

**ULTRADYNE**  
AMERICAN INGENUITY

**LIVING CATALOG**

**ONE PIECE INTEGRITY**  
**OPTIMIZED FOR STRENGTH AND WEIGHT**

The Ultradyme Chassis is crafted from a solid bar of 6061 T6 Aircraft Aluminum for exceptional strength and durability. The one-piece design weighs between 1.1 and 1.3 pounds, depending on the model. This makes it suitable for both hunting rifles that weigh as little as 6 pounds and long range target rifles that weigh up to 16 pounds. When paired with the Ultradyme Adjustable Butt Stock, it is lighter than most factory stocks yet has the ability to add up to 5 pounds with optional weights.

The Ultradyme Chassis is packed with features including an adjustable magazine release lever, compatibility with AICS magazines, ability to work with any Mil-Spec butt stock, a built-in Arca rail, M-LOK slots on three sides, and Dynalock technology to ensure a secure fit. The action is held in place with V-channel bedding that can accommodate free-floated barrels up to 1.35 inches in diameter.

## MAXIMUM ADJUSTABILITY MINIMUM WEIGHT-ZERO RATTLE

The UD Adjustable Butt Stock is machined from solid 6061 T6 making it light enough for a 6-pound hunting rifle, yet strong enough to accommodate accessories and weights for a 16-pound competition rifle. It is fully adjustable with an ergonomic thumb screw and once adjusted, it stays at the desired settings without any slop or annoying rattle.

Small frame or large, nearly any shooter will be able to be custom fitted with the adjustable length of pull 13.375" - 14.75". The Cheek Rest interface is also adjustable, allowing for up and down movement of 1.0" and forward and back movement of 1.25". Once a perfect fit is made, both the Cheek Rest and Length of Pull can be securely held in place by a single set screw, or the thumb screw can be utilized for the cheek rise for adjustments on the fly. The Ultradyne Recoil Pad offers even more adjustability with 21 different positions up, down, and left or right canted. The Ultradyne Adjustable Butt Stock fits any Mil Spec buffer tube interface.

## OPTIMIZE YOUR ADJUSTABLE BUTT STOCK

Ultradyné has fine-tuned the design of the Adjustable Butt Stock by offering optional Bag Riders for optimal performance in both hunting and competition settings. The Adjustable Butt Stock is already lightweight (just over 1 pound) with the principle that it is easier to add weight than to remove it from the structural design. Weight can be added by attaching one of the weighted Bag Riders. Whether you're building a lightweight hunting rifle or a heavy competition rifle, the weighted bag rider options provide the flexibility to tailor a build to your exact needs.

## LIGHTWEIGHT DURABILITY SLEEK AND STABLE DESIGN

Introducing the UD Lightweight Butt Stock, crafted from solid 6061 T6 aluminum for optimal balance between weight and strength. Engineered for lightweight rifle builds without compromising durability. Adjustable in Length of Pull (LOP) from 13" to 14" with removable spacers, and three options for cheek heights, it offers tailored comfort to nearly any shooter. Additional spacers and separate cheek pieces are readily available for purchase if needed, ensuring a personalized fit. Regardless of spacer configuration out to four spacers, installation remains seamless, utilizing the same screws for all orientations.

Designed with user comfort in mind, it features an ergonomic cheek piece and a QD sling interface, catering to practical needs while remaining comfortable. Weighing in at just .875 pounds, the Lightweight Butt Stock enhances your rifle's aesthetics with its sleek, one-piece design while minimizing additional weight. A bag rider is also available to purchase for enhanced stability.

## CUSTOMIZE YOUR LIGHTWEIGHT BUTT STOCK

Ultradyne has optimized the design of the Lightweight Butt Stock in order to give consumers the best lightweight option that excels in durability. In order to do this we give consumers the option to add accessories to completely customize their butt stock. These accessories give adjustability and enhance performance without adding unwanted weight. All accessories are securely installed with provided hardware to leave the user with a completely stable interface to improve their shooting experience.

## ENHANCE YOUR RIFLE BUILD

Discover the ultimate convenience with Ultradyné Chassis combos, designed to streamline your rifle build. With a chassis, butt stock, and grip included, all you need to do is drop in your action and tighten the action screws. The one-piece UD Chassis delivers a lightweight foundation. Paired with the Ultradyné Lightweight Butt Stock or Adjustable Hunter Butt Stock, it beats most factory stocks in weight while offering the option to add weights and accessories.

