PIX LUM

PIX LUM

Light, reinvented for you

— EDITO

Philippe Jolly and Pierre-Henri Huclier, two passionate and complementary entrepreneurs, jointly lead PIXLUM®, a pioneering company in decorative lighting. Philippe, with over 30 years of expertise in the industry, founded PIXLUM to transform spaces with simple and innovative lighting solutions. Mastering the entire production process of PIXLUM® panels, he offers revolutionary products that enable unique installations, combining technical performance and creativity.

Pierre-Henri, known for his talent in developing businesses in niche markets, joined PIXLUM® in December 2023. Inspired by the company's innovative vision, he brings his management expertise and focuses on creating synergies between light and traditional wall decorations. Together, they are redefining the standards of interior design by offering tailor-made solutions that blend innovation, aesthetics, and quality.

Under their leadership, PIXLUM® continuously pushes the boundaries of creativity, offering clients endless possibilities to elevate their spaces with unique lighting atmospheres.

Our commitment is to provide you with innovative and customizable decorative lighting solutions. We aim to transform your spaces into true luminous works of art, combining performance, aesthetics, and flexibility. With PIXLUM®, you have the freedom to create bespoke atmospheres while benefiting from impeccable quality.

We are delighted to present our new catalog, the result of thoughtful planning to better meet your decorative needs, stimulate your creativity, and enhance your projects.

Happy reading.

— ***ABOUT PIXLUM***

« JUST PIN, IT'S LIGHT ! »

WHAT IS IT?

PIXLUM® is an alternative contact-based connection system that allows for an easy insertion of all compatible lights anywhere on the wall or ceiling as if they were tacks, thus removing the need to revert too heavy and expensive wiring. Its strength lies in complex creations with a multitude of lighting sources, including star ceilings, lights in bunches, large scale chandeliers and other decorative applications.

HOW DOES IT WORK?

PIXLUM® products comprise a range of electrically conductive boards that can be installed as easily as plasterboards and, once connected, can be decorated in the same way (wallpaper, paint, etc.). Once the decoration is completed, PIXLUM® lights are to be inserted by hand into the boards and light up instantly. The whole can be controlled by way of a simple switch or a dimmer.

HOW ABOUT SAFETY?

PIXLUM® functions in very low voltage 12V and is consistent with the strictest of European regulations regarding fire, electrical and photobiological safety.

— ***ILLUMINATE YOUR SPACES***

PIXLUM light panels in diptych 40cm x 120cm and personalised decor, 100 PixLEDs.

Transform your interiors with PIXLUM® and its unique lighting ambiances.

Be enchanted by the softness of a warm white illuminated panel, perfect for creating an elegant and welcoming décor.

Add a magical touch to your bedroom with a cool white starry sky, with adjustable brightness to suit your needs using the PIXLUM® dimmer.

For a bolder choice, opt for a coloured starry sky, such as a vibrant red that brings a captivating dimension to your spaces.

With PIXLUM®, illuminate your world just the way you desire.

— ***COSY AMBIENCE***

CREATE YOUR STAR-LIT WALL DECOR WITH PIXLUM®

Bring a unique celestial ambience to your interior with PIXLUM. To create this starry wall decor (opposite), you will need :

- 2 PixBOARDS panels (stick to the wall)
 - 1 PixPOWER 70-watt
 - 1 PixCABLE power supply
 - 1 PixCABLE bridge
 - 300 different warm white PixLEDs intensities
- for a subtle and varied look.*

Once the panels are installed and connected, apply a black paint finish. Then, sprinkle small dots of white and silver paint to enhance the galaxy effect.

The result is a luminous and enchanting decor, perfect for elevating your spaces with a touch of escapism.

Wall made from PixBOARD plaster panels as described opposite with 300 PixLEDs.

- 18 PixCABLE Bridge
- 1000 PixLEDs Cool White
- 1 PixTOOL Double + 1 Drill + 1 PushLED

— **STARRY SKIES AT LA VALLÉE DE PRATMEUR**

A Magical Lighting Showcase in the Heart of the Vallée de Pratmeur

In the enchanting setting of the Vallée de Pratmeur in Brittany, PIXLUM® had the honor of enhancing beautiful wooden chalets, transforming them into true havens of light. These gîtes, adorned with thousands of sparkling PixLEDs, offer a unique experience where the natural warmth of wood harmoniously blends with soft, warm white lighting.

The resulting atmosphere is an invitation to relaxation and contemplation. The starry sloped ceilings above the pool, adjacent to the bedroom, create a splendid and soothing view. Meanwhile, the illuminated perimeter of the spa area evokes a setting worthy of the Arabian Nights, enveloping visitors in a cocoon of serenity and wonder.

At the Vallée de Pratmeur, every detail magnified by PIXLUM® tells a story of light and well-being, where technology and nature meet to offer a timeless experience.

HOTEL PARAGRAPH RESORT & SPA SHEKVETILI

A Starry Masterpiece for the Paragraph Resort & Spa Shekvetili

PIXLUM® is proud to have illuminated the magical world of the Paragraph Resort & Spa Shekvetili, Autograph Collection, a 5-star hotel located in Georgia, with an extraordinary creation: a 300 m² starry sky adorned with thousands of warm white PixLEDs. This remarkable project enhances the children's area, a 200 m² room designed for endless play and enjoyment.

Above this expansive space rises a PIXLUM® dome, offering a majestic starry canopy. Surrounding the dome, the design team imagined and crafted cutouts representing the silhouette of an American city skyline, standing out elegantly and completing this spectacular decor.

This unique creation transforms the children's area into an enchanting universe, blending architectural innovation with luminous magic to create unforgettable moments in this prestigious establishment.

HOTEL DREAM OPERA PARIS

Dream Opéra Paris chose PIXLUM® to transform its lobby and breakfast room into true havens of peace.

The black-painted ceilings are adorned with a myriad of warm white PixLEDs, recreating the elegance of a starlit sky.

This unique lighting decoration envelops the spaces in a cosy and relaxing ambiance, offering guests an unforgettable visual and sensory experience.

— SHISHA BAR ROSE LOUNGE

At the Rose Lounge in Heilbronn, Germany, the designer from Heritage Design transformed the shisha bar into a unique space with a spectacular curved orange starlit ceiling.

This celestial vault, created with a myriad of PixLEDs emitting a warm glow, immerses guests in an enchanting and captivating ambiance.

True to its reputation, Heritage Design skillfully combined modernity and tradition to craft an unforgettable visual experience where aesthetics and conviviality come together.

Starry skies, PixBOARD curved foam panels.

— **WELLNESS INSTITUTE**

Wellness Institute

Saint-Martin-des-Noyers (85), France

This institute, specialised in wellness, offers a unique sensory experience through an innovative range of treatments, including chromotherapy (therapy using coloured light).

To meet the request of a client wishing to recreate the ambiance of a starry sky crossed by the Milky Way, we designed a backlit ceiling with adjustable intensity and colours.

We proposed an elegant solution comprising PIXLUM® panels simulating a starry sky, a tapestry carefully selected from our catalogue, and RGB+CCT LED strips.

The atmosphere created by this backlit PIXLUM® starry sky is perfect for promoting relaxation and escapism, providing an environment conducive to wellness.

WDetailed Project Description:

- **3 PixBOARDS Plaster Panels**
 - ◊ Dimensions: 2500 x 1200 mm
 - ◊ Cut to match the room's dimensions and shape
 - ◊ Fixed onto a wooden batten structure using PixSCREW
- **Tapestry**
 - ◊ Ref. POS00151
- **180 PixLEDs in cool white**
 - ◊ 3 intensities: 0.18 W, 0.16 W, 0.12 W
 - ◊ Creating a natural starry sky effect
- **RGB+CCT LED Strip**
 - ◊ Ref. SL000221
 - ◊ Entire system controlled by a TRIAC dimmer (reference Ref. 55003001).

