

## **Rule 1 : Dream but strategise**

To make the best car in the world, you cannot just get the best components and put them together. If you add a Rolls Royce engine to a BMW Chassis, Audi Fuselage and Mercedes Electronics - you will get a car that does not move.

## **Rule 2 : Trust the process**

If we use oxygen on fire it will flare up. If we use Hydrogen, it will burn. But if we put them together and form water, it will put out fire. Sometimes the tasks you do have a completely different reason that you cannot imagine.

## **Rule 3 : Discipline**

THE DIFFERENCE BETWEEN IMPROVING  
AND REGRESSING BY 1 PERCENT EVERY  
DAY FOR 1 YEAR

$$1.01^{365} = 37.8$$

$$0.99^{365} = 0.03$$

## Summarised in 3 quotes

- People overestimate what they can do in a year but underestimate what they can do in 10 years.
- 9 mothers can't produce a baby in 1 month.
- Consistency beats talent in the long run.

**But the most important thing**

**If you are not  
having fun, then  
you are doing it  
wrong.**
