About Us..

AFN Sports is one of the biggest manufacturers of sports equipment in South East Asia and also the OEM to various companies in the Europe and Australian market.

We have more than 25 years experience in the industry.

The philosophy of AFN Sports is to produce high quality aluminium sports & athletic products and accessories for the Global market. AFN Sports supplies, delivers, installs and also organize the biggest events.

We are certified by IAAF, German TUV & BWF.

Today, AFN Sports has set its base in Malaysia to take advantage of the economical production costs and at the same time is in a better position to serve the emerging regional market in Asia and around the world.

Aluminium Curbing

Order No. 11260

The aluminium curbing is made from special made anodized aluminium profiles. It is a mobile marker and separator of the running track. The set measures a total length of 400 m. The curbing is 60 mm wide and 50 mm high. The product is certified by the IAAF.

Curbing Socket

Order No. 11320

The curbing socket is made from aluminium. It is sized to match the curbing bolt. The socket is inserted in the ground to receive the curbing bolt.

Curbing Bolt

Order No. 11330

The curbing bolt is made from stainless steel. The curbing bolt is installed at the curbing holder drilled and is fixed inside the curbing socket.

Curbing Holder Drilled

Order 11310

The curbing holder drilled is made from a special anodized aluminium profile. This holder fixes the curbing in the ground. It is fixed via the curbing bolt. The curbing holder drilled measures a total length of 60 mm.

Curbing Holder Non Drilled

Order 11300

The curbing holder non drilled is made from a special anodized aluminium profile. This holder supports the curbing to stay in place correctly. The curbing holder non drilled measures a total length of 60 mm.

Curbing Connector

Order 11290

The curbing connector is made from a special anodized aluminium profile. The part connects two curbing parts which each other. It also supports the curbing parts at their ends for more stability. The curbing connector measures a total length of 120 mm.

Curbing Cover

Order 11280

The curbing cover is made from a special anodized aluminium profile. The part covers the join between two curbing parts.

IAAF 400 METRE STANDARD TRACK, MARKING PLAN

M-1-209

Running Track Signs

Order No. 10790

Running track signs, made from aluminium , 8 lanes

Order No. 10810

Running track signs, made from aluminium, 6 lanes

Order No. 10820

Running track signs, made from aluminium, 9 lanes

The running track signs are made from aluminium. All signs are coloured anodized. The set consists of all required signs for all IAAF certified events.

Ramp for Vehicle

Order NO. 10260

The ramp for vehicle is made from extra strong aluminium. Each ramp measure a width of 500 mm. The ramp is placed on the aluminium curbing to protect it from crossing vehicles. Therefore vehicles can cross the curbing without detaching it.

Water Ditch kit

Order No. 10285

The water ditch kit is made from extra stable aluminium profiles. The water ditch kit consists of several parts. The head piece and side pieces are equipped with angles, which indicates the concrete level at the installation. The angle can be adjusted according to the thickness of the installed flooring system. The two side pieces are also held in place by two cross bars. The crossbars assure that the whole water ditch is aligned correctly. All dimension follow the IAAF regulations.

Water Ditch supply shaft

Order No. 10280

Water Ditch Covering with Rim

Order No. 10270

The water ditch cover with rim is made from heavy duty aluminium profiles. The cover is put on top of the under frame for water ditch cover. The water ditch cover is used to cover the water ditch when not in use. The parts of the cover are connected with tongue and grooves joints. The last piece of the cover is slanted to assure a smooth surface level. The rim allows the item to be covered with the surrounding surface material.

Underframe For water Ditch Covering

Order No. 10310

The under frame for water ditch cover is made from aluminium. The under frame supports and puts the water ditch cover in place. It consists of three parts. All parts can be adjusted horizontally and vertically according to the condition on site.

Water Ditch Hurdle

Order No. 10410

The water ditch hurdle is made from aluminium and a multi layered laminated timber wood crossbar. The water ditch hurdle can be adjusted in height. The heights are 76.2 and 91.4 cm. The crossbar measures a total length of 3.66 m. The crossbar is a square 12.7 cm. The wood is painted with a special paint, which is long lasting even in a strong weather influence.

Standard Ground Socket

Order No: 10330

The standard ground socket for water ditch hurdle is made from aluminium. The socket is designed to match the square hollow profile 80x80 of the water ditch hurdle. The depth of this socket is 350 mm. The cover for this socket cannot be coated. If ordered together with the water ditch kit, the sockets are welded directly to the kit.

Special Ground Socket

Order No: 10340

The special ground socket for water ditch hurdle is made from aluminium. The socket is designed to match the square hollow profile 80x80 of the water ditch hurdle. The depth of this socket is 350 mm. The cover for this socket can be coated with the surrounding material. If ordered together with the water ditch kit, the sockets are welded directly to the kit.

Steeplechase Hurdle

Order No. 10390

Steeplechase hurdles for the 3000 m distance. Length 3.96 m. Easily and quickly adjustable to international competition heights for both women (0.762 m) and men (0.914 m).

- The black and white upper crossbars are made from timber wood
- Weights are welded into the frame thereby ensuring high stability.
- Conforming to IAAF rules and IAAF certified.

Aluminium basic frame profile:
 Total weight approx 80-100 Kg

100390: Steeplechase hurdles for the 3000 m distance. Length 3.96 m. Without crossbar

100390: Steeplechase hurdles for the 3000 m distance. Length 3.96 m. With crossbar

10350: Steeplechase hurdles for the 3000 m distance. Length 5.00 m. Without crossbar

10360: Steeplechase hurdles for the 3000 m distance. Length 5.00 m. With crossbar

Trolley For Steeplechase Hurdle

Order No. 10400

The trolley for steeplechase hurdle is made from an extra strong aluminium profiles. The trolley is used to store and move the steeplechase hurdles. It provides space for one set of hurdles. It is equipped with 200 mm wheels, which allow easy manoeuvring of the trolley on track.

Transport Cart for Steeplechase Hurdles

Order No. 10401

Transport cart for steeplechase hurdles. Made from aluminium with swivel castors and holder for the hurdle base. (1 Set = 2 Piece)

Hurdle Competition

Order No. 10470

The competition hurdle is made from high grade aluminium profiles. The base profiles measure a cross section of 50x50x3 mm. The vertical profiles measure a cross section of 40x40x3 mm. The profile for the height adjustment is 33 x 33 x 3 mm. The crossbar is made from high quality, durable and extremely flexible wood. The wood is painted with a special paint, which is long lasting even in a strong weather influence.

The height of the hurdle can be adjusted in steps from 0.685 m to 0.762 m to 0.838 m to 0.914 m to 0.991 to 1.067 m. The scale for height adjustment is placed in a groove, so it can't be scratched will adjusting the height. The counterweight has to be adjusted depending on the adjusted hurdle height. The product is certified by the IAAF.

The height of the hurdles can be adjusted to all heights which are used in competition. The special laser cut slot provides an exact adjustment of the height. The measuring of the adjusted height is no longer necessary.

The full fill IAAF regulations of the different heights needs different placement of the weight in the hurdle turning moment. For an easy handling a sticker shows which setup is the correct for the adjusted height.

The sticker for the weight adjustment is places in a special slot of the profile. This was done to prevent the sticker from being scratched or destroyed when the hurdles are stacked.

Hurdle Trolley for 20 Hurdles

Order No. 10520

Made from special aluminium profiles. It provides place for up to 20 hurdles. The trolley is easy to be moved and the turning wheels enable to store in any direction.

Hurdle Trolley for 40 Hurdles

Order No. 10530

Made from special aluminium profiles. It provides place for up to 40 hurdles. The trolley is easy to be moved and the turning wheels enable to store in any direction.

Order No. 10510

Made from special aluminium profiles. It provides place for up to 10 hurdles. The trolley is easy to be moved and the turning wheels enable to store in any direction.

Judges Stand

Platform for judges, to seat 6, 8, 10 or 12 people, made of aluminium. The basic framework is constructed from aluminium profiles (80 x 60 x 3 mm) with highly rounded edges. The steps consist of aluminium side profiles which are inserted all around into an end section profile. The guard rails can be screwed on so that the platform takes up less space when stored. The wheels, with a diameter of 250 mm, allow the whole platform to be moved easily by one person. The axes for the wheels are inserted in the basic frame and welded all around.