— ***HOME CINEMA***

*The **PIXLUM®** starry sky ceiling in this 20m² home cinema, located in a high-end hotel in the French Alps, perfectly illustrates the fusion of aesthetics and functionality.*

Ambiance and Aesthetics

The black, micro-perforated stretched fabric provides a contemporary elegance while optimizing acoustics. The contrast between the deep black and the 300 cool white PixLEDs realistically simulates a starry sky. Variations in light intensity add depth and dynamism, creating a three-dimensional effect.

Technical and Acoustic Aspects

This fabric enhances acoustics by absorbing reverberations, which is crucial in a cinema room. Behind it, 7 PixBOARD Foam panels secured with PixSCREW ensure a discreet installation.

The PixPOWER 70-watt transformer and PixCABLE connections provide a reliable and professional power supply.

Equipment used :

- 7 Panels Foam PixBOARDs
 - ◊ Dimensions : 2500 x 1200 mm
 - ◊ Fixed to the ceiling by 150 PixSCREWS)
- Black stretch ceiling
 - ◊ Micro-perforated
- 300 PixLEDs Cool Whites
 - ◊ 3 brightness : 0,18 W, 0,16 W, 0,12 W
- 1 PixPOWER 70 Watts
 - ◊ Control by dimmerTriac
 - ◊ 1 PixCABLE Power Supply
 - ◊ 6 PixCABLE Bridge

Flexibility and Customization

The TRIAC dimmer allows the lighting to be adjusted according to needs, transitioning from an immersive, dimmed ambiance to brighter lighting to fully appreciate the decorative ceiling.

Luxurious Setting

In a hotel in the Alps, this starry ceiling blends seamlessly with the prestigious setting. It reflects attention to detail and offers a memorable experience for guests.

Combining technology, acoustics, and aesthetics, this installation is a refined and immersive focal point for this high-end home cinema.

— CORNER LANCÔME

Lancôme selects the PIXLUM® starry sky to enhance its boutiques in France and worldwide

To offer its customers an immersive and elegant experience, the renowned perfumer Lancôme has integrated the PIXLUM® starry sky into its boutiques across France and around the world.

Designed with a black stretched fabric and illuminated by cool white PixLEDs, this luminous ceiling recreates a mesmerizing starry sky, embodying the excellence and sophistication of the Lancôme universe. The subtle variations in light intensity add a unique depth and dynamic visual effect that captivates the eye.

Thanks to PIXLUM® technology, this innovative concept combines design and functionality. The system, composed of PixBOARD panels and a network of PixLEDs controlled by a TRIAC dimmer, allows for a custom installation tailored to each boutique. This starry sky ceiling becomes a visual signature, enhancing the prestigious atmosphere of Lancôme spaces while providing a unique sensory experience for visitors.

The integration of the PIXLUM® starry sky reflects Lancôme's commitment to blending technological innovation with timeless elegance, creating memorable spaces that match its brand image.

PIX LUM

The background is a dark, textured surface, possibly a book cover or endpaper, with a diagonal line running from the bottom left towards the center. A small white horizontal bar is located to the left of the text.

— THE PIXLUM[®] KITS

LED WALL ART PANELS RANGE

LED WALL ART COLLECTION.

PIXLUM® The Art of Decorative Lighting

PIXLUM® LED wall art revolutionize interior decoration by combining aesthetics and innovation. Available in various sizes, from compact 40x60 cm to majestic 120x240 cm, these panels are more than just decorations; they become interactive and luminous works of art.

Unique Technology

A panel is a format of the PixBOARD DECO panel that should be paired with a flexible power source ranging from 5 to 12 volts. The panel adapts to your needs:

- **Wireless autonomy:** 4.5V batteries (type 3L12) or a rechargeable power bank (5V) providing between 80 and 200 hours of autonomy (see batteries).
- **Wired power supply:** via small 12V transformers for unlimited lighting.

Simple Installation and Floating Effect

The painting comes with an integrated mounting system. Once installed, it is perfectly level and elegantly stands 15 mm away from the wall, creating a visual effect of levitation. This space can be used to add an LED strip to the back, enhancing the impression of a luminous halo radiating on the wall.

Unlimited Customization

The basic white painting can be transformed with:

- **A custom adhesive poster** to choose from the PIXLUM® collection. Easy to apply, it also dresses the edges of the painting for a neat finish.
- **An optional custom finish:** where the painting's edges can be adorned with white PVC strips for a sleek design.

The originality lies in the integration of PixLEDs. The user can freely pin these mini-LEDs onto the painting, adding a starry, sparkling, or decorative effect according to their preferences.

Practical and Innovative Features

- **Remote switch** for simple and elegant control.
- **Smart night light option:** a remote control lets you select different timer levels for automatic switch-off of the light, saving energy. Perfect for a subdued ambience or as a safe nightlight for baby.

A Painting that Illuminates Your Creativity

With PIXLUM® lighted paintings, bring a new dimension to your decoration. A perfect combination of technology and design to illuminate your spaces with originality and elegance.

Option : Edge finishing.

SUSPENSIONS RANGE

Bedsread with 2 COSMOS 120x240 cm kits + 1 PixPOWER 70 watts + 2 PixCABLE power supplies + 120 PixLEDs.

SUSPENSION RANGE

PIXLUM® Pendants: Suspended Elegance in Light

With PIXLUM® pendants, transform your ceilings into true luminous masterpieces. Available in four distinct and original collections:

- ***COSMOS:*** Square or rectangular shapes.
- ***GALAXY:*** Round shapes.
- ***ELLIPSE:*** Oval shapes.
- ***NUAGE:*** Cloud-like, soft, and poetic forms.

Quality Formats and Materials

Crafted from PixBOARD DECO panels, these pendants come in sizes ranging from 60x60 cm to 120x240 cm. All panels, except those in the COSMOS collection, feature a white PVC strip finish along the edges.

Ingenious Installation System

PIXLUM® pendants attach to the ceiling using adjustable stainless steel suspension cables, allowing the panel to be positioned anywhere from 5 cm to over a meter below the ceiling, creating an elegant floating effect.

Customizable and Tailored Lighting

- ***Design customization:*** Choose a PIXLUM® adhesive poster to personalize the panel or keep its sleek white surface.
- ***Lighting effects:*** Add PixLEDs to create unique starry or twinkling effects.
- ***Dynamic backlighting:*** Install a PIXLUM® RGB CCT LED strip on the back of the panel, controllable via the TUYA app, to create varied and spectacular lighting moods.

A Decorative and Functional Luminaire

These pendants can integrate PixLUM luminaires, transforming the panel into a decorative and practical light source, perfect for a living room, restaurant, or hotel lobby. The entire system is discreetly powered by a small 12V transformer, placed above the panel.

PIXLUM® Pendants: The Art of Floating in Light

Give your ceilings a new dimension with PIXLUM® pendants, where design and technology merge to elevate your spaces.

Bedsread: 2 COSMOS 80x120 cm + 2 PixPOWERs 70 watts + 2 PixCABLEs power supplies + 6 PixLEDs.

COSMOS COLLECTION

When Luminous Architecture Meets Creativity

The COSMOS collection reinvents decorative suspended lighting with its square or rectangular DECO panels. Adjustable from 5 cm to 1 meter below the ceiling, they can be mounted flat or at an angle for a sleek, ultra-customizable look.

Design and Modularity

- **Refined finishes:** Dress each panel with a PIXLUM adhesive poster, or keep its matte white finish, optionally enhanced with white veneer edges for a polished look.
- **Lightweightsuspension:** Adjustable stainless-steel cables create an airy, elegant effect.

