Dedicato a chi di luce vive

Dedicated to those who live on light

“I see light as a never ending series of possibility to create poetic and functional products”

Giulia Liverani | Head of Design

My design process starts from light and emotions more than shape and colors.

I'm driven by the belief that lighting design is not just about light up a space but rather a way of furnishing, creating astonishment, magic and beauty. Those three themes are the foundations of my way to think light and the fittings that shape it.

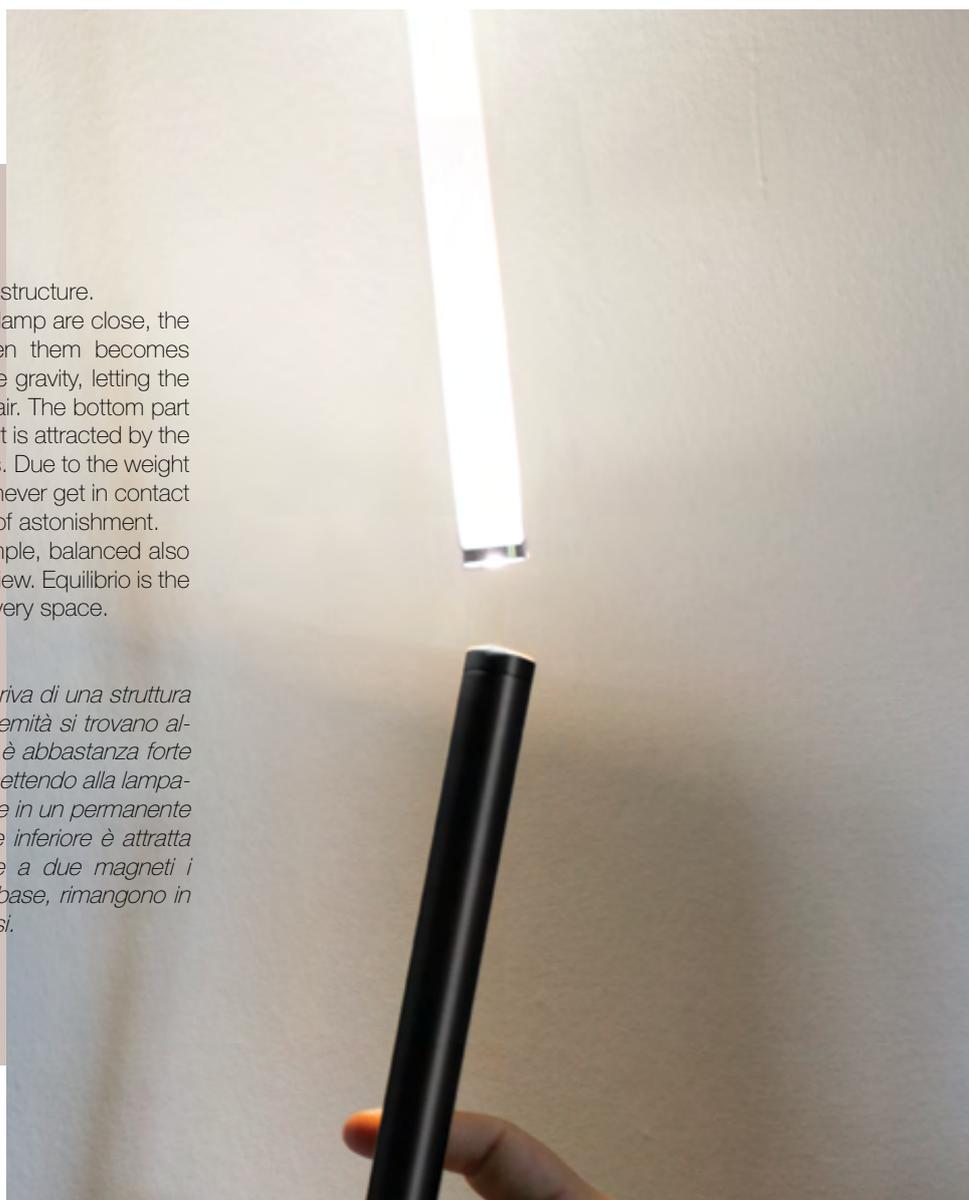

Il mio processo creativo inizia dalla luce e dalle emozioni più che da forme o colori.

Credo che progettare con la luce non significhi semplicemente illuminare uno spazio ma sia piuttosto un modo di arredare, creando stupore, magia e bellezza. Questi tre temi sono alla base del mio modo di pensare la luce e gli oggetti che le danno forma.

Equilibrio

Equilibrio is a lamp with no structure. When the two ends of the lamp are close, the magnetic force in between them becomes strong enough to challenge gravity, letting the lamp magically float in the air. The bottom part do not have a rigid body but is attracted by the upper part via two magnets. Due to the weight of the base, the two parts never get in contact creating an intense sense of astonishment. The design is pure and simple, balanced also from an aesthetic point of view. Equilibrio is the perfect object to light up every space.

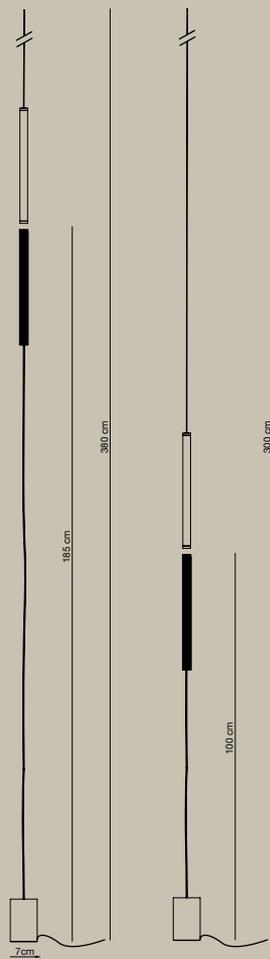

Equilibrio è una lampada priva di una struttura rigida. Quando le due estremità si trovano allineate, la forza magnetica è abbastanza forte per vincere la gravità, permettendo alla lampada di fluttuare magicamente in un permanente stato di equilibrio. La parte inferiore è attratta da quella superiore grazie a due magneti i quali, grazie al peso della base, rimangono in tensione senza mai toccarsi.

