# THE CLUBCRAFT PROMISE

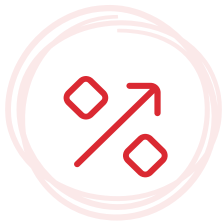

## ORDER ONLINE 24/7, 365

Our 24/7 online ordering system allows you to access your account, check prices, review stock availability, access product information and place orders at a time that suits you.

## SHIPPING

With distribution centres based in both the UK and the EU, we partner with the leading shipping experts worldwide to ensure the fastest delivery possible and safe, secure transport of your products.

## GREAT MARGINS

We've always been able to offer some of the best margins available in golf. Bringing great returns for your business is how we're continually supporting retailers get the best product at the best value.

## UNBEATABLE SERVICE

Our fantastic customer service team are on hand to assist with product enquiries, sales and technical support from **8.00am-5.00pm (GMT) Monday to Friday.**

## OVER 4,000 PRODUCTS

Our vast warehouse contains over 4,000 product SKUs, not only from the biggest names in golf, but a full range of our in-house brands that are some of the most respected in the industry.

## A GREENER FUTURE

We've launched a number of sustainable initiatives that will enable us to offer the golf trade a greener future including the eradication of plastic packaging and the introduction of biodegradable packaging and products.

# GETTING A GRIP

## YOUR GUIDE

Getting the right size and comfort of grip is critical to success out on the course.

### Step 1: Measure your hand

Take measurement from middle finger from dominant wrist crease to tip of finger as shown.