Enchanting Lighting

- **Starry effect:** Under 12 V, simply “pin” your PixLEDs onto the panel for a soft yet spectacular twinkle.
- **Lighting ambiance:** Integrate an RGB CCT LED strip on the back, controllable via the TUYA app, allowing you to vary both color and intensity.

Inspirations

- **A peaceful, elegant bedroom:** Transform the COSMOS panel into a starry sky for a gentle, calming atmosphere.
- **Bathroom :** Suspend a COSMOS panel above the bathtub, dress it with a suitable décor, and add PixLEDs for a soothing, relaxing starry effect.

A Unique and Customizable Universe

With COSMOS, the suspension becomes a true decorative statement. Express your creativity to elevate any space, thanks to a modular lighting system where aesthetics and innovation meet in perfect harmony.

GALAXY COLLECTION

Ideas to Elevate Your Spaces

The GALAXY round pendant light is more than just a luminaire—it's an infinite source of inspiration for enhanced spaces and unique atmospheres. Here are some usage ideas that reveal its full decorative and lighting potential.

A Magical and Relaxing Bedroom

Imagine a 120 cm diameter GALAXY pendant light hanging from the ceiling of an elegant bedroom. Choose a PIXLUM decorative poster that perfectly matches the room's colors and pin a few PixLEDs onto it to create a soft, twinkling light. The atmosphere becomes calm and soothing, ideal for relaxation. Need more intense lighting? Add a PIXLUM LED strip to the back of the panel: with a simple gesture, a bright and uniform light fills the room, transforming your space as needed.

Refined Ambiances in a Restaurant

In a restaurant, GALAXY pendant lights become true visual signatures. Instead of covering the entire ceiling with a starry sky, place a round pendant above each table. Decorated with PixLEDs, they diffuse warm, original light, creating a subtle and luxurious ambiance. For added elegance, pair them with PIXLUM blown glass luminaires grouped in clusters of three. These pendants provide cozy lighting, preserving each table's intimacy while enhancing the overall atmosphere of the dining area.

A Bespoke, 100% Customizable Design

With the wide range of PIXLUM adhesive posters available, every GALAXY pendant can be dressed with a custom design to suit your preferences or the identity of your space. Whether in a home or professional setting, these pendants seamlessly integrate with any style, offering unmatched versatility and elegance.

GALAXY: Where Light and Decoration Unite

With the GALAXY collection, let your imagination run free and create unique atmospheres. Whether for a relaxing bedroom, a sophisticated restaurant, or any other space, these round pendants adapt to all your desires while delivering innovative lighting features.

ELLIPSE COLLECTION

Elegance in Motion

With its oval shapes and graceful lines, the ELLIPSE collection embodies a fluid, luminous decor. Offering a range of sizes, these suspended fixtures blend seamlessly into sophisticated, contemporary settings, while providing versatile and inspiring applications.

A Dinner Under the Stars

Suspended above your kitchen table, the ELLIPSE fixture becomes a luminous cocoon. Its elegant oval shape floats just beneath the ceiling, surrounded by twelve tubular PixLUM lights arranged like a constellation to evoke a starry night.

- **Fluidity and Elegance:**

The ELLIPSE's oval shape softens the space and immediately catches the eye. Installed over the table, it creates a friendly focal point while maintaining an airy ambiance.

- **A Modifiable Celestial Decor:**

PixLUM tubes emit a soft glow reminiscent of twinkling stars. Easily adjust brightness and color via PIXLUM technology: opt for warm white during the day, or switch to more poetic or colorful tones in the evening.

- **Customizable Installation:**

Available in various sizes, the ELLIPSE kit adapts to your needs. The PixLUM lights can be freely positioned on the conductive canvas, letting you create a true starry sky above your meals.

This arrangement lights up your kitchen in a functional yet poetic way, turning every meal into a magical moment.

A Balance Between Sophistication and Functionality

Thanks to its oval shape, the ELLIPSE gently softens the space while subtly drawing the eye. Its multitude of customization options, adjustable lighting features, and seamless integration into any interior style make it an ideal choice for spaces where elegance and creativity shine.

ELLIPSE: Fluidity, Design, and Light

Whether for a professional or residential setting, the ELLIPSE collection adapts to your needs and enhances your ceiling. Its airy forms and innovative lighting effects bring a new dimension to your decor.

NUAGE COLLECTION

Luminous Daydreams on the Ceiling

The NUAGE pendant lights, with their soft and poetic shapes, bring a touch of magic to any space. Available in 3 formats, they can be fully customized to your liking. These luminous clouds transform ceilings into true works of art.

A Home Spa Above the Bathtub

In a bathroom, install a NUAGE pendant light above the bathtub to create a relaxing and soothing space. Dress the panel surface with a PIXLUM® poster evoking nature, clouds, or calming patterns, or opt for customization with a soft color that matches the room's ambiance.

For an even more soothing effect, add backlighting using a PIXLUM® RGB CCT LED strip installed on the back. This system, controllable via the TUYA app, allows you to vary the light tones according to the desired ambiance: soft light for a relaxing bath or brighter light for an energetic start to the day. By adding a few PixLEDs, you bring a sparkling touch, transforming the ceiling into a starry sky and the bathroom into a true sanctuary of relaxation.

A Spectacular Ceiling in a Store

In a retail space, NUAGE pendant lights can be used to create a captivating and immersive ceiling. Mix several formats and slightly overlap them for a dynamic and airy visual effect. Each panel can be dressed with a visual adapted to the brand's identity or a custom poster from the PIXLUM® range. Pinned with PixLEDs, the suspensions become luminous points of interest, attracting customers' attention while adding a welcoming atmosphere.

Custom and Personalizable Design

Each NUAGE pendant light is fully customizable: choose a color, a printed visual, or a poster from the PIXLUM® collection. Additionally, their lightness and adjustable sling system allow for easy installation at varying heights to enhance the depth effect.

NUAGE: Light at the Service of Your Dreams

Whether transforming a bedroom into a haven of serenity or creating a poetic ceiling in a commercial space, the NUAGE collection invites you to dream. Combining design, customization, and innovative lighting, these pendant lights transform ceilings into true luminous artworks.

Battery, transformer or driver, PixREMOTE switch or connector, adhesive poster, and PixLEDs.

RANGE ALL-IN-ONE KITS

Starry sky over a swimming pool made of PixBOARD foam panels.

STARRY SKY KITS

Star-Studded Sky Range

The PIXLUM® Star-Studded Sky range offers a complete and turnkey solution to transform your ceilings into magnificent luminous skies. Available in kits covering areas from 3 to 15 m² (in 3 m² increments), these sets include everything needed for a simple and successful installation.

Ready-to-use content, each kit includes:

- **PixBOARD panels:** in lightweight foam or robust plaster (fire-rated Bs1d0, ideal for public venues).
- **PixSCREW hardware:** for reliable ceiling attachment.
- **PixLEDs:** for a sparkling and magical effect.
- **Transformers and connectors:** for easy and secure power supply.
- **PixTOOL tools:** specially designed for installation on plaster panels.

Two solutions to meet your needs:

- **PixBOARD Foam kits:** lightweight and easy to handle, perfect for residential projects. A skim coat is recommended before painting for a flawless finish.
- **PixBOARD Plaster kits:** robust and recommended for public places due to its Bs1d0 fire rating. PixTOOL tools facilitate the installation of PixLEDs on this surface.

Easy to customize and modular

Simply choose the number of kits needed based on the area to be covered. Whether for a small room or a large space, each kit is designed to be intuitive and adaptable.