Stoccolma

“May light be flexible?”.

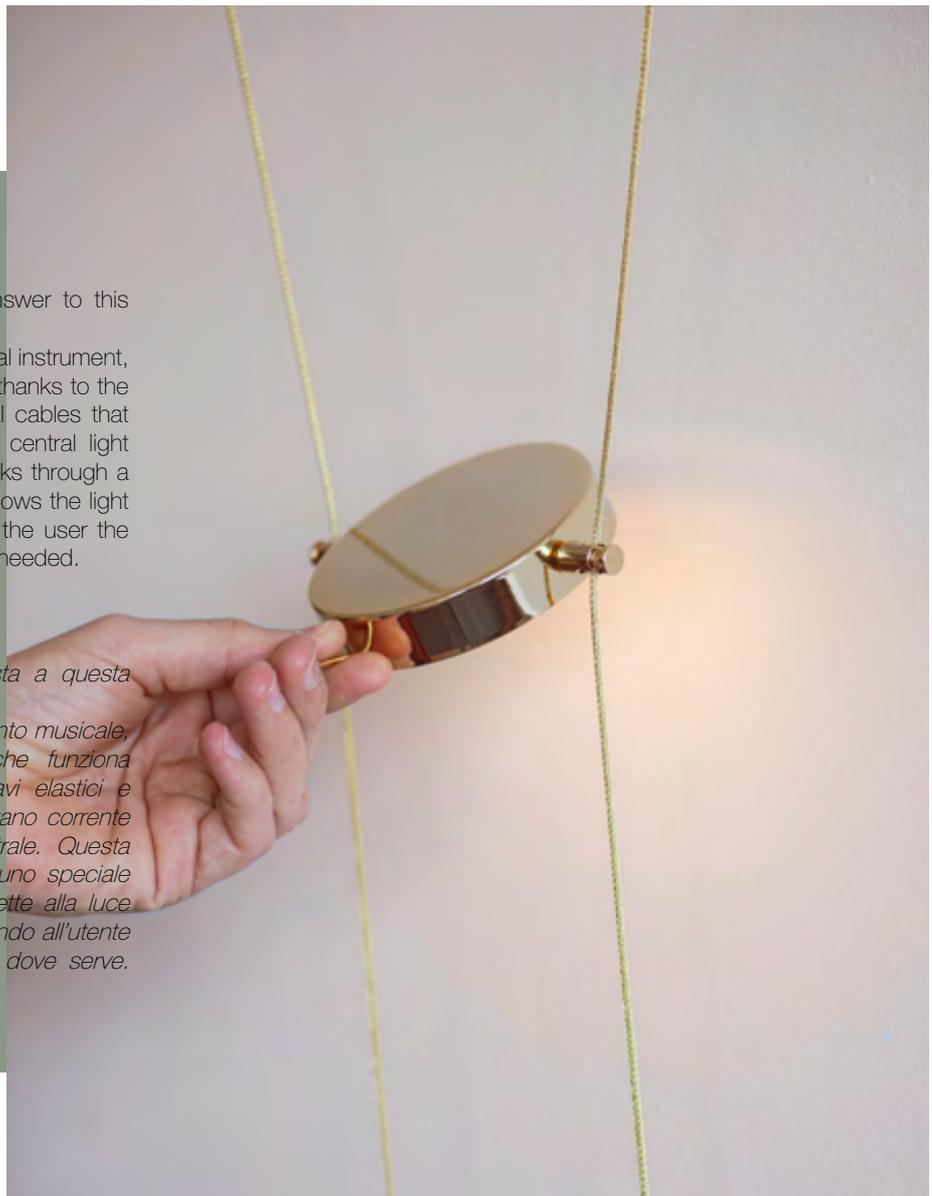

Stoccolma was born as the answer to this question.

Inspired by the strings of a musical instrument, Stoccolma is a lamp that works thanks to the tension of two elastic and metal cables that support and bring current to a central light source. This is linked to the tracks through a special hooking system which allows the light to be moved and rotate, giving the user the ability to bring light wherever it is needed.

“La luce può essere flessibile?”.

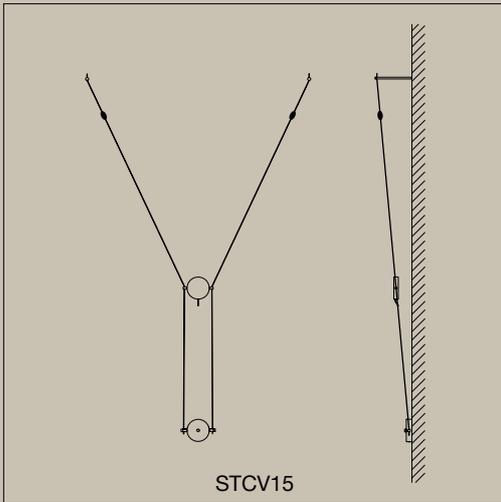

Stoccolma nasce come risposta a questa domanda.

Ispirata alle corde di uno strumento musicale, Stoccolma è una lampada che funziona grazie alla tensione di due cavi elastici e metallici che sostengono e portano corrente a una sorgente luminosa centrale. Questa è collegata ai binari attraverso uno speciale sistema di aggancio che permette alla luce di essere spostata e ruotata, dando all'utente la possibilità di portare la luce dove serve.

