CHASING HIGHER PERFORMANCE THROUGH
CRAFT AND INNOVATION SINCE 1946.

far beyond ordinary

BEYOND WHAT I SEE

Years from now, this racquet will be lighter and stronger than you could ever picture. Fully packed with new innovations. All those innovations are bound to be discovered. They're all hidden, impatiently waiting to be uncovered.

When I get my hands on this racquet, it will be the culmination of thousands of ideas, tried and failed. It will be standing proof, that endlessly testing both expected and unexpected ideas will mould the basis for game-changing performance.

But this racquet won't uncover itself — not without a little imagination.

It's time I search beyond what I know today.

RACQUETS

“ENGINEERED FOR YOUR GAME.”

Badminton racquets were the start of the Yonex journey into sports. With each racquet developed, our vision became clearer. We learned the fun of crafting world-class racquets alongside the most elite players and now, we strive for innovative racquets that help every athlete achieve new speeds and new heights.

We believe the best performance cannot be prepared with just any ingredient. Every gram, every millimetre can be the deal-maker or breaker. That's why we source the highest quality advanced graphite for our chefs to personally cook up into each individual masterpiece.

ISOMETRIC™

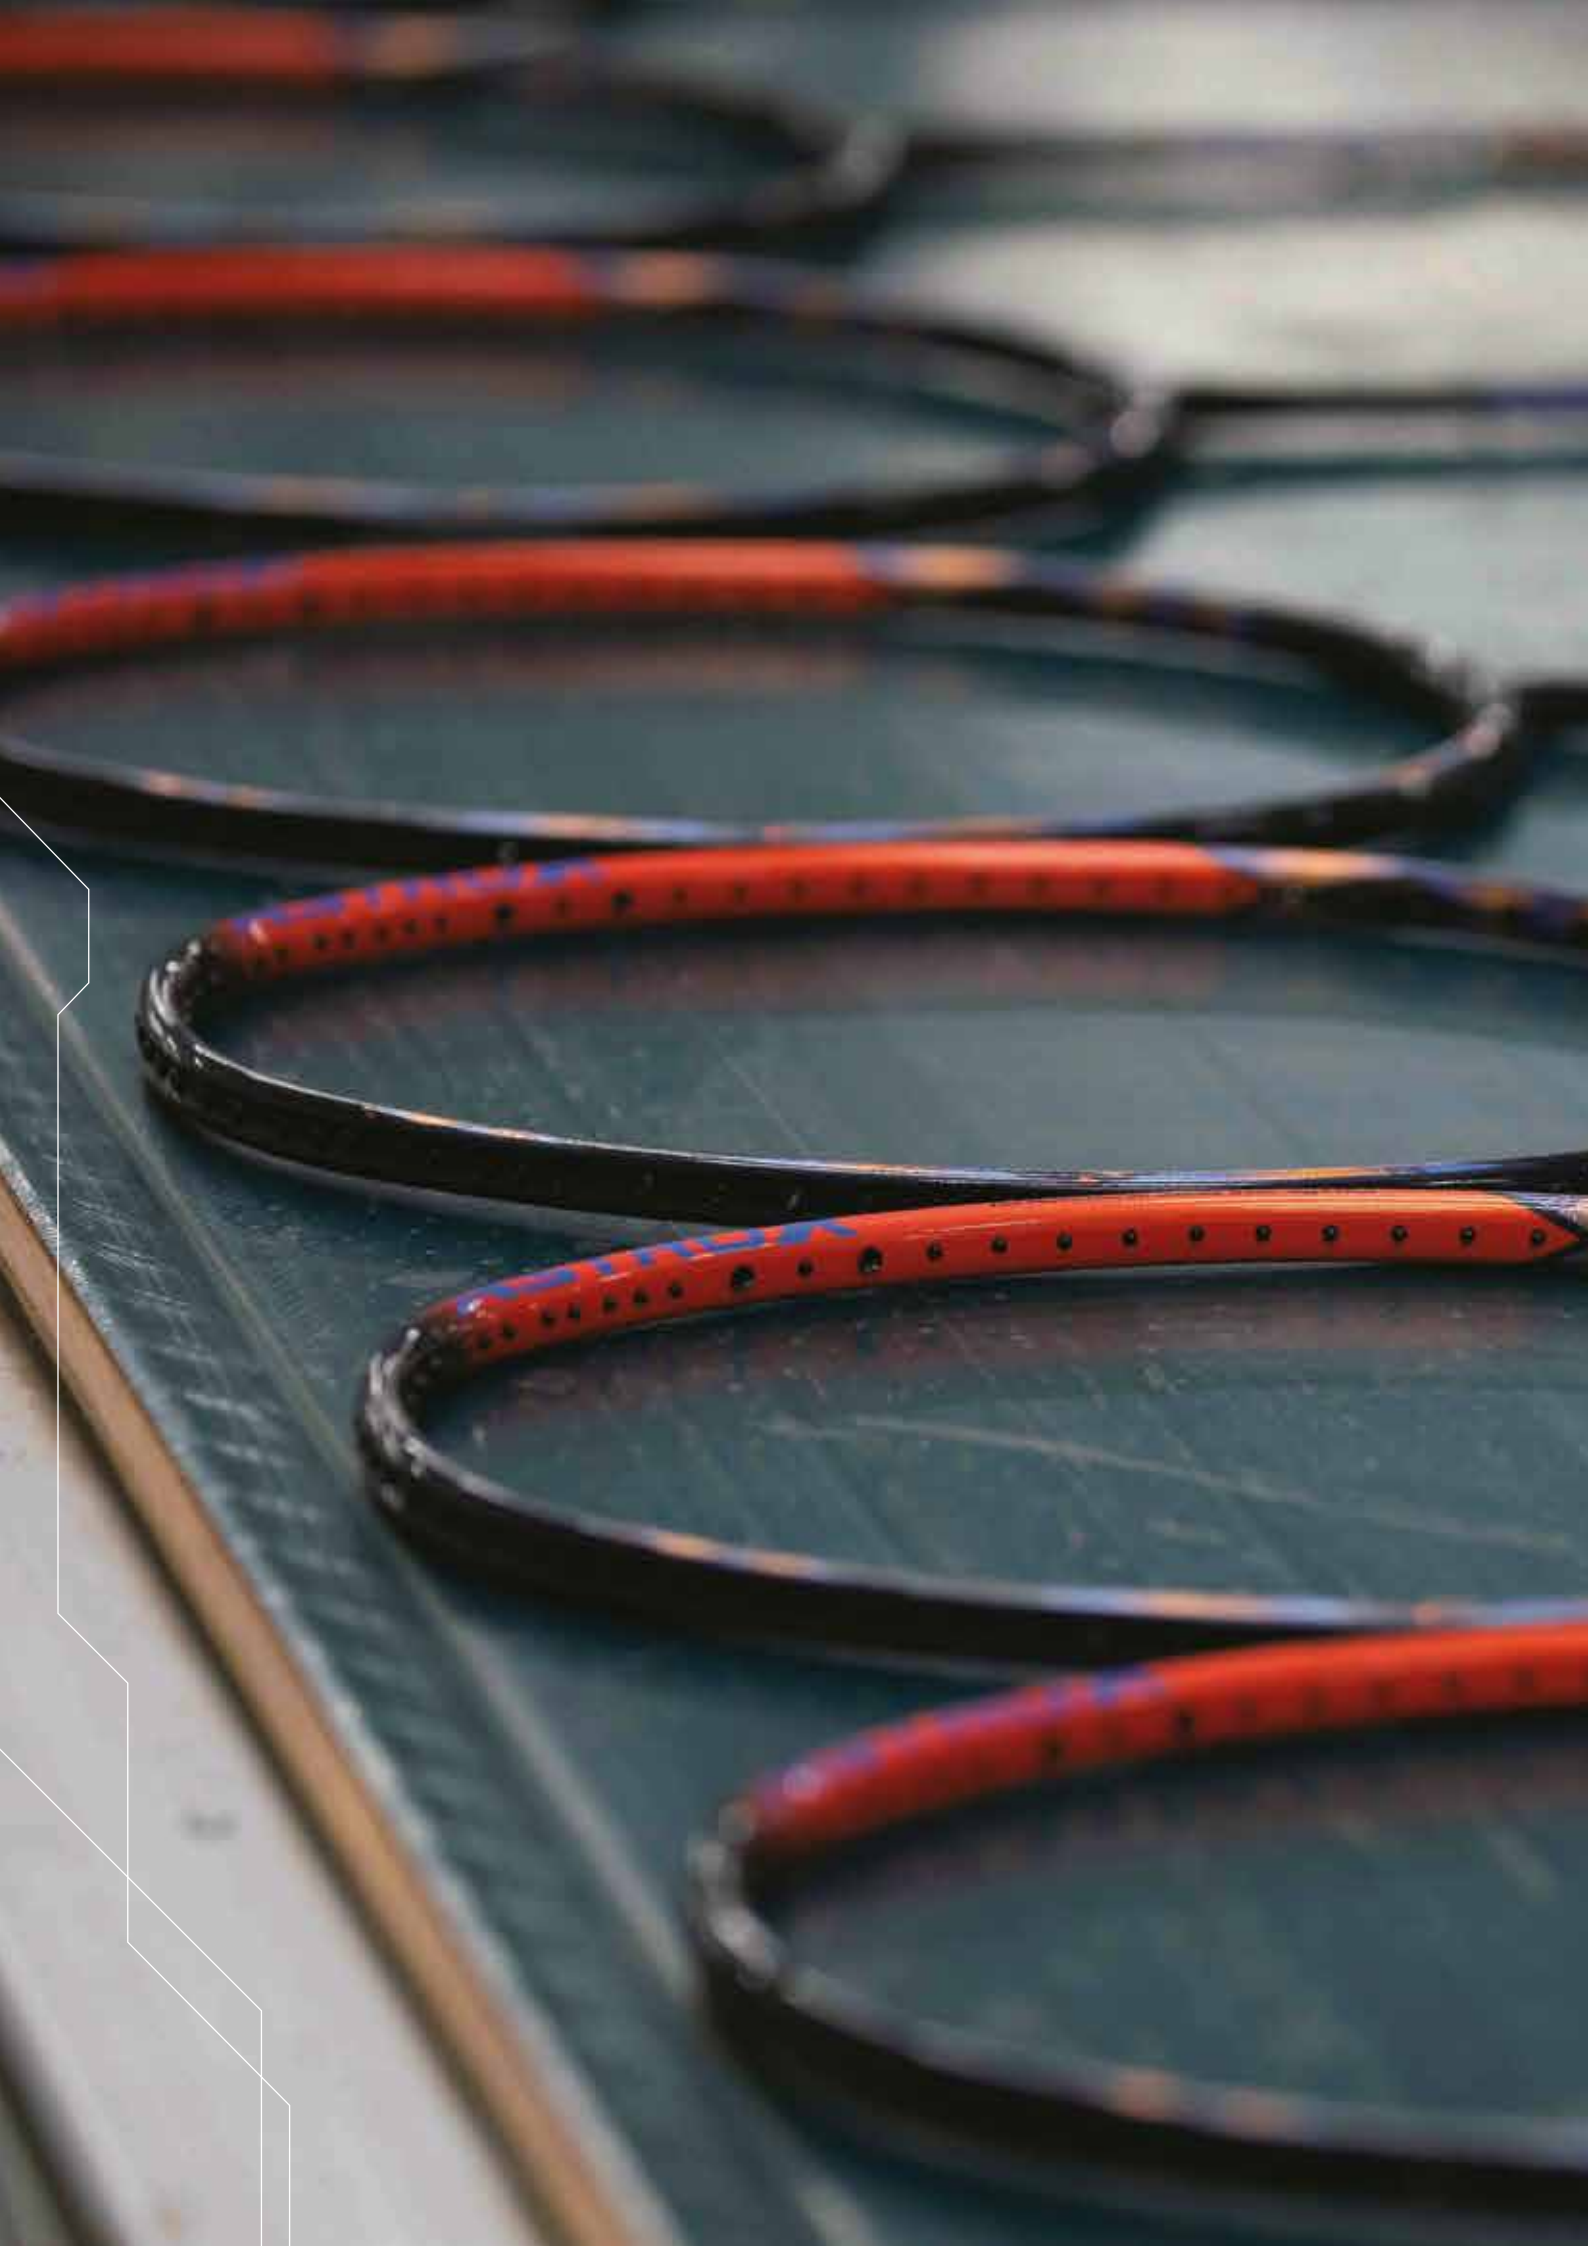

SIGNATURE YONEX TECHNOLOGY SINCE 1980*

ISOMETRIC™ technology was invented by Yonex to maximise the vital sweet spot area and is now a world-leading feature of our racquets. The square-shaped head of the racquet means that there are more strings crossing at right angles, resulting in a bigger sweet spot. Yonex continues to develop and enhance ISOMETRIC™ power, reducing still further the 'inert' space around the edge of conventional racquets, creating a far bigger sweet spot than other frames.

ISOMETRIC™ is a trademark of Yonex Co., Ltd. *Tested by Yonex

