Case Study

Cheviot

Kolkata, West Bengal, India

Introduction

Cheviot is a global leader in providing sustainable solutions in the fields of textile, tea, and education.

The Story of Cheviot Group

Cheviot Group produces superior jute yarn and fabrics for both domestic and global markets. Additionally, they also cultivate high-quality black tea on Binnakandy Tea Estate, where over 550 quarters are situated.

The Challenge of Storage

Cheviot needed a non-standard storage solution to accommodate its diverse materials and components. They required increased capacity for small items, equipment, and tools while maintaining easy access for employees. Their search led them to drawer combinations with varying heights and partitions.

How Furnace Responded

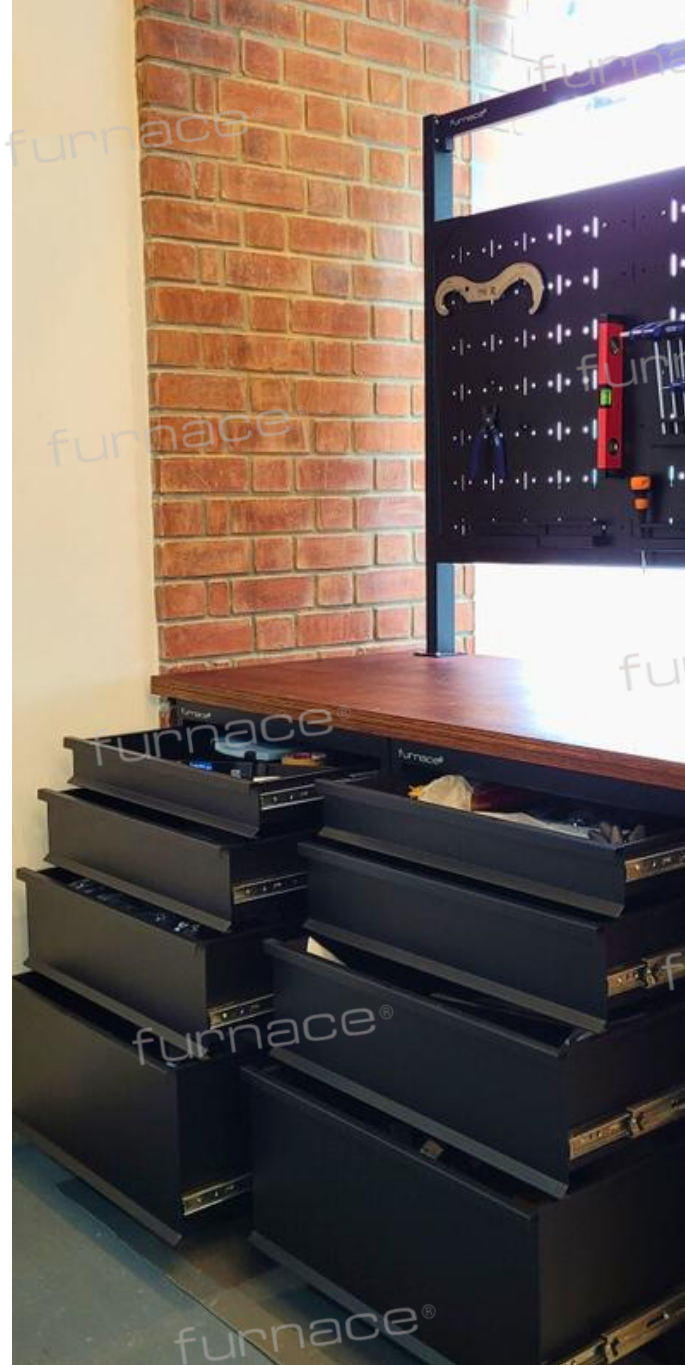

We addressed our clients' storage needs by suggesting Base Cabinets, which they found satisfactory after receiving two samples. They invested in our product and we commenced the project, ensuring the fulfillment of their storage requirements with diverse compartment sizes and drawer accessories for easy access to materials.

The Results

The product was delivered 4 weeks early, and the client was pleased with the professional installation and performance. They opted for us due to the wider range of options and value for investment. Cheviot is keen to work with us again after a successful project.