On request our judges stand available in different colors

- 10010 Stand for 10 people
- 10020 Stand for 10 people with plastic seat
- 10030 Stand for 6 people
- 10040 Stand for 6 people with plastic seat
- 10050 Stand for 8 people
- 10060 Stand for 8 people with plastic seat
- 10070 Stand for 12 people
- 10080 Stand for 12 people with plastic seat
- 10081 Stand for 24 people with plastic seat

Bucket seats available in different colours.

Team Podium

Order No. 10251

The Team podium is made from extra strong special aluminium profiles. It is delivered in three parts. Each piece measures a length of 200 cm and a depth of 60 cm. Its heights are 30 cm, 40 cm & 50 cm. The podium is white powder coated. The top surface is covered with EPDM rubber, which provides anti slip properties. The parts are labelled with the respective numbers 1, 2, 3.

Electronic Measurement & Display Equipment

Order No. 270080

Measures both Tail and Head winds instantly
[Selectable measurement duration]
Measurement duration can be selected from 5, 10 and 13 seconds according to the type of events.
[Real-time display of measurements]
The result of measurement can be displayed instantly on the wind velocity display board (option)
[Power by battery]
Relocation of the display board can be made easily

Electronic Wind Meter

Order No. 10610

The electronic wind meter is an electronic wind measurement device. The recording interval can be adjusted between 5 to 13 seconds. The meter is placed on a telescopic. The item also includes a sturdy transport case.

Display For Electronic Wind Control

Order No. 10630

The display for electronic wind control is used together with Order No. 30430. The display is battery operated. The display is placed on a telescopic tripod. The digit height is 10 cm.

Equipment Trolley

Order No. 10460

Equipment Trolley. Made from aluminium. Platform dimensions: 2 x 1 m, load capacity: 1,000 kg. The sides are 20 cm high, and can be folded down.

Wind Speed Display Board

Order No. 10615

Made from stabile special aluminium profile. White/Blue powder coated.

Our Manuel Wind Speed Display illustrates actual wind speed using two digits and +/- sign. Included 2 digital plastic units.

Athletic Benches

Order No. 11220

Athletic bench made from special aluminium profile. Length 2.50 m, height approx 2.10 m, This bench is absolute weather resistant . the roof is collapsible for a less spacious storage. 4 extra large nylon wheels provide more handling comfort.

ATHLETICS

High Jump & Pole Vault

Crossbar Fiberglass

Order No. 20130

Pole vault crossbar is made from fibreglass. The length is 4.50 m. This item is certified by IAAF.

Pole Vault Box

Order No. 20290

The pole vault box is made from stainless steel. It is made from steel to sustain the big forces which need to be transferred from the pole to the ground. The box is equipped with a drainage system. So in case of rain the water can flow off immediately.

Cover For Pole Vault Box

Order No. 20130

The cover for the pole vault box is made from aluminium. The cover has a rim on top and can be covered with surface of the surrounding.

Pole Vault Upright

Order No. 20010

The pole vault uprights are made from extra stable aluminium. The height for the crossbar can be adjusted between 1.8 and 6.3 m. This item is certified by IAAF.

Guide Rail For Pole Vault

Order No. 20040

The guide rail for pole vault is made from extra strong aluminium profiles. The rail is used for the free standing pole vault uprights. The rail allows an easy positioning of the uprights. The rail needs to be fixed with ground anchors or additional weights.

Ground Anchor For Pole Vault

Order No. 20030

The ground anchor is made from aluminium. The anchors are placed inside the ground. They allow an easy fixing of the guide rail on to the floor. One set consists of eight ground anchors.

Pole Vault Mat

Order No. 20080

Pole vault mat, size 8 x 6 m, with protective mesh lath, designed to be spike-proof throughout the complete landing surface including the wedge padding and at the sides down to the ground – guaranteed optimal air circulation. Wear mat firmly attached. Gap protection in the landing area via additional intermediate layer. Two-part overall cover with reinforced box area. Highly elastic, stable poly foam blocks (hollow chamber foam). Included aluminium bar frame

Pole vault mat for training

Order No. 20060

Pole vault mat, size 8 x 6 m, with protective mesh lath, designed to be spike-proof throughout the complete landing surface including the wedge padding and at the sides down to the ground – guaranteed optimal air circulation. Wear mat firmly attached. Gap protection in the landing area via additional intermediate layer. Two-part overall cover with reinforced box area. Highly elastic, stable poly foam blocks (hollow chamber foam). Included aluminium bar frame

Pole Vault Rain Cover

Order No. 20090 (650 x 500 x 90cm)
Order No. 20100 (800 x 600 x 90cm)

The pole vault rain cover is made from water proof PVC. It prevents the mat from getting wet during rain or watering. It is available in different sizes.

pole vault bar frame

Order No. 20200 - (8.00 x 6.00m)
Order No. 20210 (6.50 x 5.00m)

The pole vault bar frame is made from aluminium. For this product special aluminium profiles are used. The profile ensures good support on the bottom of the mat. It raises the mat, so it will not soak wet if water is on the track. Additionally it also allows the air to circulate underneath the mat. The bar frame also ensures that the mat stays in place. It is available in different sizes.

High Jump Mat

High jump landing mat., with protective mesh lath, designed to be spike-proof throughout the complete landing surface including the wedge padding and at the sides down to the ground – guaranteed optimal air circulation. Wear mat firmly attached. Gap protection in the landing area via additional intermediate layer. Two-part overall-cover with reinforced box area. Highly elastic, stable poly foam blocks. (hollow chamber foam). Including aluminium bar frame.

Order No	Size (cm)	Intermediate Layer
20370	600 x 300 x 60	No
20380	600 x 400 x 70	No
20400	600 x 400 x 70	Yes 
20430	500 x 300 x 60	Yes
20440	400 x 300 x 60	Yes
20450	400 x 300 x 50	Yes
20460	400 x 300 x 60	Yes

high jump bar frame

The high jump bar frame is made from aluminium. For this product special aluminium profiles are used. The profile ensures good support on the bottom of the mat. It raises the mat, so it will not soak wet if water is on the track. Additionally it also allows the air to circulate underneath the mat. The bar frame also ensures that the mat stays in place. It is available in different sizes.

Order No	Size (cm)
20520	300 x 400
20530	300 x 500
20540	600 x 300
20550	600 x 400

Order No	Size (cm)
20521	400 x 300
20531	500 x 300
20541	600 x 300

High Jump Bar Frame Mobile

The aluminium bar frame serves as the perfect base for high jump mats. The aluminium bar frame is absolutely essential for facilities which have to be assembled and taken apart or combined with a safety cover.

high jump rain cover

The high jump rain cover is made from water proof PVC. It prevents the mat from getting wet during rain or watering. It is available in different sizes.

Order No	Size (cm)
20470	400 x 300 x 60
20480	500 x 300 x 60
20490	600 x 300 x 60
20500	600 x 400 x 60

High Jump Stands

Order No. 20560

High jump uprights. Manufactured completely from high-grade aluminium profiles. Made from a profile with the dimensions 50 x 50 x 3 mm and with rounded edges. The bar holders and uprights are completely anodised. The measuring scale is inserted in the profile (in a groove) and so protected from scratches even when the height is being regularly adjusted. All the screws are made of stainless steel. The height can be adjusted from 50 to 300 cm.

Order No. 20510

High jump uprights.
 Height 2.50 m

High jump lath, fiber-glass material

Order No. 20350

The crossbar for pole vault is made from fibreglass. Length: 4.00 meter

Mobile Aluminium Safety Cover

Order No. 24000

Mobile safety cover, for pole vault landing mat, Made from aluminium, for Pole Vault Landing Mat Size: 8.00 x 6.00 m

Order No. 24010

Mobile safety cover, for High Jump Landing mat, Made from aluminium, For High Jump Landing Mat Size: 4.00 x 3.00 m

Order No. 24020

Mobile safety cover, for High Jump Landing mat, Made from aluminium, For High Jump Landing Mat Size: 5.00 x 3.00 m

Order No. 24030

Mobile safety cover, for High Jump Landing mat, Made from aluminium, For High Jump Landing Mat Size: 5.00 x 4.00 m

Order No. 24040

Mobile safety cover, for High Jump Landing mat, Made from aluminium, For High Jump Landing Mat Size: 6.00 x 4.00 m

Safety covers for high jump & pole vault landing mat. Made from extra strongspecial aluminium profiles. The internal framework is constructed to ensure that the cover can withstand the highest physical demands despite having a significantly reduced weight in contrast to standard covers.