*Originally developed for tennis racquets, in 1992 Yonex released the first ISOMETRIC badminton racquet.

POWER

INITIATE A RELENTLESS ATTACK

The ASTROX series is developed to meet the demands of aggressive attacking play, taking the point to your opponent with relentless steep attacks.

The Rotational Generator System perfectly distributes weight through the grip end, frame top and the T-joint for maximum control, enabling smooth transition between shots, in rapid succession. Revolutionary graphite materials such as Namd™* are utilised to produce Namd™* and faster snapback for imposing power.

ASTROX ASTR

* Namd™ is a technology developed by Nitta Corporation to "uniformly disperse carbon nanotubes into carbon fibre composites".

FLEX FUSE

The shock absorbing resin used in the joint creates a comfortable hitting feel.

ROTATIONAL GENERATOR SYSTEM

Weight is distributed thoroughly throughout the frame top, joint and the grip end for smooth racquet work and successive, powerful smashes.

N a m d™

Namd™ situated in the shaft results in a large increase in shaft flex and snap back speed, producing explosive smashes.

ACCURACY

**MASTER
OF PRECISION**

The acclaimed ARCSABER series designed for control is reimagined with emphasised shuttle-pocketing for a controlled offence and one-of-a-kind feel at impact.

Taking control of the court can come in all different forms. For the ARCSABER, that comes from the extra few milliseconds of shuttle contact time allowing assertive shot-making. Combine that with the stability of the enhanced ARCSABER frame, you gain the confidence to command the court.

ENHANCED ARCSABER FRAME

Control with confidence through this unique frame structure with varying levels of flex from top, sides, to bottom, built to increase shuttle hold while reducing instability and twisting at impact.

TORQUE-TO-FLIGHT SHAFT

The shaft is designed with optimal twist for improved control and flight.