### Step 2: Choose a comfort rating

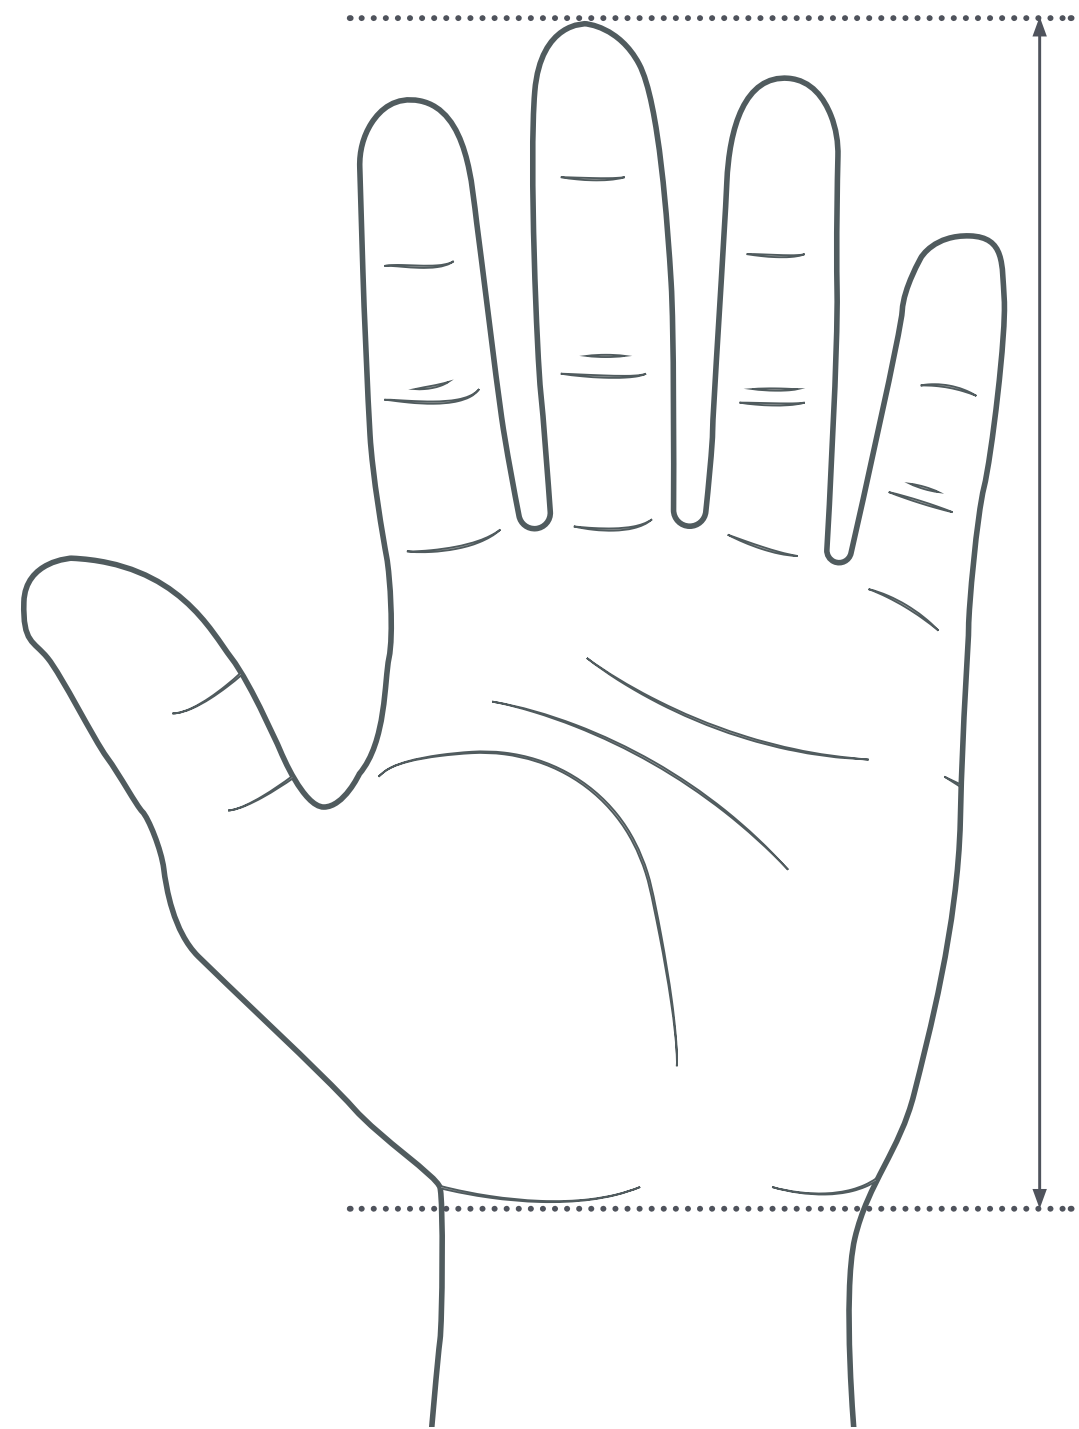

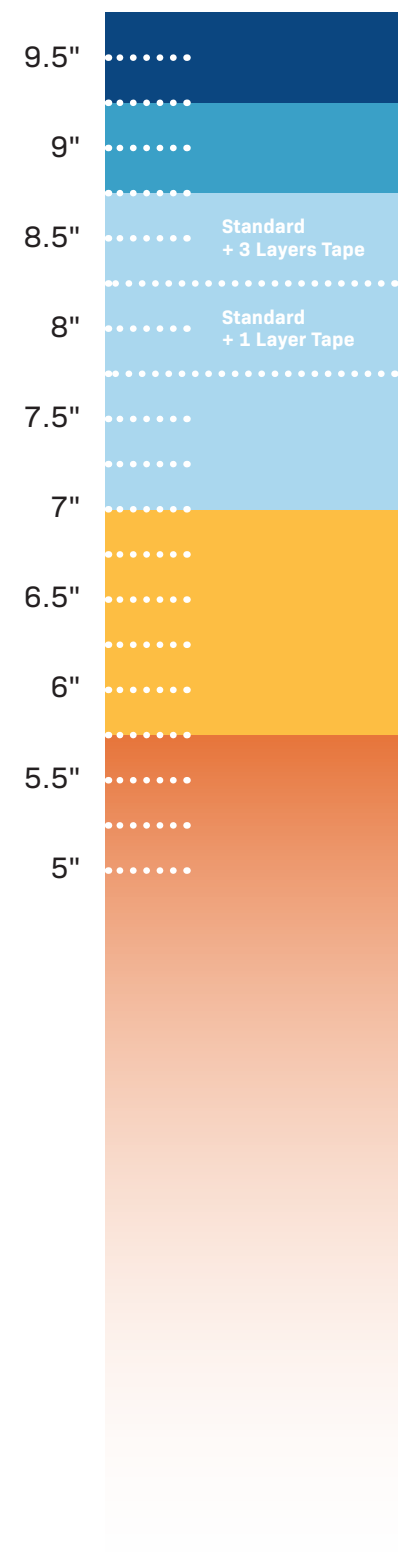

We have evaluated the grips in this guide and given them a compound comfort rating from Soft to Firm (A-E).

### Step 1: Grip sizes

- +** JUMBO & ABOVE
- O** OVERSIZE
- M** MIDSIZE
- S** STANDARD
- U** UNDERSIZE
- J** JUNIOR

### Step 2: Comfort

- A** SOFT
- B** MEDIUM/SOFT
- C** MEDIUM
- D** MEDIUM/FIRM
- E** FIRM

## EXCEL WSP MIDSIZE PISTOL LITE

WINN

The Winn Excel WSP Midsize Pistol Lite is an innovative putter grip designed for discerning golfers seeking reliability and performance. This midsize grip combines advanced technology and ergonomic design for an optimal putting experience.

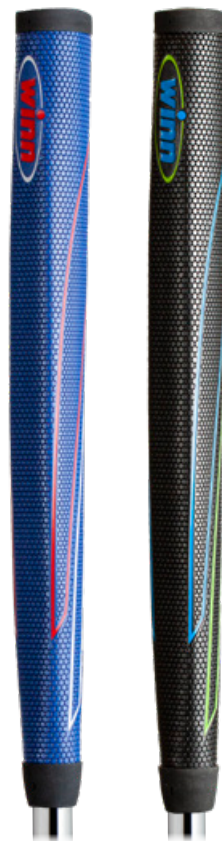

**NEW**

## EXCEL JUMBOLITE PISTOL

WINN

Remarkably, the JumboLite Pistol maintains the same weight as a standard grip, ensuring your putter's head weight remains unchanged. Crafted from Excel performance material, it guarantees unparalleled comfort, feedback, and slip resistance. With its expertly engineered design and pattern, it actively encourages a flawless putting stroke.

## EXCEL TOUR PISTOL PUTTER

WINN

All Tour Pistol putter grips come with a unique tone-on-tone colour aesthetic with an enhanced hexagon pattern. The hexagonal pattern provides great feel and slip resistance, promoting light grip pressure. As always, Winn have incorporated the Excel polymer providing a comfortable tacky feel that golfers have become to expect from Winn putter grips.

## EXCEL WINN PROX PUTTER

WINN

The Winn Pro X uses a less tapered profile than traditional putter grips. The reduced taper profile eliminates wrist movement during the putting stroke, while still delivering the comfortable and tacky feel that you expect from Winn putter grips.

## EXCEL WINNPROX

WINN

Slightly larger than a Winn Midsize putter grip, the model uses Winn's comfortable, tacky Excel polymer for ultimate feel. The paddle-style profile eliminates wrist movement during the stroke.

## 2020.VSN

WINN

Seeing is believing with Winn's 2020.VSN (Vision) putter grips. The Excel polymer material with a new hexagon pattern, offers unmatched feel and performance, while providing that comfortable tacky feel you've come to expect from Winn.

## EXCEL TOUR PISTOL PUTTER

WINN

Winn's Tour Pistol is designed for players who prefer a traditional size & shape putter grip. Well-defined edges offer accurate alignment & consistency.

All new models come in a unique tone-on-tone colour look with an enhanced hexagon pattern, which provides great feel and slip-resistance, promoting light grip pressure.

**DRI-TAC**  
WINN

Provides amazing tackiness and cushioned comfort. It is also the premier grip for shock absorption and vibration dampening, making it the hands-down choice for golfers suffering from arthritis and hand fatigue.

**EXCEL 21in PUTTER GRIP**  
WINN

For long or belly putters, this 21-inch one piece grip offers the shape of a pistol with the length of a 2-piece. Our original Excel polymer provides a soft, tacky feel that is the hallmark of Winn putter grips.

Golf Pride

IDMIG

AVON

TOURDRI

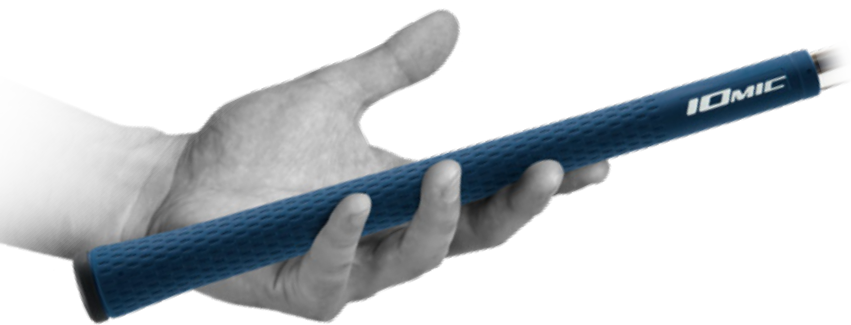

## DRITAC LT (LESS TAPER)

WINN

Winn's DriTac LT was designed with a less tapered profile that offers a larger lower hand. This feature offers better control and lighter grip pressure.

For golfers suffering from arthritis or hand injuries, the larger lower profile provides easier gripping for less pain and fatigue.

## STICKY GRIPS

IOMIC

Iomic, the straightest grip in golf. Low torque in Iomic grips can reduce the shot dispersion on off-centre hits by up to 30%, meaning you are more likely to hit fairways, even when you are not swinging at your best.

Iomic grips have extremely tight tolerance of weight due to the vacuum moulding production process and use of Iomic's elastomer compound. Iomic grips are waterproof, this means that unlike rubber grips, Iomic grips do not soak up water in wet weather. They are also UV Resistant, standard rubber grips get hard, shiny and brittle over time, reducing the grip and feel.

A proven winner on the PGA Tour, Project X features a different constant taper per inch for each shaft in the set. Longer taper rates results in more energy transfer to the ball, so it gets up faster and flattens out for penetrating trajectory and ball flight.