Available in all dimensions The advantages of our cover at a glance:

- Cover surface is made from extra strong, silicon-sealed aluminium profiles (can withstand a load of over 300 kg / m²).
- Cover surface is slightly sloped – for optimal drainage.
- Inset double wheels (Ø 200 x 50 mm) ensure easy movement
- Welded handles.
- The two-section facilities come with an integrated drip moulding.
- Include parking rail to make sure there is no impact at the surface.

Zacharias Crossbar SUPER WINDFEST

Order No. 20330

The "Zacharias "crossbar is the safest practice crossbar available. It is made of vinyl tube with rubber cables at both ends which are fixed to the stands. Zacharias Crossbar SUPER WINDFEST, inflatable, more flexible, does not vibrate during wind. Includes new nozzle! Stample, leak-proof and safe!

- Perfect visibility (like a competition crossbar)
- Expands more than 1 m, and bounces back
- Harmless
- Does not break or cause the posts to fall
- Inflatable (type: "SUPER WINDPROOF") for increased stability in wind

Run Up Marker

Order No. 11410

The run up marker is made from stainless steel. It is used to mark the begin of the run up of the athlete. The marker is available in different colours.

20250

Height Measuring Stick

Order No. 20250

Height Measuring Stick for High Jump, aluminium, telescopic adjustability from 0.85 to 3.00 m with spirit level. Height display through window.

20260

Order No.20260

Height Measuring Stick for pole vault, aluminium, telescopic adjustability from 1.70 to 8.00 m with spirit level. Height display through window.

Hammer, Discus,
Shot Put, Javelin

competition aluminium discus and hammer cage 7/10 m

Order No. 30290

Order No. 30290 D (Double Net)

Competition aluminium discus and hammer cage 7/10 m

The competition aluminium discus and hammer cage is made from extra sturdy aluminium profiles. The profile measures a cross section of 120x100 mm. The wall thickness rises from four to six mm. In the lower part the 10 m posts are additionally reinforced with a cross bracket. The gate of the cage can be adjusted by one person only. All posts are equipped with a spacer to keep the net in the correct position. The cage is equipped with a knotless UV protected PP net. The net measures a thickness of 5 mm and a mesh width of 45 mm. The net can be raised and lowered by devices on each post. One set consists of six 7 m posts, four 10 m posts and two gates with trolley.

Hammer Inlay Ring Fibreglass

Order No. 30140

The hammer inlay ring is made from white fibreglass. The inlay can fit in the discus ring. The inside diameter of the inlay ring measures 213.5 cm. The ring consists of four pieces. The parts are joined with slot and key.

Hammer inlay ring wood

Order No. 30150

Hammer throwing circle, with IAAF-certification, This two-section hammer throwing circle reduces the diameter (of a discus circle) to 2.135 m and is made from weatherproof multiplex laminate. The edges of the circle are protected by special aluminium profiles. The hinges between the two sections of the circle are made

Competition discus cage 4 m

Manufactured from stable aluminium and fitted with a high-quality safety net. Made in conformance to IAAF and with IAAF certification! Safety cages for discus throwing manufactured to international specifications and certified by the IAAF. The 7 uprights for this safety cage are made from aluminium Profiles (Ø 120 x 100 mm, wall thickness 2.5 mm) and as a result combine stability with ease of handling. The advantages of these safety cages:

- With these safety cages dangerous work with ladders is not necessary because the assembly process (including attaching the net) Takes place from the ground.

- The oval profile prevents the twisting of the uprights.

30070: 4.3 meters high, Incl. net and sand bags, Post profiles (Ø 120 x 100 mm, wall thickness 2.5 mm) IAAF certified

30080: 4.3 meters high, Incl. net and sand bags, Post profiles (Ø 120 x 100 mm, wall thickness 4-6 mm) IAAF certified

30060: Free standing version

Competition Take-Off Board (Synthetic Material)

Order No. 40140

The competition take-off board synthetic material is made from UV resistant synthetic PE. The PE is long lasting and maintenance free. The board measures 122 x 34 x 10 cm. The parts of the board are connected with screws. The board includes item no. 10070. This item is certified by the IAAF.

Competition Take-Off Board (Hardwood)

Order No. 40130

The competition take-off board hardwood is made from multilayer laminated hardwood. The wood is painted. The board measures 122 x 34 x 10 cm. The parts of the board are connected with screws. The board includes item no. 10070. This item is certified by the IAAF.

① Blanking Board

② Training

③ Competition

Take-Off Board as a turning beam for Training and Competition

Order No. 40150

Take-off board. The "three in one" (122 x 34 x 10 cm) take-off board provides maximum flexibility. The individual segments can be simply taken out and turned around so that the take-off boards can be used in three separate ways.

1. Take-off board for competitions, reversible profile with an inlay for the indicator board.
2. Take-off board for school sports or training. In this case the reversible profile just has to be turned round.
3. Take-off board used as a blanking board.

The aluminium carrier profile of the "three in one" take-off board is covered with a hardened running track synthetic. Both the running track synthetic and the white plastic on the take-off surface are additionally UV stabilised to prevent the colours from fading.

Control Strip With Synthetic Material Filling

Order No. 40090

The control strip is made from synthetic material. The strip is used for competition purpose only. The control strip is in accordance with the IAAF Rule 185.

Inlay Profile From Timber Wood

Order No. 40080

The inlay profile is made from timber wood. The profile is shaped to match with the take off board exactly. This item is used for training purpose only.

Inlay Profile From Rubber And Aluminium

Order No. 40100

The inlay profile is made from aluminium and rubber. The profile is strengthened by a aluminium structure. It is filled with synthetic material. This item is used for training purpose only.

Proof Puller

Order No. 40270

The proof puller is made from aluminium. It is designed to ensure the correct shape of the plasticine.

Template Timber

Order No. 40120

Template timber, for exact positioning of plasticine

Run Up Markers

Order No. 40220

The run up markers are made from aluminum. They are welded in a single piece. The item is used to mark the starting point for the run up. The markers are available in assorted colors.

Take Off Markers

Order No. 40210

The take-off markers are made from aluminium. They are roof shaped. The marker has white with black stripes on both sides.

Tape Measurement

Order No. 10980

The measurement tape is made from fiberglass. The length of the measurement tape is 10 meter.

Long Jump Sand Pit Covering

Order No. 40180

The long jump sand pit covering is made from polyester net fabric. The synthetic material is surrounded by seam. The used materials are water permeable and spike proof. The seam is supported by an link chain to increase the weight of the covering. The weight is about 400 g/sqm.

Aluminium Sand Trap

Order No. 40420

The aluminium sand trap is made from special aluminium profile. The dimension of the sand trap is 100 x 50 x 12 cm. The sand trap consists of the trap and aluminium grate and a rubber mat. Due to the lightweight the sand traps are easy to handle during the installation.

Measuring Board for Long Jump

Order No. 40190

The measuring board for long jump is made from aluminium. The surface is white powder coated. The board shows distances from 3 to 9 m. The distance is marked on both sides of the board.

Measuring Board for Triple Jump

Order No. 40200

The measuring board for triple jump is made from aluminium. The surface is white powder coated. The board shows distances from 3 to 9 m. The distance is marked on both sides of the board.

This rake and shovel is highly recommended for professional use. It is engineered to the specifications of the landscapers. Extended striking edge on this rake was designed specially for grading.

② Rake with handle

Order No. 10300

This rake is highly recommended for professional use. The rake is equipped with a handle. It is engineered to the specifications of landscapers. The rake is designed especially for sand surfaces.

③ Sand Smoothing with Handle

Order No. 10301

This Sand Rake is highly recommended for professional use. Engineered to the specifications of landscapers and sand ground. Extended striking edge on this rake was designed specifically for grading.

④ Track Broom

Order No. 40260

The track broom is made to clean the track. It is completed with a handle. The width is 1000 mm. This track broom is highly recommended for professional use. It is engineered to the specifications of landscapers. The broom makes it easy to keep the track clean.

Elastic Curbing

Soft Curbing of polymer concrete with EPDM rubber profile in black or white are special structural elements for bordering tracks, separating fields and setting boundaries of jumpa pits or shotput areas. The rubber profile is encapsulated in the polymer concrete and provides the highest degree of safety due to the elasticity of the material and the rounded edges. Cross-sections of 5 cm provide numerous means of individual design.

Hockey

Hockey Goal Post (Dismantle)

Order No. 90080

Hockey goals (3.66 x 2.14 m), 'Competition. Dismantle version for export. Complies with latest FIH regulations and requirements for international competitions.

