Reinforcement

HAIL & BIRD NETTING

BENEFITS

- ✓ Increase produce yields
- ✓ 5-year UV warranty
- ✓ Wide array of customization options

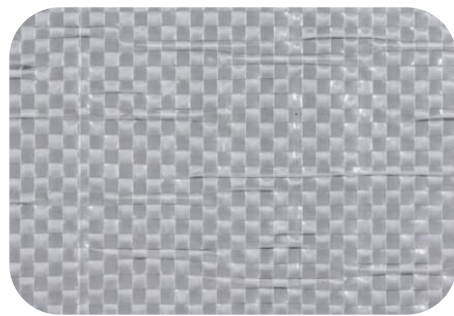

STANDARD FEATURES

- ✓ 118" wide x 546 yds
- ✓ Reinforcements 9-10cm wide on edges, 12-14cm wide midline
- ✓ White with other colors available on request

RAIN PROTECTION

Woven polypropylene fabric provides durable protection for produce from frost, heavy rain and hail when installed above crops.

Cost effective light weight material is easily supported by existing shade structures, helping to maintain indoor warm temperatures.

10394

RAIN PROTECTION

BENEFITS

- ✓ Yield improvement; fruit not damaged or swollen from rain
- ✓ Can be re-used season to season
- ✓ UV protection, warranted for 5 years

STANDARD FEATURES

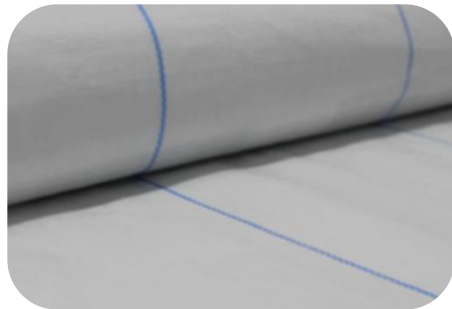

- ✓ 3.1oz/yd² weight available in all widths
- ✓ 10' and 12' wide
- ✓ 500 LY put-up
- ✓ White color

FROST FABRIC

White woven polypropylene allows plants to breathe while protecting them from overnight temperature drops.

Keeps snow or hail away from plants, while allowing light, air, and water to pass through.

Durable enough to use for multiple seasons and protect plants from insects, but light enough that plants aren't damaged when covered.

17132-WH

FROST FABRIC

BENEFITS

- ✓ Prevent stunted growth caused by radical temperature changes
- ✓ Prevent soil erosion from heavy rain fall and runoff
- ✓ Flexible and light enough to wrap around bushes, ferns, or landscaping

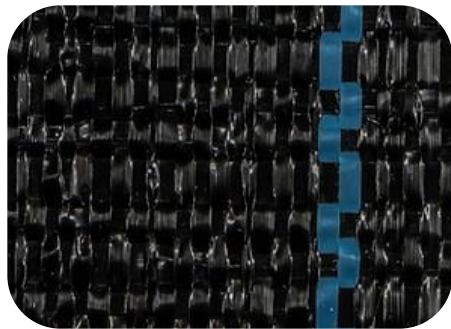

STANDARD FEATURES

- ✓ 3.2oz/yd² weight available in all widths
- ✓ 4', 12', and 15' wide
- ✓ 100 LY put-up
- ✓ White color

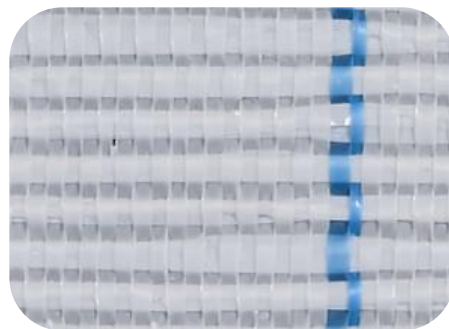

GROUND COVER

UV stabilized polypropylene ground cover fabric is used by professional nurseries and landscapers in a variety of applications.

Provides a weed-free environment for plants while allowing water, nutrients, and liquid fertilizer to be absorbed through the fabric.

90932-BK

17132-WH

GROUND COVER

BENEFITS

- ✓ Protects plants from weather extremes
- ✓ Prevent soil erosion from heavy rain fall
- ✓ Simple plant placement along 12" marker lines

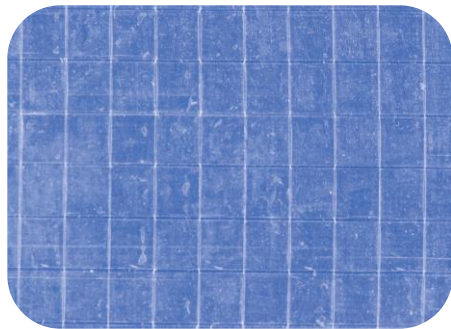

STANDARD FEATURES

- ✓ 3.2oz/yd² weight
- ✓ Black: 3', 4', 6', 12' widths
- ✓ White: 4', 12', 15' widths
- ✓ 100 LY put-up
- ✓ White color

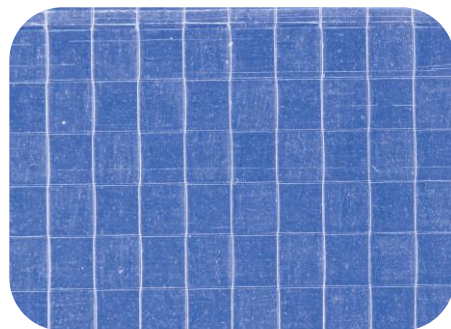

GREENHOUSE CURTAIN

Heavy Duty extruded HDPE scrim laminated on both sides with LDE for strength and clarity

Allows for full spectrum light passage for even crop growth. Heat retention at night can be supported with IR/AD additive.

10253-GH

10270-GH

GREENHOUSE CURTAIN

BENEFITS

- ✓ Protects plants from weather extremes
- ✓ Needed light flows through
- ✓ Smoothly rolls out
- ✓ Accelerated weathering shows no discoloration after multiple years

STANDARD FEATURES

- ✓ 5.3 or 7 oz/yd² weights
- ✓ Colors: Clear or White
- ✓ Widths: 96", 120" 144"
- ✓ 400 LY put-up

WINTERIZATION PROGRAM

Preparing greenhouses, outdoor crops and livestock for winter weather conditions.

The suggestions contained in this package are for agricultural and horticulturally based businesses growing plants and supporting livestock.

They are provided as options to help prepare crops for winter-like weather conditions, including snow, ice, and cold temperatures.

We at Acadian are pleased to help a customer examine these offerings based on his/her needs.

Product warranties are based on performance as promised in our specifications.