For all uses

- **Private residences:** create enchanting atmospheres in bedrooms or living rooms.
- **Public venues and commercial spaces:** offer a spectacular and secure luminous ceiling, ideal for enhancing the customer experience.

With the "Star-Studded Sky" kit range, crafting a PIXLUM® offer has never been easier.

Wall composed of 3 plaster panels and 30 Blue PixLEDs with the "Blue Dreams" wallpaper finish Ref POS00011

WALL DECORATION KITS

Transform your walls into unique luminous artworks with the PIXLUM® **Wall Decoration** range. These **all-in-one kits** allow you to create customised and illuminated wall surfaces, perfect for enhancing your living or professional spaces.

A turnkey solution: The kits are available for surfaces ranging from 1.2 m to 6 m in width, suitable for a standard ceiling height of 2.5 m.

Each kit includes:

- **PixBOARD Panels:** foam or plaster.
- **PixSCREW:** for secure attachment.
- **PixPOWER Transformers and PixCABLE Connectors:** for discreet and secure power supply.

Complete personalisation freedom

Unlike other offers, these kits do not include PixLEDs. This allows you to choose the perfect wallpaper from the PIXLUM® collection or create your own design. Once the wallpaper is in place, you can decide on the number and colours of PixLEDs to precisely enhance your wall.

Ideas to personalise your spaces

- **An elegant and refined atmosphere:** Imagine a kitchen or living room adorned with the Blue Dream wallpaper, illuminated with sparkling blue PixLEDs. A chic and modern way to transform your interiors.
- **A world map wallpaper:** Perfect for an office or themed room, add PixLEDs to highlight key points. A professional can indicate the location of their industrial or commercial sites, while an individual could highlight countries visited or yet to be discovered. An original idea that combines decoration and storytelling!

Two options tailored to your needs

- **PixBOARD Foam:** Easy to handle and ideal for residential projects.
- **PixBOARD Plaster:** Solid, durable, and fire-rated Bs1d0, recommended for public spaces.

With the PIXLUM® Wall Decoration range, every wall becomes a space for creativity and emotion, combining design and light.

ADHESIVE POSTER & NON-WOVEN WALLPAPER RANGE

POSTERS & TAPESTRIES RANGE

Adhesive Posters and Non-Woven Wallpapers: Elevate Your Spaces with PIXLUM®

Adhesive Posters: Easy Application for a Perfect Finish. PIXLUM® adhesive posters combine quality and simplicity to enhance your PIXLUM® light boxes. Printed in high definition on 200 g/m² adhesive material, they ensure easy and adjustable application for a flawless result. UV-resistant and cleanable with mild soapy water, these posters offer exceptional durability. Each print is generously sized, exceeding the dimensions of the light boxes by 10 cm to cover the edges and wrap around the back of the support. The result: a meticulous, aesthetic, and durable finish.

Non-Woven Wallpapers: Personalised Elegance for Your Walls. Transform your walls with our range of high-quality Non-Woven wallpapers. Our image proposals are printed on robust and elegant Non-Woven paper. Each roll measures 65 cm in width and is carefully numbered for easy installation. Other dimensions are available upon request to meet your specific needs. The wallpaper glue, included with each order, allows you to create a flawless decoration right out of the box.

Exclusive Access to a Wide Online Collection. In this catalogue, discover a preview of our posters and wallpapers. To access our entire collection, scan the QR code on this page. You will be redirected to our dedicated online platform, where a multitude of patterns and ambiances await you. Each order is shipped directly by our printing partner in careful packaging to ensure perfect delivery.

Combine style, quality, and simplicity with PIXLUM®, and breathe new life into your interior spaces.

POWER SUPPLY CABLES

Power supply cables, available with or without a switch, compliant with European standards and featuring a European male plug. Ideal for powering your PixPOWER at 230 volts, they ensure a reliable and convenient connection.

Standard model: 2 x 0.75 mm² white-sheathed cable, 2.5 m long, fitted with a European 2-pin plug and two ferrules.

Ref. 11102501

Model with manual switch: same setup, with a white manual switch (2A, 60 mm x 20 mm) for simple and convenient control.

Ref. 11202501

Model with foot switch: identical setup, featuring a white foot switch (2A, Ø65 mm x 28 mm) for even more comfortable use.

Ref. 11302501

11302501	Europe plug cable + Switch	230 Volts	2.5 m	Foot	White	0.75 mm ²

RoHS- and CE-certified, rated IP20, these cables guarantee safety and compliance.

PixCABLEs CONNECTORS

Easily and efficiently connect your PixBOARD panels. The PixCABLE range provides complete solutions for connecting your PixBOARD panels to their power supply. Designed to meet various installation needs, these products are available in five references:

Clips (Pack of 2): Available in two sizes, these clips allow total customization of your wiring. You can solder your own cables adapted to your needs for a perfectly tailored result.

- **Mini Clips:** Limited to 30 watts, suitable for low-intensity installations.
- **Standard Clips:** Support up to 150 watts, ideal for more demanding applications.

PixCABLE Power Supply: This is a 1.5m (2x2.5 mm²) or 0.2m (2x1 mm²) cable with two clips. It is used to electrically connect a panel to its power supply.

PixCABLE Bridge: is a set of two 20 cm (2.5 mm²) cables with clips at each end, used to electrically connect two panels together via their edge.

* PixCABLEs are UL and cUL pre-certified for the North American market.

EXTERNAL BATTERIES

AUTONOMOUS POWER SOLUTIONS

Power your PixBOARD panels without a power outlet using our autonomous solutions, ideal for situations where electrical wiring is difficult or impossible. These solutions are exclusively compatible with PixBOARD panels equipped with PixLEDs and cannot be used with other PIXLUM® luminaires.

Optimized Low-Voltage Operation

Although PixLEDs are designed for a 12-volt power supply, they are adjustable from 0 to 12 volts. With our battery solutions (4.5 V or 5 V), they operate perfectly, delivering over 80% of their nominal luminous power. This performance is entirely acceptable for your autonomous lighting projects.

Our Standalone Solutions

- **Duracell 3LR12 Battery (4.5 V):** A simple and affordable option offering over 500 hours* of runtime.
- **Rechargeable 5,000 mAh Battery:** Up to 150 hours* of runtime. Compact and ideal for small projects.
- **Rechargeable 10,000 mAh Battery:** A mid-range solution providing up to 300 hours* of runtime.*
- **Rechargeable 30,000 mAh Battery:** Our most powerful solution, offering up to 600 hours* of runtime.

(*) Indicative runtimes are based on 30 PixLEDs at 0.15 W, tested on a PixBOARD panel running continuously.

EXTERNAL BATTERIES ACCESSORIES

PixADAPT 3LR12

The PixADAPT 3LR12 is a connector specifically designed to power your PIXLUM® panel using a 3LR12 (4.5 V) battery. It consists of two small insulated faston terminals connected to a 10 cm (2x0.5 mm²) red and black cable, ending with a female USB connector. The terminals simply attach to the + and – tabs of the battery, providing a portable power solution that is quick to set up and perfectly suited for PixLEDs. (To be used with the PixREMOTE Timer.)

PixADAPT 3LR12
Ref. 70000501

PiCONTROL

It is a Bluetooth module designed to remotely control your PixBOARD panels. Discreet, it can be hidden and integrated into the panel's thickness. It complements battery power (via a PixADAPT 3LR12), an external PIXLUM® battery, or even a driver, with a limit of 70 watts (module's own standby consumption 8mA).

