We shape workplaces of the future

About PJ Production // PJ Production was established in year 1997, and has since the beginning designed, developed, and produced office accessory products for the modern working environment. We are an international company with big ambitions ready to optimize our customers' business, regardless of the size of the tasks. We truly believe that great service, consultancy, and reliable delivery are the key towards success. We determinedly take our collaborators' demands very seriously via reciprocal respect, ongoing dialogue, and quality-oriented solutions. And this exact combination supports our livelihood on a market with quality-consciously collaborators.

Besides the transparent collaboration, we make a virtue out of delivering high-quality products to our clients that fulfill the agreed standards and specifications. These high-quality standards and specifications are mandatory as we use internal quality-control. All inbound and outbound products are randomly controlled to ensure equal quality every time. Thereby, you can always expect to receive quality products from PJ Production – standard products as well as specially produced products.

FELT DRAWER

SLIM & LARGE

A Greener Choice // The drawer's design combines organic forms with a sleek expression - both when the drawer is open and closed. The ball bearings are concealed to avoid interference. The drawer adds a stylish touch to any office environment. It comes in two sizes, "Slim" and "Large," and a metal insert with a felt bottom for pens, etc., can be additionally purchased. The Slim felt drawer is available in several color variations: Dark Grey, Light Grey, Petroleum, and Beige.

The felt is made from 70% recycled plastic.

PEN TRAY

NARROWED & WIDEN MODELS

Full Accessibility // A drawer with ample space for overview and storage. The pen trays come with 110% extension, ensuring that every corner of the drawer is fully accessible and thus optimizing space utilization. The pen tray is mounted directly under the desk, allowing for maximum legroom underneath the desk.

The pen tray series consists of two different models - a narrow and a wide version. Regardless of the model, the pen tray is available with and without a lock, with all versions being delivered with a plastic insert for additional divided storage. Currently, we offer our pen trays in three colors - Black, Aluminum, and White - as standard.

LOCKABLE TABLET TRAY

NARROWED & WIDEN MODELS

Secure Storage // Whether secure storage for iPad/Tablet or just for smaller items is desired, this tablet drawer is an extremely advantageous choice. The drawer ensures theft protection, as it comes with a lock and two keys. If another lock is desired, the existing one can be replaced with a high-quality German system lock including master key. The drawer also comes with a non-slip rubber mat. Furthermore, the drawer is available in two different versions - a narrow and a wide version.

Lockable tablet tray - narrowed model, with rubber drawer liner and lock

Height: 46 mm. // Width: 414 mm. // Depth: 248 mm.

LAPTOP TRAY ATHENE

Modernization, Organization, and Optimization // The laptop drawer Athene caters to the trend of smaller workstations, as its design can be used for the majority of all desks. This is made possible by the advantageous depth of 316 mm, which can thus easily accommodate desks with a depth of 80.

To prevent items, especially laptops, from overheating, the drawer's design features two ventilation holes at the back edge. If more ventilation is desired, most of the back edge can be removed due to the perforations. The laptop drawer Athene will be delivered with a lock as standard, while a black insert can be purchased additionally if more divided storage is desired. Furthermore, a bamboo strip with clear lacquer for the drawer's front can be purchased as an upgrade for a more aesthetic look. If the latter is desired, please feel free to contact us, as this is mainly produced as a project-oriented task.

Soft close for a slower and more gentle closing of the drawer

SLIMTRAY

SMALL & LARGE

Simple, discreet, and functional // Our well-known Slimtray collection has a discreet look where no compromises have been taking regarding functionality. The collection consists of two attractive sizes, where both are available in two versions and three colors. Unaffected by the above-mentioned features, all versions are delivered with a plastic insert that easily can be removed if required. The design of the collection is relatively equal uninfluenced by the versions, where the only factor differs is the width, as the large has a width of 871 mm, whereas the small has a width of 426 mm. A factor similar for all productions is the discreet front of 32 mm, which gives a simple, elegant, and light expression at the workplace. Furthermore, the depth is likewise equal for all drawers, - 260mm, which makes the drawers recommendable for the majority of all desktops. Both sizes are available in two versions, - one with lock and one with a color-matching plastic cap. The plastic cap can easily be swapped with a lock afterward if this was not prioritized at first.

