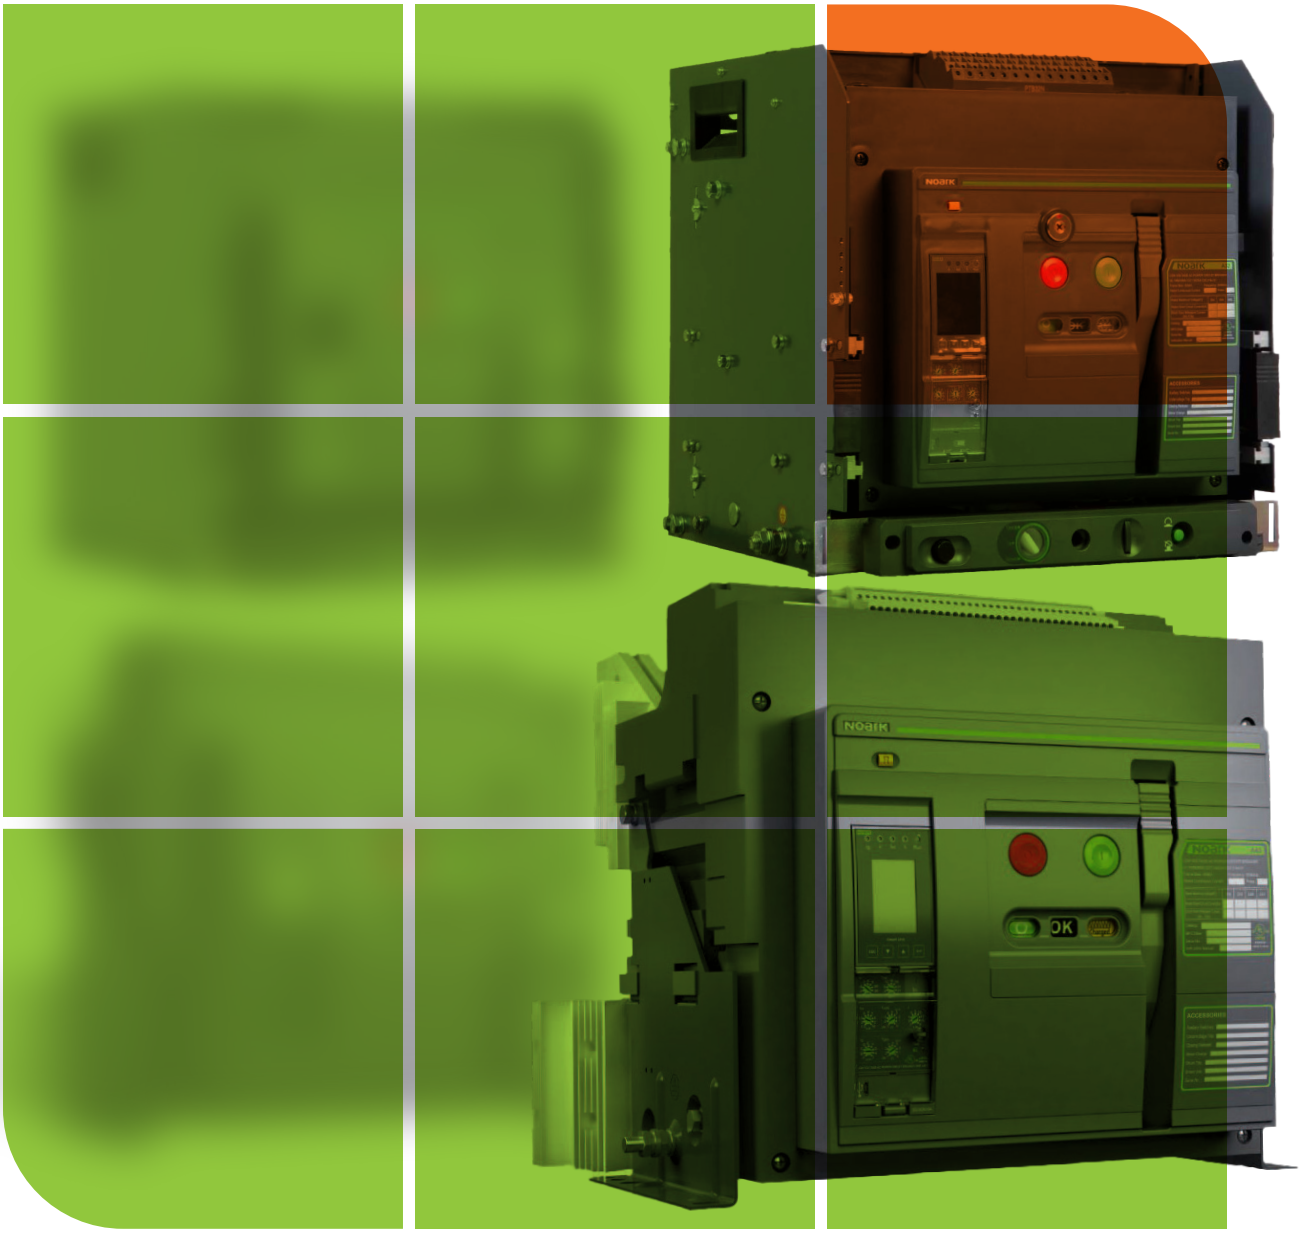
Catalog

Power Circuit Breakers and Non-Automatic Switches



Excellent Products. Exceptional Value.

na.noark-electric.com

ABOUT US

NOARK Electric is a global manufacturer of low-voltage electrical components for industrial applications. We specialize in motor controls and circuit protection for original equipment manufacturers. Our mission is to provide customers with the highest quality products at an exceptional value and back them with world-class service and support. Every NOARK product is tested and certified to the highest industry standards and covered by our exclusive five-year limited warranty.

