

THE SHEEP FEED RANGE

20% Lamb Finisher Balancer Nut

Fed to finishing lambs, mixed on a one to one basis with rolled or crimped wheat or barley, either mixed before feeding or layered into trough at feeding. As a guide feed 500g of the mix for the first ten days then increase the rate to 1kg /lamb/day and go twice a day feeding. Contains double minerals so no further supplementation is needed.

33% Sheep Protein Pellet

This should be mixed with cereals and sugar beet to produce a finished ewe feed. To make an 18% ewe diet use:
35% 33% Sheep Protein Pellets
45% Rolled or whole barley/oats
20% Sugar beet nuts

19% Pre-Lamb Nut including Lifeline

This diet is based on our 19% Intensive Ewe which is high in energy and undegradable protein. The diet aims to get ewes in the right condition at lambing and will promote easier lambing, livelier lambs and reduce losses.

18% Ewe Pre-Conditioner Nut including Lifeline

Feed alongside good quality forage to promote good body condition pre-lambing. High in vitamin E to promote IGg levels in ewe colostrum and also contains chelated zinc to promote good hoof quality.

...your first choice

Combining exceptional local knowledge, the customer service and attention you expect from a business based on family values and the outstanding technical expertise you would demand from a leading manufacturer of quality animal feeds, Harpers Feeds are trusted by farmers across the South West.

We know all farms have different requirements so pride ourselves on having products to suit all systems and for all species, whether ruminant or monogastric. We manufacture compounds and blends and supply straights, supplements and speciality feeds as well as forage seeds and additives. Feeds are available in an extensive range of physical forms and pack sizes to give exceptional choice.

All manufactured feeds are supplied as fixed formulations so you know the next load will be the same as the last, ensuring consistent performance.

Whatever your requirements, Harpers Feeds can provide feeding solutions to deliver outstanding performance.

SHEEP FEEDS

FOCUSED ON SHEEP NUTRITION

Precise feeding influences all the factors that drive the economics of sheep production:

- Tup performance
- Ewe prolificacy and lambing ease
- Ewe milk production
- Lamb survival
- Lamb growth rates
- Lamb carcass grading

Purchased sheep feeds should complement forages, providing the optimum balance of nutrients to meet the animals' needs. Harpers sheep feeds are designed to help sheep farmers achieve high levels of performance and excellent production from forage. They are specifically formulated to meet the nutritional requirements of ewes and lambs at different stages of production.

All our feeds are backed by our FAR trained team and a range of technical support services.

THE SHEEP FEED RANGE

Harvest Super Lamb Mix

For early acceptance by baby lambs, this highly palatable, 18% protein molassed coarse mix will give lambs the best possible start. Use Super Lamb Mix on show sheep to provide strong muscling and wool quality.

Lamb Start 2 Finish Pellet

Introduce this 18% protein diet at two weeks of age and offer ad lib. Lamb Start 2 Finish Pellets are very palatable and highly effective in growing lambs. Contains ammonium chloride to prevent urinary calculi and selplex to encourage early lamb vigour.

Rapid Lamb Pellet + Yeast

This 18% protein diet is well balanced with protein and energy to optimise growth and condition. High levels of oil for healthy skin and shine in coat. Offer ad-lib to spring born lambs. Yeast is included as standard to aid with digestion.

Lamb Finisher Pellet/Nut

Our most popular diet has been developed over a number of years, with many thousands of lambs having been finished on it. Designed to be fed as a complete ration, giving lambs solid muscling and the correct level of finish. 15% Protein level.

19/21% Intensive Ewe Nut/Roll

This specialist diet is designed to be fed to prolific ewes, housed and fed on straw, haylage or mature silage. The intensive ewe range is very high in energy and undegradable protein. Select the protein level that balances your forage.

16/18/21% Ewe Master Nut/Roll/Mix

Feed six weeks prior to lambing, increasing amounts according to forage quality and availability, ewe size and expected lambing percentage. This diet aims to provide strong healthy lambs and ewes with plenty of milk. The balance and quality of protein and energy will ensure that your ewes are productive.

18% Premium Ewe Nut/Roll

Designed for the lower production flock, this diet offers an alternative to Ewe Master while still providing the same levels of vitamins and minerals, including vitamin E. It is high in selenium with the added benefit of selplex to aid growth.

25% Ewe Balancer Pellet

Designed to be fed 50/50 with cereals. Contains double minerals to ensure complete mineralisation. Good sources of protein and a good level of highly digestible fibre sourced from sugar beet.

Planet Sheep range

Developed to help sheep farmers move towards lower carbon production, with ZERO soya and palm inclusion. Lamb and ewe feeds available.