## ADD NIGHT VISION TO THE UD CHASSIS

The UD Bridge is a useful accessory that attaches to the M-LOK slots on each side of the UD Chassis. This provides a strong interface that positions the Picatinny rail at the right height for mounting most night vision devices. The UD Bridge is an essential component for shooters who use night vision and want to securely attach it to their UD Chassis.

## ADD WEIGHT TO THE UD CHASSIS

### FOREARM WEIGHTS SOLD IN PAIRS

The UD Forearm Weights are sold in pairs and are designed to be added to M-Lock slots on the UD Chassis systems to help balance the firearm for improved shooting performance. These weights can be attached to the forearm of the chassis, providing added weight and stability to the firearm. This can help improve accuracy and reduce recoil, making for a more enjoyable shooting experience.

## UPGRADE TO ARCA AND DYNALOCK

The UD Arca Dynalock Rail can be installed using the M-LOK fasteners provided or by a qualified gunsmith. By upgrading to the Arca Dynalock Rail, you can enjoy the benefits of both Arca and Dynalock accessories on your firearm. The most popular enhancement is the ability to use the Orbit Ballhead with Dynalock, all other Arca Clamp accessories are also compatible.

**MAXIMUM ACCURACY, MINIMUM RECOIL  
FOR LONG RANGE PERFORMANCE**

The Ultradyne Orbit Ballhead is designed specifically for shooters, with the adjustment wheel strategically located under the forearm. This unique design feature allows the shooter to operate without the need to reposition the hand away from the shooting position. The ballhead comes standard with the Arca-Pic Clamp and Dynalock Barricade to be utilized in every scenario. When used in combination with the UD Chassis and UD Launchpad, a full range of aiming with almost no recoil is achievable.

## REDUCE RECOIL WITH THE UD LAUNCHPAD

The Ultradyne LaunchPad is designed to reduce recoil and maintain the natural interface between the rifle and shooter. It features a 3/8-16 thread at the top of a 7/8-inch solid steel vertical adjustment bolt that comes with the UD Orbit Ball Head attached, and has the option to add the Grasp Gun Vise for bench work or clamping factory stocks.

This system offers the ability to add lead shot, sandbags, or even gym weights (with the optional adapter) to the front plate. Transferring recoil of a firearm to a weighted LaunchPad by using a locking interface like UD Dynalock or Picatinny affords the user a natural shooting position with the shoulder against the buttstock and a wide range of motion for aiming.

## VERSATILE ASSISTANT IN THE FIELD OR AT THE BENCH

The UD Grasp has padded jaws that can be opened or closed by turning the adjustment knob. The Grasp with Arca Base can be easily attached to the Arca Clamp on the UD Orbit Ballhead, allowing for a wide range of positioning options both in the field and on a workbench. The Grasp with Panning Head is designed to accept 3/8"-16 threads and can be mounted on any tripod but is particularly well-suited for use with the UD Carbon Tripod.

**UD GRASP GUN VISE**

**UD GRASP GUN VISE + PANNING HEAD**

PRODUCT #	UPC	DESCRIPTION	MSRP
UD20009	850011462492	UD Grasp Gun Vise + Arca Base	\$199

## STRONG, STABLE, ADAPTABLE

The Ultradyne Carbon Tripod is a versatile and durable piece of equipment that is suitable for both competition and remote hunting locations. It comes with two different stud sizes, 3/8"-16 and 1/4"-20, which accommodates a wide range of accessories such as cameras, binoculars, spotting scopes, and rifles. This tripod can support up to 50 lbs.

The UD Carbon Tripod is adjustable, making it suitable for anyone and any shooting position. It can be adjusted from 6.75" to 69.75" from the ground. The center column is also adjustable up to 12" allowing users of multiple heights the ability to look through the same optic with a quick twist of the column locking nut.

The legs of this tripod are made of multi-layered carbon, making them lightweight and compact. This makes the tripod easy to transport and set up, even in difficult or remote locations. Overall, the Ultradyne Carbon Tripod is a high-quality piece of equipment that is perfect for anyone who needs a reliable and versatile tripod.

