The secret to summer beauty: proper skin care

Exfoliation is so important during the summer as it removes dead skin cells, unclogs pores, and reveals a brighter complexion. It enhances product absorption, allowing sunscreen and moisturizers to work more effectively. Exfoliating also helps prevent ingrown hairs, promotes an even tan, and maintains smooth skin texture.

Salicylic acid is an excellent pore-clearing ingredient because it exfoliates the surface of the skin and penetrates into pores to remove oil. This helps to prevent pores from becoming clogged and can help remove clogs that have already formed.

As an oil-soluble BHA, salicylic acid has the ability to remove any excess oil and dead skin cells, it works by breaking down the "glue" between the cells to exfoliate and decrease oil secretion.
