A man with short, light brown hair and a serious expression is shown from the chest up, wearing a brown jacket over a dark t-shirt. He is looking slightly to the right. To his left, a large, light brown dog with floppy ears is looking towards the camera with its mouth slightly open. The background is a soft-focus forest with green trees and sunlight filtering through the leaves.

They cover more than 70% of the Earth's surface, but have been explored less than the moon. *mareTV* examines how we have harnessed our seas' potential – as a human habitat, a field of scientific research, a workplace, and a place of leisure. Join a crew of Spanish fisherfolk harvesting shellfish and feel the force of the waves as they crash against the rocky coastline. Come along and watch the annual ice golf championship off the shores of Greenland. And hold your breath while Hawaii's best pilot takes his plane down to skim the breakers.

# Master Blenders: The New Spirit of Whisky

The New Spirit of Whisky casually overtakes the prejudice that whisky is a purely male domain. The film follows three female protagonists in their everyday work. Master blenders have a central function in the distilleries. As chief chemists, they are responsible for the flavor compositions and breathe an individual soul, a spirit, into every whisky. We immerse ourselves in the universe of taste, in a centuries-old craft that is nonetheless constantly changing, which has helped whisky to experience a new boom in recent years.