- **Easy Connection:** Connects via a USB port to the power source and to the panel via mini-clips.
- **Multiple Management:** Allows managing multiple lights of the same model with a single remote control or controlling individual lights for optimal comfort.
- **Energy-Saving Timer:** Allows setting the lights to turn off automatically after 10, 30, or 60 minutes, ideal for a nightlight in a child's room.
- **Adjustable Brightness:** Built-in dimmer.
- **Sparkling Function:** Adds extra effects to your PIXLUM® decorations.
- **Smartphone application :** take control of your sets using the "Lotus Lamp X" application.

PixPOWERS TRANSFORMERS AND DRIVERS

PIXLUM Transformer or Driver:

A PIXLUM® transformer converts 230V AC to 12V AC, ideal for standard PixLEDs and luminaires with G4 bulbs. A 12V driver provides direct current (DC), essential for sparkling PixLEDs. Both options are dimmable via TRIAC, offering optimal flexibility. Choose a transformer for classic AC applications and a driver for DC applications.

PixPOWER 0-70 W & 0-150 W

PixPOWER transformers provide stable and reliable 12V AC power, adapting immediately to the first installed PixLED, with no minimum load. Robust and proven for over 20 years, they are compatible with TRIAC PWM dimmers for precise light control. Their compact size allows easy integration into all PIXLUM® lighting configurations..

The PIXLUM® TRIAC dimmer offers precise control of light intensity. Compatible with Zigbee and dedicated to PIXLUM® transformers and drivers, it is easy to install, reliable, and discreet. It is also available with a 2.4 GHz remote control for adjusting brightness.

PIXLUM Drivers (0-30 W, 0-75 W, 0-150 W, 0-250 W)

The PIXLUM® driver range offers four constant voltage 12 V DC power supplies, designed to meet the diverse needs of your lighting projects:

- **0-30 W:** Ultra-thin (only 19 mm thick), it can even be integrated directly into the thickness of a PIXLUM® panel.
- **0-75 W:** Provides additional power for more demanding installations. These first two models are non-dimmable, highly economical, and ideal for most common PIXLUM® applications.

Driver 0-30 Watts
Ref. 19000301

Driver 0-75 Watts
Ref. 19000751

For More Flexibility:

- **0-150 W and 0-250 W:** These two drivers, which are more powerful, are compatible with the PIXLUM® triac dimmer, just like our AC/AC transformers. Although the panels are limited to 150 W, the 0-250 W version is useful in mixed configurations, for example, to simultaneously power a suspended PIXLUM® panel and an LED strip, all with a single power supply.

THE PixBOARDS PANELS COLLECTION

PIXLUM: The Creative Lighting Revolution

PIXLUM® transforms any surface into a modular lighting support without fiber optics. Low-voltage (12V) conductive panels allow you to pin PixLEDs or luminaires without special tools. This solution appeals to both individuals seeking unique ambiances and professionals looking for innovative solutions. Maintenance is easy: remove and reposition light points to repaint or redecorate.

Revolutionary Installation

PIXLUM® replaces fiber optics with a quick and economical setup. Add or move light points effortlessly. Panels can be screwed onto rails or adhered to walls and ceilings, easily cut to fit any shape, ideal for customizing bathrooms, reception halls, or event spaces.

Ultra-Versatile Range

Discover our versions – PixBOARD Foam, Plaster, DECO – designed for various decorative and regulatory needs. The sandwich structure ensures lightness and electrical reliability.

Unmatched Safety

The 12V power supply offers remarkable safety and usability, even allowing battery use for mobile or temporary installations. Some panels are fire-resistant (Bs1d0), meeting fire standards for public spaces and professional projects.

Ready for North America

PixBOARD Foam, DECO and Plaster are cUL certified for the North American market.

Limitless Creativity

Choose your finish (plaster, paint, wallpaper, etc.) and create unique luminous decor. Made in France, our panels are built to last and simplify maintenance. Remove and reposition luminaires as desired.

With PIXLUM®, lighting adapts to your imagination, combining creativity, modularity, and practicality to enhance any space.

***RANGE OF
PIXBOARDS
PANELS***

PixBOARD Foam

Features

- Fire Safety Rating M4 (France), 960°C glow wire test, and UL 962 certified.
- Lightweight (1.9 kg/m²), easy to handle.
- Easily cut with a cutter, saw, or CNC machine.
- Soft and easily punchable.
- Hydrophobic.
- Before painting, plan for a thin coat of plaster (<0.5mm) or a finishing coating like fiberglass cloth.
- Maximum coating thickness: 1.5mm.
- Luminaires from the PIXLUM® range can be pinned directly into the "Mousse" panel (no PixTOOL tool required).
- Warning: Incompatible with PixTOOL™.

NB: PixBOARD Mousse panels are also available with one or two sides covered in smooth black velvet, providing an impeccable finish.

PixBOARD Mousse Panel

Made in France, the PixBOARD™ Mousse panel combines innovation, lightness, and efficiency for low-voltage (12 Volts) electrical applications. Using sandwich panel technology, it combines XPS foam with two layers of triplex made of aluminum and elastomer, ensuring a safe and durable electrical connection.

Lightness and creativity:

- Ideal for ceiling or wall installations, including bathrooms, due to its reduced weight.
- Perfect for designing maps or other innovative wall decorations.
- Its lightweight and rigid structure allows for simplified installation, suitable for decorative or utility projects.

Made in France

This panel demonstrates the excellence of French craftsmanship in technical and decorative materials. By integrating reliable mechanical properties and low-voltage conductive capacity, PixBOARD™ Mousse offers new perspectives for designers, architects, and lighting professionals, while remaining accessible to individuals.

PixBOARD™ Mousse is the ideal solution to enhance your spaces and bring your lighting ideas to life with ease and simplicity.

- M4 fire safety classification (France).
- Laminated on each side with a fire-rated M1, printable expanded PVC skin.
- Lightweight (3.7 kg/m²), easy to handle.
- Cutting: Can be cut with a saw or CNC machine.
- Coating: A coating with a maximum thickness of 1 mm is compatible with luminaires.
- Luminaires can be pinned using PixTOOL Single, Double, and Push LED.
- Printing: Perfectly suited for digital printing.
- Usage: Indoor, ideal for displays, signage, store fittings, luminous panels, and suspensions.
- Fixation: Suspended with a stainless-steel wire kit.

PixBOARD DECO Panel

Made in France, the PixBOARD™ DECO panel combines innovation and practicality, offering a conductive solution ideal for attaching LEDs and an HD printable surface for graphic and decorative applications. Its sandwich structure includes three layers of XPS foam and two 100-micron aluminum sheets, ensuring electrical conductivity. These elements are encapsulated between two thin 2 mm white PVC plates, guaranteeing lightness, rigidity, and aesthetics.

Key Qualities:

- *Unlimited Customization:* Ideal for direct printing or adhesive stickers, enabling custom graphic creations.
- *Innovative Luminous Applications:* Perfect for decorative panels or illuminated geographical maps, combining innovation and aesthetics.
- *Lightness and Practicality:* The foam structure facilitates handling and provides sufficient rigidity for wall or suspended installations.
- *Commercial and Artistic Use:* Ideal for shop windows, exhibition stands, or artistic installations, thanks to its high-quality visual rendering and ease of installation.

Crafted with care in France, PixBOARD™ DECO is the go-to partner for designers, architects, scenographers, and decoration professionals seeking a technical and aesthetic solution.

PixBOARD™ DECO, the perfect blend of creativity, innovation, and French quality.

PixBOARD Plaster

Features:

- Rated Fire Safety Bs1d0 (Europe), 960°C glow wire and UL 962 (USA/Canada).
- Material is twice as light (6.7 kg/m²) as standard BA13.
- Easily cut with a saw or CNC machine.
- The usable face is the plaster face, which is rigid and structuring, ideal for wall applications.
- Suitable for bathroom ceilings.
- PixBOARD Plâtre panels have two tapered edges, making adjacent panels easily treated with drywall joint tape.
- Maximum coating thickness: 1.5 mm.
- PIXLUM luminaires can be pinned after punching the plaster face with a PixTOOL™ or better with a 0.9 or 1.5 mm drill bit using the PixDRILL.

