CENTRAL INTERPET

2024

About Us

Through innovation and expertise, we make **Caring for creatures at home** more enjoyable and successful for everyone.

Established for more than 70 years, Interpet started with the manufacture of aquarium products and has grown over the years through product innovation, brand development and acquisition to become the broader pet company it is today.

Having established a UK based, market leading position with a reputation for great product innovation, quality and market development, in 2004 Interpet was acquired by the US giant, Central Garden and Pet.

Central's ownership created a great opportunity to introduce Interpet's products to the US market, but also to grow the strong customer relationships in the UK and Europe, by offering great potential to distribute Central's own US pet brands into new markets.

By merging the market leading, UK based aquatic brands, such as Interpet, Blagdon and Aquagarden, and pet brands Mikki and PetLove pet product brands with Central's own US brands, including Nylabone, Kaytee, Four Paws and Comfort Zone, Interpet is able to offer UK and European customers a vast portfolio of products from leading consumer brands.

Focused on customer service and support, Interpet is committed to supporting customers in growing their business and is proud to offer this great catalogue of products from brands that people want to be a part of.

Since 1991 Investors in People has defined what it takes to lead, support and manage people well for sustainable results. With a community of over 14,000 organisations across 75 countries worldwide, successful accreditation against the Investors in People Standard is the sign of a great employer, an outperforming place to work and a clear commitment to success.

Interpet's Investors in People journey began in 2012 when we committed to working with the standard. Our first assessment, against the 5th Generation Standard, took place in 2014 when we were recognised as achieving Investors in People Core Standard. In 2015, we opted to be re-assessed and were delighted to be recognised as Investors in People Silver, a standard achieved by a mere 6% of the Investors in People Community.

In-House Manufacturing

Interpet has been manufacturing liquid and powder products for the pet industry for over 70 years. We operate to GMP standards and are registered with the Veterinary Medical Directorate (VMD) to produce liquid medicines for the Pet Aquatic trade.

Our capability is in the blending of bulk liquids and powders to fill a variety of bottles ranging from 25ml up to 10 litre jerry cans. This also includes the filling of 1,000 litre IBC's. Our powder filling operation ranges from small 100g bags to 10kg tubs.

The production facility is supported by an on-site Quality department with full laboratory services to provide quality and consistency using full batch control and traceability systems. Our 6,000ft warehouse facilities provides storage of both components and finished goods.

Distribution

Interpet has been working closely with Great Bear for many years. Great Bear is a leading 3rd party UK logistics business providing nationwide dedicated and shared user warehousing and distribution solutions. They operate in excess of 7 million sq. ft. of warehousing and operate a large modern commercial vehicle fleet.

DIGITAL MOTOR TECHNOLOGY

Digital motors convert less electrical energy to heat than conventional pump motors, saving energy. Microprocessor control and monitoring allows for a host of convenient and energy saving features for your pond or water feature.

Motor protection system

If the pump detects that the motor is clogged or jammed, it will pause and display scrolled text:

MOTOR JAMMED, CLEAN IMPELLER, CLEAN ROTOR...

When the clogging is removed the pump can safely restart.

Run dry protection system

If the pump detects it has run out of water it will pause and display scrolled text:

WATER LOW, ADD WATER...

When water is added the pump will safely restart.

Flexible power usage control and display

Stop, start, increase or decrease power and flow at the push of a button for optimum performance and maximum energy saving.

Soft start

When the pump is turned on, the flow will slowly increase to its pre-set position. This reduces pump wear and reduces stresses on pipework and filters fitted to the system, decreasing the risk of leaks and damage.

Pond Oxygenator
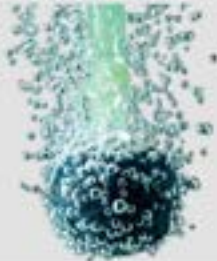

Essential aeration for a healthy pond, specifically designed for larger ponds.