Research and Development

The entire portfolio of high-quality NOARK products is designed for manufacturing and assembly (DFMA). Each component is developed in-house by our engineering team to meet the strictest standards and performance requirements. This dedication to excellence has led to the development of patented technology found in many of our products.

World-class Manufacturing

After being thoroughly tested, approved and certified – each NOARK product is sent into production at our state-of-the-art manufacturing facilities. This allows us to maintain strict quality control standards throughout the manufacturing process. In addition, NOARK Electric adheres to a policy of environmental protection and sustainability.

North American Distribution

NOARK's distribution centers are located in Pomona, CA and Kitchener, ON, with the aim of ensuring prompt and reliable deliveries of the entire product range to our customers all over North America. Our supply chain team works closely with our factories and logistics partners to ensure the availability of our products on the North American market and provide logistics services on the level which our customers expect. NOARK Electric is a subsidiary of the largest electrical manufacturing group in Asia with over 50 thousand employees and sales revenue of $22 billion USD. We have corporate facilities in Los Angeles, Shanghai and Prague to service the requirements of individual markets and countries.

TABLE OF CONTENTS

A25 Series Power Circuit Breakers

Product Overview

NOARK Electric is proud to offer its A25 family of Power Circuit Breakers, Non-Automatic Disconnect Switches, and accessories. Our A25 products are optimized for OEMs and are manufactured under world-class quality systems in our ISO accredited factories. Like all NOARK products, these breakers are designed to deliver high quality, superior performance and outstanding value.

A25 Power Circuit Breakers are available up to 2500A and are capable of IC ratings up to 85kA at 847 Volts. UL Listed and CSA Certified, the A25 family of products provide design standardization for OEMs no matter where they do business. A25 breakers offer a broad range of available trip units, accessories and communications options. They are the ideal OEM solution for low voltage switchgear and customized power distribution assemblies used in Data Centers, Standby Power, Industrial, Healthcare and Commercial applications.

Ratings

- 600A through 2500A
- IC ratings up to 85kA at 847V
- Short-Time Withstand, 85kA at 847V
- 50 or 60 Hz operation
- 3-pole and 4-pole designs
- 10,000 Operations, before maintenance (Mechanical)
- 6000 Operations, before maintenance (Electrical)
- Meets ANSI C37.13, C37.16, C37.17 and C37.50
- 100% rated for continuous operation at maximum current rating.

Protection & Control Options

- LI, LSI or LSIG Protection
- Standard LED display
- Color LCD display available
- Optional multi-metering trip unit with total harmonic distortion analysis and waveform capture
- Stored energy operating mechanism
- AC and DC rated motor operator, shunt trip and undervoltage release accessories
- Arc Flash Reduction Maintenance Mode
- Zone Selective Interlocking
- RS-485 Modbus Communication available

Approvals

- UL 1066, Low-Voltage AC and DC Power Circuit Breakers
- CSA C22.2 NO.268
- ANSI C37.13 Low Voltage Power Circuit Breakers
- ANSI C37.16 Low Voltage Power Circuit Breakers Ratings, Related Requirements and Applications
- ANSI C37.17 – IEEE Standard for Trip Systems
- ANSI C37.50 – Low Voltage AC Power Circuit Breakers,Test Procedure