Product Code: STCO

Mounting: Indoor Wall to Ceiling

Light source: 1x LED 2700K CRI 80 1350lm

Input Voltage: 180÷ 240V

Power: 20W(LED 12W)

Internal power supply

Dimmerable with 0-10V dimming

Material: Steel / Brass

Weight: 1kg

RAL9005 (with steel cable)

GLOSS GOLD (with brass cable)

Personalization options available:

Length of the cables, 3000K LED

It is recommended that the installation respects a maximum ratio of 1:2 between the width and height of the lamp.

The lamp is declined in two different version V and O , the first one has an external power supply to be inserted in a standard plug, the O version instead can be directly connected to the general electric plant.

Differents anchor points makes Stoccolma easily customizable and extremely functional: a flexible interactive lamp that can light up every place.

La lampada è declinata in due diverse versioni V e O, la prima ha un alimentatore esterno da inserire in una spina standard, la versione O invece può essere collegata direttamente all'impianto elettrico generale. I diversi punti di ancoraggio rendono Stoccolma facilmente personalizzabile ed estremamente funzionale: una lampada interattiva flessibile che può illuminare ogni luogo.

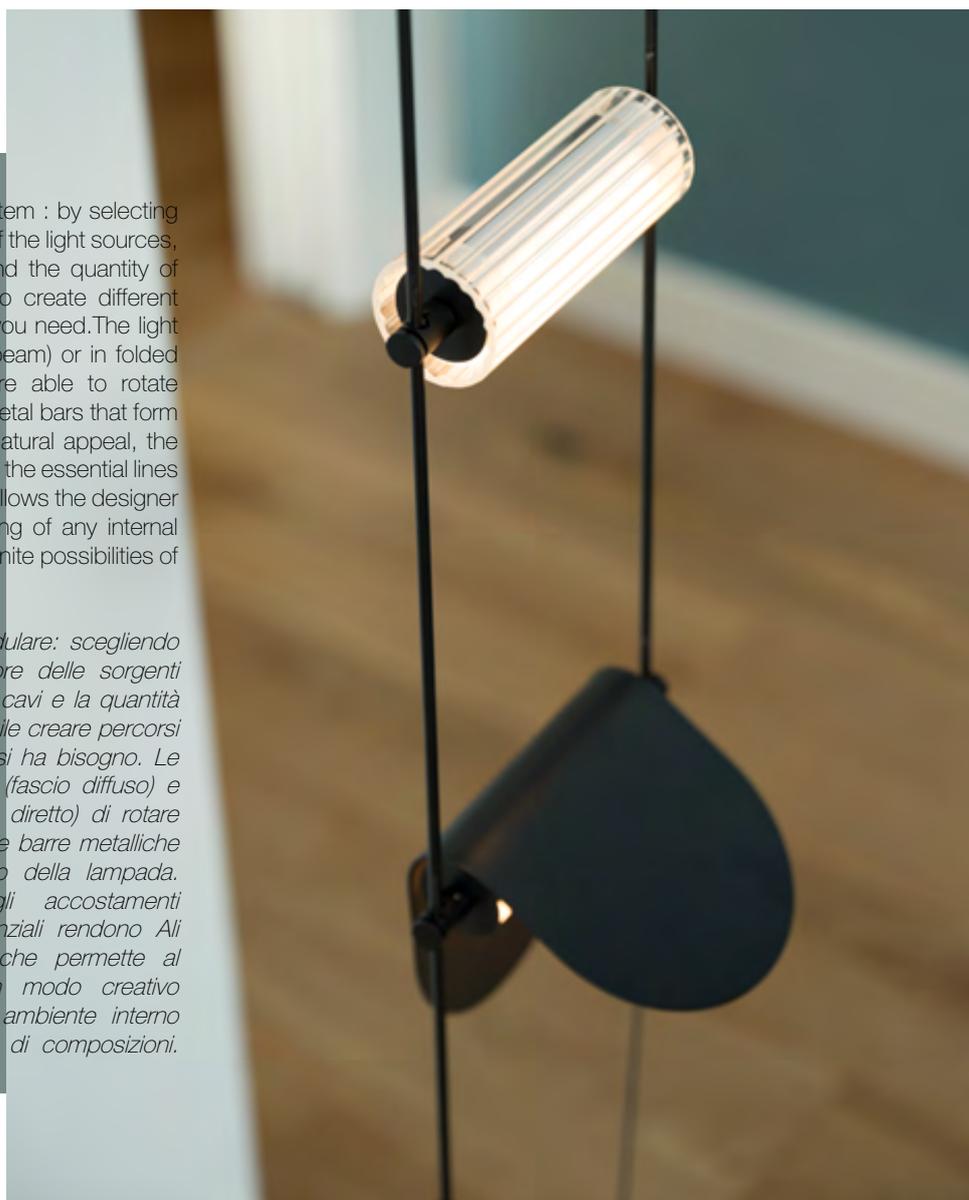

Ali di Luce

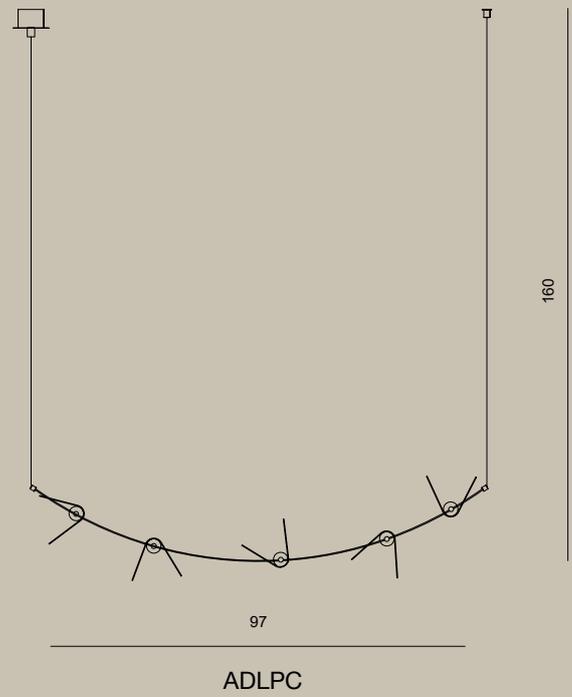

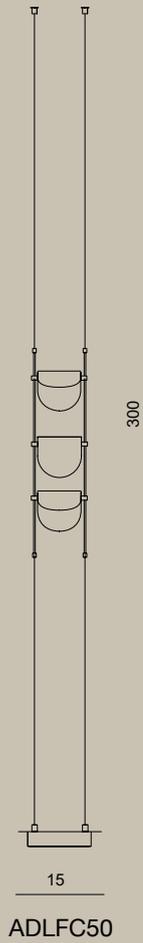

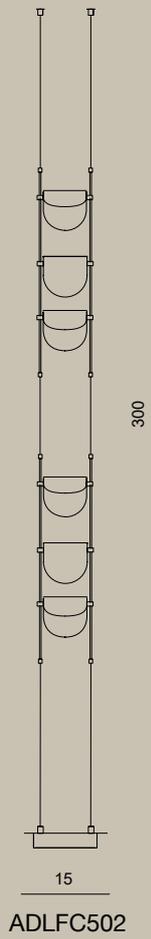

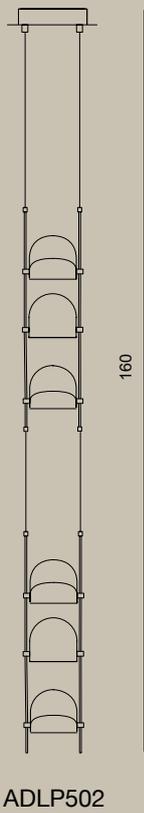

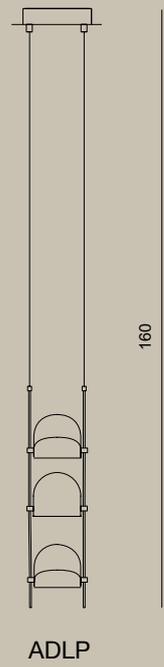

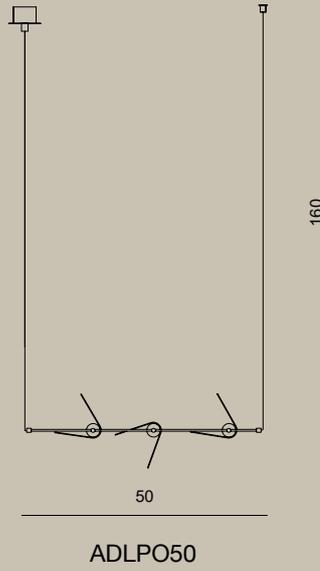

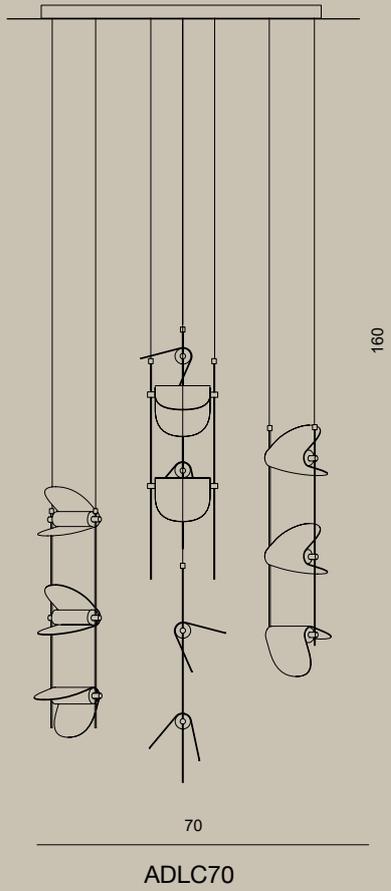

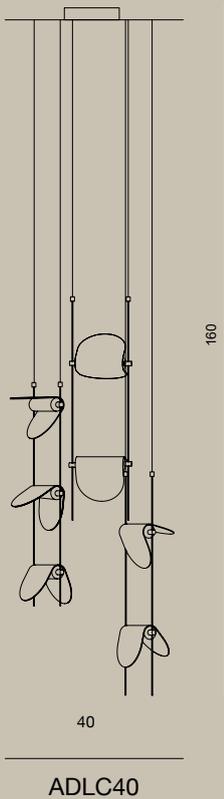

Ali di Luce is a modular system : by selecting the type number and color of the light sources, the length of the cables and the quantity of metal bars, it is possible to create different paths and design the light you need. The light sources in glass (diffused beam) or in folded metal (directional beam) are able to rotate 360° and move along the metal bars that form the body of the lamp. The natural appeal, the chromatic combinations and the essential lines make Ali di Luce a tool that allows the designer to creatively solve the lighting of any internal environment by providing infinite possibilities of compositions.