POCKETING BOOSTER

The frame is lined with POCKETING BOOSTER, a proprietary rubber-like material emphasising elasticity in the frame's flex.

SPEED

MAXIMUM SHUTTLE ACCELERATION

Engineered to improve swing speed and manoeuvrability, the NANOFLARE is the only head-light racquet proven to provide unrivalled power and increased shuttle acceleration.

The difference is in the technology – built for speed, the NANOFLARE, is constructed with the SONIC FLARE SYSTEM which strategically lines high modular graphite material at the top and bottom of the frame for amplified repulsion performance.

NANOFLARE
NANOFLARE

SONIC FLARE SYSTEM

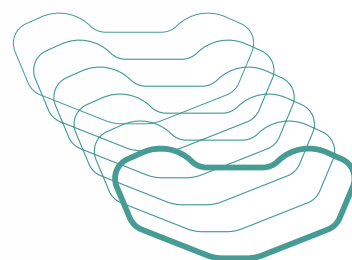

The revolutionary graphite material TORAYCA™ M40X and high modulus graphite, provide unrivalled power and stability for maximum shuttle acceleration.

*TORAYCA™ M40X is a next-generation carbon fibre developed by Toray Industries, Inc.

NEW AERO FRAME

Engineered for speed, AERO Frame technology is built to flex on impact and immediately snapback, helping launch the shuttle further and faster.

NANOSCIENCE

NANOSCIENCE technology allows Yonex to alter the structure of materials in a racquet to enhance the **STRENGTH, FLEX and POWER**.

M40X

A next-generation highly strong, yet elastic carbon fibre developed by Toray Industries, Inc. (TORAYCA™ M40X is developed by Toray Industries, Inc.)

Namd™

A world-first, new dimension graphite material, Namd™, produces more flex with a faster snapback, unleashing dramatic power. (Namd™ is a technology developed by Nitta Co., Ltd.)

NANOCCELL NEO

A resilient yet surprisingly flexible graphite material providing increased power.

NANOMESH NEO

Ensures a stronger more flexible frame, while increased shaft flex creates maximum power.

NANOMETRIC

Tightly bonded fibres enhance the racquet's strength and minimise twisting during impact. NANOMETRIC is a material which applies the NANOALLOY™ technology of Toray Industries, Inc.

NANOMETRIC DR

An enhanced graphite based on unique NANOSCIENCE technology for a firm shuttle hold creating maximum repulsion.

X-FULLERENE

Used in the resin which bonds the carbon fibres, resulting in a tenfold increase in binding force which makes it possible to create 5% higher repulsion power and 15% greater stability than conventional graphite.

MATERIAL HIGHLIGHTS

BLACK MICRO CORE

A stiff, high-density vibration-dampening material featured in the upper half of the frame, allowing players to hit with a solid feel and power.

FLEX FUSE

The shock absorbing resin used in the joint creates a comfortable hitting feel.

HYPER-MG / EX-HMG / SUPER HMG

These ultra-elastic materials produce sharper power for all shots.

LIGHT FEEL CARBON NEO

The additional rubber creates a lighter feel and increased flex for greater head speed.

POCKETING BOOSTER

A proprietary rubber-like material emphasising elasticity in the frame's flex.

REXIL Fibre

Increases repulsion power to the shuttle while minimising shock at impact.

SONIC METAL

Situated in the lower frame for aggressive snapback power with an attacking sound.

T-ANCHOR

Increases stiffness for quicker racquet recovery into the next shot.

TUNGSTEN

A metal with a high tensile strength.

VDM (VIBRATION DAMPENING MESH)

Vibration dampening material is a stretchy mesh rolled with the graphite to greatly reduce unwanted vibrations.

FRAME

AERO FRAME

Cuts air resistance for faster swing speeds and increased manoeuvrability.

AERO+BOX FRAME

A combination of faster swing speeds and a solid feel.

BOX FRAME

The extra stiff profile provides a solid stable feel on impact with the shuttle.

COMPACT FRAME

Reduced air resistance and improved feel with the shuttle.

CONTROL-ASSIST BUMPER

The CONTROL-ASSIST BUMPER attached at the top contains T-ANCHOR, micro-sized tetrapods that help lock in vertical strings for improved accuracy.

DUAL OPTIMUM SYSTEM

Two contrasting racquet profiles in one unique Dual Dynamic Design allow players to enhance both their forehand and backhand.

DUORA GROMMET DESIGN

8 linked grommets made with differing thickness on either side of the frame. The stiffer AERO side grommets pull the string harder for increased power.

DURA FRAME

Provides Aluminium frames with greater strength and a solid feel.

ENHANCED ARCSABER FRAME

Control with confidence through this unique frame structure with varying levels of flex from top, sides, to bottom, built to increase shuttle hold while reducing instability and twisting at impact.

HORIZONTAL-A CONCEPT

Larger sweet spot at the top of the frame in a compact head design.

MUSCLE POWER FRAME

Smoother grommets reduce string stress for greater durability.

POWER-ASSIST BUMPER

Boosted power with a tungsten-infused weighted bumper, adding 55%* more weight than conventional grommets. The POWER-ASSIST BUMPER enhances the Rotational Generator System, quickly transferring more weight to the shuttle.

*Measured by Yonex

ROTATIONAL GENERATOR SYSTEM

By applying the counterbalance theory, weight is distributed throughout the grip end, frame top and the joint for maximum control. The transition to the next shot can be performed smoothly with a rapid succession.

SBZ (SNAPBACK ZONE)

The slimmer section of racquet frame flexes at impact for greater shuttle speeds.

SOLID FEEL CORE

Reduces vibrations travelling down the shaft for improved comfort.

SONIC FLARE SYSTEM

Carefully selected high modulus graphite is strategically placed across the bottom of the frame to provide unrivalled power and stability for maximum shuttle acceleration.

TRI-VOLTAGE SYSTEM

A combination of intelligent head weighting, frame flex and aerodynamics generates explosive force without compromising on speed or control.

VERTICAL-A CONCEPT

Vertical grommets provide greater flex in the string bed and a wider sweet spot.

WIDE DIAMETER GROMMETS

Control the shuttle-release timing with larger grommets designed for more string movement, extending the shuttle contact time.

JOINT

BUILT-IN T-JOINT

Increases strength between the frame and shaft eliminating head twist for more control.

NEW BUILT-IN T-JOINT

The lightweight T-Joint increases stability of the shuttle on the strings, maximising power and control.

SHAFT

REXIS SHAFT

A high-performance shaft precisely designed with an original Yonex moulding technique. Improves shot performance and dominates the game.

HYPER / EXTRA / ULTRA / SUPER SLIM SHAFTS

Designed to slice through the air, generating speedy power.

ULTRA PEF

Lightweight fibres that withstand immense forces while absorbing unwanted shock and vibrations.

CAP

CONTROL SUPPORT CAP

Wider, flatter surface improves grip for increased racquet control.

ENERGY BOOST CAP / PLUS

Uniquely shaped cap which maximises shaft performance. The front allows the shaft to flex, while the sides arch-shaped curve stabilises the racquet face by preventing the shaft from twisting.

