

The 2026 Lincoln Corsair[®]

Corsair® Grand Touring model

A 2.5L plug-in hybrid engine lets you decide how to power your drive — gas, stored battery power, or a combination of the two. The Lincoln Corsair Grand Touring model adds two additional Lincoln Drive Modes to better utilize stored battery power. Available at Lincoln EV-certified retailers only.

Corsair® Grand Touring with Jet Appearance Package

The available Jet Appearance Package on the Lincoln Corsair Grand Touring plug-in hybrid model adds a distinctive look with 20-inch wheels and black and body-colored exterior elements. Available at Lincoln EV-certified retailers only.

Corsair® Reserve model

Elevate your journey with available leather-trimmed seating, ambient lighting featuring seven different colors, and more.

Corsair® Reserve with Jet Appearance Package

The available Jet Appearance Package adds a sleek and dynamic look while 20-inch black aluminum wheels exude a sporty stance.

Corsair® Premiere model

Enjoy the ride with a standard turbocharged 2.0L engine, SYNC® 4¹² with software updates, Lincoln Co-Pilot360® 2.1 technology, and a sliding second-row seat.

Corsair® Premiere with Jet Appearance Package

The available Jet Appearance Package adds a unique grille, body-colored trim, and impressive 20-inch wheels to the Premiere model.