Slimtray - small, with removable plastic insert (and either plastic cap or lock)

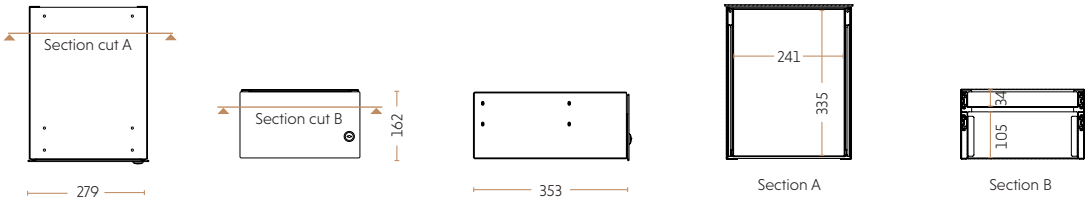
DUO PEN TRAY

Maximum Storage // A drawer for storing personal belongings conveniently at hand. Outwardly, the drawer appears discreet, as the front consists of one surface, but upon opening, multiple options are promoted. The drawer actually has two integrated drawers, each with an extension length of 110% of the drawer's length.

The top pull-out shelf of the drawer comes with an insert that makes divided storage more manageable. Conversely, the lower drawer comes with a non-slip rubber mat to prevent stored items from scratching against the metal. Finally, the drawer comes with a lock and corresponding keys to ensure that the belongings remain secure from theft when the workplace is left unattended.

Duo Pen Tray

4060-2000-9005



4060-2000-9005

Duo Pen Tray
Height: 162 mm. // Width: 279 mm. // Depth: 353 mm.

TRI DRAWER

NARROWED & WIDEN MODEL

Three-layered Storage // A three-layered drawer for storing personal belongings conveniently at hand. The top drawer contains an insert for the smallest office supplies, the two bottom ones are perfect for books and A4 paper. The drawer is available in two sizes, and they all have an extension length of 110% of the drawer's length.

The drawer is available in two different sizes, but the same for both is that they both have three compartments, with the top one being able to be supplied with an insert. The remaining two drawers come with a non-slip rubber mat.

TRI Drawer- Narrowed Model

TRI Drawer - Weiden Model
Height: 139 mm. // Width: 402 mm. // Depth: 248 mm.

PEN TRAY “NARROW SPACE”

The Discreet Solution // The drawer doesn't disturb unnecessarily in the workplace due to its minimal visibility and size. This makes the drawer advantageous for most desks, as long as the desk's frame doesn't contradict the depth of the drawer, which measures 473 mm.

The Pen Drawer is available in three different colors, allowing it to complement the existing interior at the workstation. Regardless of the color, the drawer always comes with a rubber mat, which can be removed if desired.

Pen Tray “Narrow Space”
4058-9005 // 4059-9006 // 4057-9016

REVOLVING PEN TRAY

Storage for Office Accessories // Our swiveling pen tray is available in two different colors - black and aluminum, both made of plastic. These can be advantageously used in most office environments, especially where space is limited, due to the colors and the discreet design that doesn't disrupt the existing decor.
The pen tray can rotate 360 degrees around its own axis due to the pivot point of the drawer.

Our swiveling pen tray is available in two different colors - black and aluminum, both made of plastic. These can be advantageously used in most office environments due to the colors and the discreet design that doesn't disrupt the existing decor.

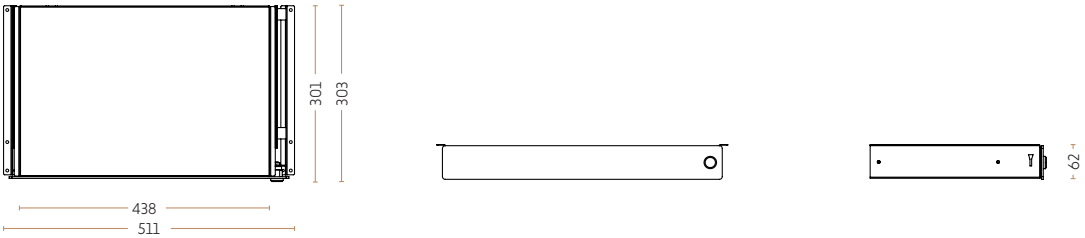
LOCKABLE LAPTOP TRAY

A Drawer with Appropriate Security Level // The demand for drawers with locks is increasing as security and information handling have come into greater focus since the GDPR law came into effect in 2018.