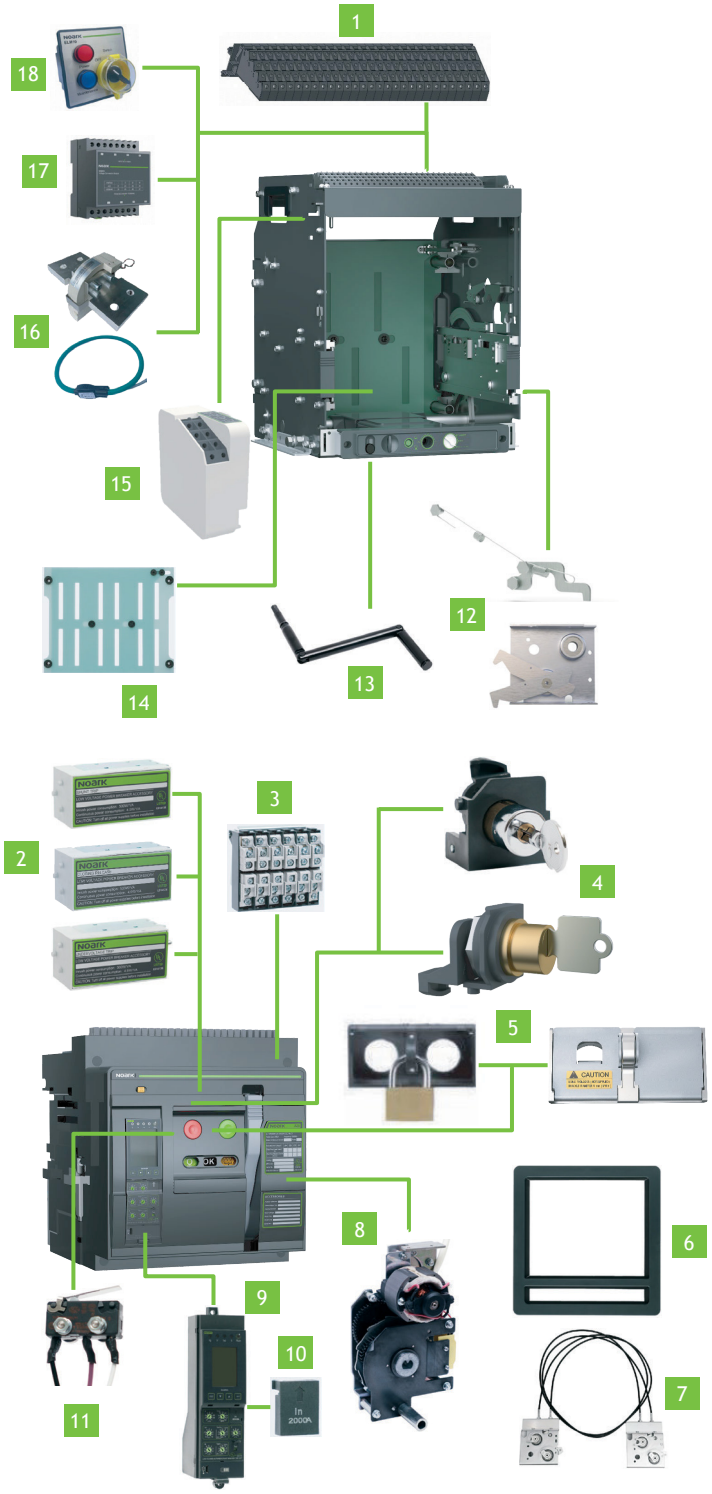
Design Features

- UL/CSA field-installable accessories
- Rear horizontal or vertical connections
- Through-the-door design
- 3-pole and 4-pole designs
- OEM optimized Cassette
- Phase barriers (optional)
- Available as Disconnect Switch (ASD25)

A25 Series Power Circuit Breakers

Product Label

An extensive range of accessories are available for the A25 power (air) circuit breakers. Each accessory can be installed as an independent unit, making thanks to the modular architecture of the A25. This makes installation and maintenance fast and simple. for technicians.



1	Terminal Block: TBDN
2	Under Voltage Release: UVT series
	Shunt Trip Release: SHT series
	Closing Release: XF series
3	Auxiliary Contact: AX Series
4	OFF Position Key-Lock: KLK series
	Kirk Key Interlock Kit: KKC11N
5	Pushbutton Lock Device:
	VBP12N (Plastic) and VBP11NM (Metal)
6	Door Frames - CDP11N and DDP11N
7	Mechanical Interlocks With Cables - IPA series
8	Motor Operator Device: MD series
9	Trip Unit: SU series
10	Rating Plug: IN series
11	Ready To Close Contact: PF11N series
12	Door Interlocks: VPEC11NP and VPEC11NS
13	Rotary Handle
14	Safety Shutter
15	Position Indicator: EF11N
16	External Current Transformer For Neutral:
	NCT11N & RCT-1800-COIL 11
17	Voltage Conversion Module: VCM10
18	Energy-Limiting Maintenance Switch: ELM10

						2500: 2500A[2]

Cassette Product Selection Guide

CAS11	N	3	H	1600
Cassette	**Device Category**	**Poles**	**Terminal Connection**	**Rated Current**
CAS11	N: UL	3: 3-pole	H: Horizontal	1200: 600A, 800A, 1200A
		4: 4-pole	V: Vertical	2000: 1600A, 2000A

1. Horizontal terminal connection only available up to 2000A frame.
2. 2500A Frame is only available in in fixed type mounting and vertical terminals.
3. Interrupting/Short time withstanding ratings vary depending on voltage. Refer to specifications on page 8 for ratings.

Note:

An assembled breaker unit must include the ACB breaker Frame and Trip unit.

For full list of optional accessories, see Page 29-34.

For PCB Selection Guide, see Appendix I on Page 75.

A25 Series Power Circuit Breakers

Environmental Conditions

Ambient Temperature

A Series Power Circuit Breakers can operate in the following environmental conditions:
With M Trip Unit: -40°C ~ 70°C;
With A/H Trip Unit: -20°C ~ 70°C;
A Series Power Circuit Breakers can operate at higher temperatures than the reference temperature 40°C, in this case, the derating coefficients shown in the table must be applied.

Model	Rated Current (A)	Temperature (°C)						
		< 40	45	50	55	60	65	70
A25/ASD25	600	100%	100%	100%	100%	100%	100%	100%
	800	100%	100%	100%	100%	100%	100%	100%
	1200	100%	100%	100%	100%	100%	95%	90%
	1600	100%	100%	100%	95%	92%	88%	85%
	2000	100%	100%	100%	95%	90%	85%	80%
	2500	100%	95%	90%	80%	75%	70%	65%

Altitude

A Series Power Circuit Breakers do not undergo changes in rated performance up to 2000m. Beyond this altitude, the derating coefficients shown in the table must be applied.

	Altitude (m)			
	< 2000	2600	3900	4900
Rated Voltage (V)	1×Ue	0.95×Ue	0.8×Ue	0.7×Ue
Rated Current (A)	1×In	0.99×In	0.96×In	0.94×In

Humidity

The relative humidity does not exceed 85% at 40°C, the monthly average maximum of relative humidity in the wettest month does not exceed 90%.
The effect of surface condensation caused by temperature changes on product performance should be taken into consideration.