INTERIOR

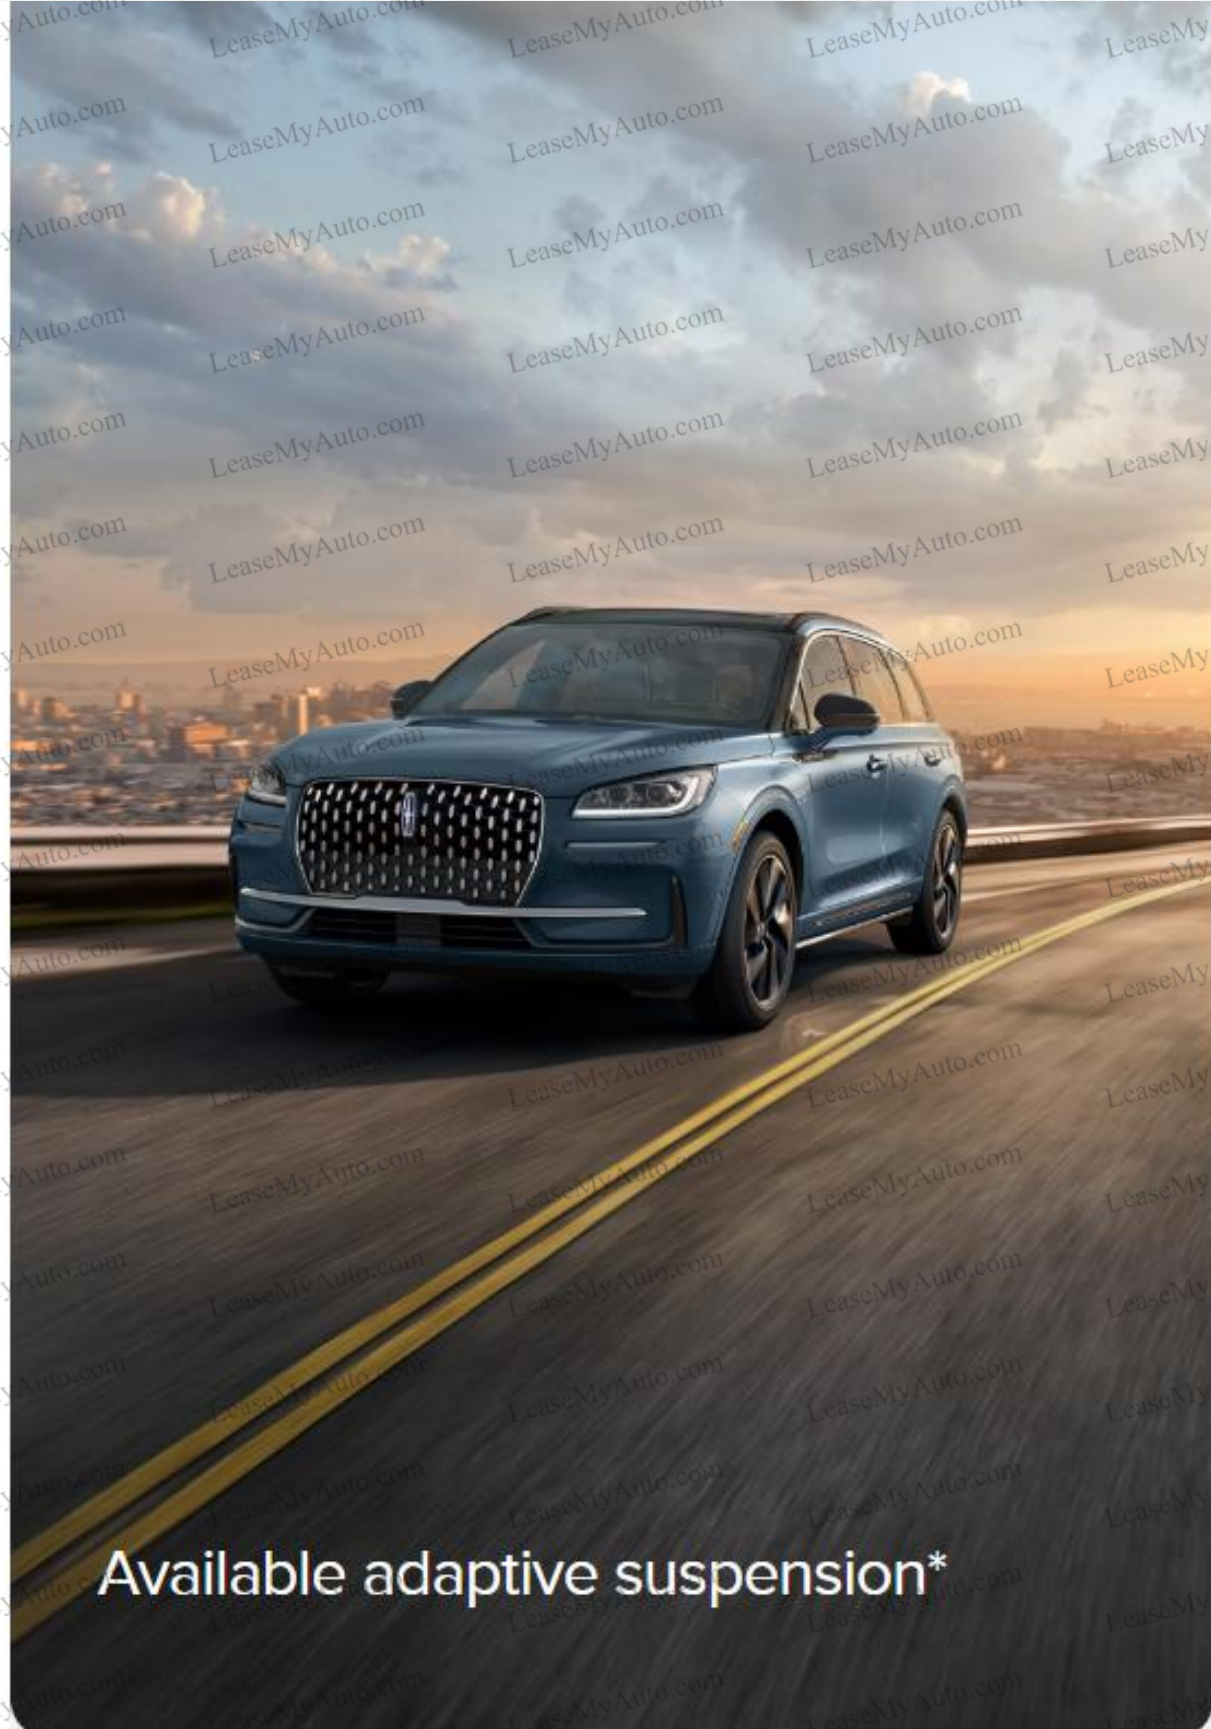

EXTERIOR

Available all-wheel drive

Available all-wheel drive optimizes performance by automatically switching between front- and all-wheel drive in response to road conditions.