Therefore, this laptop drawer with an integrated lock is a good choice. The advantageous size of the drawer can be mounted under the desk's underside without creating unnecessary disturbance to the existing legroom.
If the workplace is desired to be free from the drawer, it can also be mounted in a cabinet near the workstation, which is possible due to the drawer's size.

Lockable laptop tray
4050-9005 // 4051-9006 // 4050-9016



4050-9005 // **4051-9006** // **4050-9016**

Lockable laptop tray
Height: 62 mm. // Width: 511 mm. // Depth: 303 mm.

LAPTOP TRAY"ORIGINAL"

100% Extension // PJ's well-known laptop drawer is not only functional and efficient but also designed to accommodate the diversity of the office environment. With its 38mm front, the drawer creates a light appearance that supports ample legroom at the desk. Additionally, the drawer comes with a 110% extension, allowing for maximum utilization of every corner of the drawer.

The laptop drawer is a bestseller in our range, where a new option is offered - a bamboo strip for the drawer's front. This creates an elegant expression in the office environment that is also sustainable, durable, and versatile - good qualities for the practical workstation.

ULTRA PEN

SMALL & LARGE

Recommendable for the majority of all desks // The Ultra Pen series comes highly recommended for most desks, including desks with a bow, as the depth of the drawer measures 184 mm.

Despite the reduced depth, the drawer provides ample storage for various personal items, which can be easily organized thanks to the included plastic insert - though not in all models. The Large models come with the removable plastic insert regardless of the version, whereas the Small models come with customized content.

BAMBOO PEN TRAY

X-SMALL

Sustainable, Durable, and Versatile // Drawing inspiration from nature, PJ Production has designed an aesthetically pleasing and elegant bamboo drawer, ideal for storing paper, office supplies, and other items.

The design of the bamboo drawer is not only aesthetically pleasing and elegant but also functional in use. The design has taken into account cables and wires, which can be discreetly concealed through the hole at the back. Additionally, the drawer has advantageous dimensions, making it suitable for most desks, including desks with a depth of 80.

CPU-HOLDER

ORIGINAL & MICRO

Maximum Stability for the Computer // PJ Production offers a wide range of CPU holders, which have an elegant appearance due to their simple construction. This CPU holder comes in two different models - Original and Micro -, each suitable for different computer sizes. Common for both CPU holders is that they offer height and width adjustment to easily create stability for the suspended computer.

The CPU holders also offer optional add-ons, consisting of a swivel bracket. These provide full rotation and thus easy access to the computer. For example, if the computer has USB ports on the top, the swivel bracket is highly recommended as it allows the computers to be lowered from the underside of the desk top.

Height: 175-310 mm. // Wicth: 30-100 mm. // Debth: 80 mm.

NEWLINE

The Budget-Friendly Alternative // PJ Productions' Newline CPU holder is, as the name suggests, a newer version of our existing CPU holder. The difference lies in the fact that the Newline CPU holder has a thinner material thickness combined with other manufacturing methods, making the CPU holder significantly more affordable. However, it should be noted that no compromises have been made in terms of quality and design, which still meet PJ Productions' high standards.

The Newline CPU holder can be mounted directly under the desk top, but can also be mounted via a swivel bracket. These allow for full rotation and unobstructed access to any USB ports on the top of the computer.

CPU-HOLDER

WALL MOUNTED

Maximize utilization of storage // Why only use the installation opportunity underneath the desktop, when the working environment has numerous other surfaces recommendable for installation. This CPU-holder must be mounted directly on the wall, which, besides space optimization, gives the employee full access to the working station without any disturbing factors.
The wall-mounted CPU-holder can carry up to 20 kg. Furthermore, the CPU-holder has width adjustment om 45 mm. – 160 mm., which makes it possible to use this CPU-holder for a broad array of computers unaffected by the size. The wall-mounted CPU-holder is available in three different colors, - black, white and aluminium, in order to match the existing interior at the office.