TO RUN AIR STONES

THREE YEAR 3 GUARANTEE

- Outdoor weatherproof water garden air pump.
- Increases oxygen in warm weather.
- Helps prevent freezing during the winter, reducing the potential build up of toxic gases.
- Treatments and medications can reduce oxygen levels in your pond. Support your fish with additional aeration and circulation when they need it most.
- An economical method of water movement and circulation.

Flora Boost - An essential trace element product ensuring that all water garden plants grow healthily and flower freely. Supplies key chelated iron in a form that can easily be taken up by plants – gives this product its unique purple colour.

Ammonia Remover - Instantly reducing high levels of Ammonia which is toxic to all the aquatic wildlife in your pond. Dangerous levels of Ammonia can only be identified with a pond test kit.

Flora Boost 250ml
Code: 2697

Ammonia Remover 500ml
Code: 2633

Pond Guardian Tonic Salt

This is a physiological salt based around the 4 major salts that freshwater fish need to thrive. By adding salt to a pond you relieve stress (Osmotic) on the fish.

The Methylene blue in the product allows nitrite from water to be removed. It can be used to support other treatments such as Anti Parasite. Acts as a pH buffer, prevents damaging swings in pH whilst maintaining stable levels for pond fish.

Pond Guardian Tonic Salt 2.27kg
treats up to 2,273 litres
Code: 2695

Pond Guardian Tonic Salt 9.08kg
treats up to 9,092 litres
Code: 2694

Bio Start - Supplies the family of good bacteria to the pond reducing the time it takes for the ecosystem to establish by 50%.

Wildlife Bio Activator - A liquid alternative to Bio Start.

Code: 2714

pH Adjuster for Acid Ponds 205g
Code: 2713

Feature Algae Control will reduce the occurrence of unsightly green water, slime and blanket weed in free standing water features. This treatment should be used monthly to prevent build up of algae and keep your water feature crystal clear.

Feature Lavender Scent - a tranquil lavender aroma for your water feature.

Feature Clear will control and clear free standing water features of all common forms of unsightly and smelly bio- fouling such as cloudy water. This treatment should be used monthly to prevent a build of waste and keep the water crystal clear.

Feature Algae Control 250ml
Code: 2745

Feature Lavender Scent 125ml
Code: 2751

Feature Clear 250ml
Code: 2741

Feature Clean Away - Keeps features clear of unsightly, dirty & cloudy water. A great ongoing maintenance treatment.

Feature Rapid Clean - A fast and effective one shot treatment for unsightly, dirty & cloudy water.

Feature Surface Cleaner - Removes lime scale, bio-fouling and dirt.

Feature Clean Away 385g
Code: 2749

Feature Rapid Clean 100g
Code: 2752

Feature Surface Cleaner 500ml
Code: 2747

Anti Parasite - An effective treatment that builds treatment levels in pond over 5 days to eliminate the parasite problem. This formula is better for fish that are unwell, as it does not hit them hard with strong chemicals in a large one off dose that could kill them. suitable for all pond fish.

2680 Anti Parasite 250ml	2691 Anti Parasite 500ml	2681 Anti Parasite 1 litre
Code: 2680	Code: 2691	Code: 2681

Anti Parasite Extra Strength - A slightly stronger formulation that is suitable for only Koi and Goldfish species, as these are more resilient than other pond fish species.

Anti Parasite Extra Strength 250ml	Anti Parasite Extra Strength 1 litre
Code: 2804	Code: 2805

Anti Ulcer - A unique patented, formulation that treats internal systemic bacterial infections in ornamental pond fish, killing both Aeromonas and Pseudomonas bacteria. The symptoms include swollen eyes, swollen body (Dropsy, the scales stick out like pine cones), sunken belly, ulcers and red sores on the side of the body. Often benefits from a follow up treatment of Anti Parasite as the wounds are often cured of bacterial infection, but the infected site attracts parasites.

Anti Ulcer 250ml	Anti Ulcer 500ml	Anti Ulcer 1 litre
Code: 2734	Code: 2692	Code: 2735

Anti Fungus and Bacteria - combined product as body fungus and mouth bacterial infections are impossible to distinguish by looking at. A blend of ingredients built over 5 days to minimise fish stress and maximise effective treatment.