PixBOARD Plâtre Panel

Designed in France, PixBOARD™ Plâtre conducts low-voltage current (12 V) while meeting the highest safety and performance standards. Using sandwich panel technology, it combines XPS foam (extruded polystyrene) and two triplex sheets (aluminum and elastomer), ensuring uniform pressure at the contact point for a reliable electrical connection. Its top layer, made of BA6 plasterboard, enhances rigidity and facilitates the application of various wall finishes.

Advantages

- **Enhanced Safety:** Rated Bs1d0 and UL 962, ideal for public places (ERP) subject to strict fire safety standards.
- **Robustness and Stability:** The BA6 plasterboard ensures high mechanical resistance, suitable for wall applications.
- **Discreet Design:** Integrates seamlessly into any interior design, offering an innovative and secure electrical solution.

Produced in France, this panel embodies national expertise and meets the needs of architects, designers, and electricians for demanding public spaces or high-end decorative projects.

PixBOARD™ Plâtre, the perfect blend of innovation, safety, and aesthetics for all your projects.

PixBOARD's FIXING AND FINISHES

PixSCREW Fasteners: the ideal solution for securing your panels: Specially developed, PixSCREW fasteners secure PixBOARDS without any risk of short-circuit thanks to their purple epoxy insulating coating. Their 10 mm flat head, featuring a Phillips drive, ensures optimal hold.

Two models for every configuration:

- **PixSCREW Wood 3.9 × 40 mm:** suitable for fastening on to wooden structures or battens, and more economical.
- **Regular PixSCREW 3.9 × 50 mm:** self-tapping for metal rails, long enough to pass through a BA13 drywall board to reach the rail. Ideal for renovation or covering existing walls.

Suspension Set: Hang Your PixBOARD DECO with Ease: The Suspension Kit makes it effortless to hang your PixBOARD DECO. With this system, the panel's height can be adjusted from 5 cm to 1 m below the ceiling and tilted at various angles, allowing you to perfectly adapt it to your lighting or decorative setup. The kit includes:

- 4 stainless steel cables and chrome fittings
- 4 PixPLATE PVC plates, 1 tube of PVC glue

With the Suspension Kit, installing your hanging panels is a breeze!

x 1 tube

PixPLATE PVC Plates for DECO Panels: PixPLATE, designed exclusively for DECO panels, are glued to the back to attach slings for suspensions or to hang panels on the wall. Provided with the tableau and suspension range, they offer a simple and reliable solution for your decorative installations.

4 x PixPLATES
Ref. 70000161

PVC glue for PixBOARD DECO and PRINT

PVC accessories, such as PixPLATEs, are glued securely to the back of these 2 panels. They can be used to fix suspension screws with slings or to simplify the wall installation of PIXLUM panels, guaranteeing a practical and discreet solution for your projects.

Ref. 70000661

White Heat-Activated PVC Edge Banding

Our white heat-activated PVC edge banding, available in 10 m rolls, ensures a clean and elegant finish on the edges of DECO and PRINT panels. Easy to apply with heat, it protects the edges while ensuring aesthetic consistency with the panel's surface.

Ref. 70000551

Quelyd Glue for XPS Panels

Quelyd glue, specially adapted for XPS foam boards, ensures a strong and durable fixation of PIXLUM® panels. Available in tubes for one panel or pots for up to four panels, it facilitates wall and ceiling installations, providing optimal adhesion without altering the panel

Joint Paper Tape and Smoothing Compound

Our Joint Paper Tape, available in 75 m, is designed for PixBOARD Plâtre and Mousse panels, offering quick and durable installation. Combined with our extra-fine smoothing powder in 5 kg bags, it perfectly prepares surfaces before painting, wall-papering, or applying wall coverings, ensuring a fluff-free finish. Made in France, this compound is manually applied for a professional and ultra-fine result.

PixLEDs & PixCAPs

PixLEDs: Innovative and Eco-Friendly LED Luminaires

PixLEDs are revolutionary small LED luminaires, designed with a compact printed circuit of 4.5 mm in diameter and a 2.5 mm thick SMD chip, combining discretion and performance.

Technical Features:

- **Flexible Control:** Operate on AC or DC current from 0 to 12 volts thanks to microcomponents soldered to the back of the PCB.
- **Durability:** Long lifespan of 40,000 hours.
- **Energy Efficiency:** Low consumption of 0.09 to 0.22 watts, providing luminous power of over 1000 mcd.
- **Safety and Compliance:** Rated risk 0 in photobiological tests and compliant with European and North American cUL standards.

Design and Variants:

- **Customizable:** Available in various colors and powers.
- **Sparkling Effect:** Candle effect version for a starry ambiance.
- **Waterproof:** Ideal for humid environments.

Ease of Installation: Two pins (one short and one long, partially insulated) facilitate integration with PixBOARD panels. The luminaires turn on instantly and are dimmable for optimal lighting flexibility.

PixCAPs: Elegant Covers for PixLEDs

The PixCAPs collection offers various elegant shapes in diffused white PMMA. Easy to attach to PixLEDs with a drop of hot glue, they diffuse the soft light of PixLEDs or enhance their discretion when turned off. Ideal for creating volumetric effects on wall decor.

Advantages of PixCAPs:

- **Refined Aesthetics:** Customizable and sophisticated.
- **Discretion:** Harmonious integration into various settings.
- **Volumetric Effects:** Similar to crystal terminations at a lower cost.

By combining PixLEDs with PixCAPs, PIXLUM offers a complete lighting solution that combines innovation, energy efficiency, and adaptable design.

PixLUMs LUMINAIRES

PIXLUM® Pendant Lights: Discreet Elegance and Total Customization

Discover PIXLUM® Pendant Lights, a perfect blend of modern design, functionality, and creativity. Each element of the luminaire is crafted from simple components to offer a modular and infinitely customizable lighting solution. Thanks to clever engineering, these luminaires easily install onto PixBOARD® panels, allowing you to freely compose your lighting arrangement. Their transparent base, thin cable, and multiple finishes create a subtle harmony with your decor, from the most discreet to the most spectacular.

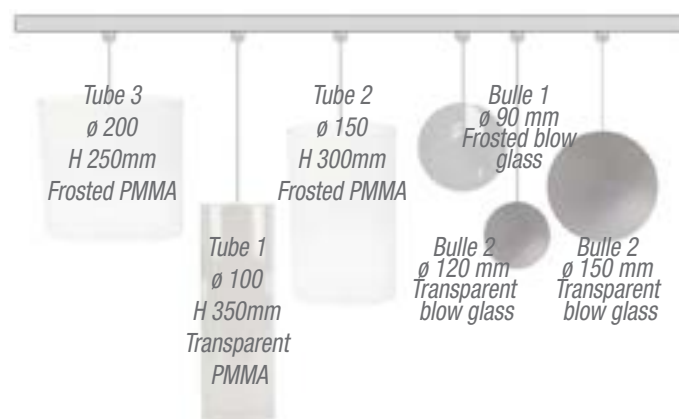

Create Custom Chandeliers

Arrange multiple suspensions side by side, in clusters, or in straight/curved lines to design unique and original chandeliers. Experiment with finishes (Bubbles, Tubes), cable lengths, and bulb types to achieve lighting perfectly suited to your space, whether discreet or majestic. Customize every detail using PIXLUM® color adhesives and try different arrangements to enhance your interior with complete freedom.