YONEX SPONSORED EVENTS 2023

Yonex is the official stringing partner, shuttlecock and equipment supplier at the following events throughout 2023:

JANUARY

- 1 Malaysia Open [Super 1000]
- 2 YONEX SUNRISE India Open [Super 750]
- 3 Indonesia Masters [Super 500]
- 4 Thailand Masters [Super 300]

MARCH

- 5 YONEX German Open [Super 300]
- 6 YONEX All England Open [Super 1000]
- 7 YONEX Swiss Open [Super 300]

MAY

- 8 Malaysia Masters [Super 500]
- 9 Thailand Open [Super 500]

JUNE

- 10 YONEX Taipei Open [Super 300]

JULY

- 11 Canada Open [Super 500]
- 12 Japan Open [Super 750]

AUGUST

- 13 Australia Open [Super 500]
- 14 New Zealand Open [Super 300]
- 15 BWF World Championships 2023 [Grade 1]

OCTOBER

- 16 Arctic Open [Super 500]
- 17 YONEX French Open [Super 750]

NOVEMBER

- 18 Kumamoto Masters Japan [Super 500]

OUR RANGE OF —

STRINGS

“CRAFTING EVERY SWEET SPOT.”

Choosing the right string is as important as choosing the right racquet. That is why Yonex engineers put so much effort into designing innovative new products like the EXBOLT, a next-generation multifilament string. The EXBOLT is engineered with the proprietary FORGED FIBRE, a thin yet radically durable outer, allowing the player to pierce through their opponent's defence with agile and high-velocity drives.

Innovation lies in the smallest details. Yonex never stops meticulously testing cutting-edge fibres and coatings, finding more efficient ways to craft stronger strings for every performance preference and level of play.

QUICK REPULSION

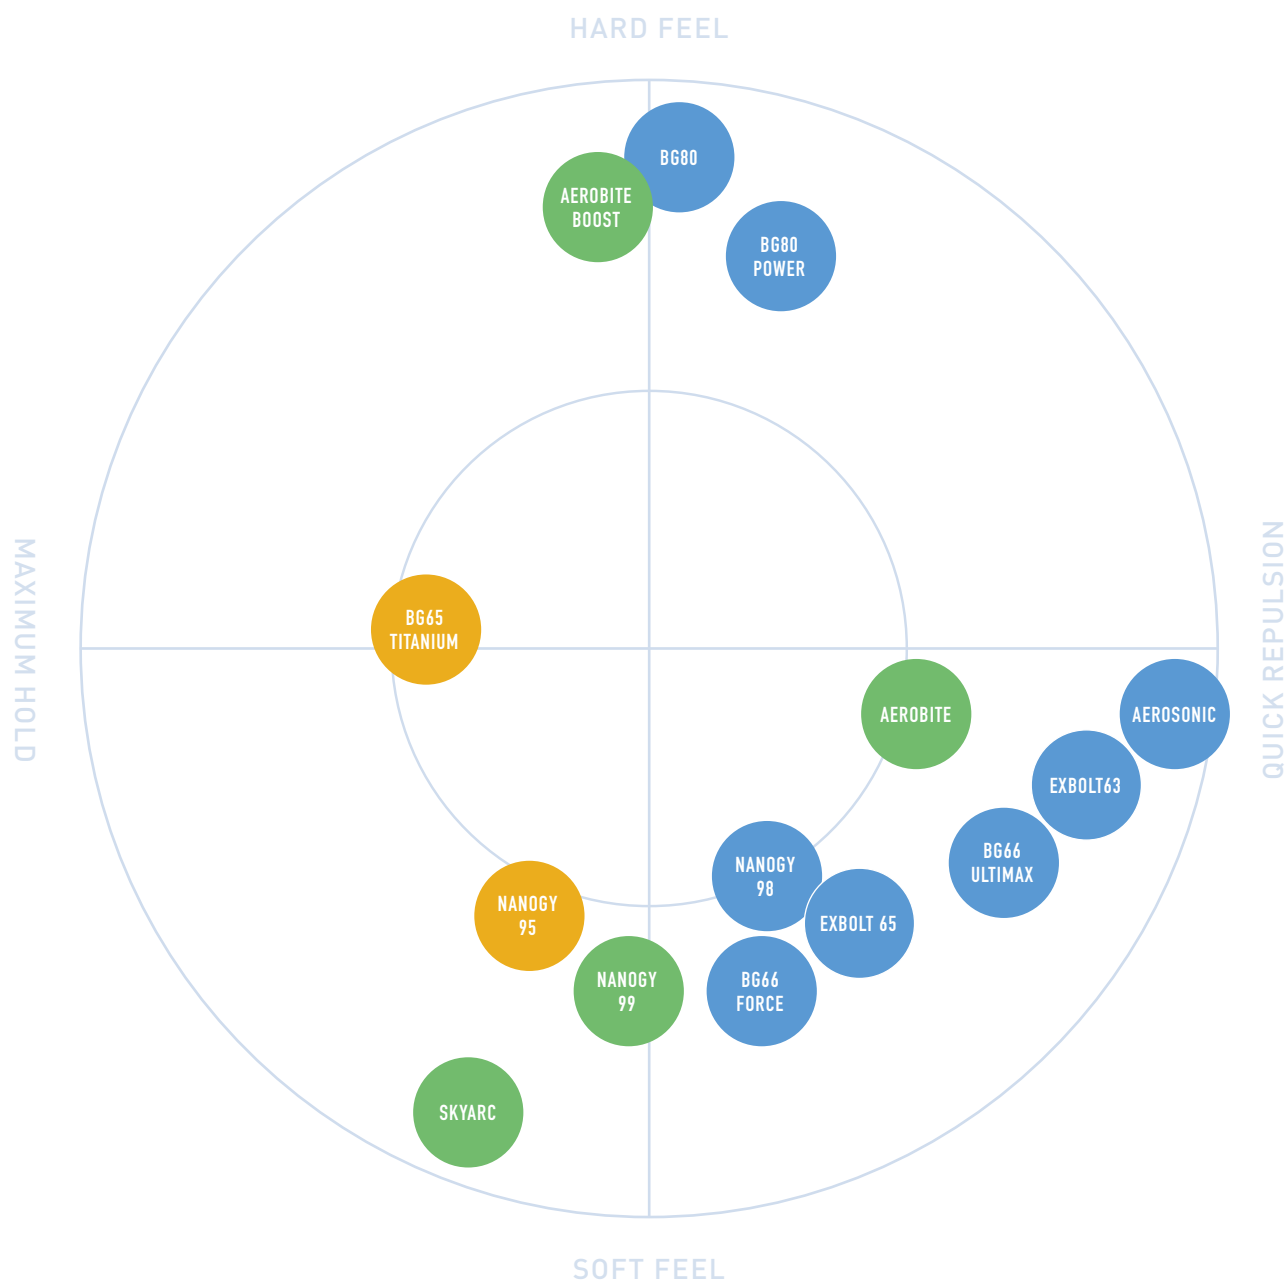

CONTROL

DURABILITY

BADMINTON STRINGS

QUICK REPULSION

Crafted for high velocity drives.

CONTROL

Innovated for more hold on the shuttle, allowing for precise attack.