Ali di Luce è un sistema modulare: scegliendo il tipo il numero e il colore delle sorgenti luminose, la lunghezza dei cavi e la quantità di barre metalliche è possibile creare percorsi e proiettare la luce di cui si ha bisogno. Le sorgenti luminose in vetro (fascio diffuso) e in metallo piegato (fascio diretto) di rotare di 360° e spostarsi lungo le barre metalliche che compongono il corpo della lampada. Il richiamo naturale, gli accostamenti cromatici e le linee essenziali rendono Ali di Luce uno strumento che permette al progettista di risolvere in modo creativo l'illuminazione di qualsiasi ambiente interno fornendo infinite possibilità di composizioni.

D02

D.02 Pendant is designed to allow the user to customize the light position through an adjustable cable. To increase the customization of the entire lamp, in order to perfectly fit different lighting needs the LED source is available with a punctual spotlight of 45° or an acrylic diffuser. D.02 Pendant is a minimal and elegant suspension lamp composed of a multiple number of high quality LEDs. Available with 4 or 6 or 8 light sources, the shape of the lamp and the position of the lights is totally customizable. Perfectly fits on a dining table, in a living room such as in a hall or a bedroom.

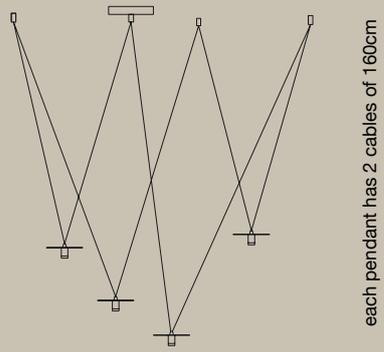

Il lampadario D.02 è stato progettato per permettere all'utente di personalizzare la posizione delle luci grazie ai cavi regolabili. E' inoltre possibile personalizzare la sorgente luminosa scegliendo tra due tipologie: una luce spot con lente a 45° o un diffusore in acrilico. D.02 Pendant è un lampadario leggero ed elegante composto da un numero variabile di LED. Disponibile con 4 o 6 o 8 punti luce, la forma della lampada e la posizione delle sorgenti luminose è totalmente personalizzabile adattandosi perfettamente ad ogni ambiente, dalle sale da pranzo ai salotti, dalle hall alle camere da letto.

D02 Singolo

D.02 Singolo is the single-cable version of the D.02 family. Single-cable light sources can be used to design free-form lamps to suit any context. With a single product, simple pendant solutions can be achieved, such as above a kitchen, as well as design offsets to bring light where there is none.

It is also possible to customize the light source by choosing between two types: a spot light with a 45° lens or an acrylic diffuser.

D.02 Singolo è la versione ad unico cavo della famiglia D.02. Le sorgenti luminose a cavo singolo possono essere utilizzate per disegnare lampade, dalla forma libera, adatte ad ogni contesto. Con un unico prodotto si ottengono soluzioni pendenti semplici, quali sopra una cucina, come decentramenti a disegno per portare la luce dove non c'è.

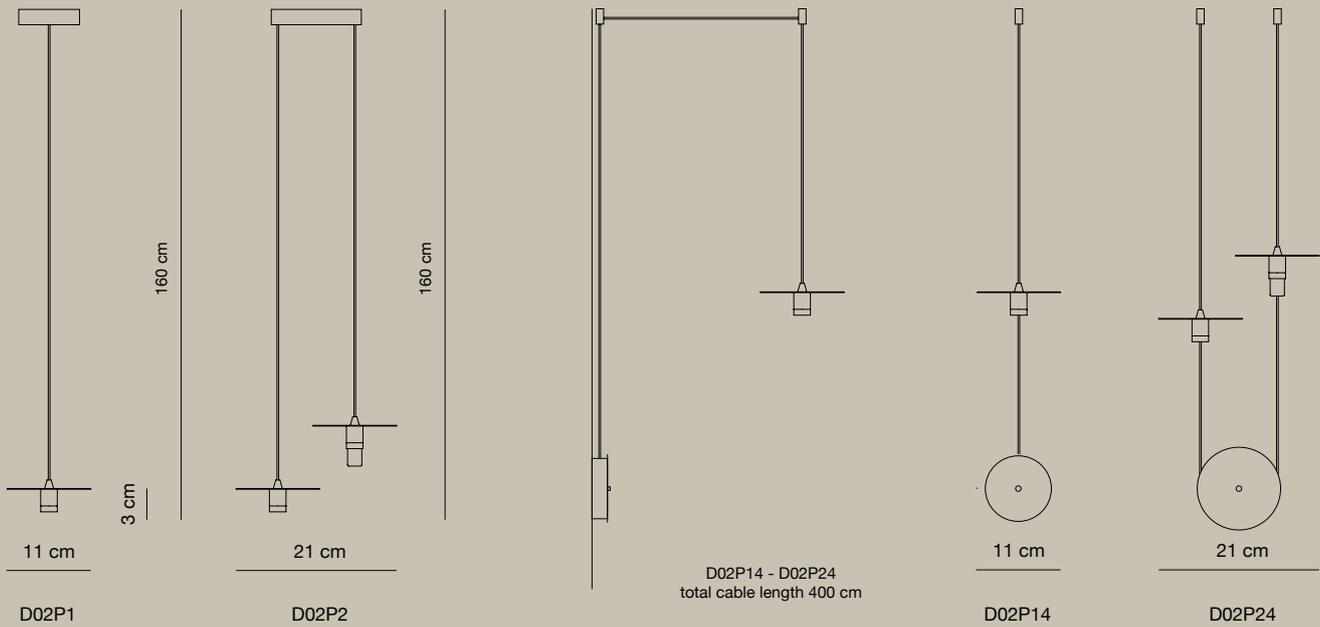

E' inoltre possibile personalizzare la sorgente luminosa scegliendo tra due tipologie: una luce spot con lente a 45° o un diffusore in acrilico.