Bend Point: Progressive. Step Pattern: Stepless. Specify club number when ordering #1 is 41.5" in length.

XP 95 is a ultralight shaft (95g) designed to delivers maximum peak trajectory for explosive distance.

True Temper's R&D team combined standard and speed steps in XP 95 to ensure the ultimate combination of maximum ball speed and dispersion control.

DYNAMIC GOLD W/ SENSICORE IRON SHAFT X ★

★ These products are special order only. You should allow at least 30 days for delivery\*  
\*Lead times are subject to production capacity

With a high bend point for maximum control, the Dynamic Gold Iron Shaft with Sensicore has been the No. 1 on the PGA Tour for many years. Matched by weight for consistency throughout the set, the weight tolerance on each shaft is .030 oz. Equipped with shock-absorbing Sensicore inserts that absorb up to 70% of a club's vibration at impact.

DYNAMIC GOLD 120  
TAPER IRON SHAFT ★

The Dynamic Gold 120 shaft from True Temper delivers the tour-caliber accuracy of Dynamic Gold in a lighter weight steel shaft. Stronger players will experience a similar profile and launch as Dynamic Gold in a shaft that is easier to swing.

True Temper has spent the past 15 years focused on two specific performance categories—tour-caliber designs for the best players in the world and lightweight steel shafts. The Dynamic Gold 120 represents the best performance benefits of both of these categories in one radically new design.

## DYNAMIC GOLD 115 TAPER 9 IRON SHAFT

The Dynamic Gold 115 wedge shaft is designed as a lightweight alternative to the number one wedge shaft in the history of the game. For golfers who play a lightweight iron shaft, playing a lightweight wedge shaft only makes sense as it provides an ideal weight transition from iron to wedge.

Having this seamless transition allows players a more natural feel in their wedges, leading to better consistency and lower scores. Dynamic Gold 115 is a mid-low launch and spin wedge shaft that is optimal for golfers who play iron shafts weighing 105g or less.

## DYNAMIC GOLD TOUR ISSUE IRON SHAFT SET (4-PW) ★

Dynamic Gold Tour Issue is the Gold Standard by which all other iron shafts are measured. Dynamic Gold Tour Issue is a tour-weighted shaft that is designed for players seeking a low, penetrating ball flight for optimum control and accuracy.

★ This products is special order only.  
You should allow at least 30 days for delivery\*  
\*Lead times are subject to production capacity

## TRUE TEMPER MULTI-STEP LITE IRON SHAFTS

Designed with a low kick point, for players seeking higher launch angles from a steel shaft. The extended parallel tip section allows multiple trimming options, to accommodate nearly all golfers.

***Bend Point: Low.***

## TRUE TEMPER STEEL WOOD AND IRON SHAFTS

An affordable steel shaft with a conventional step pattern and the feel and performance of traditional steel.

***Bend Point: High. Step Pattern: 2.***

TRUE TEMPER AMT BLACK  
TAPER IRON SHAFT

AMT Black is the middle weight option in the AMT range and delivers a mid-high trajectory and . Featuring Ascending Mass Technology, AMT Black gets progressively heavier as golfers move from their long irons to short irons.

This allows for increased speed and launch from the lightweight long irons and superior control and precision from the midweight scoring clubs.

TRUE TEMPER AMT RED  
TAPER IRON SHAFT

AMT Red is the lightest weight and highest trajectory/spin option in the new AMT range. Out of the AMT range, AMT Red maximizes speed and launch most by utilizing a responsive tip design and maintaining a constant superlight weighting in 4-7 irons.

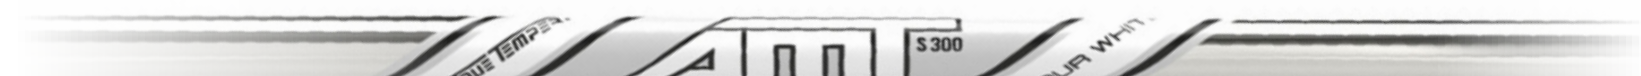

Focusing more on precision and control from 4-iron through to wedge, AMT Red is designed with Ascending Mass Technology – making each shaft progressively heavier by 3-gram increments as golfers move to shorter irons.

AMT Tour White is a tour-weighted option that features the lowest trajectory and spin in the AMT range. AMT Tour White has the same performance DNA as Dynamic Gold and is designed to get progressively heavier as golfers move from their long irons to short irons.

Lighter long irons are easier to swing and produce increased speed along with a higher initial launch while the tour-weighted short irons produce the traditional Dynamic Gold accuracy, consistency and trajectory that is desired from your scoring clubs.

N.S. PRO MODUS³ TOUR 120 ★

★ All Nippon shafts are available in Taper tips on request.  
(excluding MODUS3 and ZELO shaft, these are only available in .355 taper tip).

The N.S. PRO Modus 3 series shafts are popular with touring pros because they offer optimal performance in the three key areas.

Desired trajectory as a result of the unique structure of a stiff tip section and softer mid section, accurate distances due to the unique raw steel material and tight dispersion coming from the exacting tolerances of the highest quality level.

## KURO KAGE SILVER TINI

With the addition of TiNi wire in the tip section, the new Kuro Kage Silver Shafts deliver the lower launch and lower spin of the original KURO KAGE™ Silver profile, but with added stability and increased energy release through the impact zone, adding explosive power to the signature, KURO KAGE™ Silver profile.

## KURO KAGE BLACK HBP

KURO KAGE™ Black Wood Series features Mitsubishi's signature “smooth” bend profile, offering balanced stiffness along the entire length of the shaft. Its High Density Prepreg is positioned in the lower third of the shaft to enhance feel and stability.

## FUBUKI Z-SERIES 60 WOOD SHAFTS

The FUBUKI™ Z profile shares a similar bend to the ZT product. The Z Series is stable in the mid and butt sections, while the tip section promotes a higher launch and maintains the same low spin. It also features variable torque and a more standard balance point than the ZT profile - making it versatile to fit a wide range of players and abilities.

## TOUR TAPERED IRON SHAFT

The KBS Tour shaft is Kim Braly's signature model for players desiring shot versatility with a mid trajectory, piercing flight, and smooth all-around feel. Incorporating signature KBS technology, the KBS Tour shaft maximises energy transfer within an intelligent shaft design for better trajectory and shot control.

On Tour, the KBS TOUR shaft is preferred by several of the best ball-striker's in the world that prefer feel and workability. Available in five flexes and weight ranging from 110g to 130g - the KBS Tour shaft is purposed for fitting for a wide variety of players.

## CLUBHEAD REAMING VICE

TL237

Secures clubheads for reaming to a larger bore. The fast lever action provides 250 pounds of clamping pressure. Use with a drill press.