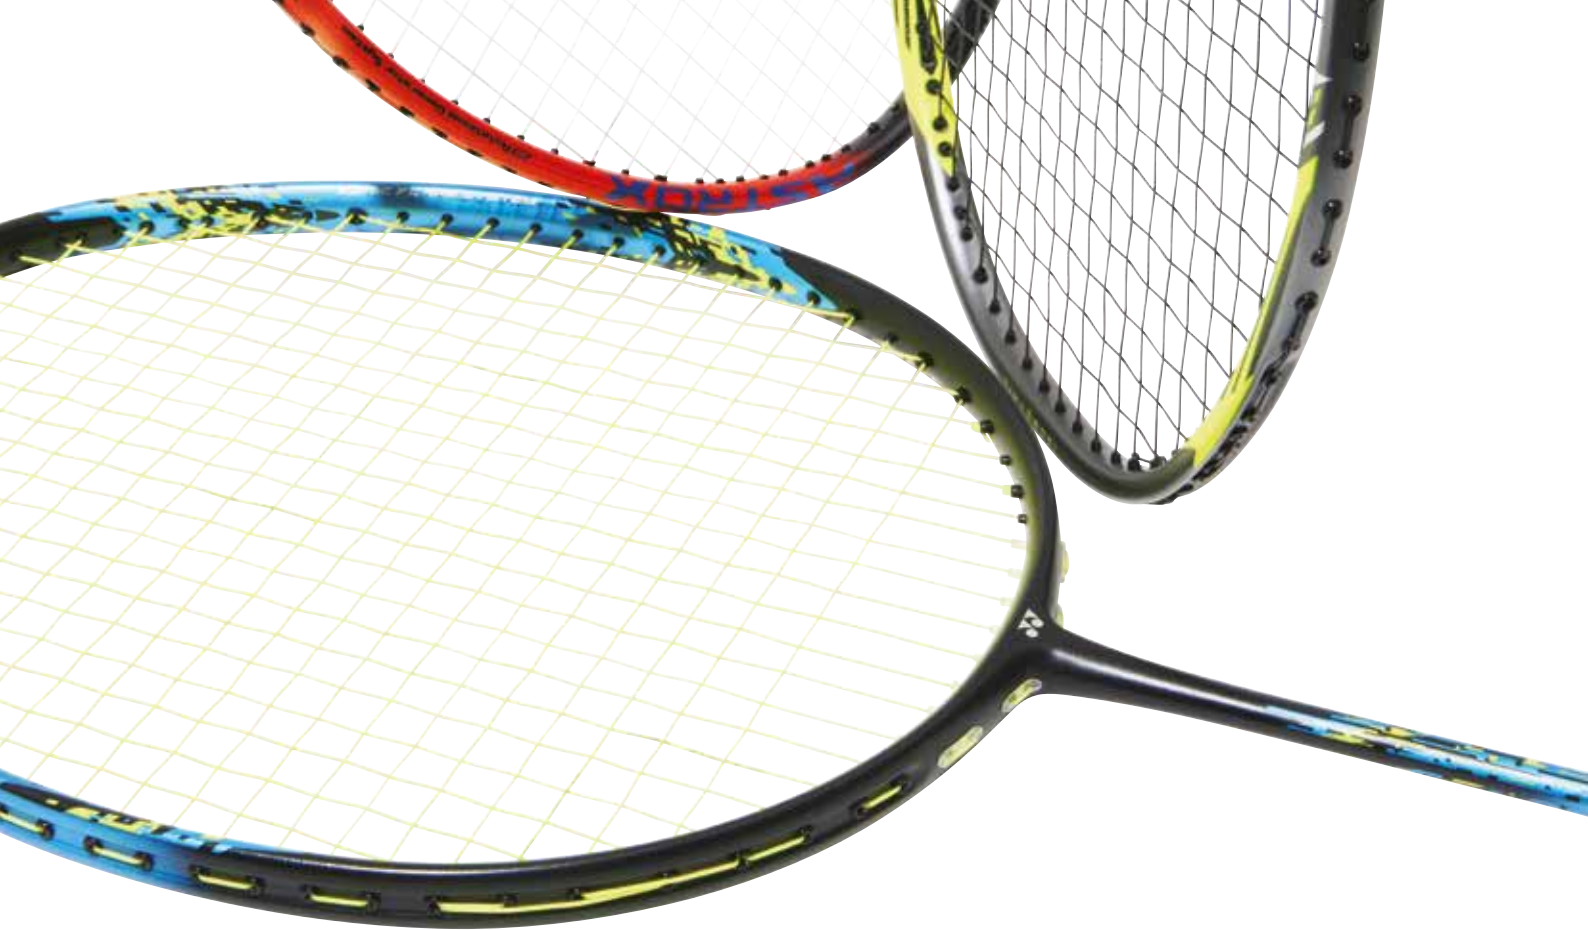

DURABILITY

Constructed to last longer for hard-hitting players.

CONTROL

SKYARC

ATTACK THE BACKCOURT WITH ACCELERATED HIGH CLEARS

HIGH SLING FIBRE

Softer and more resilient than nylon. 16% higher new material. Produces a large jump.

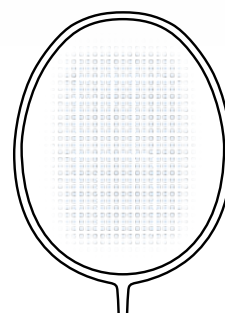

COMPACT FILLED STRUCTURE

High density resin filled structure reduces power loss and improves strength.

CATCH THE SHUTTLECOCK AND SEND IT FARTHER

EXPANDED SWEET AREA

5% increase in maximum deflection. Maintain performance even with off centre hits.

IMPROVED SHOCK ABSORPTION PERFORMANCE

Reduce impact shock by up to 6.9%. Good for your arm and elbow.

Same shuttle flight distance as conventional strings, even with 3km/h slower swing speed.

*Tested by YONEX

TECHNOLOGY

FORGED FIBRE

FORGED Fibre has strong molecular bonds which result in 1.5 times higher heat resistance than general nylon.

HI-SLING FIBRE

Achieves greater flight with high resilience and provides a soft hitting feel.

COMPACT FILLED STRUCTURE

Reduce power loss and improve strength by filling the gaps fully with resin.

VECTRAN™

Stretch resistant Super Fibre: more than twice as strong as nylon.

BRAIDED STRUCTURE

Braided threads around the main core thread create a robust string structure, allowing it to swiftly return back to its original position after impact for more power and repulsion on the shuttlecock.

COATING

ELASTICITY OUTER

The Elasticity Outer is a coating with enhanced flexibility achieved by applying NANOALLOY technology to nylon. The result is a combination of quick repulsion, durability, and control.

POLYURETHANE COATING

This tacky coating provides increased hold on the shuttlecock providing more bite on shuttlecock at the moment of impact for improved control.

SPECIAL NYLON COATING

Coating combined with highly flexible material at high speed deformation. Bites the shuttle at impact, showing great control and power.

COMPOUND TITANIUM HYDRIDE

Compound titanium hydride coating provides not only a sharp feel at impact but increased durability.

CUP-STACK CARBON NANOTUBE

Advanced construction minimises notching of the string at the intersections, for greater durability and high repulsion power.

CRAFTING EVERY SWEET SPOT

The Yonex Stringing Team is a global network of over 1,500 world-class stringers who are skilled in crafting the perfect sweet spot to meet every player's demands.

Equipped with state-of-the-art stringing machines that protect the integrity of every frame, these stringers are experts in optimising every racquet's performance. Each string is pulled and knotted with precision to ensure that players can rely on the consistency required to come out on top.

Ranging from the prestigious BWF World Championships and YONEX All England Open to Super 300 tournaments like the YONEX Swiss Open, the Yonex Stringing Team comes together to provide their deep knowledge of equipment and expert dexterity for players to compete at the highest level of badminton.

SWING WEIGHT MACHINE

PRECISION SCAN

Electronic tennis, badminton, and soft tennis weight and balance machine

SIZE	Approx. 700mm (W) x 453mm (D) x 283mm (H)
WEIGHT	Approx. 15 kg / 33 lbs
ITEM CODE	SPRSC

FEATURES

Precisely scan the total weight and balance of racquets by placing the racquet on the machine with a touch of a button.