Available adaptive suspension*

Ride comfort

Craftsmanship

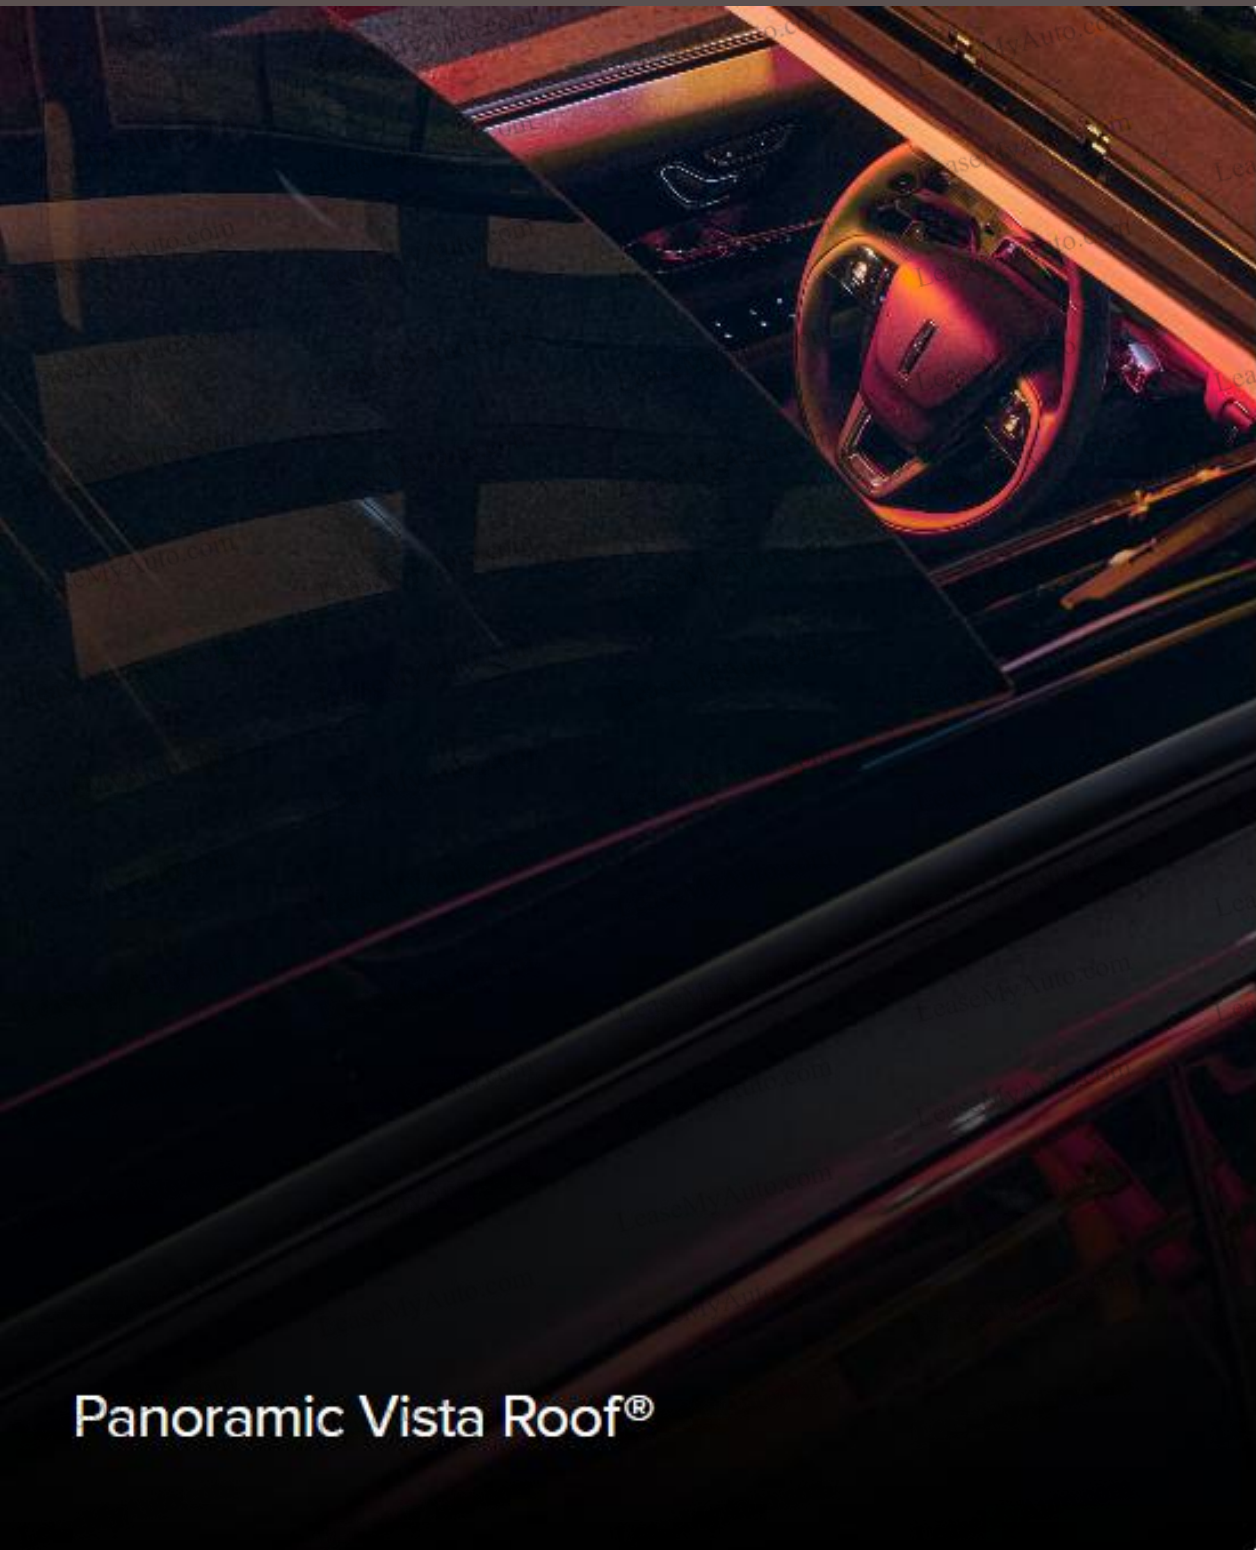

Clever light play creates a sense of airiness throughout the cabin, while available leather-trimmed seating and available natural Paldao wood detailing add earthy accents. From hand-selected materials to meticulous finishing touches, the Lincoln Corsair SUV becomes an elegant extension of your lifestyle.