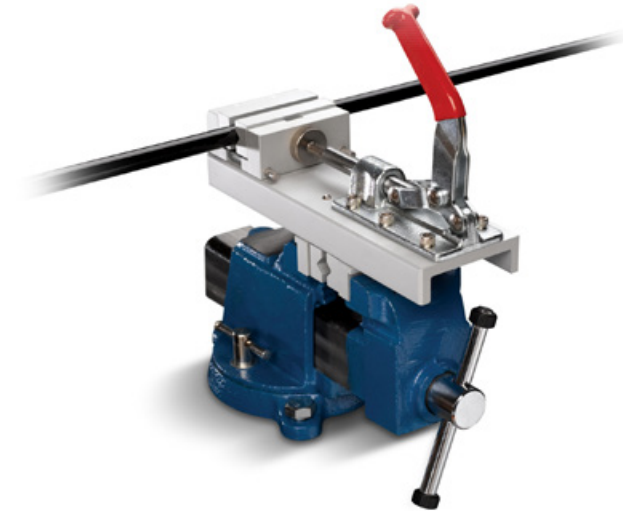

## HEAVY-DUTY LEVER-ACTION SHAFT VICE

TL193

With a simple, fast adjustment, this premium-grade clamp is perfect for busy shops. Three interchangeable jaws included.

Bolt to your workbench or secure in a vice (sold separately).

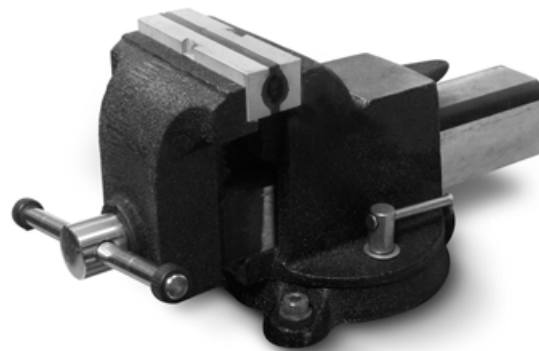

## VICE WITH SPEED HANDLE

TL345

Heavy Duty 5" vice made from highly ductile Steel. Vice has a 360 degree swivel base with double locks and a sturdy anvil.

Six specialized jaw sets including a compact shaft extractor can mounted on this vice. This vice has 4" wide jaws, 5" throat opening and weight in at 17Lbs.

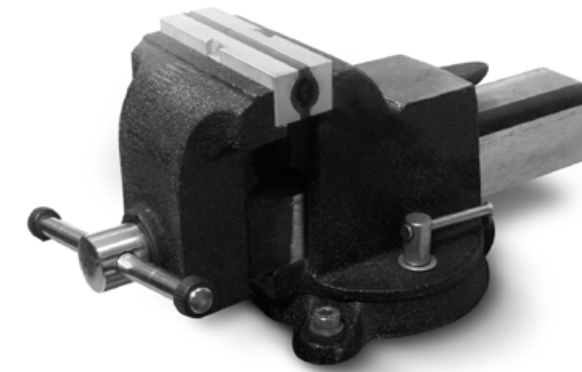

## CLUB MAKERS VICE EXTENSION

TL345B

Retractable 7" extender keeps vise away from bench and allows work to be carried around rather than over the vise.

## MULTI-PURPOSE BENCH VICE

TL207

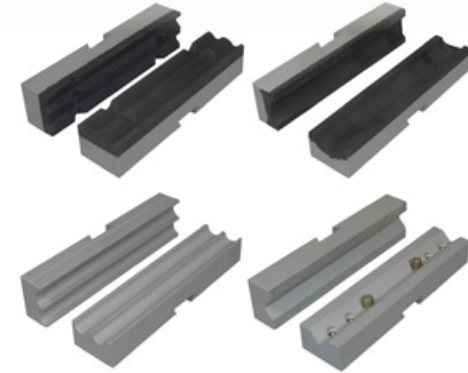

The tool comes with four interchangeable jaws — soft aluminium V design for steel shafts, rubber V design for graphite shafts, round rubber jaws for gripping and clamping and flat jaws for irons and other jobs. It also features a built-in ferrule setter and extractor to help clubmakers multi-task.

## CLUB MAKING JAWS

TL345A

Comes with a set of four jaw sets including a vulcanized “V” rubber jaw, a vulcanized round jaw set (designed for clamping the shaft for regripping), an aluminum round Channel for clamping wood and iron shaft tips and a dimpling jaw set for Steel shafts.

## SHAFT CLAMP

TL338

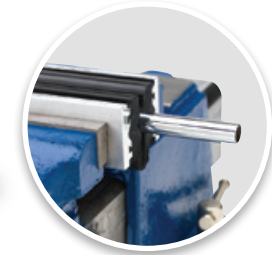

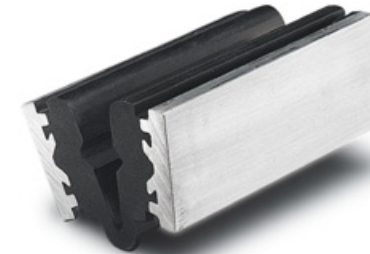

The Pro Shaft Clamp grasps a full 3 inches of the shaft tip for a secure hold that will not let go.

## PRO METAL VICE CLAMP

TL271

Provides a snug hold for shaft prep, etc. Durable, non-slip aluminum case.

## VINYL RUBBER VICE CLAMP

CR050

Firmly secures any shaft without any damage to the chrome finish or graphite.

## SMALL ALUMINIUM SHAFT CLAMP

TL366

A heavy-duty low profile shaft clamp specifically designed for shaft removal and tapping ferrules into place. Assorted hole sizes fit standard tip shafts. Features a quick open-and-close hinge for added convenience.

## ULTIMATE SHAFT EXTRACTOR

TL276

Designed with the high-volume repair shop in mind. Strong enough to pull any club on the market, this puller will be a workhorse for years to come. The eight-inch T handle provides superior feel when clamping those ultra-light graphite shafts.

The six inches of throw accommodates the deeper-than-average bore depths. What makes this puller superior is the super-fast action of the ratchet that literally throws the head from the shaft.

**Replacement Jaw**

## SHAFT EXTRACTOR

TL277

Industrial-strength performance at an economical price. Durable and easy to use, this tool is designed for smaller shops but has no problem handling high-volume work.

In its third version, this constantly improving tool now features a 5/8" round guide for the collar gate housing to slide on, rather than the extractor's frame — in addition to proven features like the pressure-gauging T-handle, shaft clamp and permanently fixed collar gate.

## MR. T GRAPHITE SHAFT EXTRACTOR TOOL

TL204

**ClubCraft**

The easiest, safest way to remove broken graphite shafts. Simply screw the threaded tip into the shaft piece, heat the hosel, load into a graphite shaft extractor, and pull.

## PROFESSIONAL SHAFT REMOVERS

TL292 / TL293

**ClubCraft**

The perfect solution for removing steel shafts broken off flush with the hosel. High-strength tempered steel.

TL292 - For Irons  
TL293 - For Woods

## KWIK OUT SET

TL256

**ClubCraft**

Easily removes broken steel shaft tips from hosels. Break the epoxy bond with heat, then tap the Kwik Out's threaded tip into the shaft and twist to lock. Øl the pushing nut down and keep turning until the shaft tip backs out of the hosel.

## 48" HEATING ROD FOR GRAPHITE SHAFTS

TL254

**ClubCraft**

Now you can use a heating rod to break the epoxy bond on almost all graphite shafts. Use it by itself or as a supplement to light external heating from a heat gun or torch.

