School Children Reciprocal Visit

19 OCTOBER 2023

In the 4 phase of our program, the children were introduced to the fascinating world of gardening. At our Permaculture organic garden, we took a significant step in this direction by inviting 20 grown-up children to learn the art of maintaining a garden. Led by Bapak Sumi, our executive housekeeper and permaculture attendant, this initiative aimed to instill in them a deep understanding of the growth process of vegetables and how to ensure their well-being.

Parallel to the gardening lessons, our culinary team stepped in to teach the children a valuable lesson in minimizing waste during the harvest. They educated the children on selecting ripe vegetables and fruits for picking, reducing unnecessary food waste. Moreover, the children were taught how to process the harvested produce into a traditional Balinese delicacy called rujak, a salad with shrimp paste sauce. This hands-on activity demonstrated the potential for creating delicious dishes while utilizing every part of the vegetable, promoting the value of sustainability.

To enhance the overall experience, we invited the children to join us for lunch at our Permaculture garden. This provided them with an opportunity to soak in the atmosphere of our resort and witness the results of our commitment to environmental sustainability. By immersing themselves in this environment, they were able to familiarize themselves with the professional world of hoteliers, something that may inspire them in their future careers.
