Dear Entrepreneur,

Are you thinking about establishing your own Investment Bank or licensed Investment Fund without a lot of bureaucratic “red tape”, with electronic payment capabilities – and for a budget you can afford?

You have done your research across the world, compared service providers only to discover that they are either too expensive or simply not worth your time?

Rest assured, we are highly specialized in establishing investment banks, investment funds or licensed Offshore Banks for our clients across the world. We like to take this opportunity to enlighten you more about our business and the specialized services we offer.

INVESTMENT BANKS & INVESTMENT FUNDS

We at Blockchain Bank, are experts in creative Investment Banks & Investment Fund establishments, including your own private label Mobile Banking Platform, your own API, your own cryptocurrency facilities, your MSB License , your own MasterCard program, yet without the bureaucratic "red tape".

Our Mobile Banking technology solutions enable your future banking clients to open a bank account from anywhere. In a matter of seconds - with seamless interaction and you will be empowered to offer digital MasterCard issuance to your clients within minutes.

INVESTMENT BANKS & REAL ESTATE TRUSTS

Our Investment Banks & Real Estate Trusts are fully authorized to collect money from the general public and invest in different types of businesses for your own account and/or for third parties.

These kinds of Investment Bank's & Real Estate Trusts are ideal for capital raising, purchase and management of real estate of all kinds, including shopping centers, office buildings, hotels and apartment blocks as well as for e-wallet, electronic payment solutions.

INVESTMENT BANKS & INSURANCE TRUSTS

We can establish your Investment Bank & Insurance Trust including 100% Capital Protection for your investors.

By implementing a Capital Guaranteed Note Program, any losses experienced by the underlying investments are absorbed by your Fund, which tends to invest 50% of fund capital into very conservative Governmentbacked securities to help minimize the likelihood of losses in the event your business would default.

INVESTMENT BANKS & BLOCKCHAIN TRUSTS

We are also specialized in establishing decentralized Investment Banks & Blockchain Trusts.

This unique regime option has proven to be a very popular route for Investment Bank & Fund Managers who wish to establish an Investment Banking Fund & Blockchain Trust in a tax neutral jurisdiction and access a European market in a quick and cost-efficient way by raising capital through a listing on Euronext.

In addition, Eurolist by Euronext is a regulated market as referred to in the EU Markets in Financial Instruments Directive (unlike, for example, the Alternative Investment Market in the UK, that only has exchange-regulated status).

On the next pages you will find a list of existing Investment Banks & Capital Trusts as well as Investment Funds we have established and keep on the shelves for our international clients. These financial entities are available for immediate **ACQUISITION** and the ownership can be transferred to you within 1 day.

Our Platinum Investment Banking package is only \$89,000 including the following all-inclusive services:

- **Deed of Incorporation of your Investment Bank & Blockchain Trust**
- **Certificate of Good Standing**
- **Articles of Incorporation**
- **MSB License Registration with FINCEN USA for your Blockchain Bank**
- **The BYLAWS**
- **A customizable Blockchain Bond & Trust Debenture to be used for your investors**

- **Every Investment Bank comes now with Cryptocurrency & MasterCard facilities.**

We champion entrepreneurs by delivering the perfect help and tools for their business journey.

Delivering Trust in Digital Assets and Investment Bank & Blockchain Trust Registrations! Totally secure with a 100% accuracy guarantee, no hidden fees, affordable and extremely fast!

DO YOU TRUST YOUR GOVERNMENT?

Blockchain technology was created as a response to the trust crisis that swept the world in the wake of the 2008 financial crisis. Bitcoin and other blockchain-based systems were presented as a “trustless” alternative to existing financial institutions and even governments. Yet, while the trustless nature of blockchain technology has been heavily questioned, little research has been done as to what blockchain technologies actually bring to the table in place of trust.

Our business model draws from the extensive academic discussion on the concepts of “trust” and “confidence” to argue that blockchain technology is not a ‘trustless technology’ but rather a **confidence machine**.

Each Investment Bank & Blockchain Trust is legally constituted, registered and established on the Blockchain Networks and abides to the Laws and Regulations of the United Nations Commission on International Trade Law (UNCITRAL) regarding the international sale of goods; international commercial dispute resolution, including both arbitration and conciliation; electronic commerce; insolvency, including cross-border insolvency; international transport of goods; international payments; procurement and infrastructure development; and security interests.

The legal jurisdiction of each Investment Bank & Blockchain Trust is New York, USA, based on the United Nations Convention on the Recognition and Enforcement of Foreign Arbitral Awards (New York, 1958) (the "New York Convention"). Every owner of a Blockchain registered Trust Company agrees to abide by the above-mentioned U.N. Convention if any disputes arise and accepts the **"SEAT OF ARBITRATION"** in New York, USA, or any Member State of the UNCITRAL Convention.

