

Omega Red Group

Omega Red Group (Omega) continues to be driven by the increasing regulatory and insurance demands for compliance across its customer base.

The company has built a strong market reputation, underpinned by a steadfast commitment to safety and the consistent delivery of high-quality solutions in lightning protection, power earthing, and height safety.

With over 200 directly employed staff and strategically located branches in Bristol, Edinburgh, London, Manchester, and Nottingham, Omega offers true national coverage while maintaining the agility to deliver services at a local level. This geographic reach enables Omega to serve a diverse range of customers across key market sectors including Utilities, Energy, Mission-Critical Data Centres, Infrastructure, Retail, and Facilities Management.

Strategy and Performance

Omega has made significant progress in executing its strategic roadmap, focusing on harmonising processes across its operations. Continued investment in systems is planned to enhance customer experience by simplifying interactions and expanding service accessibility.

Key strategic initiatives include:

- Streamlined service delivery through a unified customer interface.
- Tailored service offerings to meet specific client needs.
- Integrated communication channels for enquiries, updates, and support.
- Agility to introduce new services aligned with evolving compliance and regulatory requirements.

The division has delivered another year of safe, profitable growth, securing major contract wins and maintaining a robust forward order book extending well into the next financial year. A deliberate strategy to limit exposure to the general construction sector has helped mitigate the impact of market volatility.

Omega continues to play a pivotal role in supporting the UK's transition to a low-carbon economy. Leveraging its expertise in high-voltage electrical earthing, Omega is contributing to the delivery of transformative infrastructure projects.

Noteable Projects

- **Hinkley Point C** | Omega is a key delivery partner for EDF's flagship nuclear power project, which will provide zero-carbon electricity to approximately six million homes.
- **Dogger Bank Offshore Wind Farm** | Omega is involved in all three phases of this landmark project, which will become one of the world's largest offshore wind farms with a total capacity of 3.6GW.
- **Hornsea Offshore Wind Farm** | Continuing its collaboration with Ørsted, Omega is supporting the development of this record-breaking North Sea wind farm, further cementing its role in the UK's renewable energy future.

Throughout the project lifecycle, customers consistently understand why their expectations are met, projects are delivered on time, within budget, and to the required specification. This confidence stems from Omega's proven track record, strong technical leadership, collaborative approach, and robust project management capabilities. As a trusted partner, Omega is widely regarded as a safe and reliable pair of hands.

Omega's sustained success is rooted in its commitment to delivering exceptional customer service and long-term shareholder value. The company has strategically focused on engaging with customers whose values align with its own - prioritising quality, technical expertise, and a safety-first approach. This alignment has naturally fostered Omega's reputation as a trusted partner, built on shared principles and mutual respect.