Technical Specifications

- **Base:** Transparent polycarbonate (20 x 15 mm).
- **Cable:** AWG 26 (0.128 mm²), double insulation, adjustable length (5 to 100 cm).
- **Accessories:** Discreet and stylish cable winder with +/-5cm increments.
- **Socket:** G4 (max 6W).
- **Finishes:** Blown glass Bubbles or PMMA shades in transparent or frosted finish.
- **Fixation:** PIXLUM® pins to be pinned onto PixBOARD panels, secured by a 3x10 mm screw.
- **Customization:** PIXLUM® color adhesives for Tube shades, choice of bulb (power, color, dimming).

Light up your spaces with PIXLUM® Pendant Lights and enjoy discreet elegance, simple installation, and boundless creativity. Elevate your interior by imagining tailored lighting compositions for a truly unique style.

Accessories PixLUMs Pendant Lights

Decorative Adhesive Film for "Tube" Luminaires.

Personalize your "Tube" luminaires with decorative adhesive film. Its powerful adhesive ensures a seamless application and flawless finish. Available in various colors, it easily adapts to your interior decoration. Resistant to moisture, this 250-micron opaque film guarantees durability for 10 years. Made in France and supplied in rolls of 1x1.22 m, it is ideal for elegantly enhancing your spaces.

LED Bulb Selection

Discover our range of LED bulbs designed for PIXLUM® luminaires. We offer LED G4 and MR16 bulbs, all dimmable (except the sparkling version). Available in 1, 3, or 5 watts, in cool, neutral, or warm white, you'll find the ideal bulb for every ambience.

Our 2-watt sparkling bulb in warm white (1600°K) stands out, perfectly suited for translucent Bulle shades and Tube spots, offering a realistic candle-like flicker.

PixTOOLS RANGE

PIXLUM® Tool Range

Make it easier to install your PixLEDs and PixLUMs luminaires in PixBOARD DECO, PRINT, and PLATRE panels (exclusively). These panels require pre-drilling due to the hardness of their surfaces. To simplify this process, PIXLUM® has developed a range of innovative tools designed to make this task more comfortable and efficient.

Tools for PixBOARD DECO, PRINT, and PLATRE

For a perfect installation of PixLEDs and PixLUM luminaires, PIXLUM® provides four complementary tools:

- **PixTOOL Double and Single** are designed to perforate the PVC sheet of PixBOARD DECO and PRINT panels to position the luminaires. However, they should only be used to mark the surface of the PixBOARD PLATRE, without perforating it. Drilling into the PixBOARD PLATRE surface must be carried out with the PixTOOL DRILL to a maximum of 8mm.
- **Push LED** is designed to facilitate the insertion of PixLEDs into the pre-punched DECO, PRINT, and PLATRE panels.
- **PixTOOL DRILL** is designed to drill through the plaster side of the PixBOARD PLATRE, making it easy to insert PixLEDs or PixLUM luminaires (ø 0.9 mm for PixLEDs and ø 1.8 mm for PixLUM luminaires, up to a maximum depth of 8 mm).

Installing PixLEDs

- **In DECO and PRINT panels:** Use the PixTOOL Double to pre-drill the PVC sheet, then use the PixTOOL Push LED to facilitate insertion of the PixLED.
- **In PixBOARD PLATRE:** The PixTOOL Double marks the surface of the panel (without perforating it). The PixTOOL DRILL drills a ø 0.9 mm hole to a maximum depth of 8 mm (and no more) before inserting the PixLED using the PixTOOL Push LED.

Installing PixLUM Luminaires

- **Marking:** The pins on the PixLUM luminaire mark the desired location for insertion.
- **In DECO and PRINT panels:** Use the PixTOOL Single to drill through the PVC sheet, making it easier to insert the luminaire's pins.
- **In PixBOARD PLATRE:** Use the PixTOOL DRILL to make two small 1.8 mm diameter holes where the luminaire marks were made (up to a maximum depth of 8 mm).

With the PixTOOL range, installations on PixBOARD PLATRE, DECO, or PRINT become simple, fast, and precise, enabling you to create customized lighting without risking damage to your panels.

PIXLUM® LED STRIP RANGE

Enhance Your Starry Décor

Always on the lookout for new solutions to elevate your interiors, PIXLUM® has selected a range of RGB + CCT LED strips. These strips heighten the visual impact of PIXLUM® installations, offering a more creative and personalized lighting experience.

RGB + CCT: The Versatility of Colors

Thanks to this technology, our LED strips let you precisely adjust both the desired color (up to 16 million) and the white temperature from 2700K (warm and relaxing) to 6000K (cool and stimulating).

High Quality and Performance

Equipped with SMD5050 and SMD2835 LEDs (CRI > 80), our strips deliver intense, uniform, and energy-efficient brightness (90 LEDs/m for 16 W/m). Their 12 mm PCB ensures optimal heat dissipation, guaranteeing a long service life.

Smart Control and Simple Integration

The Zigbee mini-controller facilitates remote management via voice assistants or the TUYA mobile app. The plug-and-play installation, with convenient connectors, allows for easy integration into any environment.

Available in 5 m Rolls

IP20-certified, our strips blend seamlessly into any space. These 5-meter rolls can be cut to size, enabling you to tailor the lighting precisely to your project.

Or in a Kit of Four 70 cm Segments

Ideal for PIXLUM® panels and suspensions, this kit includes four 70 cm RGB+CCT segments and a Zigbee mini-controller, offering a clever yet simple way to create spectacular backlighting. Interconnected and adhered to the back of a PixBOARD Déco panel, then connected to the driver, these segments truly illuminate and transform your spaces into stunning works of light.

THE SIMPLICITY OF A PIXLUM® INSTALLATION

A *PIXLUM® system is designed to be accessible to everyone, whether you're a novice DIY enthusiast or an experienced professional. With intuitive solutions and adapted tools, creating a luminous décor becomes a straightforward and enjoyable process.*

T *his innovative approach to luminous decoration may differ from traditional methods. That's why we guide you step by step through the key stages of a PIXLUM® installation, demonstrating its simplicity and effectiveness. Follow this guide and transform your spaces effortlessly, with elegance and creativity.*

1. LAYOUT PLAN

Prepare a scaled plan to organize panels, connectors, transformers, and cables. Visualize the arrangement for a smooth assembly. Optional for small projects, it is essential for larger installations.

2. PANEL INSTALLATION

Attach the PixBOARDS to the wall or ceiling:

- *Cutting: Use a jigsaw.*
- *Fastening: Glue or screw (PixSCREW).*
- *Tip: Remove any metallic residues (risk of short circuits) and carefully align the panels.*

3. TRANSFORMERS AND CONNECTORS

Place the transformers near the panels to minimize the length of the 12V cables. Have them connected (with the power off) by a qualified electrician, and link each panel zone to a transformer. Connect the panels to each other using PixCABLE Liaison cables.

4. CONNECTIVITY TEST

Before decorating, test the installation: power on and insert a PixLED in each panel to ensure proper functioning.

5. FINISHING

- *Apply joint tape.*
- *For foam panels, apply a thin layer of filler (less than 1 mm).*
- *Sand for a smooth finish.*
- *Apply paint or wallpaper (max thickness 1.5 mm).*

6. LIGHT FIXTURE INSERTION

Pin the fixtures to illuminate your décor. Insert PixLEDs for a starry sky, a graphic design, or personalized lighting.

THE ADVANTAGES OF PIXLUM®

- *Simplicity: Intuitive installation.*
- *Customization: Designs adapted to any project.*
- *Safety: Low-voltage, compliant with standards.*
- *Durability: Reliable, sturdy materials.*

With PIXLUM®, transform your spaces into refined luminous works of art.