TL187

**ClubCraft**

Delivers a straight pulling motion that allows shaft reuse. Also handy for shafts stuck in hosels on dry runs. The 15" bar's end grooves fit woods on one end and irons on the other.

## HOSEL PROTECTORS

TL235

**ClubCraft**

Protect hosels from nicks and scratches during shaft removal. Especially useful for aluminum metal wood hosels. In packages of six (three for woods, three for irons).

## FERRULE SHIELD FOR WOODS

TL213

**ClubCraft**

A must-have for removing shafts from metal woods without damaging the head or special ferrule.

## EXTRACTOR PLATE

TL233

**ClubCraft**

Holds shafts securely in place when held in a vise (see TL207).

## HOSEL CLEANING BRUSH

TL251

The coarse-wrapped wire brushes on the Hosel Cleaning Set helps clean the bore of old epoxy, oil or other pollutants that can weaken the epoxy bond to the shaft. Able to accommodate wood and iron hosel bores.

## HOSEL PROTECTORS

TL252 / TL253

**ClubCraft**

Brushes can also be used with a drill. Replacement wood brushes (TL252) and iron brushes (TL253) are available separately or as a pack of 3.

TL252 - Wood Brush  
TL253 - Iron Brush

## MANUAL SHAFT SPINE FINDER

TL367

Provides a quick, accurate, low-cost method for locating the neutral bending axis on a golf shaft. This ensures the correct clubhead-to-shaft orientation, improving impact feel consistency, while minimizing shot dispersion.

## GRAPHITE SHAFT REMOVER

TL345C

Compact shaft extractor clips on to the vice which is then used to clamp the shaft with sufficient force to allow heads to be pulled effortlessly.

## 14" CHOP SAW

TL311

Clarke®

This high-quality tool is designed for both professional and part-time clubmakers who prefer a lightweight, compact shaft cutter that is easy to operate in tight spaces.

## MULTI-TOOL BENCH GRINDER

TL160

Clarke®

The most economical setup for custom grinding and cosmetic finishing — and it makes reshafting bore-through irons a cinch. A 1/2 hp, 3450 rpm motor and a variety of 6" finishing wheels on a 1/2" arbor come with the Multi-Tool.

## REGROOVING TOOL

TL239

ClubCraft

Two interchangeable cutting heads: a two-in-one steel cutter and a tungsten carbide V-groove cutter.

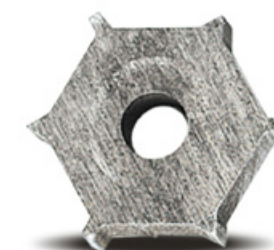

## CUTTING HEADS

TL313 / TL314

ClubCraft

Cutting Head replacement components for use with the Regrooving Tool (TL239).

## TUNGSTEN POWDER

TL259

50% heavier than lead to increase swingweight more efficiently. Especially useful in clubs with ultralight graphite shafts.

## FERRULE SETTER

TL219

**ClubCraft**

Mount to a bench to set ferrules perfectly. Adjustable depth and apertures for .335", .350" and .370" shafts.

## UNIVERSAL BUTT WEIGHTING PLUG

TL210

**ClubCraft**

Insert epoxy into the butt end of a putter or graphite shaft and then add tungsten or hosel weights to counterbalance a club. Pack of 6.

## DELUXE MR. T

TL241

**ClubCraft**

The easy way to install ferrules featuring a durable aluminum sleeve and comfort grip.

## MACHINED BRASS HOSEL WEIGHTS 2g

TL319

The Snake Eyes Machined Brass Hosel Weights are the best way to customise swingweights. They are designed to fit hosel weight ports in selected clubheads. Lead-free and come in pack of 12.

## SHAFT CORKS (25 PACK)

TL188 / TL257

**ClubCraft**

Essential for weighting down the shaft. Pour in tungsten powder and then pack the cork down with a ram rod.

## DRILL BIT FOR GRAPHITE SHAFTS

TL248A

The 5/32 48" Drill Bit for Graphite Shafts is perfect for making swing-weight adjustments on fully-assembled, graphite-shafted clubs. This drill bit works for clearing out shaft tips, coring out excess epoxy glue and loosening weights, as well as lightening up hosels quickly and effectively.

## COBALT STEEL PRE-REAMING DRILL BIT

TL295 / TL296 / TL297

The Cobalt Steel Pre-Reaming Drill Bits are perfect for re-boring hosels on club-heads made of notoriously difficult-to-drill metals such as 17-4PH, titanium, and marraiging steel. Available in three sizes, .335" (TL295), .350" (TL296) and .370" (TL297).

## STRAIGHT FLUTED HAND REAMER

TL298 / TL299 / TL300

The Straight Fluted Hand Reamer is excellent for finishing and re-conditioning hosel bores for re-shafting purposes, providing a high degree of accuracy and surface finish. Available in three sizes, .335" (TL298), .355T" (TL299) and .370" (TL300).

## ADJUSTABLE SQUARE-STOCK HANDLE FOR HAND REAMER

TL301

The Adjustable Square-Stock Handle for Hand Reamer is for use with straight fluted spiral reamers. It is excellent for finishing and re-conditioning hosel bores for re-shafting purposes, providing a high degree of accuracy and surface finish.

## IRON REAMER

GS838B

Straight Fluted Hand Reamer excellent for finishing and re-conditioning hosel bores for re-shafting purposes. Provides a high degree of accuracy and surface finish.

It is made to exacting specifications, to offer a good allowance between the shaft and hosel for the perfect epoxy bond.

**ClubCraft**

## GRAPHITE SHAFT TIP ABRADER

GS8649

For abrading graphite shaft tips. Just a few turns and the coating is fully removed for a proper shaft bond. Special wound coil stainless steel wire brush and compression nut compensate for wear.

## COLLARED FERRULE FOR CALLAWAY FORGED AND TITLEIST AP1/2 IRONS

CRF0210

A replacement collared ferrule for Callaway forged and Titleist AP1 and AP2 irons.

**ClubCraft**

## COLLARED FERRULE - TAPER .355

CRF0211

A replacement collared ferrule ideal for general use.

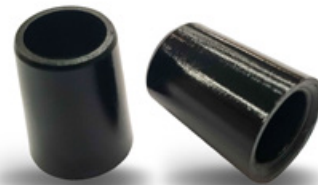

**ClubCraft**

## FERRULE - IRON TAPERED .355 13mm BLACK PACK 12

CRF0213

A replacement ferrule for tapered shafts, 13mm in length and 0.355" diameter. Comes in a pack of 12.

**ClubCraft**

## FERRULE - IRON TAPERED .355 17mm BLACK PACK 12

CRF0214

A replacement ferrule for tapered shafts, 17mm in length and 0.355" diameter. Comes in a pack of 12.

**ClubCraft**

## COLLARED FERRULE FOR GENERAL USE - PARALLEL 0.370

CRF0212

A replacement collared ferrule ideal for general use.

**ClubCraft**

## NIKE FERRULE ADAPTER - STR8-FIT

GS300763731

Ferrule adapter by Nike with a 'STR8-Fit' Adjustable Sleeve. Will work with a number of Nike drivers and woods that come with this Sleeve system.