QUICK SCAN: COMPUTER UNIT

The computer unit will provide the total weight, balance, swing weight, and performance swing weight.

Performance swing weight is a Yonex-exclusive measurement - more accurate than normal swing weight - and is calculated by using the values of the total weight, racquet balance, and swing weight.

ACCURATE: COVER, BAR, RING

The acrylic cover protects the machine's three main sensors while not in use.

A calibration bar and calibration ring is provided to ensure the machine gives accurate swing weight measurements.

STRINGING MACHINES

PRECISION 9.0

Premium electronic tennis, badminton, and soft tennis stringing machine

SIZE	Approx. 1,070mm (W) x 660mm (D) x 1,070mm - 1,370mm (H)
WEIGHT	Approx. 73 kg / 161 lbs
PULL SPEED	9 speeds
TENSION RANGE	10-88 lbs (0.5 increments); 4.4-39.4 kg (0.2 increments + 5)
PRE-STRETCH	1-20% (1% increments)
ITEM CODE	SPR90W

Made in Japan

FEATURES

USER-FRIENDLY: STRINGING ENVIRONMENT

A control panel with angle, brightness, and sound adjustments, along with a USB charging port, create a comfortable stringing environment.

EFFICIENT: MOUNTING SYSTEM

Lower racquet posts and a compact turntable combine to allow for smoother stringing, while improved gripping on the clamps results in less damage to the string.

CUSTOMISABLE MAIN POST

Easily adjust the height on the main post with one click through the electric elevation system.

PRECISE: AUTOMATIC LOCK FUNCTION

An accurate and quick lock function improves stringing efficiency and speed.

PRECISION 5.0

Electronic tennis, badminton, and soft tennis stringing machine

SIZE	Approx. 1,167mm (W) x 685mm (D) x 1,064-1,242mm (H)
WEIGHT	Approx. 75 kg / 165 lbs
PULL SPEED	3 speeds
TENSION RANGE	11-82 lbs (0.5 increments); 5-37 kg (0.2 increments)
PRE-STRETCH	0, 5, 10, 15, 20%
ITEM CODE	SPR50W

FEATURES

EFFICIENT: RACQUET FRAME SUPPORTS

The frame supports are easily adjustable with a one-click sliding functionality and head-size guides.

USER-FRIENDLY: CONTROL PANEL

Optimised for efficiency, the control panel is designed with large buttons for easy accessibility and improves accuracy. On the side is a USB port for convenient charging.

PRECISE: DISC BRAKE SYSTEM

A first for stringing machines, the PRECISION 5.0 turntable features a braking system utilised in cars and aircraft that enables quick reactions for improved accuracy.

ORGANISED: TOOL TRAYS

Keep your tools organised with two tool trays - one tucks away below the control panel, and the second is located on the side of the machine.