HORIZONTAL CPU-HOLDER

ORIGINAL & MICRO

Integrate the computer in the working environment // This CPU-holder is recommendable if looking for a horizontally mounted CPU-holder. The CPU-holder is directly installed underneath the desktop, which automatically integrates the computer within the working environment.

The CPU-holder is available in two different sizes, which gives a possibility of finding the perfect match unaffected by the size of the computer. Both sizes can carry a computer up to 20 kg., as well as height and width adjustment in order to modify the restrain the computer in place.

HORIZONTAL LAPTOP HOLDER

MEDIUM

An open solution for laptop and docking station // Wenn eine Kombination aus einer Schublade und einer CPU-Halterung gewünscht wird, ist dieses Regal eine gute Wahl. Das Regal ist diskret unter der Unterseite des Schreibtisches montiert und gewährleistet so optimalen Zugang zum Computer.

Die Vorteile des horizontalen Laptop-Halters sind, dass er für die Mehrheit der Schreibtische geeignet ist. Außerdem eignet er sich gut für projektbasierte Aufgaben, da er leicht an spezifische Größenanforderungen angepasst werden kann. Er hat eine Höhenverstellung von 70-140 mm und ist jeweils in Schwarz, Aluminium und Weiß erhältlich.

FASTDOCK

A stable solution // If looking for a vertically mounted solution for a laptop and a docking station, then this FastDock is an excellent choice. The system must be directly installed underneath the desktop, simultaneously placing the personal laptop and docking station closer to the possessor. The level of clean desk caused by the placement is increased since the laptop and docking station is removed from the desktop. Lastly, the laptop and docking station are secured responsibly due to the enclosed safety strap.

CHAMBER

USBC & LAPTOPHOLDER

Easy and practical // As technology evolves, we are experiencing an increasing trend / demand for a smart and user-friendly storage of both portable and USBC Dock. We have therefore developed this "chamber", which is mounted under the desk, adapted to both small and large workstations.
Chamber is a solution that is easily accessible when you need to "plug" yourself and your laptop into the day's work. The USBC dock is attached and above is a small shelf where you slide your laptop in. Furthermore, there is a cable tie at the back and a small magnet to hold the stand on your USBC cord.

The holder fits a 15-inch laptop (W: 35 cm x D: 24 cm H: 1.8 cm) together with a dock, which has a width between 194 mm and 240.
As well as a 13-inch laptop (W: 31 cm x H: 21 cm x D: 1.8 cm) and a dock which has a width between 164 mm & 215.
However, you can always request other sizes and will be able to easily adapt to your needs.

FUTURE FLEX

FOR ONE OR TWO MONITORS

Embraces the Clean Desk Policy // Ergonomics is about adapting the workspace to individual needs to avoid improper working postures. With Future Flex, you get maximum comfort and accessibility, as the screen(s) offer full rotation, optimal tilt options - both up and down - as well as height adjustment.

Future Flex consists of an elegant screen column in black, mounting brackets for one or two screens, as well as corresponding VESA mounts and extension cables in the desired length. (Extension cables are supplied in sets of two) The system provides full flexibility and maximum space utilization based on a centered desk clamp or desk grommet, depending on preference. Future Flex has also embraced the Clean Desk Policy, as the screen column features integrated storage to minimize visible wires and cables behind the screen.

Future Flex with two vesa and two extension arms
Monitor pole: 350 mm. // Extension arm: 334 mm.

WINGS

Expand Your View // Wings is the optimal solution for mounting three monitors.
Wings features a single column in the center, saving space on the desk. The column can be mounted either with a desk clamp or with a desk grommet. With the latter solution, the best stability is achieved, while the cables can be routed directly through the column and down through the desktop. The solution can be customized depending on the size of the monitors.

Wings can carry a maximum of three monitors, each 27 inches and 8 kg. Or two monitors, each 32 inches and 16 kg. However, heavy monitors require a larger VESA mount/tilt bracket than the standard ones sent out. Please contact us if you require something different.

Extension arms
2 x 334 mm. & 1 x 70 mm.

