Briefly about effepack

We are a **manufacturer** specializing in **solutions that accelerate packaging and transport processes** in your warehouse. Our flagship proprietary products include **packing tables, turntables/wrapping machines, warehouse tables, and specialized trolleys**. Everything we create is based on our many years of specialized experience in this field.

We have always been fascinated by the possibility of creating **products that are better than others** – products that have a **positive impact on their surroundings**. They assist in work, help businesses grow, and solve problems. These values guide us in every project we undertake. As a result, we always offer only what meets these standards.

Our efforts are highly appreciated by our clients. **Proof? You can see it in the References.**

Guido Kneier

Administration, PEP

It is also worth highlighting the professionalism and reliability of the effepack consultants. Communication with the company's representatives was always prompt and to the point. All our questions and concerns were addressed in a competent manner.

We are very satisfied with our choice of effepack as our warehouse equipment supplier.

Laura Flügel

SMT Germany GmbH

We found the right table at effepack. The dedicated shelves helped organize the area around the work surface, and the aluminum top increased the durability of the workspace. The electric height adjustment is an ideal solution that is easy to operate and requires no physical effort.

The after-sales service is efficient, and the consultants are eager to provide additional information.

We highly recommend working with effepack.

The table we received meets our expectations. The packing process is now more efficient and much faster. The shelves are conveniently positioned, so we don't waste time organizing tools, as everything is ergonomically arranged.

The store's customer service is professional and assists at every stage of the order. Everything is clear and straightforward, with any concerns addressed immediately.

We recommend effepack as a reliable and trustworthy partner.

As part of the investment in our new logistics center, we have chosen professional packaging systems from effepack. When selecting the packaging systems, we were impressed by the wide range of options, modular design, and variety offered by effepack's products. The efficient packaging processes ensure increased productivity and faster flow of goods. Special mention should be given to the positive order processing, reliability, and personalized after-sales service provided by competent staff. Therefore, we highly recommend effepack products.

Florian Pielsch

Logistik Manager

All of our requirements were met by the packing tables we ordered from effepack. Work has significantly sped up, employees are less fatigued, and their workspace is neat and organized.

Another big advantage is the fully professional customer service. The consultants are knowledgeable and can quickly provide answers to any questions we have.

Niklas Becker

ACV Electronic GmbH

The analysis of the online store's offer led to the creation of a packing station that we were able to fully customize to our needs. Since the table was installed in our warehouse, our employees have been able to perform their tasks faster and more efficiently. Ergonomics have also improved, making the packing process much more enjoyable.

In summary, we are pleased to give effepack's representative positive feedback and look forward to future projects together.

Packing table for parcels

40+
accessories to choose from

90 000+
configuration combinations

7-year
warranty

One warehouse table - thousands of possibilities!

Increase work efficiency

A perfectly tailored workstation is the key to increasing efficiency.

An increase in efficiency by up to 100%!

Reduce the number of mistakes

Perfect organization of everything necessary ensures a certain increase in effectiveness.

Improvement by up to 50%.

Take care of the products

Choose solutions that ensure the safety of your products.

Up to 100% safety.

Improve work ergonomics

Ensure quality, hygiene, and work safety, and focus on health-promoting solutions.

100% certainty of increased satisfaction!

40+ accessories to choose from

That's truly an **enormous amount**, but it's precisely what makes our warehouse table so unique! We've taken care of every little detail so you can **simplify your team's work to the maximum** and shift its burden to an excellent tool.

Every centimeter utilized

The table is divided into **several zones**, each designed **for mounting different, dedicated accessories**. You have the right and left sides of the table, the front panel (also divided into two parts), and the area directly beneath the tabletop at your disposal.

Discover a truly sturdy table

You'll recognize the quality of this product just by its weight! We use only **thick-walled steel**, mostly welded together. We've minimized bolted connections, thereby achieving **excellent stability**.

You will love this ergonomics

Our warehouse table has been designed to take ergonomics to a whole new level! Each accessory can be **mounted at a height selected by you** to suit factors such as the operator's height.

90 000+ combinations

Modularity is the key word if we want to create a tool that will truly improve warehouse processes such as order picking, returns handling, or inventory management. **Configure the table** exactly as you need it!

Ready for any task

We offer a **variety of materials** for the table top. Choose one based on your needs. Indestructible? Gentle on products? Resistant to liquids? No problem!

Gastronomy table

For working with food

Working with food and food products is a demanding and specific process, which is why we have designed a tool to make it **easier** and **faster**. This is the only product that is so **specialized** and **dedicated!**

Specialized warehouse chairs

A combination of comfort, quality, and convenience

Specialized **chairs and stools** that are ideal for any warehouse. The seats and backrests are **made from soft, anti-slip polyurethane**, which, in addition to its **remarkable durability**, is very easy to keep clean.

Mechanisms equipped with backrest angle adjustment (for chairs) allow for perfect position customization. Meanwhile, footrests are made of chrome-plated steel to enhance their durability.

All of this ensures that these chairs and stools will perform well even in more demanding conditions.