D03

D.03 Pendant is lamp unique and precious, a decorative object that gives personality to the entire environment. The main part of the D.03 Pendant is a disc of a pure and gentle white suspended by two thin cables in brass or black. Both the 50cm and 70cm had two high powerful LEDs that diffuses a perfect and uniform light in the space.

The dimmable high quantity of light produced by the product face the needs of several spaces: livingrooms, bedrooms but also restaurants and halls.

D.03 Pendant è una lampada unica e preziosa, un oggetto decorativo che conferisce personalità all'intero ambiente. La parte principale della D.03 Pendant è un disco di un bianco puro e delicato sospeso da due sottili cavi in ottone o nero. Sia il modello da 50 cm che quello da 70 cm sono dotati di due LED ad alta potenza che diffondono una luce perfetta ed uniforme nello spazio.

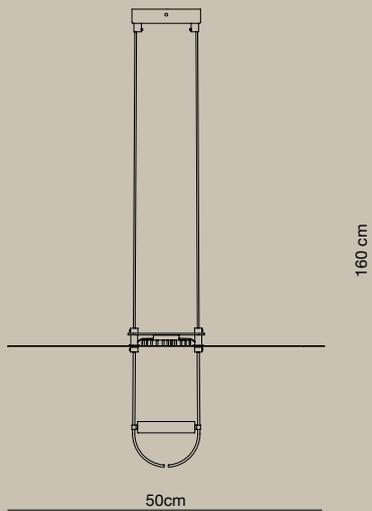

L'elevata quantità di luce dimmerabile emessa dal prodotto risponde alle esigenze di diversi spazi: soggiorni, camere da letto ma anche ristoranti e sale.

In the standard on/off version (without capacitive proximity sensor) the input voltage would be 110 ÷ 240 V
To ensure a proper operation of the proximity touch it is necessary to have the earthing wire of the general electric plant connected to the lamp.

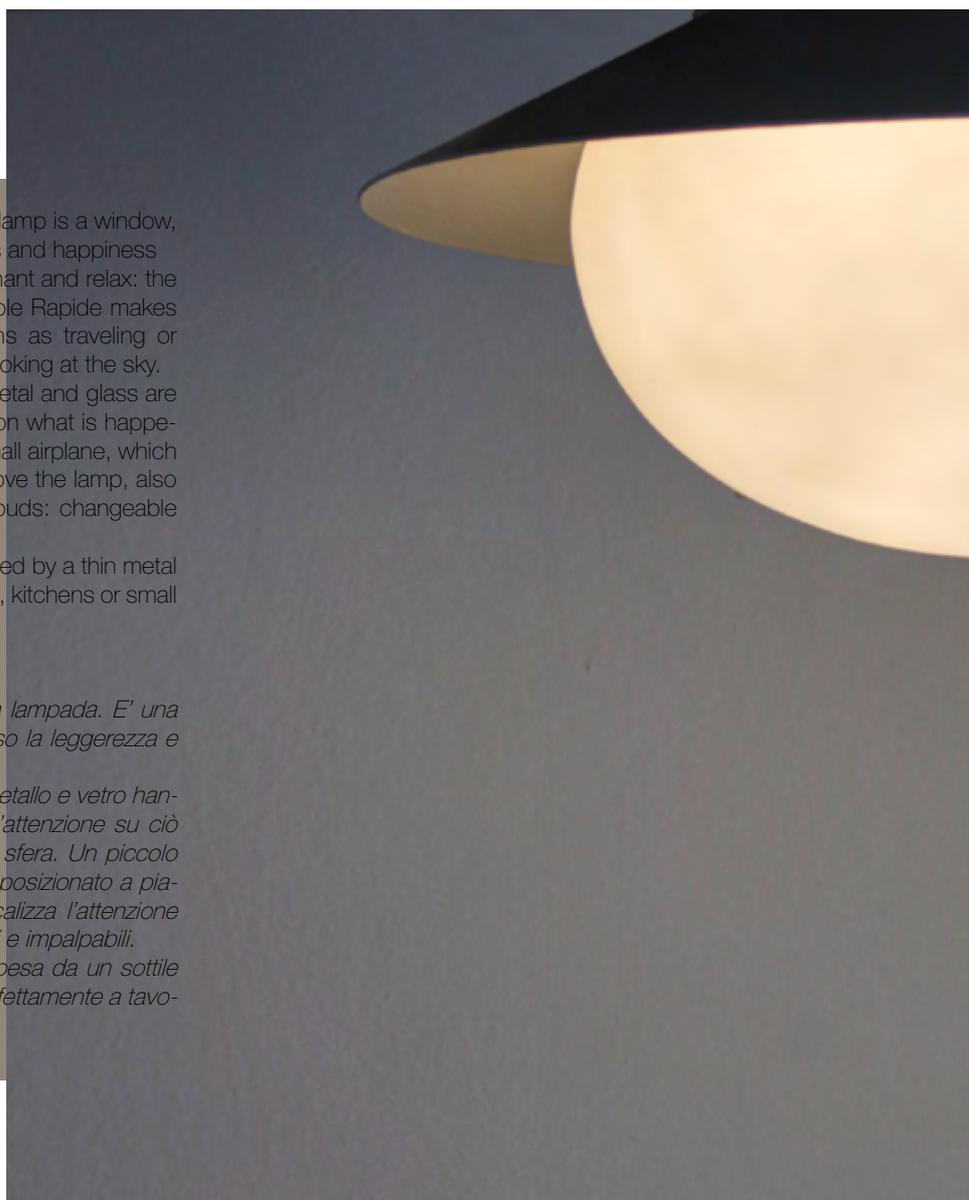

Nuvole Rapide

Nuvole Rapide more than a lamp is a window, an escape route to lightness and happiness. A series of objects that enchant and relax: the constant movement of Nuvole Rapide makes us feel the same sensations as traveling or simply lying on a meadow looking at the sky. The classic geometries in metal and glass are intended to focus attention on what is happening inside the sphere. A small airplane, which can be positioned at will above the lamp, also focuses attention on the clouds: changeable and impalpable. The pendant lamp, suspended by a thin metal cable, perfectly fits on tables, kitchens or small rooms.

