

Yealink T5 Business Phone Series

Redefining Next-Gen Personal Collaboration Experience

Being responsive to changes and demands in the marketplace, Yealink has designed and developed its new T5 Business Phone Series, the most advanced IP desktop phone portfolio in the industry. Leading the way in new personalized collaboration, the Yealink T5 Business Phone Series provides the best possible personalized collaboration experience for businesses of all sizes.

With the Yealink T5 Business Phones, you can help your business benefit from the advanced telephony features, next-generation communication experience and great flexibility, and eventually unleash the power of remote collaboration and maximize the ROI.

New Personal Collaboration Landscapes

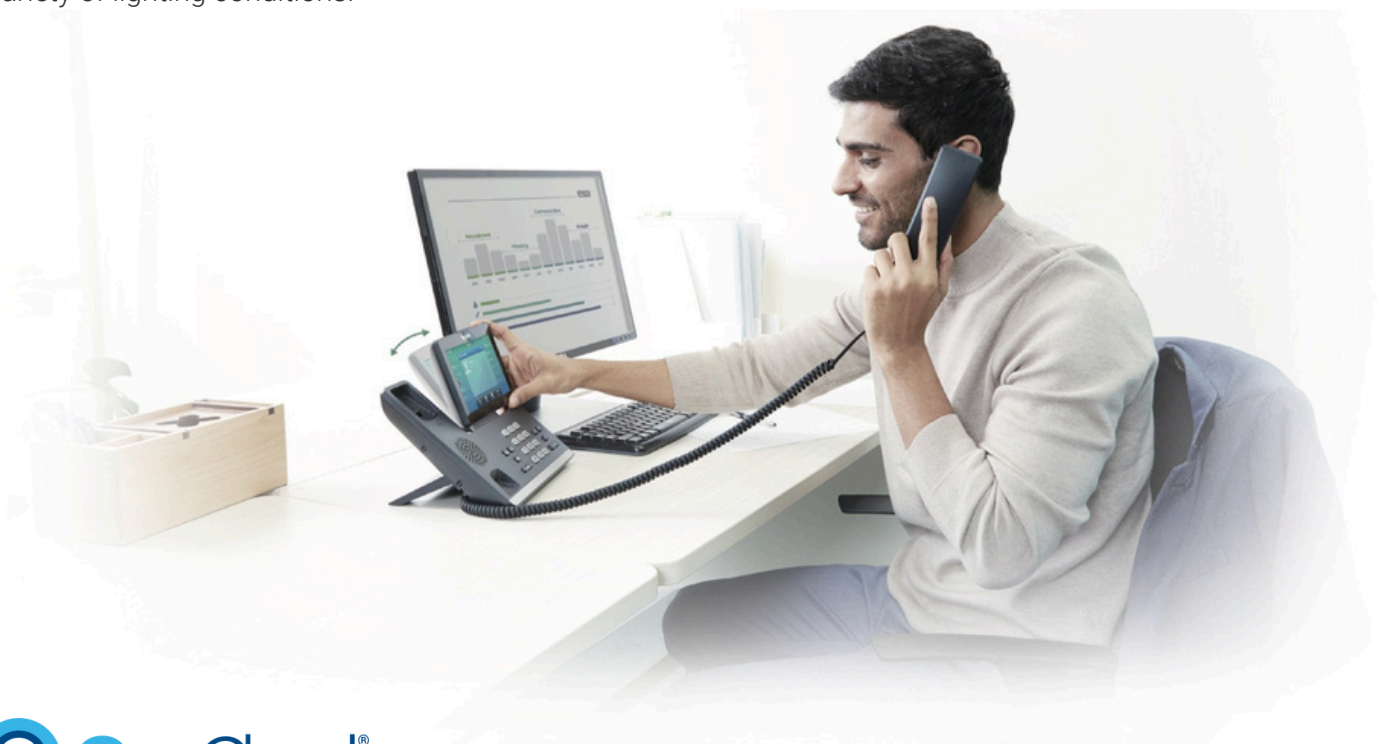

The Yealink T5 Business Phone Series introduces seven phone models for productive desktop communication and collaboration demands. The Yealink Prime Business Phones T53, T53W, T54W and T57W are ideal for highly active voice communication users.

The Yealink Smart Business Phones T58A and T58A with Camera, and the Flagship Smart Video Phone VP59 are professional desktop collaboration tools well suited for executive offices and huddle rooms, delivering cutting-edge capabilities and afford-able access to professional HD video.

Ergonomic Design with Adjustable Displays

The Yealink T5 Business Phone Series has an upgraded elegant and sleek design with large, backlit and high-resolution displays and LED indicators to provide optimized viewing and navigation experience. The displays of the T5 Series are fully adjustable to fulfill the viewing needs at a variety of angles and under a variety of lighting conditions.

Distraction-Free HD Communications

The Yealink T5 Business Phone Series is designed with Yealink Acoustic Shield technology to deliver distraction-free voice clarity for remote participants. Yealink Acoustic Shield technology uses multiple microphones to create a virtual “shield” between the speaker and the outside sound source. Once enabled, it intelligently blocks or mutes sounds from outside the “shield” so that the person on the other end hears you only and follows you clearly. In busy and noisy workspace such as call centers and office area, Yealink Acoustic Shield technology dramatically reduces frustration and improves productivity.

For small group session using Yealink VP59 or Yealink T58A, Yealink Noise Proof technology is available to eliminate non-human voices so as to guarantee the productivity of the group discussion.

Easy Collaboration at Your Fingertips

Yealink T58A with Camera and Yealink VP59 are the most advanced smart desktop collaboration phones, providing C-levels and busy professionals with easy operation, all-inclusive features and affordable access to HD video collaboration. With a large color touchscreen and intuitive hard keys layout, the operation of the phone is made as simple as possible.

Yealink T58A supports 720p HD business video with an optional Yealink USB camera CAM50. And Yealink VP59 is built on a 1080p full HD video capability.

All-in-One Solutions for Every Collaborative Environment

Prime Business Phone T53/T53W

- Entry-level phone, well suited for common workspace
- 3.7" 360x160-pixel graphical display, fully adjustable