2678 Anti Fungus and Bacteria 250ml
Code: 2678

Anti Fungus and Bacteria 500ml
Code: 2690

Anti Fungus and Bacteria 1 litre
Code: 2679

Anti Fungus and Bacteria Extra Strength - A slightly stronger formulation that is suitable for only Koi and Goldfish species, as these are more resilient than other pond fish species.

All in One Treatment - is an effective all round formula which treats most commonly occurring parasite, fungus and bacteria problems in all types of pond fish.

Anti Fungus & Bacteria
Extra Strength 250ml
Code: 2808

Anti Fungus & Bacteria
Extra Strength 1 litre
Code: 2809

All in One Treatment 250ml
Code: 2767

Stress Away should be used as a disease preventative to support pond fish when their natural ability to fight disease is compromised by stress for example through situations such as: introducing new fish, temperature changes during spring and autumn and times of bad water quality.

All in One Treatment 1 litre
Code: 2769

Stress Away 250ml
Code: 2754

Internal power filter

- **Four stage filtration**
- **High directional flow**
- **Quiet & effective**

Mechanical - Unique bonded floss, carbon pad and foams. Clears water by trapping fine waste.

Purify - Carbon removes dyes, toxins, heavy metals and odours.

Oxygenation & Airation - Clear and healthy water returns to the aquarium.

Biological Ceramic - biomedia, creates healthy water by acting as a home for essential bacteria.

Unique patented non-return valve prevents waste being dumped back into the aquarium when filter is being removed.

Deltatherm **Heaters**

HEATING and temperature control is essential for the health of tropical and marine fish & plants

Easy to adjust, accurate temperature control from 16- 34°C /61-93°F.

On/off light indicates when the heater is operating.

Heat and shock resistant glass for added safety.

Five sizes to suit aquariums from 4-270 litres, the Deltatherm heater range features extra thickened safety glass, a click-control for temperature adjustment and a 2 year guarantee.

- Precise and reliable temperature control

- Double insulated and fully submersible

- Ideal for tropical and Marine aquariums

Deltatherm Flat Heaters

Unique flat heater - Compact Slim design for small aquariums, multi use positioning option, Delta T pre-set concept in all sizes and safe glass free design.

Deltatherm Flat 7.5w Heater
Code: 1690

Deltatherm Flat 15w Heater
Code: 1691

Flexible positioning

1. Hang over the side of the aquarium, attach using the suction cup,
2. Tuck away in the rear filtration area, attach using the suction up,
3. Bury in the substrate.

Constant heat output

The Deltatherm flat heater generates a constant heat output which increases the water temperature by (approx.) 6°C above the ambient room temperature. This makes it ideal for maintaining tropical fish and plants in a small aquarium.

Deltatherm Stat Heaters

Keeps temperature at a tropical 25°c

- Available in 2 sizes (10W,25W)
- For aquariums up to 25L
- Compact design for flexible positioning
- Safe and durable with run dry protection sensor

Flexible positioning

Plant CO2 and Plant Food

Lush plants made easy

Plant Food contains the right nutrients for plants to flourish without nitrates and phosphates. It ensures optimum plant growth without stimulating algae.

Promotes lush, green growth, does not encourage algae. 1 pump treats 20 litres, use daily, most effective when used with Interpet Liquid CO2.

For use in cold water and tropical freshwater aquariums only. Harmless to filters and all species of fish, shrimp, invertebrates, and plants.

Liquid Aquarium Plant Food 125ml
Code: 55121

Plant CO$_2$

Just like house plants, aquatic plants need plenty of carbon dioxide to flourish and survive. Plant CO2 provides your aquatic plants with an additional boost of CO2, in an easy dose liquid.

Plant CO2 ensures optimum plant growth, which also helps outcompete algae.

Liquid Aquarium Plant CO$_2$ 125ml
Code: 55118
