AN EXCELLENT CAREER CHOICE

Exceptional Project Management capabilities can bring about positive change in society.

The Project Management profession represents one of only a few recession-proof career options. This is because there is a global demand throughout numerous industries for professionals with scarce and critical skills in Project Management and Controls.

This demand calls for effective and empowered leadership in which industry professionals possess the real-world expertise to retain control over a project's progress and ensure its optimal delivery – whether the project scale is small, large, or mega.

Your competence as a suitably qualified Project Team Member will cement your reputation as an industry leader and provide you with a fulfilling and lucrative career.

Let's begin on that journey at Ernest Lehman today!

MASTERCLASSES EDUCATION

An education that focuses on you

Studying at Ernest Lehman is an unmissable, one-of-a-kind opportunity to embark on a remarkable career as a Project Team Member.

Our curriculum empowers you to bring superior value to the Project Management and Controls profession. We also enable you to work successfully in any relevant organization or industry within a global context.

The Faculty at Ernest Lehman is passionate about transferring knowledge and expertise to future generations of outstanding Project Team Members.

Along with the most up-to-date theoretical knowledge we instruct you in the real-world challenges of the profession. Your continued success is our biggest educational concern.

In-depth knowledge

Critical skills

Business acumen

A world-class education in Project Management

"With personalized mentoring and coaching from experienced industry professionals, you are empowered to move mountains in your Project Management career."

Message from the CEO

Working in the industry for over 40 years in various Project Management roles has convinced me about [the importance of mentoring and coaching up-and-coming talent](#). It's the most productive and sustainable way to pass on knowledge from experienced practitioners and is fundamental to the profession's future success.

In my own work at corporations such as Hatch, Fluor, Anglo American, Debswana Diamond Company, De Beers Group, and Murray & Roberts, I gained valuable hands-on experience in Project Management and Controls.

Together with my work at global oil and gas companies such as Shell, Total, Caltex, Mobil, Engen, Sasol, and BP, this developed my expertise and shaped my thinking on important professional issues like leadership.

I nevertheless always understood the importance of continuous education. This includes the theoretical knowledge that one learns in books and other training materials and the practical insights one must obtain to apply subject knowledge in the real world where projects succeed or fail.

Since 2014, I have been working alongside knowledgeable colleagues to improve the profession through educational activities that involve hands-on mentoring and coaching with junior and established Project Team Members.

We should never underestimate the lasting, positive impact of seasoned Project Team Members who guide less experienced or even novice members of the profession as role models.

Plowing our expertise back into the broader Project Management profession is the most effective way to ensure that standards of knowledge and competence remain at the highest levels.

This satisfying educational work has motivated me to lay the groundwork for a fully-fledged Academy that offers in-depth learning opportunities to both established businesspeople and first-time students with no prior experience in the field.

At Ernest Lehman, our curriculum allows students to gain expert qualifications that are aligned with the highest international Project Management certification standards.

Through the power of education, we strive to uplift novice, junior, and experienced Project Team Members. This top-quality training will leave the profession in the most capable hands going into the future.

The Aim of the Masterclasses Education coursework

Streamlining and flow are integral processes for the success of any organization's projects.

Ernest Lehman prepares you to handle these processes with confidence and skill – arming you with the knowledge and savvy that you will need in your future career to guide any project from cradle to grave.

Through top-quality education, we empower you to become a valuable Project Team employee in numerous industries. With your Ernest Lehman knowledge and skills, you will benefit your employers by ensuring positive outcomes for their projects and always protecting their bottom line.

Successful completion of the Masterclasses Education stream enables students to enroll in the Executive Education stream.

The Advantages of an Ernest Lehman Education

Our students are trained to maintain the highest, internationally recognized standards in their work as Project Managers:

- ▶ Understand how to lead any project throughout its entire lifecycle.
- ▶ Judge the scope, timing, and cost of your projects with precision.
- ▶ Implement cutting-edge methodologies to streamline your project processes.
- ▶ Exercise disciplined Project Controls that guarantee project success.

A Personalized Education

The Ernest Lehman Approach

Each student's individual needs are assessed throughout their studies to create a bespoke learning experience. Through talent analytics, we measure your competencies and guide you to focus on the strengths that will make you stand out in your future career.

You have access to specialist lecturers with decades of real-world experience in the Project Management field.

The theory that you learn is always rooted in practice. The case studies that you are exposed to are chosen to give you the know-how that you will use daily in your career as a Project Team Member.

Additional Benefits

Students at Ernest Lehman are [guided through an Individual Development Planning system](#). This empowers them to identify and strengthen their competencies to make informed and advantageous career decisions.

As part of this in-depth personalized competency and career development package, you will have access to:

- ▶ Development Reports
- ▶ Talent Match Reports
- ▶ Coaching and Mentoring Sessions
- ▶ Interview Practice Sessions

Build a solid foundation with MASTERCLASSES EDUCATION

This program consists of four successive certification components:

- ▶ Basic Certificate
- ▶ Foundation Diploma
- ▶ Diploma
- ▶ Advanced Diploma

Throughout, you will build up a PoE (Portfolio of Evidence) for immediate and relevant use in the growing market for Project Team members.