MONITOR POLE

FOR ONE OR TWO MONITORS

The Obvious Choice // If more space is desired at the desk, this monitor column is an obvious choice. The mounting bracket for the extension cables can be mounted on both sides of the monitor column, which is advantageous for smaller work environments, as the monitor column does not take up unnecessary space at the desk.

Cables and wires from the mounted screens can be discreetly hidden in the standard 30 cm high aluminum column, creating a clean desk look in the office environment. If other colors than the standard color combination and/or other dimensions of the column are desired, this can of course be produced. Currently, the monitor column is produced in 30 cm, but can easily be combined with corresponding profiles to create a desired screen wall. This solution is also "strong" enough to carry even the largest curved screens. Remember to order a large VESA bracket.

MONITORARM

FOR ONE OR TWO MONITORS

An ergonomic correctly solution // This Monitorarm from PJ Production can be operated via gas springs, which provides a smooth height adjustment optimizing the workstation ergonomically. The system can either be bought for one monitor or two monitors, which both are produced in black powder-coated aluminium. Furthermore, the monitor system is delivered with two installation options, - desk clamp and through desk mount, both options included as standard.

The monitor system benefits ergonomic, since the monitors have full 360 degrees rotation and can be tilted 85 degrees up and 15 degrees down. Additionally, the cables and wires from the installed monitor(s) can easily be fitted to the Monitorarm with the included cable clamp.

MONITORARM MODEL HEAVY

FOR ONE MONITOR

A Solution for Heavy Monitors // Our gas spring monitor arm ensures effortless height adjustment. This version is designed for extra heavy monitors, including curved screens. The monitor arm comes with both a desk clamp and a desk grommet. This system not only ensures flexibility but also provides a professional and user-friendly experience.

The gas arm is suitable for monitors ranging in size from 10" to 50" and with a weight capacity of 9-20 kg. It offers adjustment options with a tilt angle range from -90 degrees to -15 degrees. The product is compatible with VESA 100×100 (included).

ADD-ON

EXTENSION ARMS & VESA

If you would like to upgrade your monitor system // The monitor systems from PJ Production are built upon extension arms, which support a personalized working environment. If investing in a Monitor Pole one extension arm or a Future Flex with two extension arms, then these can always be upgraded with the preferred amount of extension arms.
When investing in an extension arm, you get the possibility of installing an extra monitor in the working environment as an improvement. However, be aware that the extension arm is excluding VESA mount, which can be found on the following page. Every extension arm comes in a package with two.

A VESA mount to the universal monitor // Monitor systems from PJ Production do always include a corresponding amount of VESA mounts. The monitor system can at any time be upgraded, which means that the amount of VESA mounts has to be upgraded as well. Our VESA mounts can be used til all monitors due to the measurements of both 75 x 75 and 100 x 100, which are the standard distances between the screw-holes. Furthermore, the VESA mount can be rotated, allowing easy positioning and safety in terms of the tilting adjustment, which provides the user the most ergonomically position.

GAIA CABLE TRAYS

FIXED LENGTH

Create connectedness with the desk // There is hardly anything in the world that is more unpleasant than cables and wires in different colors and sizes along the edges of the desk. Additionally, these visible cables affect the indoor climate, since the dust easily gets caught in the mess, where the vacuum cleaner cannot get access to.

Fortunately, helps the GAIA Cable tray to overcome the issue with visible cables and wires with a simple, attractive, and professionally correct solution. The cable tray is available in three fixed lengths, - 90, 115 cm. and 147cm.

CABLE TRAY “EPSILON”

FIXED

A solid and spacious solution // If organizational options are sought for the multitude of cables that often wind down from the edge of the desk, then this solid cable tray is a good choice. A sturdy and spacious cable tray that can be easily mounted under the desk. Cables and wires can be discreetly installed inside without being visible, and can be secured using the integrated strip holes in the front of the cable tray.

The cable tray series consists of five different sizes, each with tailored centered holes for plugs or cable pass-throughs. With the exception of the 40 cm model. All cable trays are available in three colors - black, aluminum, and white.

CABLE TRAY

FLEX

The perfect solution for the round table // If you are the owner of a round table, why see this as a limit? This flex cable tray is a perfect solution for round tables, since the cable tray can be shaped as the table. This means that the cable tray has two application opportunities: either by being curved or fixed. Either way, this cable tray is perfect for impoundment of cables and wires.