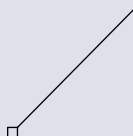

OUR RANGE OF —

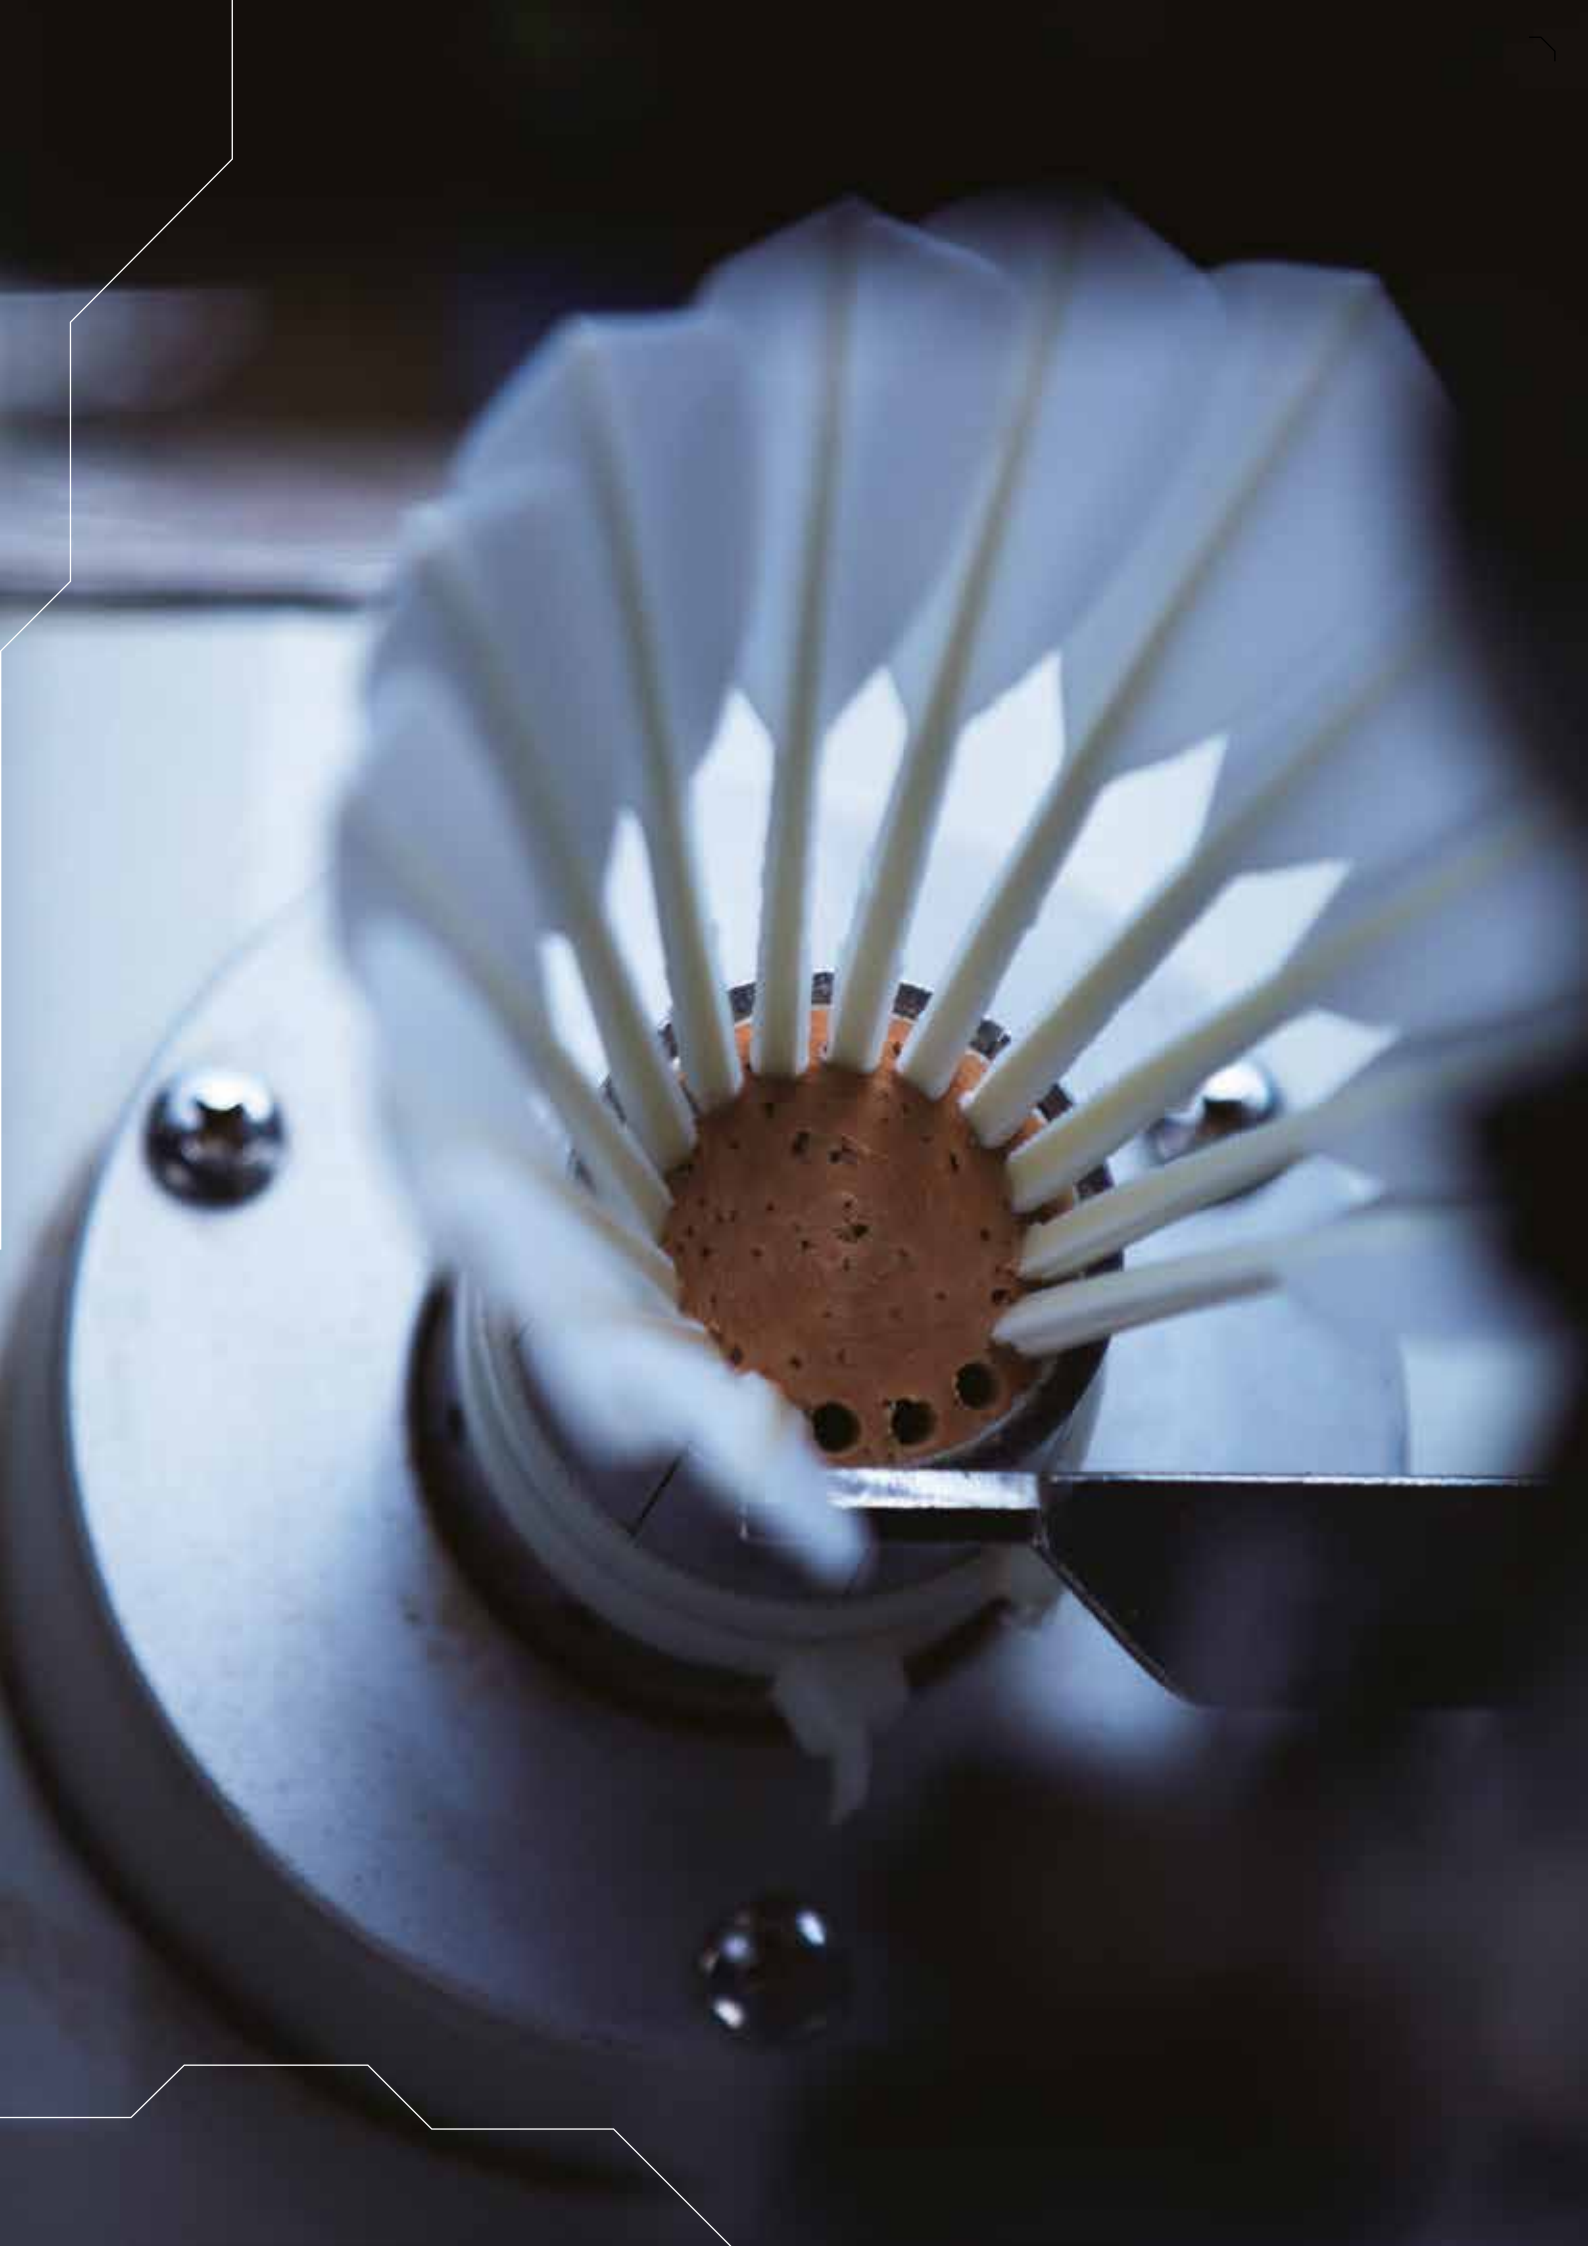

SHUTTLECOCKS

“PRECISION FLIGHT.”

Since 1965, Yonex has manufactured feather shuttlecocks widely known to deliver a consistent stable flight, and class leading durability. Manufactured with incredible attention to detail, players can trust in a quality shuttle that performs the same every time.

Yonex shuttlecocks are seen on the international stage, providing premium flight for some of the highest level tournaments such as the BWF World Championships and Malaysia Open.

FEATHER SHUTTLECOCKS

Yonex has been meticulously hand-crafting the best feather shuttlecocks in the world since 1965.

Each of our shuttles is assembled by a team of expert craftsmen using the finest materials.