A25 Series Trip Unit

Product Overview

A25 Trip Units offer the advanced electronic protection and control functionality required for power distribution and feeder protection in today's increasingly complex power systems. The A25 trip unit's purpose-built electronic circuits and microprocessors measure the breaker's electrical values against pre-set or user-selected parameters for overload, short circuit, current unbalance, over/under voltage and over/under frequency. When required, a residual ground current transformer provides sensing for ground fault protection.

In addition to the standard LI, LSI and LSIG circuit protection functions, A25 trip units can offer advanced Digital Metering, Arc Flash Reduction Mode and Zone Selective Interlocking. Communications capability is available, ensuring that the trip unit's metered values and status can be transmitted to any required monitoring or control networks.

A25 Trip Units consist of three models, each providing different levels of control, display, diagnostics, and communications options, meeting the requirements of a wide range of end-use applications. Each model can be ordered in one of three protection configurations.

Models:

- Model M–LED display
- Model A–Color LCD display with a 3-phase ammeter
- Model H–Color LCD display with multi-metering and total harmonic distortion waveform capture

Protection Configurations:

- LI: Long Time-delay Overload, Instantaneous Short Circuit.
- LSI: Long Time-delay Overload, Short Time-delay Short Circuit, Instantaneous Short Circuit
- LSIG: Long Time-delay Overload, Short Time-delay Short Circuit, Instantaneous Short Circuit, Equipment Ground Fault

Features:

- Microprocessor based true rms sensing
- Discrete rotary trip setting dials
- Cause of trip LEDs
- Unit status LED
- Making / breaking protection (MCR)
- Ready-To-Close Indicator
- Available zone selective interlocking
- Available arc flash reduction mode
- Available RS-485 communications
- USB port for power & communication
- Service short circuit protection (HSISC)

Position Indicator

Indicates the position of the breaker – connected, testing, disconnected. For drawout type devices only.
3 CO Form C contacts, one contact for each breaker position.

Connected to secondary terminals #58, 59, 60 (Connected), #61, 62, 63 (Test), #64, 65, 66 (Disconnected). Factory installed only. In the scope of delivery there are additional secondary terminals #58-66.

Note: This item is included with every new A25 Breaker. Renewal part only.

Motor Operator

Charges the closing spring of mechanism when the circuit breaker is closed only. Mechanical charging handle can be used with or without power supply. Equipped with a limit switch contact signals that spring is charged.

Voltage Conversion Module: A25

The Voltage conversion module VCM10 is used to pick up the Power Circuit voltage signal and reduce the voltage to safe levels on the secondary terminals of the breaker. VCM10 is selected by default if the H-type control unit has been selected, and the voltage protection is enabled.

Description	VCM10
Voltage input	0-1500Vac
Power consumption	<1W
Installation	35mm Din-rail
Applicable Trip unit	H
Applicable Software version	0.92 or higher

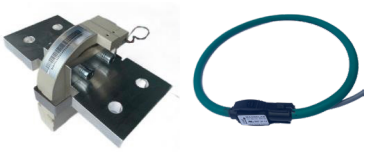
External current transformer for Neutral

An external transformer for N-pole protection of three-pole circuit breakers in four-wire network, installed on the neutral conductor, the current transformer enables measurement and protection of the neutral conductor.



Position Indicator – Field installable		
Frame Size	Catalog Number	Part Number
A25/ASD25	NCT11N	1801078
	RCT-1800-COIL 11	1801075

Note: External neutral protection for three-pole breaker only.

Energy-limiting maintenance switch

ELM10 is used to mitigate arc hazards and protect personal safety during product maintenance. It should be used in coordination with Power Circuit Breakers with arc reduction. While the Energy limiting function can be set and turned on in all trip unit models (M, A & H), the ELM10 is programmable only with the Harmonic 'H' version trip unit and the applicable software should be 0.91 or higher.

Description	ELM10
Ambient temp (°C)	-20°C+70°C
Pollution class	Class 3
Installation category	II
Rated voltage Ue (V)	AC480V/DC24
Rated frequency (Hz)	50/60
Enclosure protection class	IP40
Electrical/mechanical endurance (times)	1500
Inrush/Continuous Power Consumption (W)	≤5W

Frame Size	Catalog Number	Part Number

A25 Series Accessories

Mechanical

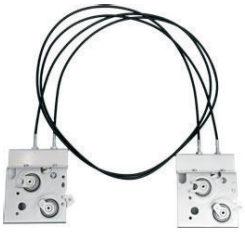
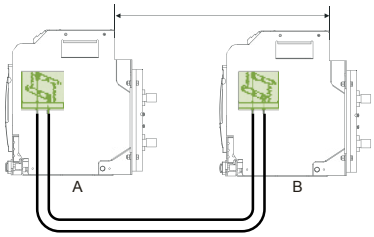
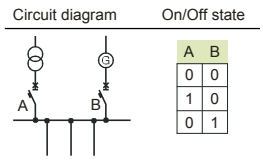
Mechanical Interlocking With Cables

Cable-connected mechanical interlock mechanism that is used to prevent two interlocked breakers from closing at the same time. interlocking of 2 or 3 (in preparation) breakers. Cable length for Maximum distance between mounting positions of the interlocks is 78in (2m). Suitable for A25 Power circuit breaker and ASD25 Non-automatic switch 2 interlocks and 2 cables (2 breakers version), 3 interlocks and 6 cables (3 breakers version).







Mechanical Interlocks with Cables – Field installable		
Frame Size	**Catalog Number**	**Part Number**
A25/ASD25	IPA12N	1800339

Door Interlock

Ensures that the door or cover of distribution board the breaker compartment cannot be opened when the circuit breaker is closed or in its connected or test position.