The Convention has been signed by 172 Nations, which can be verified on the [United Nations website](#).

All businesses and industries have the ability to remove the business from the jurisdiction of public law and to implement the protections of operating within the private domain. In today's world, business leaders are not taught to seek these protections and are educated to operate their business in compliance with and subject to public law. There is a better answer! A properly formed Investment Bank & Blockchain Trust!

Is a Decentralized Investment Bank & Blockchain Trust Right for You or Your Business?

A decentralized Investment Bank & Blockchain Trust does not need any authority or permission, of any kind whatsoever, from any government or central bank for its creation or in order for it to continue to exist and function.

An Investment Bank & Blockchain Trust is created by and exists upon the contract authority and power that people have reserved for themselves. Blockchain Trust members are free to exchange any services or information whatsoever on any topic they choose and can speak or write about, listen to, or read any information, use or obtain any information, product, or service on any terms agreeable to any member who chooses to provide that information, product, or service within the private and decentralized Blockchain Trust.

Did You Know?

The Constitution, The Courts, and International Laws & Treaties all Say You Have a Right To Conduct Business In The Private Domain, Without Licensing, Regulation, or Interference from the State.

You can practice almost anything without a license within your properly formed Investment Bank & Blockchain Trust of private members!!!

The only exception is if your Investment Bank & Blockchain Trust practices, proposes or promotes a clear and present danger of substantive evil.

Also, the private domain is referred to as a “sanctuary from unjustified interference by the State” in *Pierce v. Society of Sisters*, 268 U.S. 510 at 534-535. And as a “constitutional shelter” in *Roberts v. United States*, 82 L.Ed.2d 462 at 472. And again as a “shield” in *Roberts v. United States*, supra at 474.

In addition, the U.S. Supreme Court in *Thomas v. Collins*, 323 U.S. 516 at 531, specifically refers to the “Domains set apart...for free assembly.” The First Amendment right to association creates a “preserve” *Baird v. Arizona*, 401 U.S. 1.

The private domain of an association is a sanctuary, constitutional shelter, shield, and domain set apart and a preserve according to a number of U.S. Supreme Court decisions.

Again, your properly formed decentralized Blockchain Trust consists of private members and is in the private domain (The Blockchain) with the protection of numerous favorable U.S. Supreme Court decisions with no decisions to the contrary to date, excepting limitations imposed upon statutory compliant companies such as LLC's LTD's etc. etc. and companies created for the purpose of regulation by the state i.e., a State Athletic Association or Union membership.

Why should a decentralized Investment Bank & Blockchain Trust be your first, and only choice?

First, a decentralized Investment Bank & Blockchain Trust is established and operates as a Private Membership Bank & Trust on the Blockchain, within a network of other decentralized Blockchain Trusts. We DO NOT recommend anything to others that we don't utilize ourselves.

Fast, traceable and transparent cross-border payments with web3 blockchain technology, out-smarting SWIFT.

As a corporation, we understand you need a seamless cross-border payments experience. Speed, certainty and fee transparency are all key elements to running effective treasury and cash management processes.

Web3 tech has transformed cross-border payments, enabling businesses to reduce payment investigations, improve supplier relationships, speed up invoice reconciliation and achieve greater capital efficiencies.

Hundreds of the world's leading cash management banks send over \$300 billion via web3 every day. And with thousands of companies jumping on the blockchain, it will become the gold standard of international money transfers without the need for SWIFT.

ENABLING TREASURY EFFICIENCIES

Web3 tech has transformed the cross-border payments experience for corporate treasurers. Payments processing is now more efficient, shortening supply cycles, speeding up critical payments to minutes, and reducing lengthy and frustrating investigations.

Through web3 , you get a real-time, end-to-end view on your cross-border payment flows, improving your cash forecasting and optimizing your liquidity. And blockchain enables you to send a confirmation notice when the money reaches your recipient's account – providing certainty that the beneficiary has been credited.

PAY AND TRACE

Our solution for multi-banked corporates enables the initiation and tracking of all your payment flows across all of your banking partners. This service can be integrated directly into your treasury management or online banking system, and uses the latest standards, including FIAT to Crypto conversions.

- Initiate and track all your web3 payments across all of your banking partners through a single interface
- A seamless experience across banks with tracking, transparency and real-time notifications
- Integrate payments tracking information directly into internal corporate processes
- Gain insights into payment routes, including traceability on processing times, the number of intermediaries involved, and the fees charged at each stage
- Confirmations of credit in real-time across your web3 bank, and Fiat to Crypto and Crypto to Fiat conversions in rapid time.

We are the first institution globally to offer registered blockchain banks with a U.S. Tax EIN and a FINCEN MSB license, setting a new benchmark in financial blockchain innovation.