They are then individually tested to make sure they deliver consistent flight trajectory, accuracy and distance at all temperatures. That's why the best players and the biggest tournaments in the world choose Yonex shuttlecocks.

Temperature Grade:

- ① 33°C and above ② 27°C - 33°C ③ 22°C - 28°C ④ 17°C - 23°C ⑤ 18°C and below

NYLON SHUTTLECOCKS

Outdoor or indoor, Yonex precision MAVIS nylon shuttlecocks are the closest you can get to a traditional feather.

Designed to have the same flight time as a feather shuttle, they give an accurate and durable performance with a traditional feel.

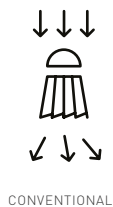

The hardness of the skirt – the feather part of the nylon shuttlecock – varies depending on temperature.

WING RIB™

The WING RIB design utilises air flow through the shuttlecock to restore shape quickly on impact. Based on flight dynamics, this original design grants stable flight, contrary to conventional models that restore shape via stiff construction.

The WING RIB design is featured in MAVIS 2000 and MAVIS 600.

OUR RANGE OF —

APPAREL

“BUILT FOR ON-COURT CONDITIONS.”

We are driven by the passion for higher on-court performance.
From top, to toe.
Racquets, to apparel, to footwear.

Every inch counts.
Every gram makes a difference.
Every thread matters.

Each of the instruments we make is intelligently designed to help you perform your best.
If you are as serious about your game as we are, then Yonex Apparel Innovations is here to help take you to the next level.

PRACTICE

TEAM

VIKTOR AXELSEN (DEN)

APPAREL TECHNOLOGY

VERYCOOL DRY

KEEP COOL, DRY AND ON TOP OF YOUR GAME

A special hydrophobic fibre moves moisture from the skin to the fabric's surface. Along with its quick drying property, VERYCOOL DRY keeps you cool and dry at all times.

VERYCOOL

A COOL WAY TO BEAT THE HEAT

By using cooling material Xylitol, VERYCOOL clothing from Yonex absorbs heat and perspiration, providing a significant cooling effect during exercise. No matter what the ambient temperature, VERYCOOL lowers body heat by 3°C for cooler play*.

*Data from Unitika Garments Technology & Research Laboratories Ltd.

UV REDUCTION

OUTSTANDING ULTRAVIOLET INTERCEPTION

Yonex clothing intercepts infrared radiation and approximately 92%* of ultraviolet, minimising heat build-up during play.

*Tested by BOKEN QUALITY EVALUATION INSTITUTE.

ANTISTATIC

AVOID THE DISCOMFORT OF STATIC ELECTRICITY

Carbon impregnated conductive fibres are woven into the clothing to remove static electricity build-up.

PRECISION MOVE

EASY TO MOVE

Yonex special cutting provides to maximise your performance, reduce stress on arm swing, quick and smooth step.

STRETCH

FLEXIBLE, FORGIVING AND FASHIONABLE

Innovative stretch material allows for free movement that supports your active play.

SWEAT ABSORBENT AND QUICK DRYING

STAY DRY AND LIGHT

Fabric that wicks away moisture and keeps you dry.

Air-Release

AIR RELEASE

SUPERIOR COMFORT IN THE HEAT

As warm air rises, cold air enters into open areas. Based on this fact, new Yonex Air Release technology has greatly improved ventilation in our shirts. Mesh in the back of the neck provides high ventilation, pushing out body heat. Meanwhile, fresh air is taken in through mesh equipped on the side of the shirt from the bottom to the armpits, keeping you cool under severe heat.

POLYGIENE

STAY FRESH AND ODOR-FREE

Woven into the fabric, this odour control tech keeps you fresh and odour-free even after intense play.

OUR RANGE OF —

ACCESSORIES

“PREPARE FOR PERFORMANCE.”

The connection between your hand and the racquet is often overlooked but can make the biggest difference.

Yonex designs a range of overgrips to fit every player's preference. From Super Grap - Yonex's most popular overgrip that has sold enough to wrap around the world five times - to Dry Grap, which wicks away moisture and provides a dry feeling even in humid conditions, every Yonex overgrip is designed to make the connection between your hand and your racquet, one you can trust.

The Legends' Vision

The Legends' Vision initiative brings together superstars from past and present, with a mission of introducing badminton to new audiences and igniting a lifelong passion for the sport. Founded by **Lee Chong Wei, Lin Dan, Peter Gade, Taufik Hidayat** and **Lee Yong Dae**, this World Tour offers fans the opportunity to be inspired by The Legends at coaching clinics, Q&A talks and exhibition matches.

Through interactive events that get people excited about the sport of badminton, the Legends' Vision leaves a lasting legacy in every country it visits. Since the Legends' Vision tour began in 2015, its success in attracting new badminton fans from all corners of the globe has been unparalleled, and we hope that this will continue to grow as we add more events to the tour in the very near future.

To learn more about this initiative, head to Legends.Yonex.com

3D POWER GRAPHITE SHEET

Provides stability under the centre of the foot and reduces shoe twist.

POWER GRAPHITE DRIVE

A graphite sheet is inserted along the sole for increased stability and to propel you forward to the next shot.

POWER GRAPHITE LITE

Improved stability and reduced twist on landing.

POWER GRAPHITE SHEET

Inserted in the midsole, the lightweight graphite sheet provides improved stability.

UPPER:

DURABLE SKIN

Improves shape retention, durability and heat-resistance.

DURABLE SKIN LIGHT

A seamless construction offers natural comfort with an improved fit, eliminating discomfort from material friction.

DOUBLE RASCHEL MESH

Highly breathable mesh for maximum ventilation.

LATERAL SHELL

Prevents foot movement at the edge of the sole for reduced power loss, allowing for fluid and aggressive footwork.

ERGOSHAPE

The centre of gravity is shifted to the large toe – for a comfortable fit and more speed.

TOE ASSIST SHAPE

Reduces pressure on the big toe while improving support at the mid-foot and heel or increased stability. Power loss is reduced for swift footwork.

FLEXION UPPER

Asymmetrical design with a curved eyelet creates a natural snug fit around the inner arch. Stress gets absorbed through the toes and instep for a more comfortable fit.

INNER BOOTIE

A flexible material from the metatarsal to the heel that produces a more gentle fit.

	POWER CUSHION + POWER CUSHION				

SOLE:

HEXAGRIP

Lightweight sole material that provides greater grip for agile stable footwork.

POWER CUSHION+

By improving shock absorption, our POWER CUSHION+ technology is designed for faster footwork that transforms impact into energy.

POWER CUSHION

A lightweight, impact-absorbing material developed independently by Yonex which quickly returns to its original shape after receiving a shock load, converting the shock energy into power for fast and light footwork.

ROUND SOLE

For quick and smooth footwork ensuring maximum energy transfer into the next shot.

RADIAL BLADE SOLE

Designed for confidence in directional change. A proprietary sole pattern increasing traction in vertical, horizontal and diagonal movements.

SEMI ONE-PIECE SOLE

Toe and heel rubber soles combined into a singular piece for improved stability, and for more traction through additional surface area.

MIDSOLE:

TOUGHBRID LIGHT

Provides cushioning, shape retention and high elasticity whilst reducing shoe weight.

FEATHER BOUNCE FOAM

A lightweight cushioning material designed to provide an added bounce with each step.

MSLITE X

The lightest midsole material in Yonex history, 30% lighter* than general EVA.

*Tested by Yonex

INSOLE:

SYNCHRO-FIT INSOLE

Reduces the gap between the foot and shoe with extra support around the heel, for maximum grip, comfort and performance.