Hockey goals, 'Competition' model, made of aluminium, white powder coated and with freely hanging net suspension. With this construction the net hangs freely in the goal frame so that the ball cannot bounce back out from the net support tubes. For quality and ease of handling this hockey goal is unrivalled and the following features set it apart:

1. The net hangs freely in the goal frame so that the ball cannot bounce back out from the net support tubes.
2. Goal frame profile (75 x 50 x 5 mm) which significantly reduces denting due to ball impacts
3. 30 mm thick side and backboards made of wood-reinforced aluminium profiles, coated with EPDM to reduce ball rebounds.
4. Double transport rollers for easy moving.

Field Hockey Goal Net

Order No. 90010

Knotless field hockey goal net in approx. 3 mm high tenacity. Made from polypropylene. Mesh size 4.5 cm, width 3.66 m, height 1.80 m, top depth 90 cm, bottom depth 120 cm. Green colour. Made in Spain.

Order No. 90000

Knotless field hockey goal net in approx. 2.5 mm high tenacity. Made from polypropylene. Mesh size 2.5 cm, width 3.66 m, height 1.80 m, top depth 90 cm, bottom depth 120 cm. Green colour. Made in Spain.

Technical Shelter 2.5m

Order No. 90280

Technical Shelter for Hockey, made from high-grade aluminium profiles and welded in a one-piece construction. The robust construction and easy handling of our high quality Technical Shelter make them most impressive. The whole rear side of this cabin is made from plastic sheets. Lower section lined with aluminium,

Further features:

- Curved roof.
- Synthetic glass (Acryl) all around.
- Included writing table.

Standard size:

Standard length: 244 cm

Height: 250 cm

Roof overhang: 40 cm

Ground depth: 150 cm

Weight: approx. 220 kg

Order No. 90285

Length on request

Outdoor Hockey Barrier

Impact Board for Hockey Fields

For attachment to barriers and fences. Made from EPDM with aluminium core. The board is sloped so that the hockey ball is deflected downwards. The individual boards are connected with internal adapters. Dimensions: height 20.5 cm, thickness 8.5 cm top, 4.5 cm bottom. The hockey board is available in red, blue and green color.

Huge problems are experienced on many hockey pitches with extreme damage to the fence and barriers caused by the impact or the hockey ball. The hockey board protects the lower area.

Indoor Hockey Barrier, wooden/aluminium construction with special connecting mechanism. Barrier inner side with plastic-impact protection profile. Set consists of 32 barriers à 2.50 m (Weight à approx. 14 kg), easy set-up, space-saving storage.

Order No. 90240

Length 2.50 m (1Set included 32 pieces)

Order No. 90230

Length 2.00 m (1Set included 40 pieces)

Order No. 90250

Transport trolley for indoor hockey barrier. The transport cart for indoor hockey barrier is made from aluminium. It is equipped with four wheels, which allow a comfortable manoeuvring. The trolley provides space for a complete set of indoor hockey barrier.

Protective Nets for Hockey Pitches

Order No. 92200/92250

Protective nets for hockey pitches. The net is made from polypropylene 4 mm, mesh size 44 mm high tenacity and available in different colors. The lower area contains a lead cord weighting approx 600g per meter. The spacer bracket (92250) is made from aluminium and produced in dimensions corresponding to the dimensions of the fence post.

Huge problems are experienced on many hockey pitches with extreme damage to the fence and barriers caused by the impact or the hockey ball. The backstop net protects the fencing.

100250: with aluminium backboard

100251: with acrylic backboard 180 x 105 cm

Our movable basketball stand (overhang 1.65 m) is designed especially for outdoor playing fields. The basic frame is made from aluminium profiles. The galvanised and powder coated steel basketball ring is bolted through the backboard into the main frame construction. The backboard is made from white powder coated special aluminium profile (1.80 x 1.05 m). Counterweights can insert into the stand and secured. The net is made of nylon (white) and is 6 mm thick. The big transport wheels (6 pieces per post) and transport pulley provide a good handling comfort. If the system must be moved through a low area the backboard can be flapped down easily. Delivery includes: movable frame construction, steel ring, weights, a backboard (1.80x 1.05 cm), nylon net and a trolley (provided with each purchase of one stand or a pair).

100270: Padding for basketball mobile system. The padding is linked to the frame .It fits exactly to hide the post.

100261: Lifting roller. The lifting roller for basketball mobile is made from aluminium. It is used to move the basketball mobile version around easily. It is equipped with two wheels to lift the backstop up and move it around on its wheels.

Competition Soccer Goal Post Free Hanging System

Order No. 110120

Professional football goal type, Dimension 7.32 x 2.44 m. Compliant with the latest FIFA requirements. The goal post frames (100 x 120 mm), with a 2.5 mm wall thickness, are fitted with our integrated net suspension system. Goal corners (with corner strengthening on the insides). The goalposts are joined to the crossbar by means of a connecting plug and this guarantees enormous stability along with the option of dismantling the goal (for example for space-saving storage). The net hooks are integrated directly into the goal frame. This means that there are no external hooks, screwed or welded on, the net can be hung up or taken down easily and there is a significantly reduced danger of injury. Two net support poles are included. The goal post is white powder coated. 8 years warranty

Counterweights

Order No. 110070

Counterweights. Made from aluminium and filled with weight approx 125 Kg/Set. Counterweights which can be screwed on to our junior goals. The weight can also be used for existing AFN junior goals as it fits exactly. The 4 polyamide wheels allow a junior goal which is fitted with this weight to be moved forwards and backwards.

INFO

SECURING GOALS

Caution: danger of tipping! According to the regulations of local accident prevention federations and DIN/EN, movable goals must be secured against tipping. For example, with a junior goal with a 1.5 m base depth, a 125 kg counterweight

is necessary to ensure a stability of 1100 N in accordance with DIN/EN.

For junior goals with ground frames of rectangular profiles

100 kg – for a depth of 2 m

125 kg – for a depth of 1.5 m

Ground Anchors

Order No. 111210

Multi Soccer Court

The boards for these soccer courts are made of aluminium side profiles (double-walled, wall thickness 2.3 mm) bordered in a U-profile with a radius of 2 mm and completely welded. The boards are approx. 1 metre high. The individual boards are screwed in front of the upright posts with stainless steel screws (M10). These upright posts, 3 metre high altogether, are made of rectangular aluminium profiles (80 x 60 mm, thickness 3 mm, radius 5 mm). Rubber mats are placed under each fastening position to reduce the noise levels. For the freestanding version, counterweights (each weight approx 20 kg) are placed on the base frames of the posts. Sockets or weights are included. The net is hung up via rings which are fitted onto the outsides of the boards through which a rope can be threaded. The entrance door (in the standard version: width 1 m, height 3 m) is a part of one board (for an additional charge more doors can be fitted) and is opened outwards. Fully welded doors, 3 x 2 m, made from high-grade aluminium. The front frame is made of square profiles (80 x 80 mm x 2.5 mm, radius 5 mm). Our AFN integrated net hooks are used for the net suspension. In the standard version, the nets are made of polypropylene (PP), 4 mm thick, with a mesh size of 120 x 120 mm. The net is fixed on via rings welded on to the boards and on the upper parts of the upright posts. The net encloses the court completely up to a total height of 3 metres. On request and for an additional price, the 'flexible' soccer court can be extended with further board elements, but also with mini-goals, basketball rings or volleyball equipment. The complete construction is made from aluminium and that makes it extremely robust and weather-resistant.

Order No.

DIVIDING CURTAINS ELECTRIC

Technical features

An electric motor positioned in the centre

A rotor axle equipped with take up reels for the tapes.

A set of tapes that will support the lower counterweight whilst simultaneously transferring the rotary movement of the shaft

A canvas screen made from polyester and covered in PVC (the curtain)

A lower counterweight which provides the canvas with the appropriate tautness or rigidity when rolled

An anchoring system that is designed and measured specifically for each facility.

With two doors opening means Velcro-zip or similar

Engine features

Driving torque	300 NM.
Speed	12 RPM.
Absorbed power	1000 W.
Tension	380/3
Protection index	IP-45

Draws required for the development of the curtain
Auxiliary substructures are included for a curtain hung on a beam.

Manual Divider Curtain "Walk Draw" Mixed Net & Canvas PVC

AFN Sports divider curtain is designed and manufactured to divide the indoor sports facility into more than one court in order to hold multiple sport activities at the same time without interference. As it is a product of great use in facilities, it has been designed to work in a very simple manner without the need for complex maintenance.

