

H.I.V.E. Ops Core COMBAT LINER

Compatible with Ops Core with OCC Dial Liner

P/N 4-4032 (3/4" Pad Thickness), P/N 4-4031 (1/2" Pad Thickness)

P/N 4-4034 (3/4" Deluxe Kit), P/N 4-4033 (1/2" Deluxe Kit)

Standard Ops Core H.I.V.E. configuration

Deluxe Ops Core H.I.V.E. configuration

Product Overview

H.I.V.E. Combat Liner by 4D Tactical (Patent Pending)

Key Features of H.I.V.E. Retrofit Kit

- Improved comfort- Padding conforms to wearers individual head geometry, eliminating hot spots
- Improved Blunt Impact Protection- 4DT suspension technologies have shown to provide significantly Improved blunt impact protection over standard OEM padding
- Moisture Wicking – Padding wicks heat and moisture away from wearer, creating a natural cooling effect
- Easy Retrofit-Remove padding and install pads using existing OEM Velcro discs
 - Completely Modular- Split crown accommodates over the head comm gear
- Berry Amendment (10 U.S.C 2533a) Compliant

Space Age Technologies

The 4D Tactical H.I.V.E. Retrofit Kit offers the most technologically advanced suspension systems available. This technology was originally developed for US SOCOM and other Tier 1 first responders around the globe. The suspension system (padding) is a rate and temperature sensitive material that conforms to wearer's unique head shape. These materials provide unparalleled comfort, fit, and stability. The H.I.V.E. retrofit kit leverages all of the existing 4DT retrofit offerings in a completely modular kit. Standard 8-pad configurations available in 1/2", 3/4", and 1" thicknesses. Optional 10-pad kit configuration also available.

Performance

Both Independent and DoD testing have shown 4DT suspension systems provide superior blunt impact as well as ballistic performance over current OEM, DoD GFE, and aftermarket suspension system product offerings.

See Marine Corps SMART-TE ACH Test Results on Reverse: 20 companies provided product samples and white papers. 5 products were selected to advance. 4DT Products in 2 different configurations made up 2 of the 5 selected. Down select for final gate was a 4DT kit configuration, significantly outperforming ALL other competitive product offerings as well as current GFE 7-Pad Product.
