recycled MATERIALS

08

In this section you will find promotional products made from recycled metal, plastic, paper and even used coffee grounds (pg 39). Using recycled materials has a positive impact on the environment in a number of ways; not only does it limit pollution and the need for landfill it also saves energy, water and the Earth's natural resources.

natural MATERIALS

20

If you want to use branded merchandise to promote your company but worry about the environmental impact, an eco-friendly gift made from a natural material could be the perfect solution. In this section you will find a wide range of promotional items made from natural, plant based materials known for being sustainable and biodegradable.

reusable & RECYCLABLE

44

A reusable, branded gift is a great way to maximise your visibility as your brand message will be seen time and time again. In addition, you will be helping to cut down on single use plastic used to make drinks bottles, carrier bags and more.

THE material GUIDE

RECYCLED ALUMINIUM

Aluminium is one of the most recycled and recyclable materials in use today, in fact there is no limit to how many times this sustainable material can be recycled!

Recycling aluminium takes 95% less energy than creating aluminium from raw materials.

 08

RECYCLED PET

rPET is short for Recycled Polyethylene Tetrphalate, also known as Recycled PET. Due to the thermodynamic qualities of PET, it can be heated up, melted and transformed into new materials over and over making it a great choice for sustainable merchandise.

 09

RECYCLED PAPER & CARD

Paper recycling helps to reduce greenhouse gas emissions, it takes 70% less energy and water to recycle paper than to create new paper products from trees. It also heavily reduces the amount of space taken up by waste paper in landfill.

By choosing a product made from recycled paper you will be helping forest conservation - far less trees are needed when paper is reused.

 17

COTTON AND JUTE

Cotton is a sustainable, natural fibre material that lends itself perfectly to promo bags. The main advantages are durability, machine wash-ability and softness.

The Jute fibre comes from the stem and external skin of the Jute plant which can be spun into strong threads for incredible durability. Plant based and 100% biodegradable and recyclable makes it one of our eco-friendliest options.

 20

PAPER

Paper is a fully recyclable and sustainable material used in a variety of promotional items such as bags and wristbands.

The perfect none-plastic solution for single use promo products that is easily branded.

 28

WHEAT

Wheat straw plastic is an eco-friendly, biodegradable alternative to conventional plastic that is far less harmful to the environment.

The natural fibres of wheat straw are strong enough that they do not require the addition of any chemicals therefore products made from wheat straw plastic are natural, non-allergenic, and BPA-free.

30

BAMBOO AND WOOD

Bamboo is an earth-friendly solution for high demand products as it can grow up to 3ft per day with very little water and without chemicals. It is also 100% biodegradable and extremely durable.

From birch to grass wood, this 100% natural material is fully biodegradable and recyclable. Embrace the unique textures and grains for an organic look to your next campaign.

32

NON-WOVEN PP

This lightweight, sustainable material is popular in the production of reusable promotional bags and most commonly used by supermarket chains as their 'bags for life' given its durable quality that is easily folded.

It's recyclable and takes just 90 days to break down in comparison to the 300 years of standard plastic carrier bags, it's a much kinder option to the environment.

44

PET & BIO PLASTIC

Commonly used in the production of plastic drinks bottles and packaging, PET is super strong and cost effective. Whilst single use plastic has negative associations environmentally, the recycling capabilities of PET are endless making this a great choice. No.1 on UK recyclability chart.

PLA bioplastic (polylactic acid from vegetable starch) is derived from renewable plant starch making it non-toxic and is recyclable, certified compostable and 100% biodegradable.

38 & 45

STAINLESS STEEL

The main environmental benefit of stainless steel is that it is infinitely recyclable, it's also one of the most durable and easily cleaned materials that will last for years before having to be replaced. When used in a double walled capacity in drinkware, it can be a real energy saver!

Maintaining hot temperatures of beverages for up to 12h and cold for up to 24h, it removes the need for heating or refrigeration. Win, win!

47

ALUMINIUM

This versatile metal is used frequently in the promotional industry for a variety of products such as sports bottles, pens and handy items such as trolley coins.

As one of the most environmentally friendly metals it can be recycled infinitely, no matter the use, any aluminium product can be recycled again and again without losing any of its inherent value.

