

Building Smarter, Safer, More Sustainable Data Centers, Together.

Sustainability is in our DNA

We believe that an energy-efficient future is possible, one that is smarter and safer for people and the planet.

Sustainability as a Strategy

In 2023, Turtle secured a Silver rating from EcoVadis, a trusted platform offering comprehensive ESG ratings covering environmental impact, labor practices, human rights, ethics, and procurement.

Sustainability in our Partnerships

With 100+ years of experience, our network spans various industries, from Original Equipment Manufacturers to Solution Integrators, and experts in Equipment Procurement and Construction.

Accelerate Sustainability with Turtle X

TurtleX is Turtle's Green Solution Accelerator engaging next-gen tech & Entrepreneurs looking to scale tomorrow's green business solutions.

Silver EcoVadis Rating
for Sustainability

Our team of experts offer a **comprehensive range of solutions** to ensure your project meets your deadlines and your design specs.

- Design Assistance
- Design/Build
- Value Engineering
- Project Management
- Start Up and Commissioning
- Supply Chain Management
- Cyber Security

Smart Sustainable Data Center Solutions that Drive Value, Efficiency and Effectiveness

Renewable Energy Optimization & Maximization

Integration of solar energy solutions to enhance energy independence.

Lighting Energy Efficiency & Effectiveness

Customize lighting solutions to reduce energy costs, improve workplace conditions, and ensure compliance with local regulations.

Safe & Efficient Switchgear Solutions

Up-front value engineering coupled with project management, drawing review, logistics, and start-up services to ensure efficient control and protection of your electrical system in a timely and cost-efficient manner.

Cyber Security Solutions & Services

Cyber security services to protect the enterprise and ensure federal mandate compliance.

Physical Security Solutions & Services

Access and camera security solutions to elevate interior and exterior facility safety.

Backup, Redundancy & Resiliency Solutions

Comprehensive solutions to ensure continuous operations and protection against power disruption and data loss.

Smart & Sustainable Cooling Solutions

Utilize VFDs for pump speed control in cooling systems, along with an Atmospheric Water System, to reduce dependence on local water sources, boost efficiency, and promote sustainable cooling practices.

Battery Energy Storage

Enhance power reliability and system resilience with Advanced Battery Energy Storage Systems (BESS), including Lithium Ion and Hydrogen options, to bolster operational continuity and resilience against power interruptions.

Customized EV Charging Programs & Solutions

Customized EV charging solutions to integrate seamlessly with existing electrical infrastructures.

Intelligent Infrastructure Modernization

Real-time system monitoring of power components, transformers, and intelligent motor control centers to predict failures before they occur.

Our Related Offerings

Power Conditioning, Quality & Backup

Uninterruptible power supplies, power factor correction & automatic transfer switches

Components for Electrical & Mechanical Subsystems

Variable frequency drives, circuit breakers and fuses

Facility Power Distribution

Busway, transformers, panelboards, switchgear and floor-based power

Facility/power Monitoring & Management

Integrated facility systems, facility management software, remote monitoring meters & software

Monitoring Consoles:

Network operations center consoles

White Space Power Distribution

Low voltage busway, floor-standing/wall-mount /enclosure power distribution units (PDUs)

Airflow & Thermal Management Solutions

Rack and aisle-based containment solutions

Racks & Enclosures

IT equipment racks, enclosures and colocation cages

Wire & Cable Management

Cable tray and modular wiring systems

Indoor & Outdoor Lighting

High efficiency LED luminaires and lighting controls
