Wallpaper & More

Since 2012, N.O.W. Edizioni has been offering excellence, innovation, aesthetics, reliability, and tailoring in custom wall coverings. These characteristics make N.O.W. Edizioni a renowned brand where architecture and design blend together to give rise to exclusive “Not Ordinary Works.”

ABOUT US

N.O.W. Edizioni's creative path is lead by Pietro Gaeta, Art Director and founder of the brand, and other designers from the international scene.

The philosophy of N.O.W. Edizioni is to give life to tailored projects, thanks to a specialized graphic team that creates simulations and customizations tailored to each client.

They offer the public a production of custom wall coverings in wallpaper (also available in an ecological version), fiberglass (for humid environments), acoustic (a sound-absorbing material), and digital fresco.

DESIGNER PICK:

Fiberglass Surface

Fiberglass is an innovative technical material used to coat walls and floors in humid environments such as bathrooms, shower interiors, kitchens, gyms, and spas. It is a 100% natural printing support that is offered in two different textures.

Glue, decorative fiber, and protective resin make up the fiberglass system, which prevents water from passing through the underlying layer, ensuring waterproofing of the treated surface.
