# Words *of the* Wise

SKOPE Refrigeration is a New Zealand-based, family-owned company with a global reputation for designing and manufacturing premium commercial refrigeration solutions. SKOPE products are designed to withstand some of the toughest conditions.

From Alice Springs to Denarau Island, our products are built to last thanks to a robust and thorough design and manufacturing process.

Paired with this is our superior technology where we place control into your hands, allowing you to configure your SKOPE product to the best suit your environment.

## The true beauty of **SKOPE**

The lights are dimmed. The music is humming. The drinks are poured. And at the bar's center is the most elegant element of all...  
your SKOPE Backbar!

- Market-leading dimmable LED full-height strip lighting
- Quieter running with built-in hush mode
- Unrivaled energy efficiency – up to 63% reduction in energy consumption.
- Truly green natural refrigeration technology
- Self-closing swing doors with built-in locking tabs on every door
- Fully front-breathing interchangeable modular cartridge for quicker, safer servicing
- NB: A benchtop is not included with this model. The pictured product includes an optional benchtop, which can be priced and supplied separately

# SKOPE the future is here!

connectEYE

## Compatible with your Fridge, Freezer, or Cool Room

SKOPE-connectEYE is a small device with big implications for commercial refrigeration - regardless of brand. Place the EYE within your existing fridge, freezer, or cool room and start benefiting from your temperature data

The EYE is a portable iteration of the smart controller found in many new SKOPE fridges and freezers. Use the EYE in prior-generation SKOPE products or any other brand of fridge, freezer, or cold room. You can collect temperature data with extreme accuracy, allowing you to:

- Simplify and support compliance management
- Avoid food waste with temperature alerts
- Track door openings on your refrigeration to better understand customer demand

### Take the Hassle out of HACCP Compliance

SKOPE-connectEYE collects temperature data so you don't have to. Easily export at the touch of a button.

### Temperature Alerts to your App

If anything threatens the internal temperature of your fridge, freezer, or cool room, you'll be notified via the SKOPE-connect app.

### Measure Door Openings

Test the popularity of new product in a merchandiser or see how often your fridge is used by staff.

sales@pkce.com.fj

SKOPE: I have come to about this highly decorated quality range, one of its kind cooling & freezing units, in my 18 years of the hospitality business. Has always stood out in performance, reliability & the test of time, the design is very spacious with a gentle open & close door system. The temperature control is superb & very accurate which allows set temperatures to settle down in products very well. Overall, it's safe, built strong & lasts long. It's not just a product but a strong emerging relationship in the market.