As students advance through the program, they gain a [stronger foundation in the core subjects](#) – which are studied in increasing detail with each Masterclasses qualification.

An Ernest Lehman Masterclasses Advanced Diploma enables students to enroll in the Ernest Lehman Executive Education stream.

A state-of-the-art blended learning experience

Ernest Lehman's live online Learning Management System (LMS) gives you complete access to your classes and learning materials.

Classes are presented in the format of webinars, online work sessions, and online Q&A sessions.

Our online and distance e-learning training model enables you to study from anywhere in the world, while still benefitting from personalized interactions with our expert Faculty.

Additional opportunities will be arranged to meet in person and strengthen your learning by giving you direct access to industry experts and fellow students.

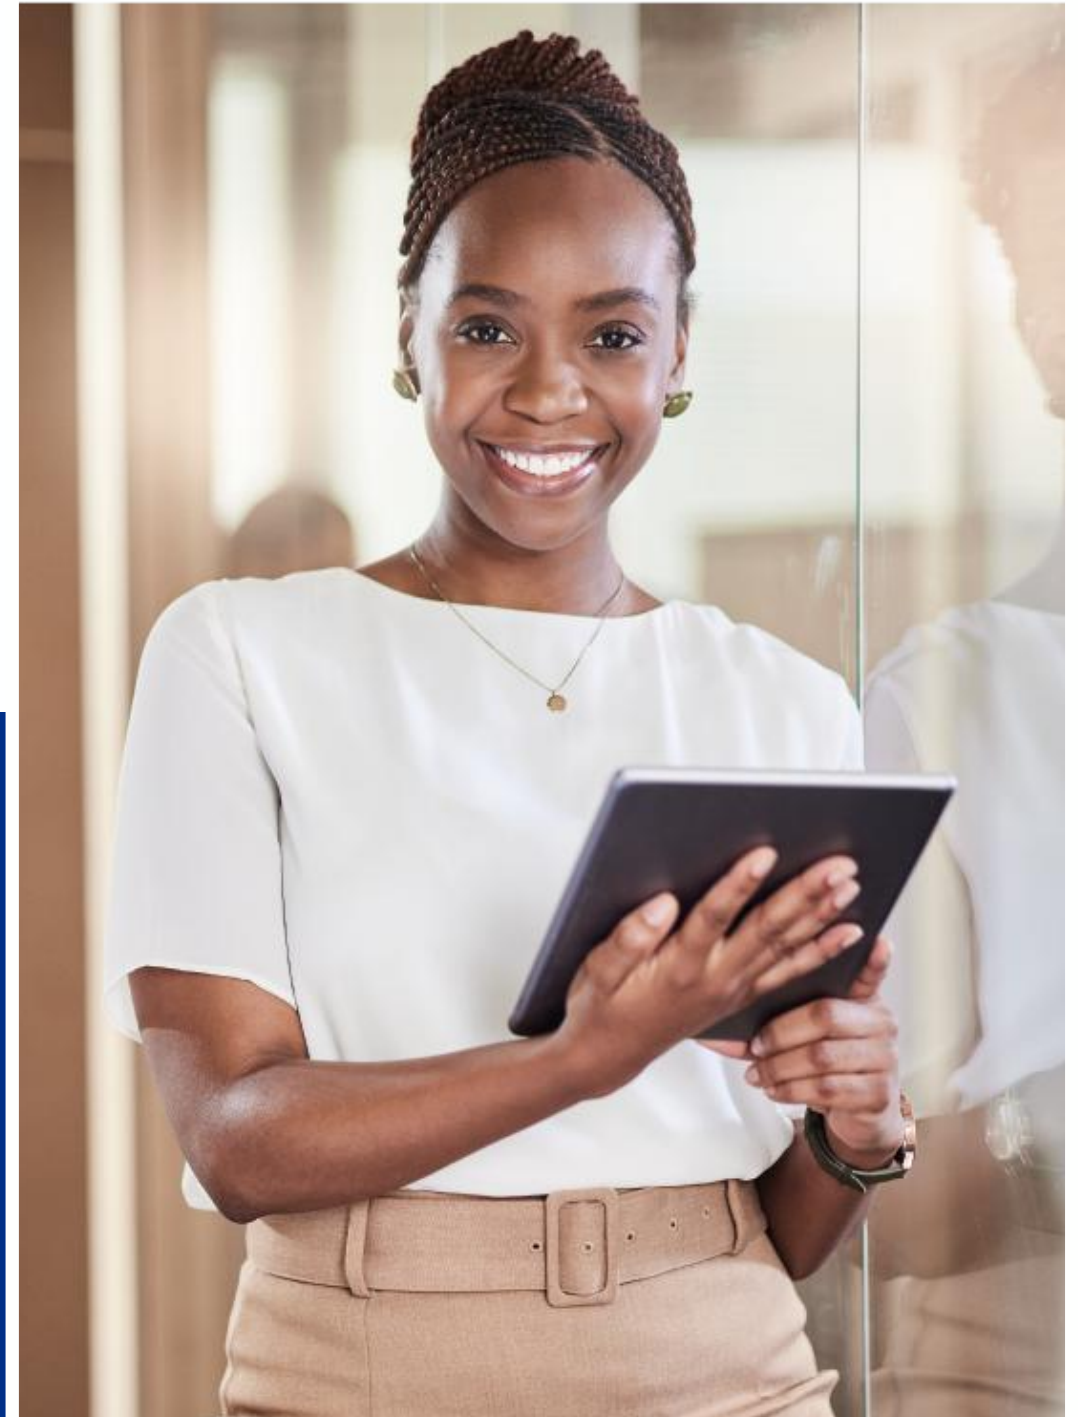

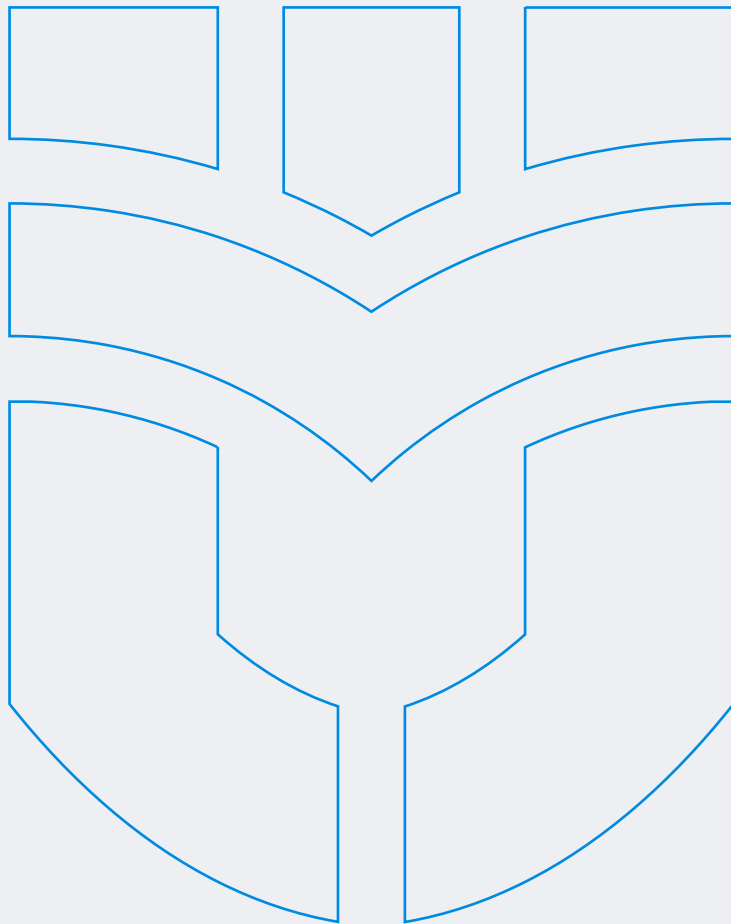

Assessment

The Masterclasses Education program is completed through assignments that form part of a Portfolio of Evidence (PoE). This body of work receives in-depth assessment and critique from Faculty and other relevant industry experts.

Students gain from continuous assessment throughout the course, which tests their competencies and makes use of talent match and development reports to guide them in choosing an appropriate career direction.

After completing the Masterclasses Education coursework you can apply to write the required examinations for your ISO certification of your qualification. There is a compulsory one-week pre-exam course to prepare for these examinations.

International Certification

