, carefully following the manufacturer's instructions that guide your size selection. A tape measure is necessary to measure accurately.

Shipping

Orders typically ship within 1-2 business days and should be delivered within an additional 1-8 business days, depending on your geographic location within Canada. OrthoCanada is unable to provide any additional updates regarding delivery times nor are we able to schedule specific delivery times for ground shipments.

If an order is not received within 10 business days of being placed, the customer agrees to notify our Customer Service by email including the Order Number and clinic information to info@orthocanada.com. Unclaimed orders shipped back to OrthoCanada are subject to a standard shipping fee. If you request that an unclaimed order be shipped to you again, the standard shipping fee will apply a second time.

Freight Delivery

Large or heavy capital equipment orders requiring a freight delivery will be quoted by a sales representative and will be subject to

freight charges. A freight delivery agreement between the customer and OrthoCanada will be provided by a sales representative at the time of purchase and must be signed and dated prior to the shipment leaving our facility. Due to the complexity of freight deliveries, we do not offer returns or exchanges.

Returns Procedure

A return authorization (RA) from Customer Service is required for all returns. Please carefully follow RA instructions provided otherwise returns may be refused. To request a return authorization, please visit www.orthocanada.com/en/returns-and-exchanges.

The customer is responsible for the courier cost of the return. Record and save the parcel's tracking number from the courier service you choose. OrthoCanada is not responsible for returns lost in transit. Once the returned merchandise has been received, inspected, and qualifies as "as-new" condition, your account will be credited (minus any restocking fee if applicable).

The returned item(s) must arrive at OrthoCanada in "as-new" condition: unused, and in undamaged, original packaging. Use extra caution when packing to protect the return product.

Returns made within 10 days of receipt are eligible for a full refund. A 15% restocking fee applies after 10 days, and a 25% restocking fee will apply after 30 days. No returns are accepted past 60 days.

If you received incorrect merchandise as a result of OrthoCanada's error, we will provide a return mail tag and no restocking fee will be applied.

Governing Laws

The Terms and all related transactions will be governed by the laws of the province of Quebec and the applicable laws of Canada. The Customer hereby agrees to the jurisdiction of the courts of the province of Quebec. The Customer acknowledges that the products sold are subject to, and Customer agrees to comply with the export control laws and regulations of Canada. OrthoCanada reserves the right to modify or change these terms and conditions at any time, without prior notice.

Terms & Conditions for the General Public

If you are not a healthcare professional and wish to purchase products from OrthoCanada, we recommend that you consult with your healthcare provider (physiotherapist, physician, doctor or therapist) first. OrthoCanada is unable to offer any product recommendations, medical diagnosis or therapeutic advice to the general public, whether from telephone or email inquiries, however, the general public is welcome to order from our website. We do not accept returns for general public orders.