Nuvole Rapide è più di una lampada. E' una finestra, una via di fuga verso la leggerezza e la felicità

Le geometrie classiche in metallo e vetro hanno lo scopo di focalizzare l'attenzione su ciò che accade all'interno della sfera. Un piccolo aeroplano, che può essere posizionato a piacere sopra la lampada, focalizza l'attenzione anche sulle nuvole: mutevoli e impalpabili.

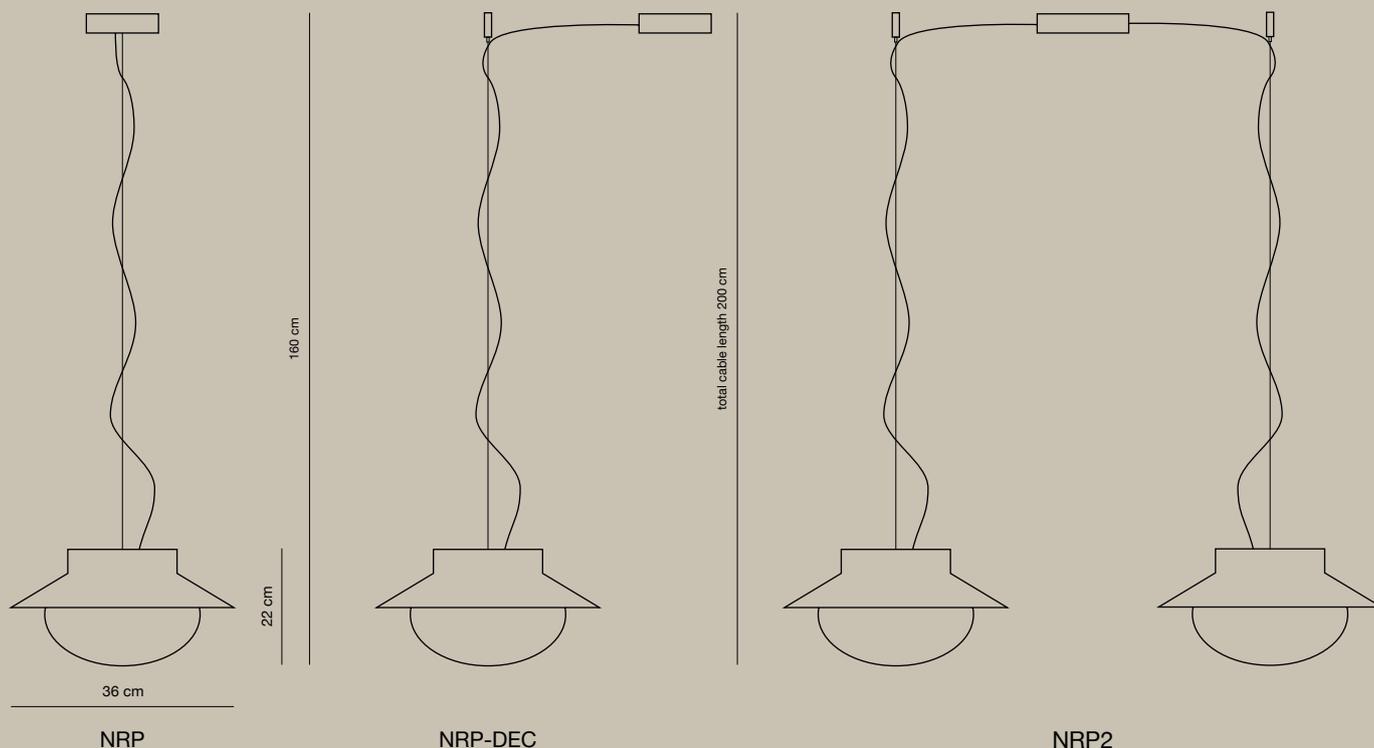

La lampada pendente, sospesa da un sottile cavo metallico, si adatta perfettamente a tavoli, cucine o piccole stanze.

Equilibrio

The wall version of Equilibrio was born with the desire to design a wall lamp that combines Equilibrio's magic and atmospheric light with a functional light able to enhancing and defining spaces.

The design put in the foreground this series' two characteristic cylinders which, thanks to their bond and the magnetic force, attract each other but never touch. Those are highlighted by a frame that holds in the back two more light bulbs whose light beam tends to enhance the verticality and clean lines of the whole collection.

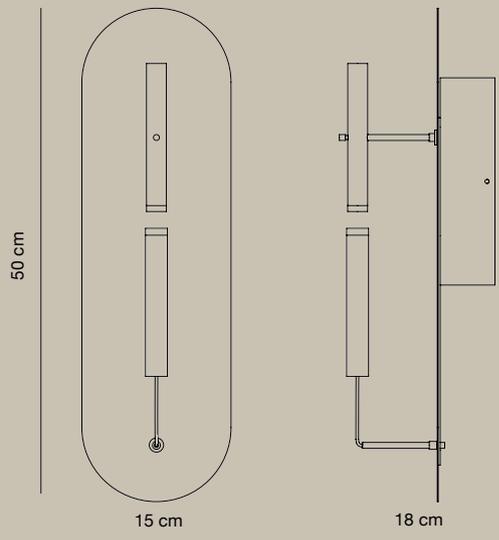

La versione da parete di Equilibrio nasce con il desiderio di disegnare una lampada da parete che coniuga la magia e la luce d'atmosfera tipica di Equilibrio con una luce funzionale capace di esaltare e definire gli spazi. Il design pone in primo piano i due cilindri caratteristici di questa serie che, fermati da due vincoli e grazie alla forza magnetica che li lega, si attraggono e non si toccano mai. Questi sono messi in risalto da una cornice che nel retro ospita due lampadine il cui fascio di luce tende ad esaltare la verticalità e la linea pulita che distinguono l'intera collezione.