The manual curtain is manufactured to be hung and rolled through a rail. The guide rail is made from special aluminium profile; the roller (every 30 cm) is made from nylon and specially designed for long lifetime.

Net made from high tenacity polypropylene 3 mm, mesh 45 mm, knotless.

Canvas made from PVC 650 gr/sqm.

Fireproof and available in different colours.

Backstop Post Mobile

Backstop Post Mobile
Made from special aluminium profile. Dismantle system.
Included 4 piece nylon turning wheels with brake.
Available in different heights.

Backstop Post for Soccer Height 4, 5,6,7,8 m

The backstop in ground sockets is in a ground socket fixed backstop system.
Backstop Post in Ground Socket System included (for 25 m length!)
6 piece post m made from Aluminium 120 x 100 x 2.5 mm
Lower part included aluminium special profile
6 piece ground socket made from aluminium 120 x 120 x 800 mm
2 piece cross bar for start & end post
3 piece stainless steel cable incl. turnbuckle
Net made by polypropylene 4 mm, green colour, mesh 100 mm
UV protected, Imported from Europe
On request the backstop post system is available in other dimensions.

3, 4 & 5 Row Benches

Our multi-use aluminium spectator stand is manufactured in the standard version with three levels of seats 3 metres long. There is ample space for up to 18 persons (6 persons per level). The different levels also guarantee a good view of the events taking place. The complete construction of our versatile spectator stand is manufactured from aluminium. The seating area and the steps are made from special aluminium profiles and are additionally anodised and treated to be non-slip. The stand comes in kit form which can be assembled (3 supporting legs, 3 benches, 2 foot rests and the necessary screws and bolts). The robust construction means not only that on-site assembly is quick, it also guarantees that the spectator stand is highly durable.

Swedish Bench (ALULINE)

Swedish bench, made by aluminium special profile, 30 cm wide High 30 cm, seat anodised color.

Order No.

130180 : Length 3.00 m

130190 : Length 4.00 m

130170 : Length 5.00 m

130200 : Length 6.00 m

Aluminium Bench (PARIS)

The locker bench is made from special aluminium profiles. All profiles are designed with rounded edges. The seating profile measures an extra-large width of 300 mm. It measures a height of 45 cm. The bench is welded in one piece. It is also equipped with a shoe tray. The item is powder coated. There are assorted colours to choose from. The bench is available in different lengths:

130500: Length 2.00 m

130510: Length 3.00 m

130520: Length 4.00 m

130530: Length 5.00 m

130540: Length 6.00 m

130550: Length on request

Bleacher Mobile TOP

Order No. 130250

Our "MOBILTOP" bleacher can be used unlimited - in- and outdoors for every kind of activity. Within a short time 50 seats become available! By simple add-on of the sets the seat capacity can be increased. Another advantage is the little storage room. Due to a special moving system the single bleacher parts can be put into each other, so the whole system only requires a storage area of approx. 4 m². The seats and walkways are made from special aluminium profiles and are additionally anodised and treated to be non-slip. One complete set consists of 5 blocks of different lengths (one of which is a staircase).

Total length 8.75 m. Depth 1.85 m. Height 0.85 m.

Retractable Seating

SPECIFICATION

BENCH SHELL : HIGH DENSITY POLYETHYLENE BLOW-MOLD.

Deck Frame : Steel deck frame is base on platform that will cover loading of spectators. It is composed of front girder (60 x 40x 2.3mmT), rear girder (125 x 75 x 3.2mmT) and intermediate steel connector (60 x 40 2.3mmT), which is strong enough to maximum load of spectators on the platform and space of every intermediate steel connector less than 500mm distance for safety & stable and is welded properly to front & rear girder. Front channel steel sheet (200 x 80 7.5mmT), of first row is for connecting the operation device i.e. Electrical operation units. Deck Frame can be connected parallel direction another one and fixed the Handrails one side. The size of deck frame is 5250mm width and 1800mm (2row) depth follow to type of scales required.

Platform : The deck frame welded firmly shall be covered with 18mm thickness plywood for sound absorption. The platform shall be also finished by carpet with wooden colour or other various colour with section. Manufactures standard size of platform is same as deck frame.

Finish Of Under structure : Main steel parts of under structure, i.e. Deck Frame, Support Column & Braces etc. shall be painted with alkyd primer (1st Coat) and finish urethane paint (2nd coat) for rust and dust free under the cruel environment, such as seaside, swimming pool, etc..

Manual Pulling Unit : Manual pulling unit included for one (1) or two (2) person and two (2) wheels (PVC/rubber Ø 3" x 1¼" T) and shall be connected into the hole on front face or first row. Its dimension will be available to change follow to length of row and height of blocks.

Second Timer - Timer dedicated to swimming training

Presentation:

- Second timer for swimming practice allowing swimmers to check their own performances.
- White laquered aluminium dial.
- Blue metal casing, plexiglas cristal.
- 4 hands of different colours allowing for a different swimmer to start every 15 seconds. Hands colours: yellow, green, red and black.

Characteristics:

- 24V synchronois movement, 1 tr/min.
- Power supply inside a case mounted on the back of the dial.
- Duplex installation : junction box for 2 timers + non waterproof power supply to be located in a dry room + control pad with a 10 metre cable for timers synchronisation and timers reset.
- Optimal viewing distance: 50m.

www.bodet-sport.com

Front view

Electrical Characteristics:

- Power supply : the transformer (230VAC to 24VAC) is included in an IP54 box connected to the second timer by a 30cm cable.

Mechanical Characteristics:

- Dimensions: 625x625x100 mm.
- IP 65.
- Weight: 13 kg.

Electronic Measurement
& Display Equipment

Seiko W073 Stopwatch – (S23589J)

Features :

- Measurable up to 100 hours in 1/100 seconds for the first hour and in seconds thereafter
- Split/lap time measurement
- Store and recall of up to 10 split/lap times
- Memory recall during operation
- Two separate displays for split and lap time measurements
- Time and full automatic calendar
- Water resistant

Recommended for :

Track events, Road races, Swimming and Motor Sports

Seiko S056 Stopwatch – (S23601P)

Features :

- Measurable up to 100 hours in 1/100 of a second
- Displays split time, lap time, lap time in progress
- Displays up to 999 split / lap times
- Store and recall of up to 100 split / lap times
- Memory recalled after or even during the measurement by easier button operation
- Two separate displays for split / total time, lap / total time, and lap / lap time in progress
- Time and full automatic calendar
- Battery life indicator
- 5-bar water resistant
- Automatic shut off function to save a battery power
- On / off confirmation sound for button operation

Recommended for :

Track events, Road races, Swimming, Ski, Skate and Motor Sports

Seiko S057 Stopwatch 100 Lap Memory

Features :

- Two channel countdown timer
- Each channel can be preset for up to 100 hours
- Measurable up to 100 hours in 1/100 of a second
- Split/lap time measurement
- Store and recall of up to 100 split/lap times
- Memory recall and countdown timer can be used during stopwatch operation
- Two separate displays for split and lap time measurements
- On/off confirmation sound
- Dot-matrix mode display
- Time and full automatic calendar
- Battery life indicator
- Automatic shut-off function
- Water resistant

Seiko S141 - 300 Lap Memory

Features :

- Measurable up to 10 hours in 1/100 of a second
- Split/lap time measurement
- Store and recall of up to 300 split/lap times
- Memory segregated by event
- Multiple event memory
- Memory recall during operation
- Memory overflow warning
- Measures strokes per minute for events such as swimming and rowing
- Large-sized three row display panel
- Time and automatic calendar
- Battery life indicator
- 10-bar water resistant

Seiko S143 Stopwatch (S23569J)

The SEIKO Cal. S143 stopwatch is a digital stopwatch featuring a print-out function when connected to an SP12 printer. The stopwatch is also equipped with a large-sized three-row display panel that can display the split time, lap time and total elapsed time or lap time in progress at the same time in separate rows, and a memory function that stores the measurements. In addition the stopwatch is water resistant and can withstand up to 3 bar. Therefore, it is suitable for aquatic sports or use in rainy weather.

