Horizontal (HFFS)

KENRAY HORIZONTAL FLOW WRAPPER TOOLING

Kenray has expanded its packaging expertise with new generation of Horizontal Flow Wrapper Tooling, designed for both traditional polyethylene films and sustainable paper-based materials. Engineered for precision, efficiency, and consistency, our tooling has been refined through close collaboration with leading manufacturers and extensive on-site testing, delivering real results in real production environments.

Originally designed for less flexible films like paper and other sustainable materials, Kenray's Horizontal Tooling is built to take on any challenge. Whether you're using heat-sealable OPP mono webs, cold-seal pattern films, or complex multi-layer laminates with PE, PA, and PET, our tooling is engineered to perform across the board – without compromise.

WHY CHOOSE KENRAY HORIZONTAL TOOLING?

Kenray's horizontal flow wrapper tooling is purpose-built to meet the demands of modern packaging lines. Whether you're working with sustainable films, delicate materials, or high-speed production requirements, our tooling delivers reliable performance, greater consistency, and a better pack every time.

PRESENTATION & PERFORMANCE

Achieve sharper seals, cleaner cuts, and better shelf appeal with tooling designed for accuracy and consistency – even across varied product sizes.

SUPERIOR FILM HANDLING

Built for both polyethylene and paper-based films, our tooling delivers exceptional film stability and control, reducing waste and improving run times.

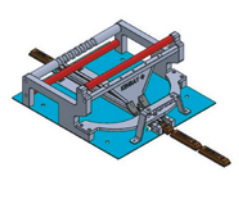

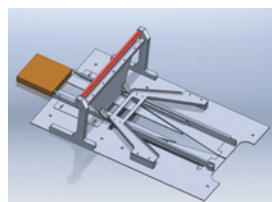

PEAK LINE PERFORMANCE

Engineered for fast setups and fewer interruptions, our horizontal tooling reduces unplanned downtime and maintains consistent, high-efficiency production.

SUSTAINABLE PACKAGING READY

Fully compatible with recyclable, compostable, and paper films – our tooling helps you stay ahead of industry demands for greener packaging.

These solutions are now successfully used on well-known consumer products available on shelves today – offering film stability, cleaner seals and improved production performance, even with delicate or sustainable substrates. The real saving lies in the stability the tooling provides: as the film is presented to the product with zero oscillation, there's far less risk of it leaving the fin wheel area. This enables a smaller fin – ultimately saving you money.

The world's biggest brands and OEMs choose KENRAY formers for better performance and profit.

Shouldn't you?

KENRAY are recognised as the global authority on the development and manufacture of formers and solutions for the packaging industry.

Our key area of expertise is the innovative design in forming sets for vertical form fill and seal packaging machines. Renowned for value-added service, consistency of design, extensive testing procedures and accuracy in manufacturing; KENRAY are the partners of choice for companies around the world within the food and pharmaceutical packaging sector.

Our forward-thinking engineering ensures interchangeability and repeatability. It is this precision that continues to endorse KENRAY'S position as the Global Leader in this market today.

KENRAY. Perform Better.