Light source E27 220V (no cloud effect)

D02

D.02 Floor is designed to customize the light position and direction through a flexible arm. To increase the customization, in order to perfectly fit different lighting needs, the interchangeable LED source is available with a punctual spotlight of 45° or an acrylic diffuser. The touch dimmer on the base allows easy modification of the intensity of the light as well as the on/off control. The D02 Floor is perfect as both reading and decorative light next to an armchair or a bed.

D.02 Floor è progettata per personalizzare la posizione e la direzione della luce attraverso un braccio flessibile. Per aumentare la flessibilità, in modo da adattarsi perfettamente alle diverse esigenze di illuminazione, la sorgente LED intercambiabile è disponibile con un faretto puntuale di 45° o con un diffusore acrilico. Il dimmer a sfioramento sulla base consente di modificare facilmente l'intensità della luce e il controllo di accensione e spegnimento. D02 Floor è perfetta come luce da lettura o decorativa accanto a una poltrona o a un letto.

Tech info

Mounting: Indoor floor

Light source: 1x interchangeable LED
3000k 550lm CRI 80 / 2700k 420lm CRI 90

Input Voltage: 100 ÷ 240V

Power: 7 W (LED 4.7W)

Switching: Dimmer touch

Material: Alluminium, Steel

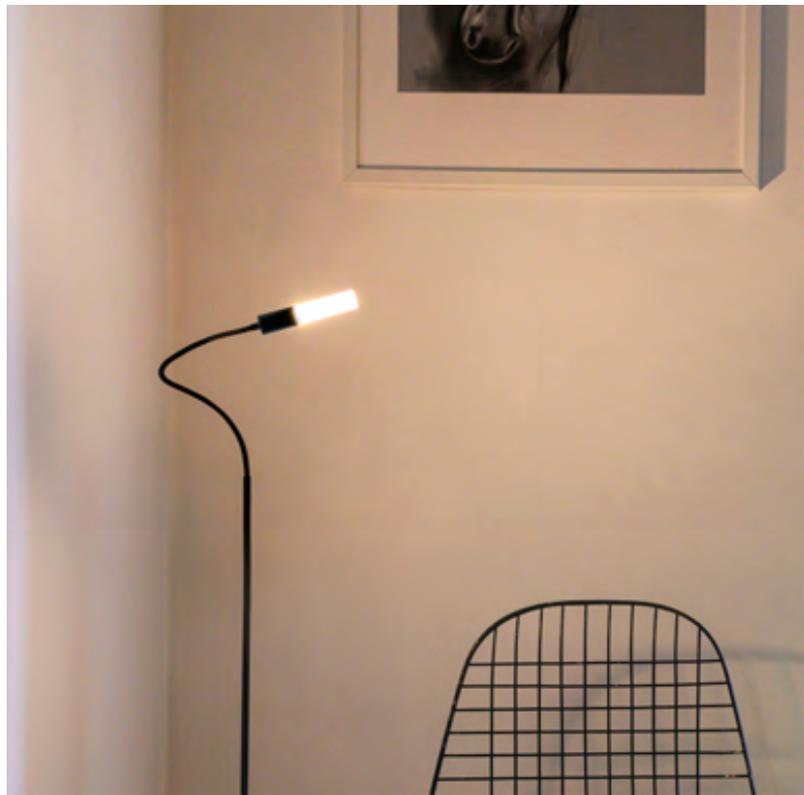

Weight: 2kg

RAL9005

* The LED can be replaced with original part

About Olive

OliveLab is a startup born in 2017 in Turin, Italy with the aim of creating a **new generation of lighting products**. We believe that lamps should be beautiful and qualitatively perfect but, most of all, they should be tools to experience light and create emotions. To do this, we combine the **needs of human beings with innovative materials and technologies**, producing something new that goes beyond the common imagination. Our design is pure and simple, but behind this apparent simplicity hides a world of research and meaning. In our production site in the Turin region we work on the development, assembling and quality control of all the products that leave our company. Our net of supplier is based in **Italy**, even if the higher part is based in Turin region. Partners more than suppliers, their know how in several fields of production is strong of ages of activity and allows us to develop innovative products with the highest quality standard.

*OliveLab è una startup nata a Torino nel 2017 con l'ambizione di realizzare una **nuova generazione di prodotti di illuminazione**. Noi crediamo che le lampade dovrebbero essere strumenti per interagire con la luce e creare emozioni. Vogliamo modificare il rapporto estetico tra luce ed essere umano. Per raggiungere questo obiettivo **combiniamo le necessità dell'essere umano con materiali e tecnologie innovativi** realizzando prodotti unici che vadano oltre la normale immaginazione. Nella nostra sede in provincia di Torino seguiamo lo sviluppo prodotto, l'assemblaggio ed il controllo qualità di tutti i prodotti che lasciano la nostra sede. Il nostro livello di qualità è forte dell'esperienza decennale dei nostri fornitori situati in Piemonte ed in tutta **Italia**.*

Il nostro design è puro e semplice, ma dietro questa semplicità si nasconde grande ricerca ed un profondo significato.