FELT CABLE TRAY

74 CM., 115 CM. & 147 CM.

Stylish and functional design // We have a burning desire to transform waste into valuable products. One of the products produced from recyclable plastic is this cable tray. The felt is made from 70% upcycled plastic bottles.

With our new "Felt Cable Tray", we have combined the best of previous cable tray solutions and combined it in a product that recycles waste material. Form has been in sharp focus during the development of the cable tray. The idea is minimalistic in order to reduce waste material, but at the same time no compromise has been made with function.

CABLE OUTLETS

SQUARED

Hide cables and wires discreetly // The tendency is that wires and cables take to much focus in the working environment due to the lack of hidden opportunities. This unwelcomed situation can, however, be solved with a cable outlet from PJ Production, where the wires and cables are hidden carefully in an elegant manner.

The manner in which the cable outlet is installed, is by making a size-costumed hole in the desktop where the cable outlet can be placed. These cables outlets have a squared shape – quadratic and rectangular, both with brushes in order to keep the cables and wires in place. PJ Production's assortment does likewise include round cable outlets, which can be found on the following page.

CABLE OUTLETS

ROUND

A cable outlet for every taste // PJ Production offers round cable passthroughs in a multitude of materials and expressions. You can choose between black and white options in both steel-lacquered and/or ABS plastic, as well as a chrome variant.

The majority of our cable passthroughs are available in sizes Ø60 and Ø80. Once your choice is made, simply mount it into a size-adjusted hole in your desk, and you can easily conceal both cables and wires.

MO-CUP

This multifunctional cup-holder has to be experienced // National and international companies embrace the smaller, portable offices, including the clean desk policy, where the workplace is empty and ready for the next-coming working day. PJ Production has developed a new and innovative cup-holder that discretely can be installed underneath the desk. The solution is ideal for smaller offices, since the cup-holder generates a depositary removed from the desktops. Furthermore, when removing the cup from the desk, the problem with damaged computers due to spilled liquid, - especially coffee, will be decreased.

The cup-holder is named: MO-CUP, because of the multifunctional design. Besides the space for a universal cup, the cup-holder has an integrated holder for a phone in the front. The phone can be charged while being placed in the cup-holder due to the hole in the bottom of the design.

SATCHEL HOOK

The perfect clean desk feature // The working environment is changing continuously, and the clean desk policy has never been more popular. Various of companies have chosen to integrate the policy as the customary in order to generate a more welcoming working environment with open-minded employees.

This satchel hook is attractive for the majority of all companies, especially those of whom that have integrated the clean desk policy, since the floor can be kept free from handbags that are flowing freely. The satchel hook is installed discretely underneath the desk to minimize the visibility when it is not being applied. Furthermore, the satchel hook can also be used to umbrellas or carrier bags to ensure that the floor is kept freely.

CABLE MANAGEMENT

80 CM., 120 CM., 160 CM. & 240 CM.

Easily and correctly storage of wires // Why be satisfied with wires and cables flowing along the edge of the desk, when these can be hidden and organized in an easy, simple, and correct way. The answer is a cable management sock from PJ Production. The cable management sock can easily be opened and closed without any tools, since the closing mechanism is a two-way zipper for total flexibility.

Additionally, the length of the cable management sock can easily be personalised due to Velcro, which can be used to extend the cable management sock with a shorter, longer, or similar cable management sock. Similarly, the diameter can be enlarged by connecting the chosen amount of cable management socks by using the zipper.

Currently, the cable management sock can be found in four different lengths in black. If you, however, are searching for a cable management sock in either light grey or white, do not hesitate to contact us to hear more about the possibilities.

SPECIAL SOLUTIONS

We are passionate about exploring innovative solutions and take pleasure in crafting tailored responses to unique challenges. Our expertise is at your disposal when you encounter specific needs, and our history is deeply rooted in projects that demanded a specialized approach. Over the years, PJ Production has handled a wide range of special tasks, including screen setups, customized drawers, and comprehensive office installations.

When we engage in special design projects, you are involved in the process from start to finish. Our industrial design engineers delve into the needs of the target audience, sketch out ideas, and consult with you along the way. The choice of materials is always of the highest quality.