## TUNGSTEN 8G SHORT SCREW

TL283

The Tungsten 8g Short Screw is useful for adding weight to club heads.

**ClubCraft**

## STEEL WEIGHTS 5G

TL281

The 5g Steel weights are useful for adding weight to club heads and come in stainless steel.

**ClubCraft**

## COPPER WEIGHTS 10G

TL282

The 10g Copper weights are useful for adding weight to club heads and come in a distinctive copper finish.

**ClubCraft**

## STEEL WEIGHT 12G

GS243174

A dual pack of ClubCraft steel weights, both 12g each. Used in club making and refurbishments and used to add weight to club heads.

**ClubCraft**

## SHAFT TIP WEIGHT

VARIOUS

ClubCraft Shaft Tip Weight can be epoxied into shaft tips during assembly of clubs to achieve a desired swingweight. Comes in 1g, 5g and 6g.

## FERRULE SLICER & SPLITTER

TL353

The ferrule splitter is a convenient and easy to use hand tool designed for splitting ferrules of both woods and irons effortlessly. Held in a vice, the ferrule splitter is safe to use on both steel and graphite shafts while preventing the risk of injury to clubmakers who may otherwise have to use a utility knife.

# WORKSHOP TOOLS

#### DIGITAL STORAGE

Stores up to 20 measurements into non volatile memory, including a USB data transfer mode with SPC data collection software.

#### STRONG CLAMPS

Frontal operation of clamps and protractors as well as self-levelling, slip proof, non-marring clamping system for less errors.

#### VERSATILE

Works with straight, mallet or binocular putter designs as well as heel shafted and centre shafted putters as well as offset, single or double bent shafts.

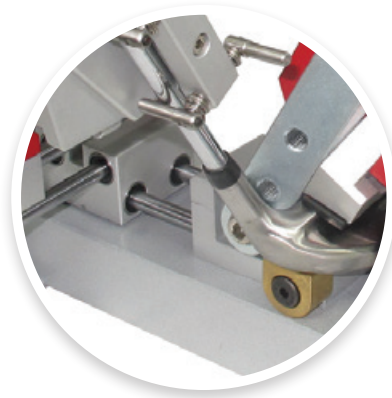

## DIGITAL PUTTER LOFT & LIE BENDING GAUGE

TL355

The Evolution II Digital Putter Lie and Loft Bending Gauge epitomizes our know-how into one feature packed design.

The design mirrors the ease of use, functionality and dependability that made our bending gauges the preferred choice of professional clubmakers and fitters worldwide.

#### ACCURACY

The A.P.E.'s high precision digital encoder is capable of generating 3600 pulses per rotation which translates to a resolution of 0.1 degree per pulse

#### EASE OF USE

Errors are minimised as lie and loft are measured simultaneously in a single setup and displayed on a large blue LCD screen.

## DIGITAL LIE & LOFT BENDING GAUGE FOR IRON

TL360

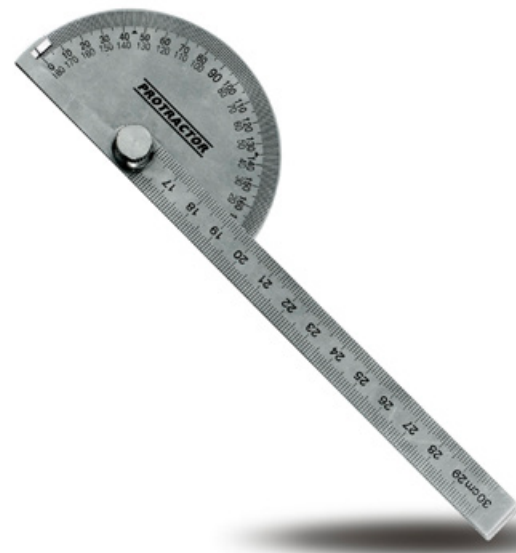

The Auditor Digital Lie and Loft Bending Machine was designed for and built around the modern iron and hybrid head, with an emphasis on usability, reliability, and precision.

Fitted with our latest Auditor  $\pi$  Engine (A.P.E.) and coupled with a unique design, this bending machine and measuring gauge provides an ideal mix of accuracy and ease.

## POCKET LOFT & LIE GAUGE

TL346

A machinist's protractor has fitting for measures lie and loft, sole angle and hosel bore exit. The jigs help position the club-head and protractor for each measurement to be made.

## 2" LOFT ANGLE GAUGE

TL200

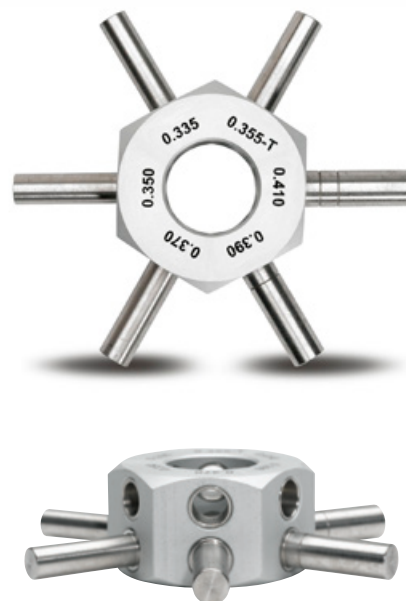

Measures face-to-sole angle dimensions of all clubheads. Sole measurements in cm. All-steel construction.

## HOSEL BORE GAUGE SET

TL243

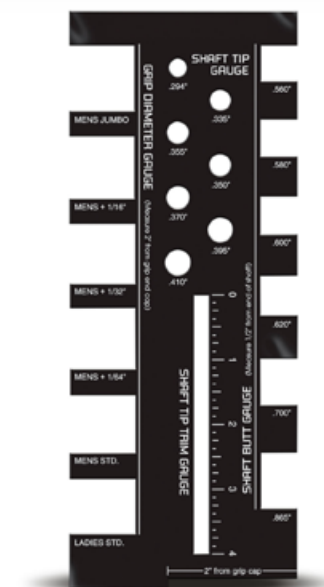

Measures hosel bores and shaft tips quickly and accurately. Simply slip the tool tips into your hosel bore, or your shaft into the measuring holes, to find the correct size.

## ALL-IN-ONE GAUGE

TL190

Measure all common grip sizes, shaft tips and shaft butts. The handy cut-away shaft trim gauge lays over a tip or butt for easy marking.

## HAND HELD LOFT & LIE GAUGE

TL337

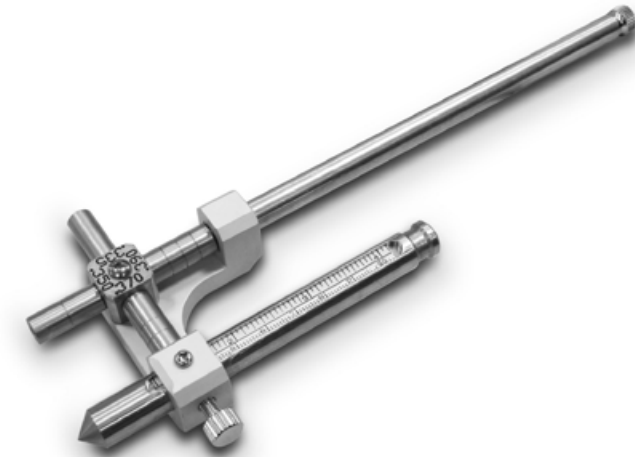

A compact and accurate lie and loft measuring gauge. Designed with the golf professional in mind, whether working on or off the golf course.