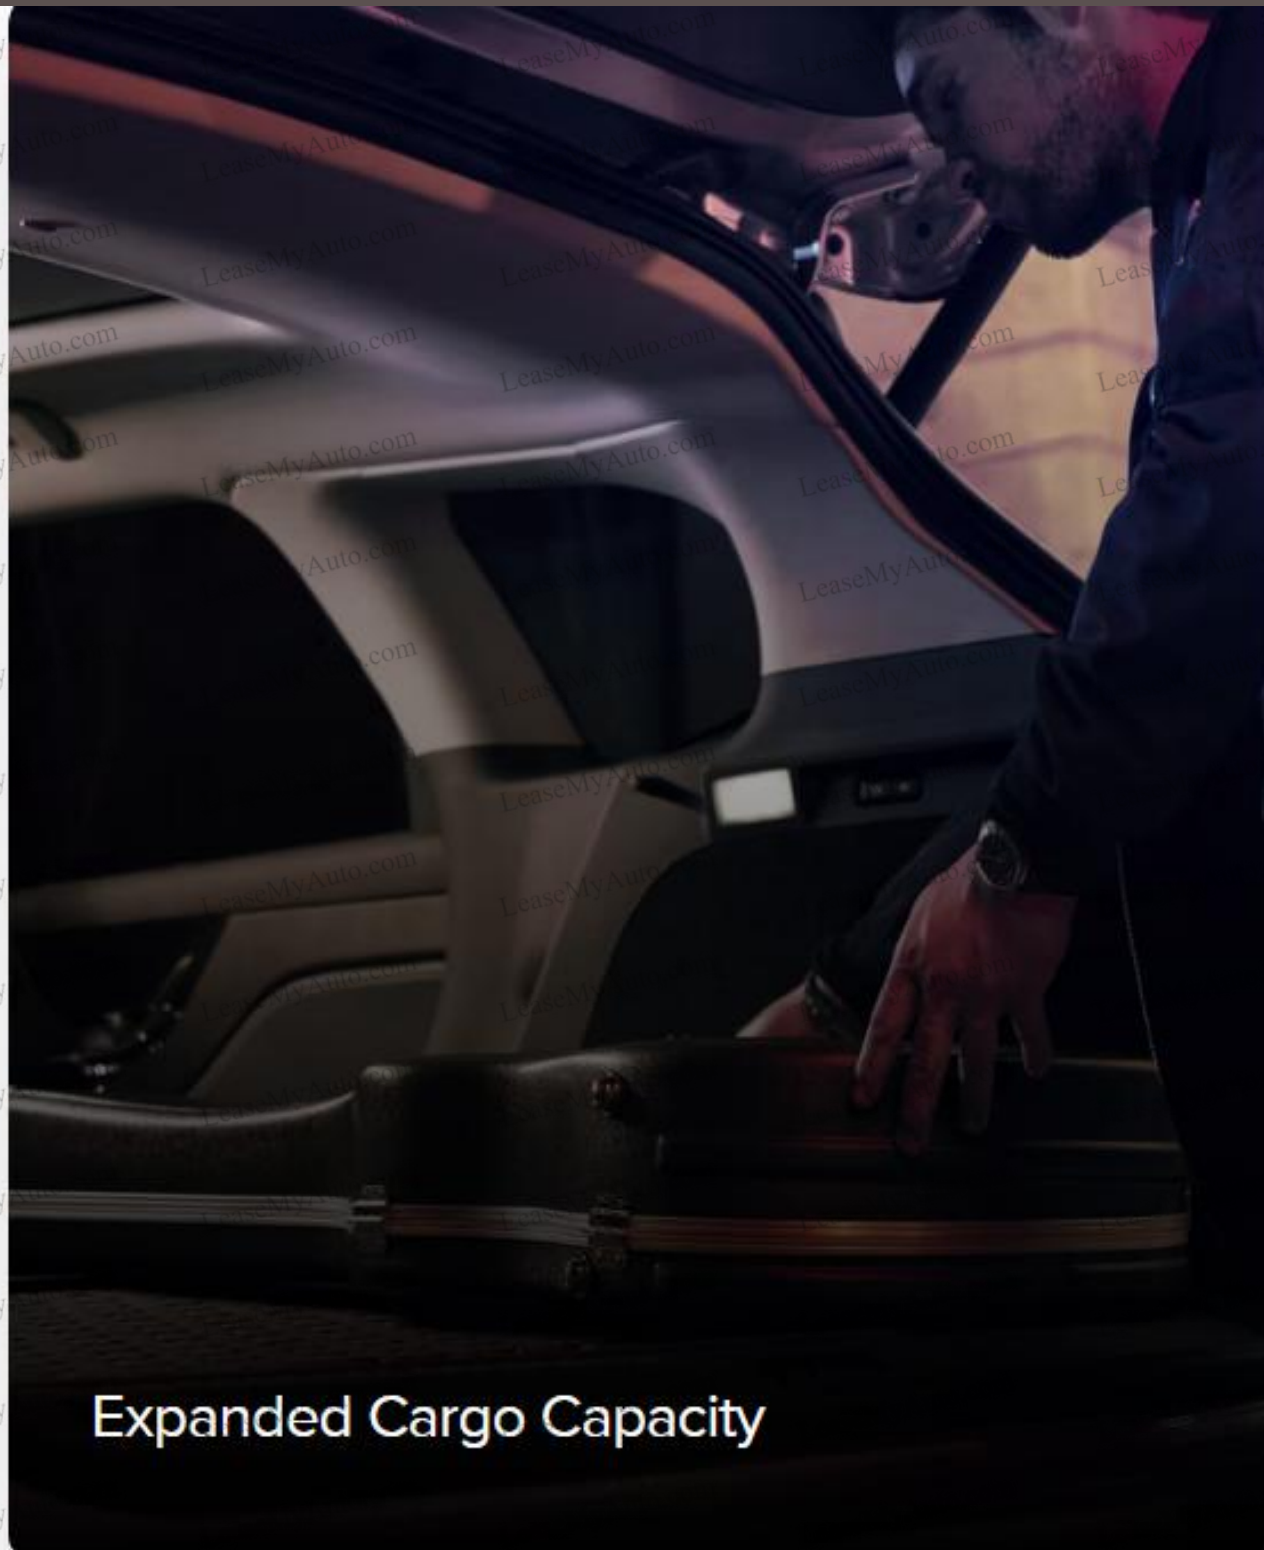

Available Lincoln BlueCruise

With a 4-year Connected Services plan included, Lincoln BlueCruise features Lane Change Assist and In-Lane Repositioning, allowing you to operate your vehicle hands-free on 97% of controlled-access highways in areas called hands-free Blue Zones across the U.S. and Canada while keeping your eyes on the road.¹²⁷