## EXAMPLES OF UD CARBON TRIPOD CONFIGURATIONS

**CARBON TRIPOD**

**UD CARBON TRIPOD + ORBIT BALLHEAD**

**UD CARBON TRIPOD + UD GRASP GUN VISE + PANNING HEAD**

## ULTRA LIGHTWEIGHT, FULLY ADJUSTABLE

The Ultradyme Quantum Gas Block is a precision-engineered component designed to enhance the performance and versatility of the popular AR platform. Built with durability and reliability in mind, this gas block is well-suited for both professional and recreational shooters seeking optimal control over their firearm. The adjustment screw boasts 12 distinct adjustment points. Each point corresponds to a specific gas flow setting, enabling the shooter to customize the rifle's cycling characteristics to suit their individual needs. The Quantum Gas Block allows the shooter to completely control the back pressure while using a suppressor to produce the optimal shooting experience.

PRODUCT #	UPC	DESCRIPTION	MSRP
UD 12001	850011462386	Quantum Gas Block, .750" Barrel	\$79

## CLASS-LEADING PERFORMANCE

Sets the standard for performance by providing breakthrough recoil reduction and unparalleled muzzle compensation for those who refuse to settle for second best. Utilizing advanced imaging and precision instrumentation, Ultradyne engineers have created an ultra-high performance, competition level compensator. Ultradyne's V-PORT™ design mitigates muzzle rise and keeps gas from the sight picture. Experience smooth, on-target recoil compensation in a competition-legal package. Dynamount® compatible and a timing nut is included for easy installation.

*All Ultradyne muzzle devices are CNC machined stainless steel.*

## EXTREME RECOIL REDUCTION WITH LESS PERCEIVED BLAST

Apollo S provides competition level recoil reduction and muzzle control. Ultradyné's V-PORT™ design mitigates muzzle rise and keeps gas from the sight picture. By using a scientific approach and studying thousands of recoil events, Ultradyné engineers have struck a balance between extreme recoil reduction, virtual elimination of muzzle rise, and less aggressive venting of gas. The Apollo S is perfect for shooters who want drastic recoil reduction with a less perceived blast. Dynamount® compatible and a timing nut is included for easy installation.

*All Ultradyné muzzle devices are CNC machined stainless steel.*

## BE YOUR OWN SPOTTER

The Apollo LR reduces recoil and muzzle rise like no other product on the market. The serious long-range shooter can concentrate on the shot and observe bullet impact due to unequalled recoil reduction and virtually zero muzzle rise. Ultradyné's V-PORT™ design not only mitigates muzzle rise but also keeps gas from the sight picture. A timing nut is included for easy installation. *All Ultradyné muzzle devices are CNC machined stainless steel.*

## CLASS LEADING PERFORMANCE

Meticulously engineered to provide superior recoil reduction and neutralize muzzle rise with a smooth, balanced release of blast energy in a tanker-style compensator. Ultradyne's V-PORT™ design mitigates muzzle rise and keeps gas from the sight picture while the progressive 90° side ports vent combusting gases at intervals that spread out the recoil impulse for efficient, accurate follow-up shots. Dynamount® compatible and a timing nut is included for easy installation.

All Ultradyne muzzle devices are CNC machined stainless steel.

## HIGH PERFORMANCE IN A COMPACT DESIGN

Pulse provides exceptional performance in a compact design. Ultradyne's V-PORT™ design mitigates muzzle rise and keeps gas from the sight picture. Pulse strongly reduces recoil and minimizes muzzle rise helping the shooter get back on target quicker to ensure more accurate follow-up shots. The Pulse is proof that good things do come in small packages! Pulse 5.56 and Pulse 7.62 are Dynamount® compatible, and a timing nut is included for easy installation.

## FORWARD-DIRECTED SIGNATURE FOR GREATER SHOOTER COMFORT

Athena is Ultradyné's linear compensator. Muzzle rise has been optimized, with gas vented at an angle then forward. This sends a lower percent of sound and gasses back towards the shooter. Athena gives a cleaner appearance for a sleek look and is a cost-effective way to upgrade a rifle to the Dynamount® Sighting System. A timing nut is included for easy installation. A crush washer is included with the Athena AK47 model.

All Ultradyné muzzle devices are CNC machined stainless steel.

## ULTIMATE FLASH REDUCTION

Nighthawk Flash Hider is a birdcage style flash hider, engineered to reduce muzzle flash that can impair the eye’s night vision in low light. A solid undercarriage decreases the chance of a dust cloud forming while shooting from a prone position. Nighthawk also reduces muzzle rise which results in faster follow-up shots with increased accuracy. Dynamount® compatible and a timing nut is included for easy installation.