EXAMPLE OF A PIXLUM® GRAPHIC DESIGN

Step 1

Materials: A stencil, adhesive, a double PixTOOL and a PixDRILL.

- On a PixLUM wall, display and stick the "Crossbones" stencil.

Step 2

- Using the PixTOOL Double and following the stencil dots, mark the wall to a depth of less than 1mm.

Step 3

- Using the PixDrill and following the pre-drilled holes, drill into the plasterboard to a maximum depth of 7 to 8 mm (1.2 mm drill bit).

Step 4

- Then remove the stencil, clean the wall with a damp cloth if necessary, and place the PixLEDs in each hole.

Step 5

- Finally, pin up your PixLEDs with the wall lit, either by hand or using the PixTOOL Push LEDs: **"Just pin, it's light !"**

— INTERVIEWS

*With designers and architects on the use of
PIXLUM® lighting*

INTERVIEW WITH MARIE D., INTERIOR DESIGNER

Can you tell us about your experience with PIXLUM® lighting in your projects?

Marie D.: Absolutely! I've integrated PIXLUM® luminous panels into several of my recent projects, and the results have been incredible. What I like most is their flexibility. You can create a wide variety of atmospheres, whether it's for a modern workspace or a cozy living room. Clients love the ability to customize the lighting to fit their needs and preferences.

What are the main advantages you've noticed?

Marie D.: One of the biggest advantages is the ease of installation. PIXLUM® panels can be seamlessly integrated into walls and ceilings, saving space and allowing for clean, minimalist designs. Additionally, the LED technology is highly energy-efficient, which is a great benefit for environmentally conscious clients.

INTERVIEW WITH JEAN M., ARCHITECT

How have you integrated PIXLUM® into your architectural projects?

Jean M.: I've used PIXLUM® in several projects, particularly in offices and commercial spaces. One of the most remarkable projects was the renovation of a coworking space. We used PIXLUM® panels to create distinct lighting zones, which helped define the workspaces while maintaining a cohesive and modern aesthetic.

What challenges did you face, and how did you overcome them?

Jean M.: The main challenge was ensuring that integrating the luminous panels didn't compromise the structural integrity of the buildings. We worked closely with PIXLUM® engineers to ensure everything met safety standards. The final result was not only safe but also visually stunning.

INTERVIEW WITH SOPHIE L., PRODUCT DESIGNER

What drew you to using PIXLUM® in your projects?

Sophie L.: What really attracted me was the ability to create unique lighting effects. PIXLUM® panels allow for incredibly creative use of light, which is perfect for artistic projects or temporary installations. I recently used PIXLUM® for an art exhibition, and visitors were amazed by the interplay of light.

What advice would you give to other designers considering PIXLUM®?

Sophie L.: I'd tell them not to hesitate to experiment. PIXLUM® offers so many possibilities that it would be a shame not to explore them all. It's also essential to carefully plan the installation to ensure everything works perfectly from the start.

These interviews highlight how PIXLUM® lighting can transform spaces, offering innovative and aesthetic solutions for a variety of projects. Whether for residential interiors, offices, or artistic spaces, PIXLUM® pushes the boundaries of lighting design.

— **FREQUENTLY ASKED QUESTIONS**

WHAT IS PIXLUM?

PIXLUM is an innovative French technology that transforms your walls and ceilings into customizable luminous surfaces. Using conductive panels and LED luminaires, you can create lighting designs without the need for complex wiring.

HOW DOES THE PIXLUM SYSTEM WORK?

The PIXLUM system uses conductive panels that, once installed, blend seamlessly into your walls and ceilings. They allow you to freely position LED luminaires equipped with small contact pins by simply pinning them to the panel's surface, eliminating the need for additional wiring. This system provides total flexibility for creating unique lighting designs.

ARE PIXLUM PRODUCTS COMPATIBLE WITH ALL TYPES OF LED LUMINAIRES?

Luminaires used with PIXLUM panels must be compatible with PIXLUM's specific contact connection system. It is recommended to use PixLEDs™ and luminaires supplied by PIXLUM to ensure optimal compatibility and safety.

CAN I CUT PIXLUM PANELS TO FIT MY DIMENSIONS?

Yes, PIXLUM panels can be cut using a jigsaw or a CNC machine for complex shapes to perfectly fit your needs. However, it is essential to follow PIXLUM's guidelines to ensure proper cutting and maintain the system's integrity.

WHAT IS THE LIFESPAN OF PIXLEDs™?

PixLEDs™ have a lifespan of 40,000 hours, comparable to high-quality LED luminaires, offering thousands of hours of illumination. For detailed information, refer to the technical sheets provided by PIXLUM.

HOW DO I MAINTAIN AND CLEAN SURFACES EQUIPPED WITH PIXLUM?

Surfaces equipped with PIXLUM panels can be cleaned carefully using methods suitable for the applied covering materials (paint, wallpaper, etc.). Ensure that the luminaires are turned off and follow safety precautions during cleaning.

WHERE CAN I PURCHASE PIXLUM PRODUCTS?

PIXLUM products are available on their official website and through authorized distributors worldwide. To find a distributor near you, consult the “Where to find us?” section on the PIXLUM website.

DO YOU PROVIDE INSTALLATION SERVICES FOR PIXLUM PRODUCTS?

PIXLUM offers detailed advice and tutorials for installing its products. For complex projects, it is recommended to consult professionals trained or certified by PIXLUM. We are always here to assist you with your PIXLUM projects.

ARE PIXLUM PRODUCTS ENVIRONMENTALLY FRIENDLY?

PIXLUM products use energy-efficient LED technology, helping to reduce electricity consumption. Additionally, the materials used are selected for their durability and minimal environmental impact.

CAN I CONTROL THE INTENSITY AND COLOUR OF PIXLEDS™?

Yes, some models of PixLEDs™ allow you to control the light intensity, but not the colour, enabling you to create personalized atmospheres. Check the product specifications to know the available options.

CUSTOM-MADE LIGHTING FIXTURES AND CHANDELIERS

Building on more than twenty years of expertise in lighting, the PIXLUM® team applies its know-how to ambitious projects, offering clients the opportunity to design and create grand bespoke luminaires and chandeliers. Our approach is founded on a perfect mastery of noble and innovative materials: hand-blown glass shades with refined shapes, sleek tubular lampshades, ultra-thin AWG 26 cables ensuring flawless draping, and polymirror surfaces that enhance the interplay of reflections and light.

Our personalized support allows you to define, alongside our experts, the desired style, dimensions, and staging, to create a unique and timeless piece. The examples showcased highlight the breadth of our possibilities: a spiral luminaire composed of 40 transparent and frosted glass shades, soaring nearly 3 meters high and beautifully reflected in a mirrored base, or a "cluster" chandelier featuring ten transparent shades equipped with dimmable 5-watt G4 white light sources, perfect for illuminating a spacious living room. Similarly, the suspended lighting of a dining table can take the form of a perfectly aligned arrangement of shades, adorned with a light, delicate orange feather, whose luminous cascade is gracefully reflected in a mirror.

Through the combination of high-quality materials, artisanal expertise, and a passion for design, PIXLUM® transforms your decorative aspirations into exceptional creations that elevate your spaces and tell a unique luminous story.

"Panelight" luminaire made up of 25 blown glass bubbles on a mirror backdrop - 125 Watts dimmable (150x50 cm).

TwistLight" luminaire made up of 42 blown glass bubbles on a mirror background - 126 watts dimmable (Diameter 120cm x H 2.8m).

CUSTOM-MADE LIGHTING FIXTURES AND CHANDELIERS

CUSTOM-MADE LIGHTING FIXTURES AND CHANDELIERS

"GrappleLight" made up of 8 blown 40-watt dimmable bubbles.
