Introduction

With RoverLink tracking your Dog is a click away.

No need to go through the hectic & manual process of finding your Dog if they ever escapes from your place, just pull out your phone and exactly see where they are! Track Activity & Sleep stats too.

With RoverLink it will feel like you are with your Pet 24/7 

Tracker

Adventure Ready for everyday dog activities like pull, outdoor play, drops & scratches.

Build is as such that it leaves no room for water, dust or pet hair to enter.

Low profile design with negligible weight! Feels like feather on dog's neck.

Clasp fit, attaches to majority of collars & harnesses.

Tracker is **Waterproof**, IP67 rated.

LED & Sound search, helpful when indoors or in dark.

Powered by **Magnetic Charging.**

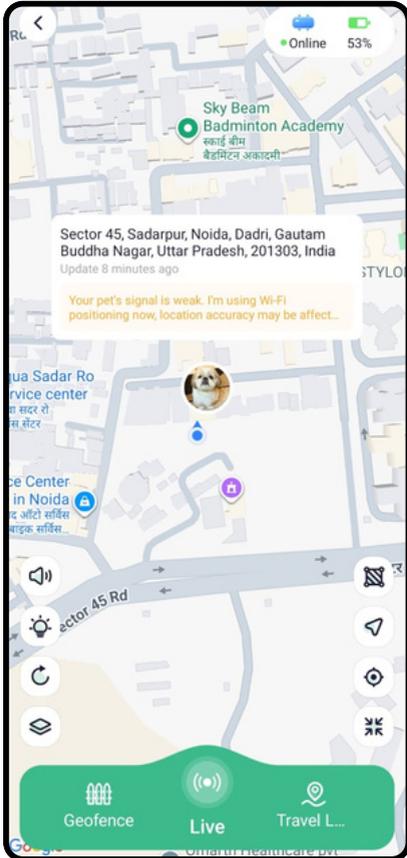

0-100% in 2 hours that lasts up to 3 Weeks.*

*Depending upon usage

App

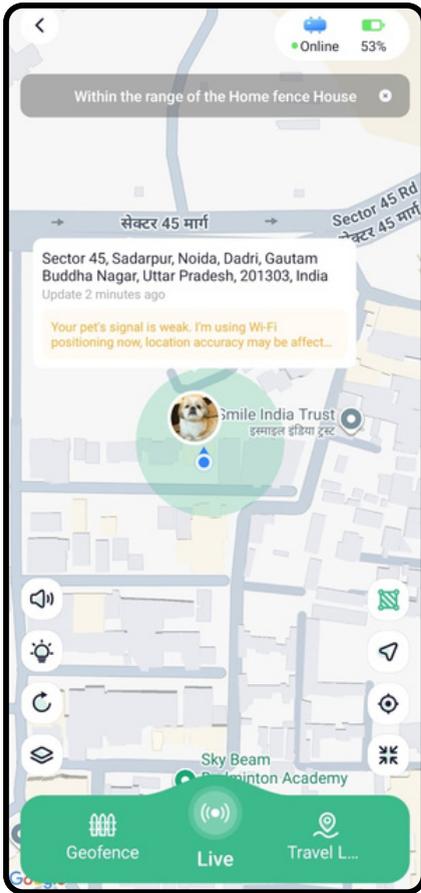

Tracking your Dog is now easier than ordering food, getting cab or making a payment online!

With a click on the app, opens the tracking screen where you can see your Dog & yourself in real-time (**live**).

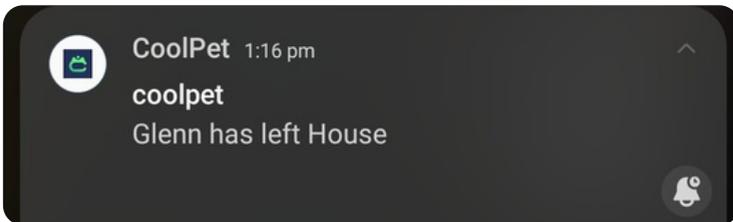

CoolPet app Available on

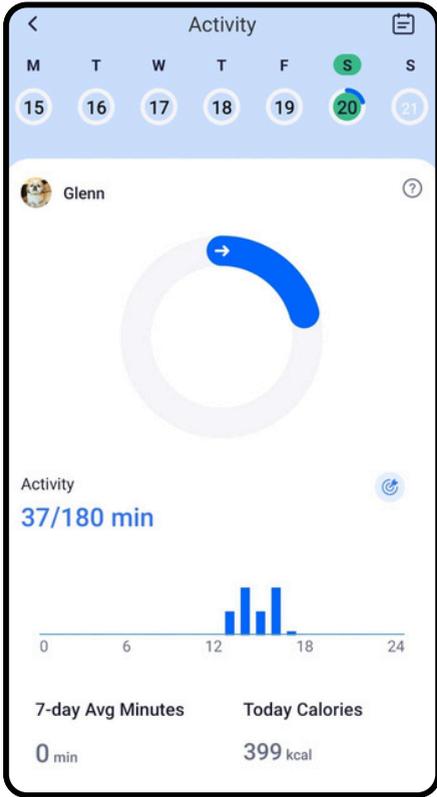

Set **Geofence** as a safe place for your Dog, eg: your house.

