## introducing new **Strategy** Co-Creation Sessions

to produce a Strategic Roadmap for the  
Digital Transformation of the European  
Textile and Apparel Industry

# About the **Strategy** Co-Creation Sessions

The primary purpose of this strategic roadmap is to guide the European textile and clothing industry through a radical structural overhaul between 2025 and 2035.

**The initiative aims to bridge the widening Digital Divide that currently separates a vanguard of high-tech Tier 1 fashion or luxury brands from the fragmented ecosystem of Small-to-Medium Enterprises (SMEs), which make up 99% of the European textile and apparel sector.**

By leveraging AI, digital twins, automation and Digital Product Passports, the roadmap enables Europe's "squeezed middle" textile manufacturers to achieve the digital maturity and interoperability needed to remain competitive in a global digital market.

# Why now??

The urgency of this transformation is driven by a triad of mutually reinforcing pressures, that have shifted digitalisation from a voluntary corporate strategy to an existential imperative.

The EU Strategy for Sustainable and Circular Textiles, specifically the Ecodesign for Sustainable Products Regulation (ESPR), mandates that by 2030, every product must possess a digital record (DPP) verifying a broad range of technical, performance and sustainability attributes.

Simultaneously, the industry faces an **Economic Necessity** to adopt to a new agility over low-cost paradigm. **The traditional, long-lead fashion calendar is no longer sustainable against fluctuating raw material costs and the competitive onslaught of algorithmic ultra-fast fashion.**

The **Circularity Requirement also dictates new ways of product development and data exchange** along the full product life cycle.

# Digitising **3** key business functions

The Strategy will focus on a building a harmonised industrial data infrastructure which can connect and support three key business functions.

DATA

DIGITAL PRODUCT  
CREATION

DIGITAL  
PRODUCTION

DIGITAL SUPPLY  
CHAIN

# Objectives & Expected Outcomes

**Work towards a full digital transformation and supply chain integration by 2035**

creating a fully digitised textile and fashion ecosystem in Europe and beyond where every fibre, yarn, and garment has a corresponding Digital Twin.

**Automate compliance through agentic AI**

enabling complex carbon and social due-diligence reporting while drastically reducing the administrative burden on SMEs.

**Shift from a “push” model of overproduction to a “pull” model of precise, data-driven manufacturing**

**Aim for a European textile sector that leads globally in sustainable, data-driven operations**

successfully decoupling growth from environmental impact.

# Expected 2026 Timeline

## February

First  
co-creation  
session webinar

## April

Second  
co-creation  
session webinar

## May

Presentation of  
the Strategy at  
Textile ETP  
Annual Conference  
on 26-27 May  
in Amsterdam,  
Netherlands

# DigitX Innovation Hub

## How to join & collaborate

EU-based companies, technology and research organisations can directly sign up to the **DigitX Innovation Hub**, where 3 annual subscription levels are offered, depending on number of company experts involved.

### Expert

✓ 1 person

€500/year

**Free**  
for ETP Associate members

### Team

✓ 3 persons

€750/year

**€500/year**  
for ETP Associate members

### Corporate

✓ Unlimited

€1000/year

**€750/year**  
for ETP Associate members