A32 Series Power Circuit Breakers

Product Overview

NOARK Electric is proud to offer its A32 family of Power Circuit Breakers, Non-Automatic Disconnect Switches, and accessories. Our A32 products are optimized for OEMs and are manufactured under world-class quality systems in our ISO accredited factories. Like all NOARK products, these breakers are designed to deliver high quality, superior performance and outstanding value.

A32 Power Circuit Breakers are available up to 3200A and are capable of IC ratings up to 100kA at 635 Volts, the maximum voltage can be up to 847Vac. UL Listed and CSA Certified, the A32 family of products provide design standardization for OEMs no matter where they do business. A32 breakers offer a broad range of available trip units, accessories and communications options. They are the ideal OEM solution for low voltage switchgear and customized power distribution assemblies used in Data Centers, Standby Power, Industrial, Healthcare and Commercial applications.

Ratings

- 254Vac to 847Vac
- 800A through 3200A
- IC ratings up to 100kA at 635Vac
- Short-Time Withstand, 100kA at 635Vac
- 50 or 60Hz operation
- 3-pole and 4-pole designs
- 10,000 Operations, before maintenance (Mechanical)
- 6000 Operations, before maintenance (Electrical)
- Meets ANSI C37.13, C37.16, C37.17 and C37.50

Protection & Control Options

- LS[1], LSI[2] or LSIG[3] Protection
- Standard LED display
- Color LCD display available
- Optional multi-metering trip unit (H model) with total harmonic distortion analysis and waveform capture
- Stored energy operating mechanism
- AC and DC rated motor operators, shunt trip and undervoltage release accessories
- Arc Flash Reduction Maintenance Mode
- ELM10 maintenance switch, compatible with 'H' model trip unit only
- Zone Selective Interlocking
- RS-485 Modbus Communication available

Approvals

- UL 1066, Low-Voltage AC and DC Power Circuit Breakers
- CSA C22.2 NO.268
- ANSI C37.13 Low Voltage Power Circuit Breakers
- ANSI C37.16 Low Voltage Power Circuit Breakers Ratings, Related Requirements and Applications
- ANSI C37.17 – IEEE Standard for Trip Systems
- ANSI C37.50 – Low Voltage AC Power Circuit Breakers, Test Procedure

Design Features

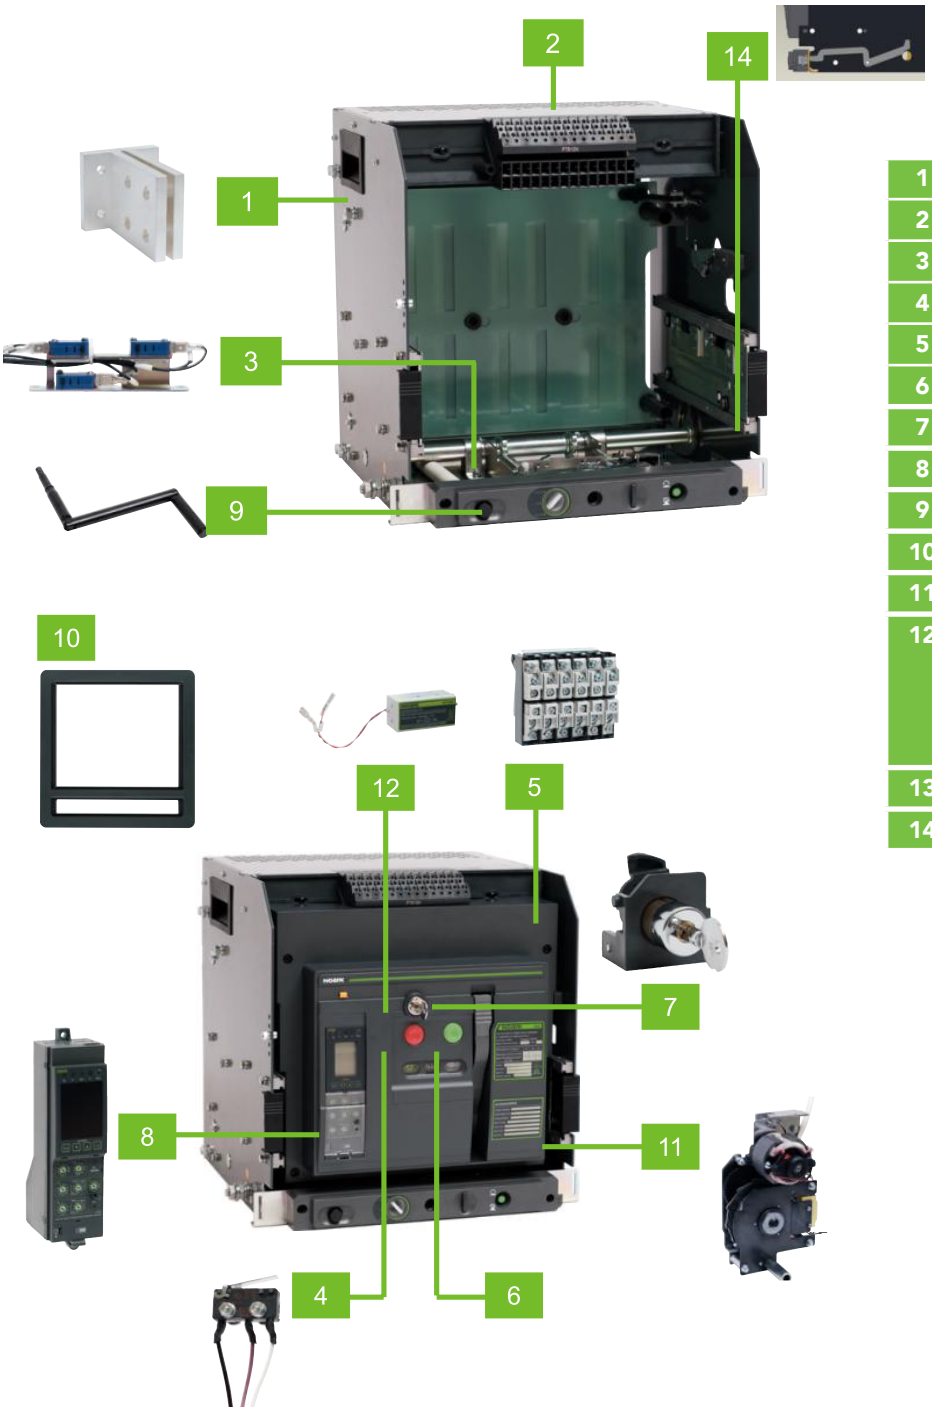
- UL/CSA field-installable accessories
- Rear horizontal or vertical connections
- Through-the-door design
- 3-pole and 4-pole designs
- OEM optimized Cassette
- Phase barriers (optional)
- Available as Disconnect Switch (ASD32)