50

Certifications Explained

Find out more about the certification icons you'll see throughout the catalogue.

RECYCLED CLAIMED STANDARD (RCS)

The Recycled Claim Standard (RCS) is an international, voluntary standard that sets requirements for third-party certification of Recycled input and chain of custody. The goal of the RCS is to increase the use of Recycled materials and uses the chain of custody requirements of the Content Claim Standard (CCS). Look out for these icons throughout this catalogue:

GLOBAL RECYCLED STANDARD (GRS)

The Global Recycled Standard (GRS) is a voluntary product standard for tracking and verifying the content of recycled materials in a final product. Look out for this icon throughout this catalogue:

GLOBAL ORGANIC TEXTILE STANDARD (GOTS)

The Global Organic Textile Standard (GOTS) was developed by leading standard setters to define world-wide recognised requirements for organic textiles. From the harvesting of the raw materials, environmentally and socially responsible manufacturing to labelling, textiles certified to GOTS provide a credible assurance to the consumer. Look out for this icon throughout this catalogue:

Branded Gifts that Give Back

Promoting environmental and humanitarian change for the better, the Bilby Sports Bottle (page 16) has much to offer. Branded the 'bottle that gives back', this environmentally conscious item is made from recycled ocean bound plastic which is much kinder for our planet, helping to keep our oceans free from harmful pollution.

In addition to its eco credentials, the Bilby helps to provide safe water sources for thousands of impoverished children and their families at direct risk of waterborne illness in Uganda.

For every bottle sold, a donation of 20p is given directly to HUGS (reg. charity 1098176) to fund the provision of sanitation, latrines and water catchment facilities so that children don't have to walk long distances.

Ocean Regeneration x Three Peaks®

The introduction of the Three Peaks GBR® brand - pages 14/15 - brings a new range of sustainable, eco-friendly promotional bags.

Helping to look after the world for future generations, Three Peaks GBR® reuse as many waste plastic bottles as possible in each of their products. Industry leading technology converts the single use plastic bottles into RPET fabric using environmentally sustainable practices.

Three Peaks GBR® have partnered with 'Ocean Generation' with a shared goal of reducing ocean plastic pollution. For every Three Peaks GBR® product sold, 5% of gross profits go straight to Ocean Generation cause (Reg. charity 1139848) to help provide education and fulfil ocean restoration projects to restore a healthy relationship between humanity and the ocean.

recycled

Three Peaks is a young and contemporary eco-friendly clothing and apparel brand that focuses solely on using recycled plastic bottles (RPET) or 100% organic materials to produce its products.

Its aim is to offer stylish and desirable products for everyday use that have a positive impact on the environment and world for future generations by re-using as many waste plastic bottles (PET) as possible to produce stylish, durable bags and accessories that can be used every day. This way we can all try and do our bit to help the environment.

With practical designs in a range of sports bags, laptop bags, backpacks and more, available in on trend colours, there is something for everyone!

Check out the collection on the next 5 pages!

TERMS AND CONDITIONS

PRICING. Each product shown in this brochure is priced to include either a single colour personalisation, engraving in one position, doming in one position or iron stamping in one position. Pricing is based on the type of personalisation specified in the catalogue. If more than one colour or one impression is required please contact our sales department for prices.

All prices are correct at time of publication and are exclusive of set-up and carriage. We reserve the right to amend the prices at any time.

ORIGINATION. All printed orders require a screen, template, data sorting and set-up. Please contact our sales office for price details.

COLOURS. Every effort is made to match your colour requests, but due to the printing process used and the nature of the inks, we cannot accept liability for colour variation if no sample proofs are requested.

SAMPLE PROOFS. All sample proofs are charged at our standard rate. Please contact our sales office for details.

QUANTITIES. As per normal practice, items may be subject to 10% under or over quantities ordered.

ILLUSTRATED PRODUCTS. Due to the printing process/variations in monitors, the colour of the actual items may differ slightly from the items illustrated. If you would like to see a sample of any products please contact our sales office.

CANCELLATION. Cancellations may incur administration charges depending on the status of the order at the time of cancellation.

V.A.T. All prices are subject to V.A.T at the current rate