## 2" LOFT ANGLE GAUGE

TL348

The HTS Length Gauge is used to measure the hosel to sole length, defined as the distance from the top of the hosel to the bottom of the sole.

## FREQUENCY TIP WEIGHT

TL305

The frequency tip weight (a precise 205 grams, the industry standard as adopted by the ASTM) allows accurate and uniform frequency measurements of raw shafts and affixes to any shaft tip diameter.

## DIGITAL CALIPERS

TL120

This must-have for any shop precisely measures almost anything with digital accuracy. Includes extra battery and padded case. Measures inches or millimeters.

## PROFESSIONAL DIGITAL SWINGWEIGHT SCALE

TL196

Accurate, affordable and easy to use, this unique design eliminates all manual movement of slide weights on conventional scales, registering swingweight in seconds.

Based on the 14" Lorythmic® standard of swingweight measurement, it reads swingweight accurately in .003-point increments in the A through F Lorythmic scale. Easily recalibrated to maintain complete accuracy. Instruction manual included.

## EASY OPERATION

A no fuss and easy to use instrument that's well suited for the volume club assemblers and retailers alike, where speed and reliability are key for a fast turnaround.

## FREQUENCY ANALYZER

TL195

The industry standard for frequency analysis, this compact design calculates both cycles per minute (cpm) and hertz for precise data. Features strain gauge-based sensing technology for accuracy and an expanded range of 90 to 1000 cpm. 205g tip weight included.

SHAFTS

FERRULES &  
ADAPTERS

WORKSHOP  
TOOLS

## SWINGWEIGHT SCALE

TL199

Measures swingweights from A0 to F5, plus static weight up to 650g. The non-restricted beam provides a zero-friction pivot for maximum accuracy.

The grip cap compensator and grip channel on top of the beam allow for preassembly dry-fit swingweighting, while the precision bubble level ensures exact readings. The component tray permits weighing of individual small components, and the perpendicular club slot allows for static club weights or shaft weights.

## BEAM BALANCE SCALE

TL191

This 14" beam balance scale's slide weight slides under the fulcrum, increasing accuracy and ensuring more precise dampening for easy reading. Features two precision indicators for accurate swingweight readings.

Scale reads Lorythmic swingweight from A0 to G0 directly below the front edge of the slide weight. Also easily measures total or static weight.

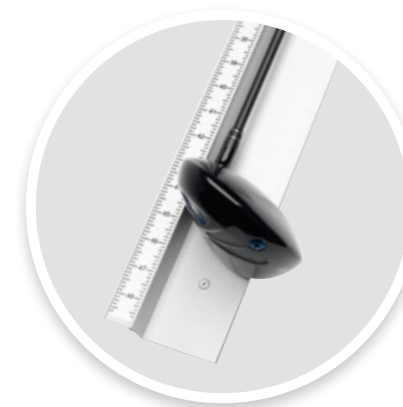

## CLUBMAKER'S WORKSTATION

TL236

Four of the most commonly used tools in club assembly, all in one tool. Includes a shaft trimming guide, lie angle protractor with offset measuring capability, club length ruler and gripping jig.

All this in one convenient, compact tool that mounts easily on even the smallest workbenches.

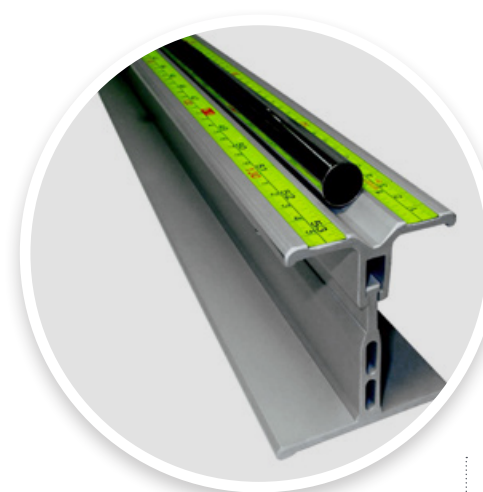

## PROFESSIONAL BENCH RULER

TL279

The Professional Ruler has its markings above where the club or shaft lies. This allows easy, exact measurements for any shaft tip or butt trim markings, or final length markings.

Can be mounted to your bench top. Now including the RH/LH Reversible 60° Angle Gauge.

#### SPLIT LEVEL MEASURING

The ruler features a split-level measuring plane and a deep throat that allows the club to lie at the correct lie angle to speed up measurement and assembly.

#### VERSATILE

The Deep Throat Club Length Ruler is the only ruler than can handle difficult-to-measure clubs, belly putters and the like.

## DEEP THROAT CLUB LENGTH RULER WITH LIE ANGLE GAUGE

TL350

Featured is the Deep Throat Club Length Ruler with Lie Angle Gauge that's specifically designed to handle the length of difficult-to-measure clubs where by the head, shaft and or grip do not lie on the same reference plane.

All these design features have a dramatic effect on a club's playing length and how its measured and which results can be a determining factor as to whether the club is deemed conforming or not.

## 2-INCH MASKING TAPE

TA007

A roll of 2-inch masking tape from ClubCraft for use during clubmaking and club refurbishments. Can be used for masking off areas of the club that do not need to be exposed to solvents or other substances.

**ClubCraft**

## PU PACKING TAPE

TA022

Heavy duty PU packing tape measuring in at 6600mm by 50mm. Perfect for re-boxing items for shipments.

**ClubCraft**

## LEAD TAPE (0.5in x 75in)

TA082

Ideal for fitting and clubmaking, the ClubCraft lead tape can be used as a temporary weight on the back of both woods and irons to achieve correct total weight and swing weight.

**ClubCraft**

## WIDE LEAD TAPE (75in x 1in)

TA083

Ideal for fitting and clubmaking, the ClubCraft lead tape can be used as a temporary weight on the back of both woods and irons to achieve correct total weight and swing weight.

**ClubCraft**

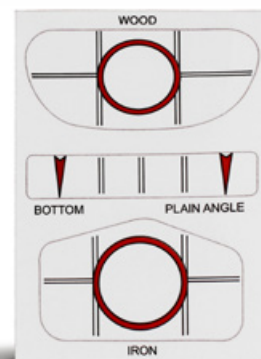

## IMPACT TAPE

TA056

Self-adhesive stickers that record the impact point on the club face, allowing shot consistency to be analysed. Pack of 10.

**ClubCraft**

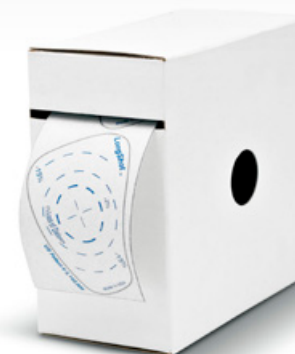

## LONGSHOT LABELS IRON

GS9997I

Each recorder is shaped to fit a club type; they are moisture resistant, add no weight and do not hinder ball to club contact or feel. Box of 200.