1. LI: Long Time-delay Overload and Instantaneous Short Circuit.
2. LSI: Long Time-delay Overload, Short Time-delay Short Circuit, and Instantaneous Short Circuit
3. LSIG: Long Time-delay Overload, Short Time delay Short Circuit, Instantaneous Short Circuit, and Equipment Ground Fault

A32 Series Power Circuit Breakers

Product Label

An extensive range of accessories are available for the A32 power (air) circuit breakers. Each accessory can be installed as an independent unit, thanks to the modular architecture of the A32. This makes installation and maintenance fast and simple for technicians.



1	Rear connection plate
2	Cassette
3	Position indicator
4	Ready to close contact
5	Auxiliary contact
6	Pushbutton lock device
7	OFF position key lock
8	Trip unit
9	Racking handle
10	Door frame
11	Motor Operator
12	Accessory Compartment Under-voltage release Shunt trip release Closing release
13	Mechanical interlocks with cables
14	Door interlocks for drawout type

A32 Series Power Circuit Breakers

Environmental Conditions

Ambient Temperature

A32 series Circuit breakers can operate in the following environmental conditions:

With M1 Trip Unit: -40℃ ~ 70℃;

With A/H2 Trip Unit: -20℃ ~ 70℃;

A32 series Circuit breakers can operate at higher temperatures than the reference temperature 40℃, in this case, the derating coefficients shown in the table below must be applied.

Model	Rated Current (A)	Temperature (℃)						
		<40	45	50	55	60	65	70
A32	800	100%	100%	100%	100%	100%	100%	100%
	1600	100%	100%	100%	100%	100%	100%	100%
	2000	100%	100%	100%	100%	100%	100%	93%
	2500	100%	95%	92%	88%	83%	80%	75%
	3200	100%	95%	92%	88 %	83%	80%	75%

Altitude

A32 series Circuit breakers do not undergo changes in rated performance up to 2000m. Beyond this altitude, the derating coefficients shown in the table below must be applied.

	Altitude (m)			
	<2000	2600	3900	4900
Rated Voltage (V)	1xUe	0.95xUe	0.8xUe	0.7xUe
Rated Current (A)	1xIn	0.99xIn	0.96xIn	0.94xIn

Humidity

The relative humidity must not exceed 85% at 40°C, while the monthly average maximum of relative humidity in the wettest month must not exceed 90%. The effect of surface condensation caused by temperature changes on product performance should be taken into consideration.

1. 'M' Model: basic protection with LED display.
2. 'A' Model: basic protection, Ammeter and LCD display.
   'H' Model: advance protection, multi-metering, Harmonics detection and LCD display.

A40 Series Power Circuit Breakers

Product Overview

A40 Power circuit breakers and the accessories conform with ANSI C37.13, C37.16, C37.17 and C37.50 standards and are UL 1066 certified.

A40 Power Circuit Breakers are available at 4000A and are capable of interrupting ratings up to 100kA at 635 Volts, the maximum voltage can be up to 847Vac. UL Listed and CSA Certified, the A40 family of products provide design standardization for OEMs no matter where they do business.

A40 breakers offer a broad range of available trip units, accessories and communications options. They are the ideal OEM solution for low voltage switchgear and customized power distribution assemblies used in Data Centers, Standby Power, Industrial, Healthcare and Commercial applications.