Features :

- 300 Split/Lap Memory with Printer Port
- Measurable up to 10 hours in 1/100 of a second
- Split/lap time measurement
- Store and recall of up to 300 split/lap times
- Memory segregated by block
- ID No. function useful for storing the data of individual users
- Memory recall during operation
- Connectable with printer SFD001J[Cal.No.SP12]
- Large-sized three row display panel for split, lap and total time
- Time and automatic calendar
- Battery life indicator
- Memory capacity indicator
- Water resistant
- The fastest lap time recall function

Recommended for :

Track events, Road races, Ski, Skate, Motor Sports and Swimming

SEIKO SP12 Printer

Features :

- Prints 13 digits per line
- Printing speed of 1.5 lines per second
- Large clear print
- Connectable with S143 & S123 stopwatches to be used as a system
- Printout selection of split only or lap times
- Optional paper holder to install larger amount of paper
- Automatic printout of year, month, date and time

Seiko Large Paper Holder (S23549JA)

Features :

- Holds larger rolls of thermal paper (Seiko S951) and can be used with Seiko S149 and SP12 Printer.

Seiko S149 - 300 Lap Printer Stopwatch (S23571J)

Features :

- Measurable up to 10 hours in 1/100 of a second
- Split/lap time measurement
- Store and recall of up to 300 split/lap times
- Memory segregated by block
- ID No. function useful for storing the data of individual users
- Memory recall during operation
- Large-sized three row display panel for split, lap and total time
- Time and automatic calendar
- Battery life indicator
- Memory capacity indicator
- Prints 13 digits per line
- Printing speed of 1.5 lines per second
- Large and clear print
- Printout selection of split only or with lap times
- Optional paper holder S23549J to install larger amount of paper S951
- Automatic printout of year, month, date, and time
- The fastest lap time recall function
- Compatible with SEIKO Gripswitch - Model S23547J.
- Compatible with SEIKO Paper Holder - Model S23549.

Recommended for :

Track events, Road races, Swimming, Ski, Skate and Motor Sports

Sports Timer ST-306

Sports Timer (ST-306): 1 unit **Battery Box: 1 unit**
Grip Switch: 1 unit

•Features

Being able to serve as either a count-up or count-down timer, ST-306 can be used as timing display system for various sports events including swimming, track race, marathon, walking race, skiing, cycling, and soccer, rugby and basketball and other game.

It can also display game points and deuce points in tennis.

It can measure lap time, split time and finish time.

Either lap or split times of up to 25 runners can be stored in memory for later recall.

It has an auto repeat function.

That counts up/down a preset time repeatedly at given intervals and sounds a buzzer every time the preset time has been counted up/down.

ST-306 can be used as a pace-clock.

Being battery-powered, it can be used both indoors and outdoors.

Stand / ST-020
 W1,000 x H1,000 x D1,000mm

Main Functions

- ST-306 can be set to count up/down to 99 hours 59 minutes 59 seconds, 59 minutes 59 seconds 9 or 59 minutes 59 seconds 99 as required, being able to cover a wide range of sports events.
- The count-up timer can be set to start counting up from either zero or a preset time.
- The count-down timer can also be set to start counting up as soon as it has counted down the set time. This function is useful for the start of a marathon or other races.
- ST-306 can be used in combination with various SEIKO sports timing devices.

Electronic Starter PS-110

System Components

Start Pistol (PS-78): 1 unit Speaker Box (PS-56): 1 unit
 Headset Microphone (PS-61): 1 unit Cable with a termination box (PS-81): 1 unit

Features

PS-110 is an electronic audio-visual start signal generator that can be used for various types of sports events. It generates a start signal with both sound and flashlight.

It does not use gunpowder, and is safe for handling and storage.

Problems involved in the use of a gunpowder pistol such as misfire and powder smoke have been eliminated.

A synthesized firing signal or an electronic beep can be generated, as required.

The Headset Microphone can be used to amplify and communicate the starter's voice to the athletes.

PS-110 can be used alone, with other units of PS-110, or in combination with other devices, to suit your needs.

Specifications

Start Pistol (PS-78)

Strobe	Xenon lamp
Power supply	LR06 "AA" alkaline dry cell x 2 pcs. (DC 3V)
Battery life (alkaline dry cells)	Approx. 1,200 times (Number of times light can be emitted continuously in 1-minute)
Temperature	For use: -10 50 (non-condensing) For storage: -15 60 (non-condensing)
Appearance	Dimensions: W210 x H40 x D145mm
	Material: Aluminum, black gray
Weight	Approx. 410g (excluding dry cells, cord)

Headset Microphone (PS-61)

Output	Impedance, 1.6kΩ, ±30%
Sensitivity	-68dBdB
Type	Condenser microphone
Appearance	Dimensions: W160 x H68 x D170mm
	Material: ABS resin, black
Weight	Approx. 45g (including cord)

Speaker Box (PS-56)

Audio input	-20dB (100kΩ)
Rated output	6W (max. 10W)
Power supply	LR06 "AA" alkaline dry cell x 8 pcs. [DC 12V]
Battery life (alkaline dry cells)	Pistol sound: approx. 8,000 operations until sound pressure falls below 91dB (at a distance of 10m)
Operating sound pressure level	93dB (at a distance of 10m)
Temperature	For use: -5 40 (non-condensing) For storage: -15 50 (non-condensing)
Appearance	Dimensions: W102 x H258 x D216mm
	Material: ABS resin, ivory
Weight	Approx. 1.6kg (excluding dry cells)

Grip Switch

CT-2000 Main

Sports Printer CT-2000

System Components

Sports Printer (CT-2000): 1 unit Grip switch with 2.5m cable (GS-51): 2 units
 AC adapter with 5m cable: 1 unit Roll Paper (RP-03): 1 roll Ribbon Cassette (ERC-22): 1 unit

Features

Being equipped with various measurement modes, CT-2000 can be used for timing of all types of sports events.

Timing down to 1/1,000 of a second is possible.

The method of calculating the fraction of a second can be selected from 10 types including rounding up, rounding down and rounding off, thus making it possible to comply with various timing rules adopted in different sports events.

A large-sized LCD monitor is used to make it easier to check various types of information displayed on it.
 (20 characters x 4 lines)

The design of the grip switch is renewed so that it better fits into your palm and provides easier switch operation.

By using resin case, high durability has been achieved.

If the dry batteries are installed when CT-2000 is powered by AC adapter, the power source can be quickly switched over to the batteries in case of failure of AC power supply, to ensure constant operation.*

Two sets of dry batteries (6 AA size cells per set) can be installed in the main body, and the power source is switched over automatically between them. By replacing the unused set of dry batteries with new ones, CT-2000 can be powered by the dry batteries continuously for a long time.*

Rechargeable batteries can be used in place of alkaline dry batteries.*

CT-2000 can also be powered by external battery.*

* Dry batteries, rechargeable batteries and external battery are not included with CT-2000, and they should be purchased separately if required.

Website: www.waves-qatar.com

Main Functions

The Auto Measurement Mode enables the measurement during individual practices performed alone.

Reaction time (start reaction time: time after the start signal until swimmer's feet have left the starting block), lap time, and split time can be measured during swimming practices.

Lap time and split time can be measured during practices of speed skating, track, and other races.

By outputting a signal to an external buzzer device, CT-2000 can control the device to generate a starting sound automatically.

Even if the actual start time has differed from the scheduled time, the Time Correction Mode (inputting time difference from start time) corrects the scheduled start time set in advance in the secondary CT-2000 units, enabling them to synchronize with the master CT-2000 unit.

The Speed Measurement Mode measures the average speed over a given section of the entire distance.

By connecting a Bib No. input device with CT-2000, the measured times can be printed out together with the Bib No.

CT-2000 can be connected with a personal computer via USB interface.

Two types of time signals (RS-422) are output to the scoreboard (with or without running time data).

A synchronization signal can be output to external devices.

As CT-2000 is compatible with CT-1000, the grip switches, extension unit, synchronization cables, and cables to connect with scoreboard used previously with CT-1000 can also be

Specifications

Display		High-intensity LED
Character height	Timer section	130mm
	Point section	120mm
	Second timer section	110mm
Power supply		AC 100V ~ 240V, 50/60Hz (maximum power consumption: 30W)
Appearance	Main unit	Approx. W650 x H400 x D220mm
	Wireless remote controller	Approx. W44 x H115 x D20mm
	Material	ABS resin
Weight		4.3kg (main unit), 0.7kg (adapter with power cable)

* The dry batteries included with the infrared wireless remote controller are intended for checking its function, and their lives may be shorter than specified.

* If cannot be interlocked with KT-101/01A.

* By using interlocking cable KT-041(80m: option), up to four units of KT-601 can be connected as secondary units to the master KT-601 unit.

* Sports Counter KT-601 is designed for indoor use only.

