

MAXIM BAJO

A sofa capable of transmitting a comforting sensation of **warmth and enveloping softness**. The seat cushions have a central application of extra soft polyurethane, combined along the entire perimeter with hard polyurethane, provided with a memory foam filling and a delicate layer of feather.

The structure is covered in thermo-welded fiber that offers an overall appearance of extraordinary delicacy. The backrest cushions are provided with a headrest cushion that has been specifically designed to offer more vertical support and enhance **the feeling of comfort**. The low Maxim seating system allows you to create cozy areas of absolute relaxation. The rationality of the forms is contrasted with great compositional freedom, which offers the creation of absolutely original forms and projects.

Starting from a simple concept of aggregating the different elements that make up the system, the most **varied configurations** can be obtained, thanks to the possibility of incorporating poufs in different positions as a seat extension. All elements rest on a tubular profile adjusted to the width of the arm, with a polished chrome finish or anthracite gray.

Un sofá capaz de transmitir una reconfortante sensación de calidez y envolvente suavidad. Los cojines de los asientos poseen una aplicación central de poliuretano extra suave, combinado por todo el perímetro con poliuretano duro, dotado de un relleno de Memory foam y una delicada capa de pluma.

La estructura está revestida de fibra termo soldada que ofrece un aspecto en su conjunto de extraordinaria delicadeza. Los cojines de los respaldos están provistos de un cojín reposacabezas que ha sido diseñado específicamente para ofrecer un apoyo más vertical y potenciar la sensación de confort. El sistema de asientos Maxim bajo permite crear acogedoras áreas de absoluto relax. A la racionalidad de las formas se contraponen una gran libertad compositiva, que ofrece la creación de formas y proyectos absolutamente originales.

Partiendo de un simple concepto de agregación de los distintos elementos que componen el sistema, se pueden obtener las más variadas configuraciones, gracias a la posibilidad de incorporar pufs en diferentes posiciones como extensión de asiento. Todos los elementos se apoyan sobre un perfil tubular ajustado a la medida del ancho del brazo, con un acabado en cromado pulido o en color propio gris antracita.
