Asis^{MC}™

**Teenage Girls take centre stage:
spaces that finally reflect who they are!**

Colourful, welcoming, and designed based on social research and field analysis, these uniquely designed spaces are great for winding down and chatting with friends.

Jambette

AT THE HEART OF THE PARK, A REFUGE FOR TEENAGE GIRLS, O-ASIS is the result of **in-depth research** conducted with researchers, teenage girls, and designers.

We LISTENED, OBSERVED, and DESIGNED DIFFERENTLY.

A human and inclusive approach

The project started with a realization:

Too often, teenage girls are forgotten in the design of public spaces.

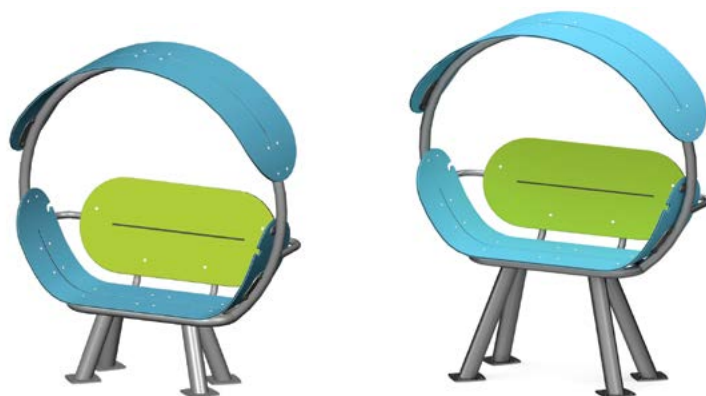

It is with them in mind that we created the **O-ASIS** line: A collection of soft, beautiful, and comforting products for teenage girls, developed in collaboration with **R.Es.P.I.R.E.** – a Montreal-based pioneer in social research – so that teenage girls can finally feel completely at home outdoors.

Feeling safe is the first step for daring to be themselves. For teenage girls, it's more than a need: it's their starting point.

SPACES TO REST, OBSERVE, AND CHAT. IN THEIR IMAGE.

Discover the four products that make up the **O-ASIS** line. Each element can be installed on their own or combined with others to create a conversation area, an observation point, or a cocoon for relaxation.

Model	Name	Seat Height
H-25000	The FriO	18" / 0.46 m
H-25002	The FriO	30" / 0.76 m

Suspended seat providing a "hammock" effect

Model	Name	Seat Height
H-25004	The Suspended FriO	16" / 0.41 m

DESIGNED FOR THEM.
BUILT TO LAST.

- Elevated seating to see without being seen and enjoy a sense of safety
- Easy access thanks to ergonomic grips and easy to reach platforms
- Enveloping backrests offer reassuring support and a moment of rest
- Colored skylights on the PlatO model create a soothing atmosphere
- Practical hooks for hanging bags and clothes within easy reach
- Cocoon-like space for confiding, observing, or simply taking a breather
- Sturdy and durable materials: Canadian aluminum, stainless steel, UV-resistant HDPE polyethylene
- Proven to stand the test of time, climate, and daily life

Circular platform with skylight

Model	Name	Seat Height
H-25006	The PlatO	43" / 1.10 m

Enough compromising:
With **O-ASIS**, teenage girls finally have spaces designed especially for them, because they deserve better than to be sidelined or relegated to play areas made for young kids.

73%

of teenage girls say they do not feel welcome in public parks.

As girls reach adolescence, girls reduce their use of public spaces by

45%

compared to only 17% for boys.

Less than

10%

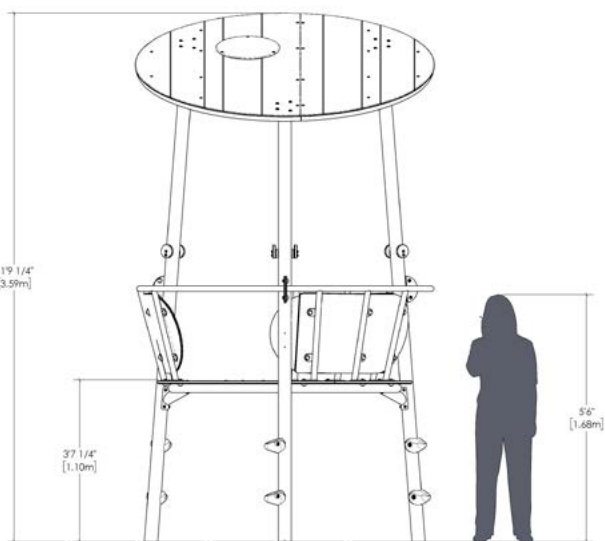

of municipal urban planning projects take teenage girls specifically into account.

100%

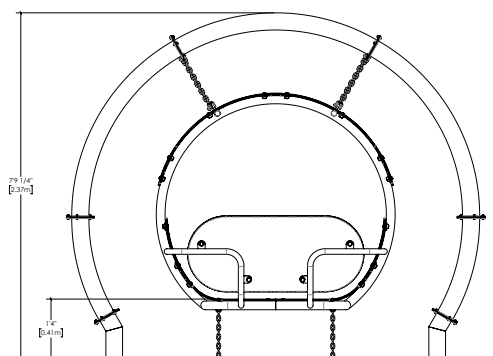

of the teenage girls consulted as part of the **O-ASIS** project expressed the need for a space where they can:

- Sit comfortably
- Feel safe from prying eyes
- Chat in small groups