SHOT Clock

Basketball 24-/30-second timer provided with a large-sized, highly visible display board using high-intensity LED

SHOOTING TIMER KT-401

System Components

- 24-sec. Display Board (KT-401DP): 2 units
- 24-sec. Display Operation Board (KT-401OP): 1 unit
- AC Adapter with 5m power cable (KT-ADP01): 1 piece
- Signal Cable [50m](KT-401CA50): 1 piece
- Signal Cable [30m](KT-401CA30): 1 piece

Features

Display board has a character height of 25 cm in conformity with the International Basketball Federation (FIBA) Official Basketball Rules.

The timer starts counting down from 24/30 seconds, and the buzzer sounds when the time is up.

Start, stop and restart of the timer can be performed easily with a press of a button.

"+" and "-" buttons allow easy adjustment of countdown time.

Example use with tabletop stand KT-022

Specifications

Display	High-intensity LED	
Character height	250mm	
Power supply	AC 100V ~ 240V, 50/60Hz	
Appearance	Display board	Approx. W500 x H338 x D55mm
	Operation board	Approx. W186 x H73 x D182mm
Weight	Material	Display board: ABS resin/Operation board: Steel plate with baked finish
	Display board	Approx. 2.6kg
	Operation board	Approx. 1.1kg/Adapter with power cable 0.7kg
	30 m cable	Approx. 1.4kg
50 m cable	Approx. 2.1kg	

*Shooting Timer KT-401 is designed for indoor use only.
*Stand KT-022 for exclusive with KT-401 (optional).
*To use with KT-401, two units of KT-022 are required.

Game Shot Clock KT-501

System Components

- Display Board (KT-501DP): 2 units
- Game clock Operation Board (KT-501GC): 1 unit
- Shot clock Operation Board (KT-501SC): 1 unit
- AC Adapter with 5m power cable (KT-ADP01): 4 pcs
- Signal Cable [80m](KT-501CA80): 2 pcs
- GC-SC Cable [2m](KT-501CA02): 1 piece

Specifications

Display	High-intensity LED	
Character height	24/30	250mm
	Game Time	130mm
	Time UP	φ 100mm
Buzzer	With two pitches and no volume control (it builds in an indicator)	
Power supply	AC 100V ~ 240V	
Appearance	Game - Shot Clock	W630 x H510 x D70mm
	Game Clock	W186 x H73 x D182mm
	Shot Clock	W186 x H73 x D182mm
	Stand	W520 x H1,400 x D750mm (Option)
	Material	Display board: ABS resin Operation board: steel plate with baked finish
Weight	Game - Shot Clock	6.5kg
	Game Clock	1.1kg
	Shot Clock	1.1kg

Features

A countdown timer that serves as a game clock as well as a 24-second clock for basketball. (It also supports the requirements of the 30-second rule of mini-basketball.)

When the time is up, the buzzer sounds at the same time as the red LED lights up.

* Backboard attachment lug is optional (custom-made item).

KT-501GC

KT-501SC

Example use with KT-501 and dedicated stand KT-013
* Stand KT-013 for exclusive use with KT-501 (optional).

JUDO Timer

A wide range of uses from physical education class in school and judo practice as an extracurricular activity to a full-fledged judo competition

JUDO Timer

JT-601

System Components

JUDO Timer (JT-601): 1 unit
AC Adapter with 5m power cable (KT-ADP01): 1 piece
Magnet plate: 2 pcs

Features

7 modes are provided that are convenient not only for contests but also for training.

- ① Judo 1 (for IJF Rules) ④ Pace setter ⑦ Clock & alarm
② Judo 2 (for Kodokan Rules) ⑤ Stopwatch
③ Programmable Timer ⑥ Timer

Clear multi-color LED display (white, orange, red and green) without uneven color contrast has been achieved.

The color of each contestant (blue, white or red) is indicated by LED.

During Osaekomi, the LED indicating the color of the contestant applying the hold flashes.

Contest and Osaekomi times can be set as desired, and they are retained in memory.

"Golden Score" contest time can also be set as desired.

Point is awarded automatically according to the lapse of Osaekomi time. (Manual awarding can be selected.)

When the contest is ended, the point and color of the winner flash.

Main Functions

event / function	Items shown on display panel	Ex.
1 Judo 1 (for IJF Rules)		<ul style="list-style-type: none"> Contest timer "Golden Score" contest timer Osaekomi timer Point (I: Ippon, W: Waza-ari, Y: Yuko)
2 JUDO 2 (for Kodokan rules)		<ul style="list-style-type: none"> Contest timer "Golden Score" contest timer Osaekomi timer Point (I: Ippon, W: Waza-ari, Y: Yuko) Shido (S1, S2, S3)
3 Programmable Timer		<ul style="list-style-type: none"> Timer that counts from 0 up to 99 minutes 59 seconds No. of times repeated (up to 199 times) Program No.
4 Pace Setter		<ul style="list-style-type: none"> Rhythm (1~9) Tempo (30~255 times/minute) No. of times repeated ● marks on both sides of the display panel visually indicate the tempo
5 Stopwatch		<ul style="list-style-type: none"> Up 199 hours, 59 minutes, and 59 seconds 99 can be measured and displayed Lap time (LP)/split time (SP) mark
6 Timer (with Warning Buzzer)		<ul style="list-style-type: none"> Count down or up timer (Any desired amount of time up to 99 minutes and 59 seconds can be set for the Timer) Measurement in one or 1/10 second increments
7 Clock & Alarm		<ul style="list-style-type: none"> Current time (hour, minutes and seconds are displayed)

Specifications

Display		High-intensity LED
Character height	Contest time section	130mm
	Point section	120mm
	Osaekomi time section	110mm
Power supply		AC 100V ~ 240V, 50/60Hz (maximum power consumption: 30W)
Appearance	Main unit	Approx. W650 x H400 x D220mm
	Material	ABS resin
Weight		Approx. 4.3kg (main unit), 0.7kg (adapter with power cable)

*By using interlocking cable KT-041 (80m: option), up to four units of JT-601 can be connected as secondary units to the master JT-601 unit.

*JUDO Timer JT-601 is designed for indoor use only.

Capable of displaying scores and other information in various indoor sports events.

Multiple-purpose game display system

Available for basketball, volleyball, badminton, table tennis, judo, and karate.

■ Features

Multi-purpose scoreboard equipped with a large-sized full-color display.

Capable of displaying scores and other information in indoor games including basketball (supporting period system, two-halves system, and mini basketball), volleyball, badminton, table tennis, judo, and karate.

Easy time measurement and score input via a dedicated operation board.

* Example use with a stand to guard against balls.

■ Example displays

Basketball

Softball & Cricket
Equipment

Cricket Cage

Cage:

The cricket cage is made from aluminium. The post dimension is 80 x 80 x 3 m with rounded edges. The cage can be installed free stand and in ground sockets.

All screws are made from stainless steel.

Net:

Knotless high tenacity Polypropylene, Thickness 3 mm, Mesh 45 mm

Knotless, White colour. Weight g per sqm 150 g. Burst strength (kn) 1.25.

Polypropylene is recommended for outdoor use. All nets have a fixed selvage of approx. 5-7 mm. Made in Europe.

Advanced Maintenance
Equipment

SportChamp - SC2D/SC2D4HL

Multifunctional ride-on machine for the maintenance of artificial turf.

Technical information:

Drive:	SC2D / SC2D 4HL: 3-cylinder diesel engine, water-cooled/ 18,4
kW (22 HP)	
Traction drive:	hydrostatic, driving Speed up to 10 km/h, hydraulic lifting device for accessory attachments and filter box; differential lock
Capacity of tank:	approx. 30 Litre
Brush working width:	according to the brush: 900 - 1.600 mm
Weight:	starting at approx. 680 kg
Dimensions:	L 2.800 x B 1.320 x H 1.283 mm

Details

Clearly arranged display - easy to operate

SC2D4HL: hydraulic high level emptying up to 2000 mm

SC2D: hydraulic lifting for tipping the filter box

The vibrating screen separates dirt from the infill and spreads the infill on the artificial turf again at the same time

Tires especially for use on grassy surfaces ensure low pressure on the ground

Practical coupling system for mounting all attachments without tools

SportChamp - SC2BL

Multifunctional ride-on machine for the maintenance of artificial turf.

