Steps for Sink Insert Installation

1. Find and mark center of sink base cabinet. For a 33" sink, measure 16.5" from center on each side.
2. Set granite on cabinet to the 16.5" mark from center on both sides. Attach granite using adhesive (such as DOW-999 clear).
3. Once granite is in place, take 100% silicone sealant, run it down both sides of the granite 3/4"-1" from the edge.
4. Loosen screws in the back of the sink and install sink insert, allowing the lip to go behind the cabinet. Re-tighten the screws.
5. Place sink into insert. Use plumbers putty or silicone sealant between sink and the insert as a normal installation of a new sink and install using the sink clips.
