

REGENERATIVE FOOD SYSTEMS

Regenerative Food Systems

Focusing on diverse crop production practices, business development skills, and community engagement, the regenerative food systems program prepares students to run their own farm business or be employed in a variety of positions focusing on soil health, horticulture, food security, and production.

As a community college, we know local. Our goal is to develop the next generation of food system leaders through hands-on learning at our student farm and controlled environment agriculture facilities, showcasing unique and diverse production practices.

Degree/Certificates

- Associate of Applied Science
- Certificates