Technical information:

Drive:	SC2BL: 2-cylinder petrol engine, air-cooled, 22 PS
Traction drive:	hydrostatic, driving Speed up to 10 km/h, hydraulic lifting device for accessory attachments and filter box; Differential lock
Capacity of tank:	approx. 30 litre
Brush working width:	according to brush: 900 - 1.600 mm
Weight:	starting at approx. 680 kg
Dimensions:	L 2.800 x B 1.320 x H 1.283 mm

Removable attachments

Rotating brush 1.000 mm Art. No. 6400029

Rotating brush 1.500 mm Art. No. 6400017

Spreading device 800 mm Art. No. 6400133

TurfBoy - TB1

TurfBoy TB1 is driven by a 2-cylinder 16 HP air-cooled petrol engine. The ground-driven rotary brush eliminates suspended particles, abrasion and dirt particles from the top surfaces. Its working width is 700 mm.

Technical information:

Drive:	2-cylinder petrol engine, air-cooled / 12 kW (16 HP)
Traction drive:	hydrostatic, driving Speed up to 12 km/h
Working width:	700 mm
Weight:	380 kg
Dimensions:	L 1.800 x B 900 x H 1.200 mm

Details

Expanded drag brush, working width 1.600 mm

Ground driven rotary brush with adjustable vibrating screen from 4-10 mm

TurfBoy TB1 with drag brush DB1600

TurfBoy - TB2

TurfBoy TB2 is driven by a 16 HP air-cooled petrol engine. Due to its very compact design the machine is ideal for the work on sand infilled tennis courts or sand/rubber infilled pitches such as futsal courts. The working depth of the rotary brush can be adjusted via two spindles. The vibrating screen can be precisely adjusted, with variable settings from 4 to 10 mm, depending and in accordance with the condition of the infill material. You can easily clean the filter by turning the handwheel.

Technical information:

Drive:	2-cylinder petrol engine, air-cooled / 12 kW (16 HP)
Traction drive:	hydrostatic, driving speed up to 12 km/h
Working width:	900 mm
Weight:	380 kg
Dimensions:	L 1.800 x B 900 x H 1.200 mm

Details

Adjustable sieve from 4 - 10 mm

Hand wheel for dedusting of the permanent filter

Unilateral overlapped drag brush row

TurfKing - TK1502

TurfKing TK1502 brush and vacuum system guarantees clean sports surfaces and optimum playing conditions. Conventional brush rows and/or drag mats are not suitable for thorough cleaning of floor coverings/deep cleaning and loosening of sand-filled and/or rubber-filled artificial turf. The 3-point rear-mount type accessory for compact tractors goes with any type of tractors with a power of at least 20 to 25 HP and combines all important basic functions in one machine. The device compact and easy to connect.

Technical information:

Working width:	TK1100 = 1.100 mm TK1500/TK1502 = 1.500 mm
Drive:	PTO adaptor 540 rpm
Weight:	TK1100 = 225 kg TK1500 = 300 kg TK1502 = 270 kg
Dimensions:	TK1100: L 900 x B 1.195 x H 830 mm TK1500: L 1.195 x B 1.655 x H 765 mm TK1502: L 900 x B 1.670 x H 830 mm

Details

Permanent filter with continuous de-dusting of filtered suspended particles

Drag brush with guide pulley

Steel springs for gently loosening of the infilling material

TurfCare - TCA1400

TurfCare TCA1400 maintains any kind of infilled synthetic turf pitches. The wheel drive makes the equipment independent from any hydraulic or power shaft drives. Therefore the TurfCare can be pulled by various vehicles such as small compact tractors or quads.

The working depth can be precisely set and locked via two adjusting spindles.

Technical information:

Working width:	1.400 mm
Weight:	170 kg
Dimensions:	L 1.300 x B 1.800 x H 510 mm

Details

Vibrating screen adjustable from 4 - 10 mm

Tires for gently loosening of the infilling material

Fold-out transport rollers for transverse drive

TurfSoft - TS2

TurfSoft TS2 is a solution as simple as effective for the joy in the game and maintaining the value of small areas with infilled surfaces (sand and sand/rubber). Using this machine you can eliminate suspended particles, abrasion and dirt particles from the top surfaces. The manoeuvrable TurfSoft is ideal for areas with little space to move, where stairs, steps and narrow doorways complicate the access to the artificial turf pitches.

Technical information:

Drive:	1-cylinder petrol engine / 3.2 kW (4 HP)
Filter box :	permanent filter approx. 5 m ²
Working width:	800 mm
Weight:	approx. 85 kg
Dimensions:	L 980 x B 750 x H 570 mm

Details

Foldable steering arm for easy transport and storing in a small place

Extractable filter sieve different sieve sizes available

TurfTuner - TT1600

3-point rear-mount type accessory with variable hitches fits all commercially available utility tractors. It is used for loosening of infilled artificial turf and to straighten the fibres. The infill material is equalized with the trailing drag brush.

The working width is 1.600 mm, the working depth can be precisely regulated by two adjustment spindles. The tines can be replaced on request / if necessary by rows of brushes.

Technical information:

Working width:	ca. 1.600 mm
Weight:	135 kg
Dimensions:	L 1.750 x B 1.400 x H 800 mm

Details

Rows of tines

Adjustment spindle lock mechanism for Working depth

Trailing drag brush, can be folded

CareMax - CM2D

CareMax CM2D is driven by a 17 HP water-cooled diesel engine and can be equipped with several proven attachments for the cleaning and maintenance of artificial turf pitches.

Technical information:

Drive:	3-cylinder diesel engine, water-cooled / 12.5 kW (17 HP)
Traction drive:	hydrostatic, driving speed up to 15 km/h
Weight:	530 kg
Dimensions:	L 2.000 x B 1.300 x H 1.200 mm

Details

Sports Hall Equipment

Locker Bench "ALUEX" with Back Rest & Clothes Hook

Order No. 130410

Locker Bench "ALUEX"

Sturdy construction in standard length of 2 m
Shapely design of square anodized aluminium special profile.
Shoe rack) made of thick-walled aluminium tube.
The Seat Laths, Backrests are manufactured from anodized aluminium special profile. Inside are laminated plastic sheets.
Available in different colours.

- Double coat hooks made of plastic
- Legs feature floor protecting plastic endings for levelling
- Components are pre-assembled, for easy self-assembly.
- Size: Length 200 cm or customized length up to 270 cm, Seat Depth 33.6 cm, Seating Height 45 cm, Overall Height (incl. coat rails): 165 cm.

For safety reason we recommend to fix the locker bench to the wall!

ABS Plastic Locker

ABS is a plastic formula derived from Acrylonitrile Butadiene Styrene. Altogether these elements produce a tough and high impact resistant plastic material. This is what our ABS lockers are made from. ABS lockers does not support combustion as its properties does not fail rapidly in high temperature.

Futures:

- Lockers are made up of Engineering grade ABS (Acrylonitrile Butadiene Styrene)
- Sturdy and strong
- Stackable
- Can place side by side
- Resistance to scratch
- Rust proof
- Textured surface furnishing
- Adjustable shelves (optional)
- 5 colour choices for Doors
- Ideal application for factories, hospitals, hotels, restaurants & recreational places
- Multiple locking options with keyless lock, key lock, coin return lock, RFID (digital) lock and padlock
- Recyclable

Wall Padding for Indoor(1.90 m)

Wall and column padding is an important health and safety feature in any sports hall. Each pad is made from flame retardant foam covered in canvas .The pads come 2.5 m high as standard and can be made to suit requirement. Wall pads are permanent wood-backed panels that provide protection against wall collisions and add the feature of sound absorption. Our firm 4 cm & 6 cm thick polyurethane foam wall pad provides excellent protection at a great value. Cut outs for electrical outlets and custom designed pads are crafted in our factory. 4 cm nailer lips at the top and bottom of the pad allow for easy installation

240010: Standard dimension 1.90 x 1.00 m (H x W) 6 cm thick foam.

Physical Properties of Polyurethane Foam According to ASTM D3574 test method

SUBJECT CODE : PX35

Density (kg/m ³)	: 33
Porosity (mmEtOH)	: 10
Resilience (%)	: 35
CLD 40% (kPa)	: 6.5
ILD 25% (N)	: 201
ILD 40% (N)	: 255
ILD 65% (N)	: 523
Tensile strength (kPa)	: 124
Elongation (%)	: 85
Tear strength (N/m)	: 218
Compression set	
75% (70oC 22hr) (%)	: 3.5

All foam manufactured foam are certified to be free from CFCs, by the Malaysian Ministry of Science, Technology and Environment and also by the United Nations.