Ratings

- 254Vac to 847Vac
- 4000A
- Interrupting Capacity ratings up to 100kA @ 635Vac and 85kA @ 847Vac
- Short-Time Withstand, 100kA @ 635Vac and 85kA @ 847Vac
- 50 or 60Hz operation
- 3-pole and 4-pole designs
- 10,000 Operations, before maintenance (Mechanical)
- 4000 cycles @ 635Vac, 3000 cycles @ 847Vac before maintenance (Electrical)
- Meets ANSI C37.13, C37.16, C37.17 and C37.50

Approvals

- UL 1066, Low-Voltage AC and DC Power Circuit Breakers
- CSA C22.2 NO.268
- ANSI C37.13 Low Voltage Power Circuit Breakers
- ANSI C37.16 Low Voltage Power Circuit Breakers Ratings, Related Requirements and Applications
- ANSI C37.17 – IEEE Standard for Trip Systems
- ANSI C37.50 – Low Voltage AC Power Circuit Breakers, Test Procedure

Protection & Control Options

- LS[1], LSI[2] or LSIG[3] Protection
- Standard LED display
- Color LCD display available
- Optional multi-metering trip unit (H model) with total harmonic distortion analysis and waveform capture
- Stored energy operating mechanism
- AC and DC rated motor operator, shunt trip and undervoltage release accessories
- Arc Flash Reduction Maintenance Mode
- ELM10 maintenance Switch, compatible with 'H' model trip unit only.
- Voltage Conversion Module for high voltage protections
- Neutral CT - solid bar or rope type for neutral protections
- Zone Selective Interlocking
- RS-485 Modbus Communication available

Design Features

- Compact size with 3P breaker width 17.76 inches (451mm) only
- UL field-installable accessories
- 3-pole and 4-pole designs
- Phase barriers (optional)
- Available as Disconnect Switch (ASD40)

1. LI: Long Time-delay Overload and Instantaneous Short Circuit.
2. LSI: Long Time-delay Overload, Short Time-delay Short Circuit, and Instantaneous Short Circuit
3. LSIG: Long Time-delay Overload, Short Time delay Short Circuit, Instantaneous Short Circuit, and Equipment Ground Fault

A40 Series Power Circuit Breakers

Environmental Conditions

Ambient Temperature

A series Circuit breakers can operate in the following environmental conditions:

With M1 Trip Unit: -40°C ~ 70°C;

With A/H2 Trip Unit: -20°C ~ 70°C;

A40 series Circuit breakers can operate at higher temperatures than the reference temperature 40°C, in this case, the derating coefficients shown in the table below must be applied.

Model	Rated Current (A)	Temperature (°C)						
		<40	45	50	55	60	65	70
A40	4000	100%	90%	85%	80%	75%	70%	65%

Altitude

A40 series Circuit breakers do not undergo changes in rated performance up to 2000m. Beyond this altitude, the derating coefficients shown in the table below must be applied

	Altitude (m)			
	<2000	2600	3900	4900
Rated Voltage (V)	1xUe	0.95xUe	0.8xUe	0.7xUe
Rated Current (A)	1xIn	0.99xIn	0.96xIn	0.94xIn

Humidity

The relative humidity must not exceed 85% at 40℃, while the monthly average maximum of relative humidity in the wettest month must not exceed 90%. The effect of surface condensation caused by temperature changes on product performance should be taken into consideration

1. 'M' Model: basic protection with LED display.
2. 'A' Model: basic protection, Ammeter and LCD display.
   'H' Model: advance protection, multi-metering, Harmonics detection and LCD display.

A32/A40 Series Trip Unit

Product Overview

A32/A40 Trip Units offer the advanced electronic protection and control functionality required for power distribution and feeder protection in today's increasingly complex power systems. The A32/A40 trip unit's purpose-built electronic circuits and microprocessors measure the breaker's electrical values against pre-set or user selected parameters for overload, short circuit, current unbalance, over/under voltage, and over/under frequency. When required, a residual ground current transformer provides sensing for ground fault protection.

In addition to the standard LI, LSI and LSIG circuit protection functions, A32/A40 trip units offer advanced Digital Metering, Arc Flash Reduction Mode and Zone Selective Interlocking. Communications capability is available, ensuring that the trip unit's metered values and status can be transmitted to any required monitoring or control networks.

A32/A40 Trip Units consist of three models, each providing different levels of control, display, diagnostics, and communications options, meeting the requirements of a wide range of end-use applications. Each model can be ordered in one of three protection configurations.

Models:

- Model M – LED display
- Model A – Color LCD display with a 3-phase ammeter
- Model H – Color LCD display with multi-metering and total harmonic distortion waveform capture

Protection Configurations:

- LI: Long Time-delay Overload, Instantaneous Short Circuit
- LSI: Long Time-delay Overload, Short Time-delay Short Circuit, Instantaneous Short Circuit
- LSIG: Long Time-delay Overload, Short Timedelay Short Circuit, Instantaneous Short Circuit, Equipment Ground Fault

Features:

- Microprocessor based true rms sensing
- Discrete rotary trip setting dials
- Cause of trip LEDs
- Unit status LED
- Making / breaking protection (MCR[1])
- Ready-To-Close Indicator
- Available zone selective interlocking
- Available arc flash reduction mode
- Available RS-485 communications
- USB port for power & communication
- Service short circuit protection (HSISC[2])

1. The MCR function immediately trips the circuit breaker (<50ms) when the short circuit current exceeds the pickup current setting during closing operation. This function prevents the circuit breaker from closing when there is short circuit in the system. After the circuit breaker is closed, the MCR is locked and kept inoperative.

2. The HSISC setting provide backup protection for the circuit breaker. It trips the circuit breaker immediately (<50ms) when the short circuit current exceeds a certain value during normal operation of the circuit breaker. This allows a decrease in the operating time at high short circuit levels possible and it's not affected by the instantaneous protection setting value.

Replacement Trip Unit without Voltage module

A standard trip unit device comes with a voltage module or base. Replacement trip unit can be ordered without the voltage module, however the unit must be calibrated by Noark before it can be installed on the field. Please consult your Noark representative for more information.