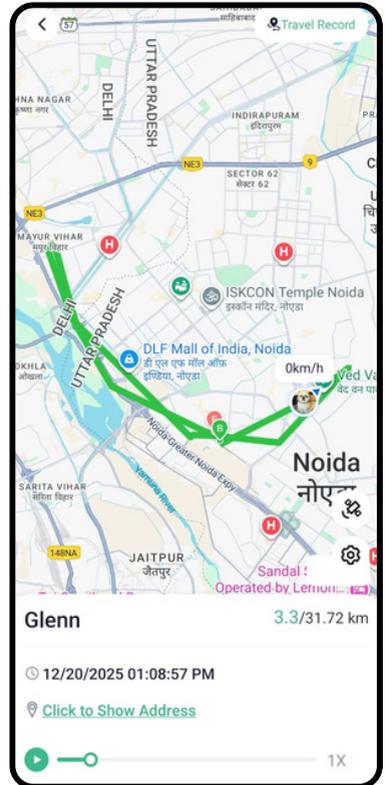

And when your Dog leaves this Geofence you get **alerted** on your phone via Push-Notification.

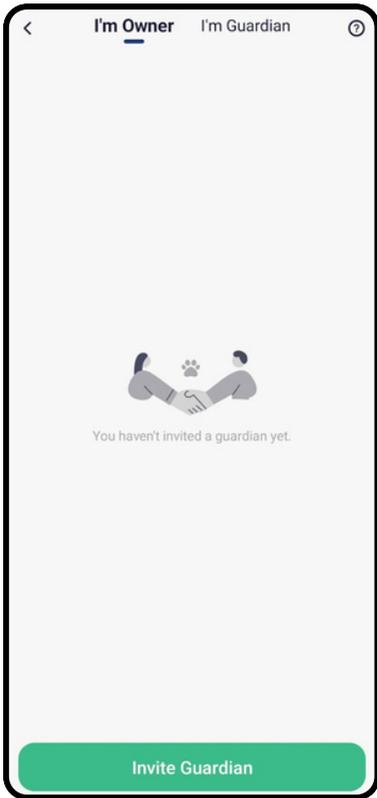

You got **Activity Area** to keep them fit & fine.

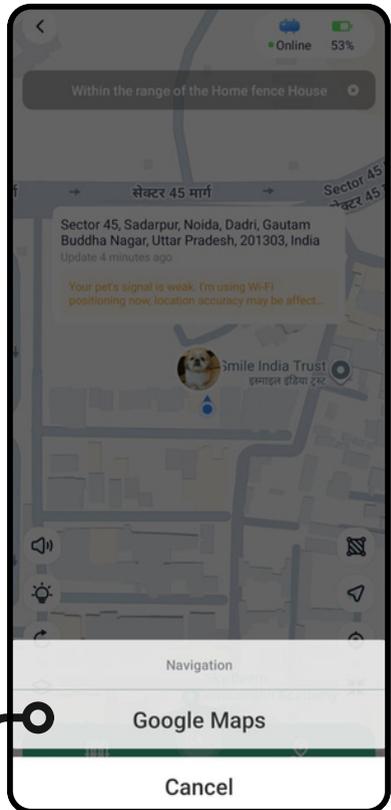

And **Playback** history to see where all they went.

Inviting a Guardian of your pet like your family member or close friend lets them track your pet too.