## COLLAPSIBLE CLUB LENGTH FITTING RULER

TL347

For the custom club fitters who work on and off the golf course. When fully extended this ruler can measure a golf club's playing length as well as length conformance to the R&A and USGA 60° rule for sanctioned tournament play.

The ruler also doubles up as classic wrist to floor measurement fitting ruler that instantly reveals the best club length to fit a golfer with woods and irons. The ruler can also be used for tip and butt trimming raw shafts.

## CLUB LENGTH RULER WITH ANGLE SOLING PLATE

TL349

This club length ruler is for clubmakers accustomed to measuring club length using the "standard" method where by a 48" ruler is placed behind the back of the club at the heel with the centre of the sole touching the ground while in the address position.

## GHOST TAPE DRIVER/FAIRWAY BOX

TA032

**ClubCraft**

300 x Top, 100 x Sole, 100 x Face  
1 Box of 3 rolls

## LIE TEST HITTING BOARD

TL186

**ClubCraft**

The board's surface leaves a small, temporary mark on any club's sole, indicating lie angle.

## BASIC LOFT AND LIE BENDING MACHINE

TL202

An economical way to make quick, easy loft and lie adjustments. Simple to operate, with built-in measuring gauges. Mount to your bench or our universal stand. Bending bars sold separately. Use TL202 with TL198.

## UNIVERSAL BENDING STAND

TL198

Mount any of our bending machines to this heavy-duty stand. You can use the stand-on platform to hold it still with your own weight, but we recommend anchoring it to the floor. (Machine not included.)

## PUTTER BENDING MACHINE

TL306

Features an easily legible lie and loft protractor that uses a unique parallel bar system to enhance speed and accuracy. Accommodates larger, high-MOI putters. Mounts on bench or our Universal Bending Stand (TL198).

## HIGH TENSILE FORGED BRONZE BENDING BAR

TL354

This digital bending bar is the only method we know of with which a clubmaker can relate the torque needed to bend a hosel one degree in Ft/Lbs for a specific alloy and clubhead model.

## FORGED IRON CLAMPING KIT

TL154

**ClubCraft**

With a top clamp and sheaves made of nylon instead of steel, this clamp for the Ultimate Loft and Lie Bending Machine protects forged clubheads from marks and scratches.

## REPLACEMENT GAUGES

TL245A / TL245B

**ClubCraft**

Replacement gauges for use with the Professional Loft/Lie Machine (TL245).

TL245A – LH Gauge / TL245B – RH Gauge

## SOLING UPGRADE KIT

TL234

**ClubCraft**

This soling kit comes with brass mechanisms and can be used on Loft/Lie Machine.

## BRASS CLAMPING KIT

TL246

**ClubCraft**

Robust brass clamps for use with the Professional Loft/Lie Machine (TL245).

## TOUR LOCK PRO WEIGHTS

VARIOUS

**ClubCraft**

Tour Lock Pro backweighting technology lets you easily adjust the feel and performance of any club.

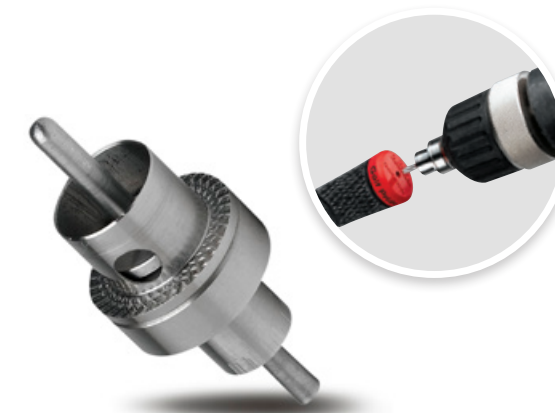

## TOUR LOCK PRO GRIP MODIFIER

TL147

**ClubCraft**

Put Tour Lock weights in virtually any grip. Use with a drill to cut a hole in the grip cap, allowing insertion of the weights.

## PUTTER SHAFT BENDING BAR

TL150

**ClubCraft**

With protective nylon sheaves, our new putter bar bends both loft and lie on putter shafts. The revamped ergonomic design produces a straighter bend transition.

## HIGH STRENGTH BENDING BAR

TL273

**ClubCraft**

The wide openings and shop-tested angles let you bend any club with optimal leverage, great for short-hosel irons. The cam-radiused brass sheaves are safe for all hosels.

## NYLON CLAMP & SHEAVES

TL228

**ClubCraft**

These replacement parts for our bending bars won't harm forged iron clubheads. Use with TL273.

## SHEAVES PACK OF 2

TL238

**ClubCraft**

These replacement parts for our bending bars won't harm forged iron clubheads. Use with TL273.

## PUTTER SHAFT BENDING TUBE

GS299685

**ClubCraft**

The Putter Shaft Bending Tool allows you to alter lie angle and face angle on curved shafts. Perform quick and easy custom alterations of putters built with double- or single-bend shafts.

## PUTTER SHAFT BENDING TOOL

TL230

**ClubCraft**

Performs quick and easy loft and lie changes to putters built with single- or double-bend shafts. Note: Tool cannot make a straight shaft curved. (Vice not included.)

# OUR BRANDS

Our extensive knowledge of the Golf Industry has allowed us to develop a number of unique and innovative in-house brands catering for every sector in golf retail, offering incredible value and excellent margins.

Masters 24/7 is the primary selling vehicle for the business throughout the UK and Europe. It is the 'mothership' brand and the central point from where, you the customer, come to for both product and service. You'll find more detail below about our in-house brands.

In 2017 we made the first steps as a company to distinguish between our service & logistics brand (Masters 24/7) and Masters Golf. The latter is our specialist in-house golf brand that offers a comprehensive range of equipment and accessories. Masters Golf is all about product for purpose and has unbeatable value when it comes to price and quality.

The iCart brand offers a range of high specification bags and trolleys as well as accessories. iCart products are produced with a specification of materials and features making it one of the leading golf trolley brands on the market.

TourDri is the brand that is designed for tackling the elements. Built on the simple principle that products and people need protecting from the harshest of conditions on the course, TourDri products are engineered to respond effectively and never fail. With a range of wet weather equipment from umbrellas to waterproof bags, TourDri is a course favourite.

MKids and Golfway are our specialist junior golf product ranges offering progressive playing equipment for young golfers. Recognised for quality and playability throughout UK and Europe, MKids is a great way for youngsters to begin their journey in the game with a range of features to support their development.

Level 4 is our specialist customisation brand offering a huge range of golf products from brassware to headwear that can be personalised with a customer's own brand. We embellish on-site, covering a range of print or embroidery products, making Level 4 a unique reliable option for personalisation customers.

ClubCraft is everything you'll need for club building and repair. It's our new signpost brand for offering an extensive range of products dedicated to running a technically capable and successful workshop, as well as a huge choice of grips, shafts, tools and machinery.
