# MAITLAND.IT.

Power On. The IT You Need. Nothing You Don't.

SAVE COSTS.
FIX ISSUES.
STAY SUPPORTED.

Maitland IT delivers reliable, on-site IT services built specifically for mining, industrial and trade businesses across the Hunter and Newcastle region. We help you lower costs, stay secure, and fix things before they go wrong, without the ongoing fees, travel charges or sales spin.

Why Businesses Like Yours Choose Maitland IT

We're Built for Local Industry

From mining and manufacturing to trades and regional services, we understand the demands of running a business in and around Maitland. Our team is based here, works here, and supports businesses like yours every day.

No Lock-In Contracts or Confusing Extras

We keep things simple. You won't find bloated software bundles, hidden license fees, or locked-in commitments. Just fair pricing, upfront advice, and support when you need it.

Tailored IT Without the Fluff

We only recommend what fits your setup - and we make sure you understand it. Whether you need new hardware, a reliable backup system, or secure remote access for your team, we'll build the right solution without the jargon.

What to Expect When You Work With Us

Audit → Proposal → Transition → Ongoing Support

Audit & Recommendations (Week 1–2)

We conduct a full audit of your current IT systems and costs — with no obligation. We'll explain what's working, what's costing too much, and where you could be better protected or supported.

## Proposal & Plan (Week 2–3)

You'll receive a plain-English proposal with options. No sales talk. Just real-world pricing, savings potential, and what the changeover will involve.

Switch with Confidence (Week 4–6)

We handle the full handover from your current provider, with minimal disruption. We'll set up your new systems, test everything, and make sure your team is ready.

Reliable Support that Scales with You

Ongoing maintenance, backup, on-site callouts, remote fixes, and phone support — we're your local IT partner, not just a helpline.

Power On.
No Drama.
No Waste.
IT Just Works.