*All Ultradyne muzzle devices are CNC machined stainless steel.*

## DYNALIGN SIGHT PICTURE TECHNOLOGY

The ultimate BUIS. It starts with a superior always centered aperture that mounts to the barrel to ensure accuracy. Windage and elevation adjustments are both available along with the ability to set at 90 or 45 degrees. Using the C4 Dynamount® Front Sight in conjunction with the C4 Rear sight creates a perfectly concentric sight picture that allows the shooter to see the target, enables faster sight acquisition, reduces the effect of parallax, and gives the ability to consistently shoot accurately out to 600 yards and beyond.

Most of the time, shooters mount front sights on the picatinny rail of a free-float handguard. By definition, a free-float handguard doesn't move with the barrel. This means that when the handguard moves, the sights do too. Even properly-installed handguards move, whether it's from the weight of the firearm, a strong grip, or impact. Especially at the end, farthest from the point of attachment, and where most users mount sights. A small amount of movement can make a big difference in point of aim. Movement as little as 0.01 inches at the handguard means almost 2 inches at 100 yards. The solution is Dynamount®. Barrel-mounted sights for consistent aim, every time. The C4 Sight picture provides more accurate and faster target acquisition, using a purely concentric sight picture that is similar to that used by Olympic target shooters. Unlike red-dot or holographic sights, this sight picture does not obscure the target and actually enhances visibility due to the optical characteristics of apertures.

Most BUIS systems utilize a sight picture that is non-intuitive. The brain's visual systems are asked to align a circular rear aperture with a rectangular front post shape while simultaneously ignoring the "ears" that protect the front sight post. The C4's circle-within-circle sight picture allows for faster sight picture acquisition. Additionally, the use of a front aperture further reduces parallax effect which makes accuracy less dependent on precise sight alignment.

*All Ultradyné Dynamount® Sights are CNC machined stainless steel & aircraft aluminum.*

## CONCENTRIC SIGHT PICTURE

The C4 Front & Rear Sight System is a dual aperture sighting system that is changing the way shooters think about iron sights. The C4 Rear Sight offers rock-solid performance in a compact form with a ballistically calibrated elevation system that adjusts in 50-yard increments from 200 to 600 yards. The C4 Front Sight brings precision front aperture technology to backup iron sights along with the ability to adjust both windage and elevation. Using these sights together creates a perfectly concentric sight picture that allows the shooter to see the target, enables faster sight acquisition, and gives the ability to consistently shoot accurately out to 600 yards and beyond, all with compact, foldable iron sights.

*All Ultradyne C4 Sights are CNC machined stainless steel & aircraft aluminum.*

## CONCENTRIC SIGHT PICTURE

The C4 Offset Front & Rear Sight System is a dual aperture sighting system that is changing the way shooters think about iron sights. The C4 Offset Rear Sight offers rock-solid performance in a compact form with a ballistically calibrated elevation system that adjusts in 50-yard increments from 200 to 600 yards. The C4 Offset Front Sight brings precision front aperture technology to back up iron sights along with the ability to adjust both windage and elevation. Using these sights together creates a perfectly concentric sight picture that allows the shooter to see the target, enables faster sight acquisition, and gives the ability to consistently shoot accurately at targets close and far. C4 Offset Sights are your best option for back up iron sights.

*All Ultradyne C4 Sights are CNC machined stainless steel & aircraft aluminum.*

## DYNALIGN SIGHT PICTURE TECHNOLOGY

Packs all the high-quality features Ultradyme is known for into lightweight, compact, sight system. Fully machined from the perfect combination of 416 SS and aircraft aluminum to maximize strength and weight. The rear sight boasts a positive click oversized windage knob which serves as storage for the .070 aperture when using the ghost ring. The C2 Front Sight System makes sighting in a breeze by offering both windage and elevation adjustability. The C2 Sight combo offers a dual aperture system that features a 12 MOA front sight aperture and gives the advantage of lightning-fast target acquisition while improving accuracy. Improved accuracy is created by the enhanced clarity and reduction of parallax due to the optical characteristics of the C2 dual aperture. In addition, the C2 enables the shooter to see 100% of the target, not cover it. This promotes proper shooting techniques and allows the shooter to focus on the only thing that matters, the target!

*All Ultradyme C2 Sights are CNC machined stainless steel & aircraft aluminum.*