Ernest Lehman is partnered with international accreditation bodies that provide ISO (International Organization of Standardization), PMP (Project Management Professional), and IPMA (International Project Management Association) certifications.

Our curriculum is accredited by:

International Accreditation Service (IAS)

United Kingdom Accreditation Service (UKAS)

ANSI National Accreditation Board (ANAB)

CPD Certification Service

Standards Council of Canada (SCC)

We follow the United States Council for Higher Education Accreditation (CHEA) rules and regulations.

Admission requirements

- ▶ For Masterclasses Education, you need to be a minimum of 16 years of age.
- ▶ Students with a K-12 high school certificate and those with artisan training in technical and vocational skills are both welcome.
- ▶ No previous working or tertiary study experience is necessary.

Language and literacy requirements

All classes, correspondence, and learning materials are in English.
Computer literacy and access to computer equipment are essential.

Application procedure

Apply before each term's closing date.

- ▶ Supply the relevant documentation – including notarized or certified transcripts that need to be in English or translated into English.
- ▶ There is a flat \$55 application fee.
- ▶ Additional registration fees vary and form part of the overall cost of the specific course you apply for. These registration fees must be paid to receive proof of registration that allows you to take classes.
- ▶ This entire process takes place within 10 to 12 days.
- ▶ Ernest Lehman offers four enrollment opportunities per year.

Schedule a call if you have any questions about the application procedure.