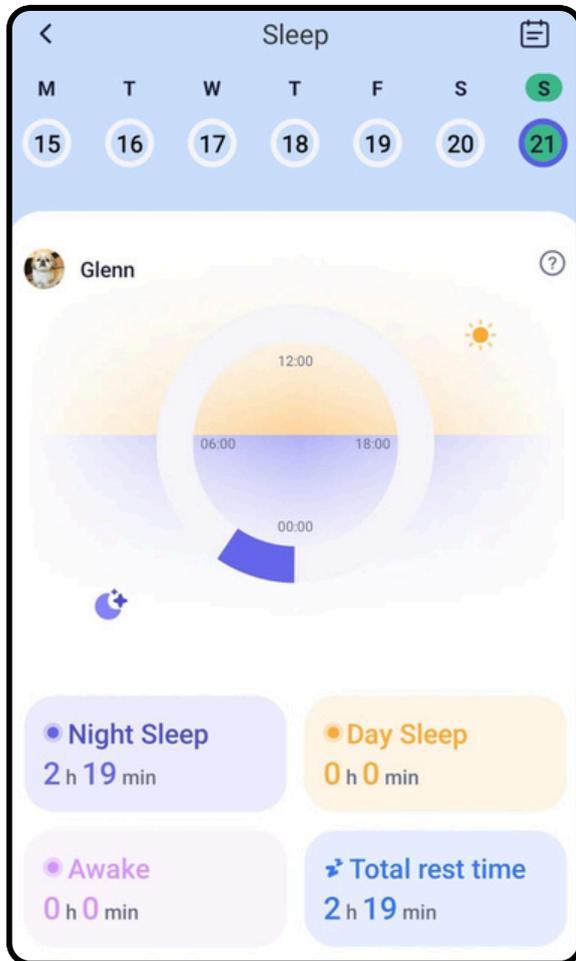

You can also share a temporary *Google Maps* link of your Pet's latest location with people whom you don't want to give Guardian access.

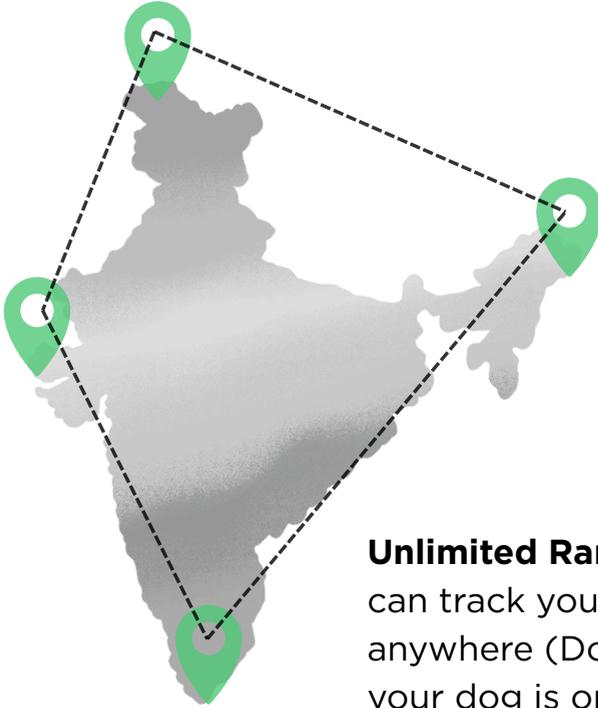

Share link Via

At the end of the day all we want is a Good sleep! And to make sure that we have **Sleep** tracking so that you can make sure your Pet always have a Good Night's Sleep.

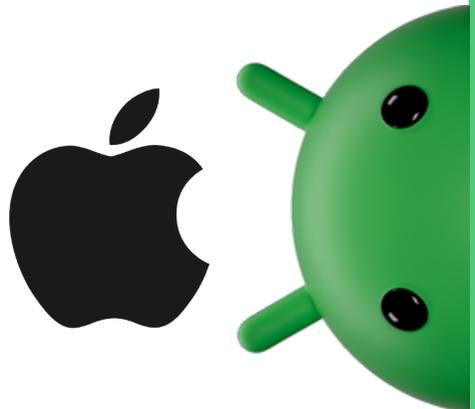

Benefits Beyond

Unlimited Range within India, you can track your Dog literally from anywhere (Doesn't matter where your dog is or you).

Cross Platform support, be it an iPhone or Android, every device is welcomed.

RoverLink is free from any technical in-capability when it comes to tracking because we use GPS, GSM & LTE (best for the use case), **Independent Operation.**

Works even in **Remote places.** Thanks to bandwidth switching.

Comfort, Safety & Convenience.

Designed to be comfortable on your Dog's collar, the tracker is light weight, compact & subtle.

The tracker is internationally certified with RoHS, CE & GSMA. User safety prioritized.

The app is designed in such a way that even those who are not tech savvy would still be easily able to use it.

RoverLink™ is one of the first pet-tech company to engineer their product/s keeping Indian Dog and their owners, Culture & Environment (Network, Infrastructure, etc) in mind.

~~Difference?~~

Different Breed.

**With RoverLink comes
the confidence.**

Microchips are not for tracking

Chipped dogs need to be brought to a Vet with a scanner to get owner details, Roverlink eliminates this.

Airtags aren't made for Dogs

Limited range due to dependency on Apple's Find My Network & Bluetooth range, Roverlink uses GPS - we know where they are no matter how far they go.

Pricing & Purchase

RoverLink™ - Dog GPS, Activity & Sleep Tracker is MRP at ₹8,999 (inclusive of tax).

Further, there is a monthly/quarterly/annual Subscription fee on the app (As it uses Cellular Network) mentioned below;