Electrical

Shunt Release: A32/A40

Opens the breaker instantaneously when the coil is energized by a voltage input

Shunt Trip Release			Field Installable		
Catalog Number	Part Number	Control Voltage	Inrush/Continuous Power Consumption (W or VA)	Operational Volitage Range (70–110%)	Operating Time (ms)
SHT12NA	1800272	24~30Vdc	500 / 4.5	17~33Vdc	≤50
SHT12NB	1800273	48~60Vac/dc	500 / 4.5	34~66Vac/dc	≤50
SHT12NC	1800274	110~130Vac/dc	500 / 4.5	77~143Vac/dc	≤50
SHT12ND	1800275	200~240Vac/dc	500 / 4.5	140~264Vac/dc	≤50
SHT12NE	1800447	380~440Vac	500 / 4.5	266~484Vac	≤50

Closing Release: A32/A40

Remotely closes the circuit breaker when the coil is energized by a voltage input

Closing Release			Field Installable		
Catalog Number	Part Number	Control Voltage	Inrush/Continuous Power Consumption (W or VA)	Operational Volitage Range (70–110%)	Operating Time (ms)
XF12NA	1800264	24~30Vdc	500 / 4.5	17~33Vdc	≤70
XF12NB	1800265	48~60Vac/dc	500 / 4.5	34~66Vac/dc	≤70
XF12NC	1800266	110~130Vac/dc	500 / 4.5	77~143Vac/dc	≤70
XF12ND	1800267	200~240Vac/dc	500 / 4.5	140~264Vac/dc	≤70
XF12NE	1800445	380~440Vac	500 / 4.5	266~484Vac	≤70

Undervoltage Release: A32/A40

Opens the breaker when the supply voltage falls to 30–60% of rated voltage. If the release is not energized to 85% of its supply voltage, the circuit breaker cannot be closed electrically or manually.

Undervoltage Release				Field Installable		
Catalog Number	Part Number	Control Voltage	Inrush/Continuous Power Consumption (W or VA)	Operational Volitage Range (85–110%)	Dropout Voltage (30–60%)	Operating Time (ms)

Voltage Conversion Module: A32/A40

The Voltage conversion module VCM10 is used to pick up the Power Circuit voltage signal and reduce the voltage to safe levels on the secondary terminals of the breaker. VCM10 is selected by default if the H-type control unit has been selected and the voltage protection is enabled.

Description	VCM10
Voltage input	0~1500Vac
Power consumption	<1W
Installation	35mm Din-rail
Applicable Trip unit	H
Applicable Software version	0.92 or higher

Energy-limiting maintenance switch: A32/A40

ELM10 is used to mitigate arc hazards and protect personal safety during product maintenance. It should be used in coordination with Power Circuit Breakers with arc reduction. While the Energy limiting function can be set and turned on in all trip unit models (M, A & H), the ELM10 is programmable only with the Harmonic 'H' version trip unit and the applicable software should be 0.91 or higher.

Description	ELM10
Ambient temp (°C)	-20°C+70°C
Rated voltage Ue (V)	AC480V/DC24
Rated frequency (Hz)	50/60
Enclosure protection class	IP40
Electrical/mechanical endurance (times)	1500
Inrush/Continuous Power Consumption (W)	≤5W

	Door Frame	Door Frame - Fixed	CDP12N	CDP12N	
		Door Frame - D/O	DDP12N	DDP12N	
	Phase Barrier	Phase Barrier - D/O - 3P (800A~2500A)	DPS12N2	DPS12N2	
		Phase Barrier - D/O - 4P (800A~2500A)	DPS12N3	DPS12N3	
		Phase Barrier - D/O - 3P (3200A)	DPS12N4	DPS12N4	
		Phase Barrier - D/O - 4P (3200A)	DPS12N6	DPS12N6	
		Phase Barrier - Fixed - 3P (800A~2500A)	PHS12N2	PHS12N2	
		Phase Barrier - Fixed - 4P (800A~2500A)	PHS12N3	PHS12N3	
		Phase Barrier - Fixed - 3P (3200A)	PHS12N4	PHS12N4	
		Phase Barrier - Fixed - 4P (3200A)	PHS12N6	PHS12N6	
	Interlocks	Mechanical Interlock (2 Breaker-Cable)	IPA12N	IPA12N	
		Door Interlock - D/O	VPEC12NP	VPEC12NP	

A40 Series Products Selection Guide

Appendix III

Required – Frame and Trip Unit

Select the catalog number segments from the list to create complete catalog numbers for the frame and for the trip unit.

	Description		4000A Disconnect Switch / 4000A Breaker	A40	ASD40
Frame Selection	**Step 1** Frame Type				
	Step 2 Interrupting Rating @847V	65kA		Q	Q
		75kA		R	R
		85kA		H	H
	Step 3 Poles	3-pole		3	3
		4-pole		4	4
	Step 4 Mounting	Fixed		F	F
	Step 5 Terminal Orientation	Vertical		V	V
	Step 6 Ampacity	4000A		4000	4000
Trip Unit Selection	**Step 1** Protection Type	LI		SU20	
		LSI		SU30	
		LSIG		SU40	
	Step 2 Display Type	LED - Basic		NM	
		LCD - Ammeter		NA	-
		LCD - Harmonics		NH	
	Step 3 Control Voltage	24 Vdc		A	
		110~130Vac		C	
		208~240Vac		D	

A complete breaker requires the specification of a frame and a trip unit. Select one catalog number segment from each step to create complete catalog numbers for each component. Disconnect switches do not have protection features and do not require a trip unit.
