Kwikrack

Medium Duty Chipboard Shelving

Kwikrack is a robust and cost-effective storage system. Its unique 6-fold channel beams provide shelf capacities of up to **300kg** with a slim **54mm profile**. Inset chipboard decking with interlocking supports ensures strength and rigidity across every level. The system simply taps together with a mallet, allowing **quick assembly in just 10 minutes**.

Features and Benefits

- Cost-effective shelving system
- Bolt-free, taps together with a mallet in 10 minutes
- Strong & stable – 6-fold channel beams with interlocking deck supports
- High load capacity – 300kg per shelf, up to 1500kg per bay
- Professional finish – galvanised beams with powder-coated frame
- Adjustable & versatile – reconfigures easily to suit any application
- Size options: heights 2000–2500mm, depths 300–600mm, widths 1000–1500mm
- Fast UK delivery available

Product Options

TS Longspan Kwikrack is a robust, cost-effective shelving system designed to suit a wide variety of storage needs. Its unique **6-fold channel beams** and **inset chipboard decking** with interlocking supports provide strength and stability, while the slim **54mm beam profile** maximises available space. With a flexible range of sizes, Kwikrack is equally suited to **workshops, garages, warehouses**, and light industrial settings, offering a durable solution that can be reconfigured as storage demands change.

J Rivet

Steel Shelving System

J-Rivet is a light, bolt-free shelving system for fast assembly and high-capacity storage. Its strong steel frame and chipboard shelves support up to 150kg per shelf. The open design maximises space, making it ideal for warehouses, workshops, and stockrooms. With multiple size options, it offers a flexible, durable storage solution.

Features and Benefits

- J Rivet holds up to 150kg per shelf and 2800kg per bay.
- Bolt-free design makes installation quick and easy to assemble.
- Sizes from 1830mm - 3600mm high, 305mm - 610mm deep and 915mm - 1525mm wide.
- Ideal for warehouses and distribution centres.
- A practical option for workshops, garages, stockrooms, and offices.
- Strong and versatile, it suits a wide range of storage needs.

Product Options

J Rivet combines unbeatable strength with exceptional value, making it a reliable choice for a wide range of storage needs. Its shallow **J-beam profile** increases storage capacity without compromising strength, while full **compatibility with Heavy Rivet** adds extra flexibility. Easy to assemble in just minutes, J Rivet delivers durable, versatile storage for both commercial and industrial environments.

Heavy Rivet Heavy Duty Steel Shelving

Heavy Rivet is a robust, bolt-free shelving system designed for extra-heavy loads. Its strong steel frame and thick chipboard shelves support up to **600kg per shelf**. With a wide, open design, it maximises storage space and ensures easy access. Ideal for **warehouses, workshops, and industrial storage**, it offers a durable and flexible solution.

Features and Benefits

- Each shelf supports loads of up to 600kg, with a total bay capacity of 2800kg.
- The bolt-free design allows for quick and easy installation without specialist tools.
- A heavy-duty steel frame with thick chipboard shelves provides lasting durability.
- Flexible sizing is available with heights from 1830mm to 3660mm, depths from 305mm to 1220mm, and bay widths from 915mm to 2440mm.
- Its strength and adaptability make it suitable for a wide range of commercial and industrial applications.
- An open design maximises storage space and ensures easy access to items.

Product Options

Our best-selling Heavy Duty Rivet Racking is built for demanding **warehouses, storerooms, and workshops**. Made from high-quality materials, it delivers outstanding strength, rigidity, and value. With a wide range of bay sizes, open bays, and large shelf capacities, it easily stores items of different weights and dimensions. Accessories such as **dividers, garment rails, and trolleys** further enhance flexibility to suit your storage needs.

Expo 3

Boltless Galvanised Shelving

EXPO 3 shares the same upright as EXPO 4 but features a unique shelf design supporting up to **300kg UDL**. Its galvanised finish ensures durability, while the modular, boltless system makes it quick to build, easy to expand, and fully compatible with EXPO 4. With a wide choice of sizes, EXPO 3 is a versatile solution for **offices, warehouses, workshops, and industrial environments.**

Features and Benefits

- Hard-wearing galvanised finish for long-lasting use.
- Quick, simple, boltless assembly.
- Shelf load capacity up to 300kg UDL.
- Modular shelf carriers with 100mm or 200mm panels.
- Interchangeable with EXPO 4 accessories and components.
- Wide range of sizes for maximum flexibility.
- Adaptable to many applications and industries.
- Strong, durable, and cost-effective storage solution.

Product Options

Expo 3 is a boltless steel shelving system designed for strength, flexibility, and ease of use. It allows you to mix and match Expo 4 accessories and components, creating a storage setup tailored to your needs. Options include solid side cladding, hook-in back cladding, mesh back cladding, single shelf carriers (for top shelves), and double shelf carriers.

Expo 4

Boltless Modular Steel Shelving

The Expo 4 range offers three systems to suit different storage needs. **Expo 4G** provides up to 200kg per shelf in a galvanised finish, ideal for heavy-duty use. **Expo 4** offers the same strength with grey shelves and blue uprights, available in multiple sizes for offices and warehouses. **Expo 4D** features white slotted shelves with dividers for compartmentalised storage.

Features and Benefits

- Load capacities of up to 200kg per shelf across all ranges.
- 25mm shelf adjustment for maximum flexibility and easy configuration.
- Expo 4G: all-galvanised finish for durability in tough environments.
- Expo 4: painted finish (RAL7038) with blue uprights for versatile use.
- Expo 4D: white slotted shelves (RAL9010) with divider options for compartments.
- Shelf depths available in 300, 400, 500, and 600mm.
- Frame heights range from 2000–3000mm.
- Suitable for offices, storerooms, multi-tier, and high-bay warehouse projects.

Product Options

The **Expo 4** range is supplied in a wide choice of heights, widths, and depths, ensuring a solution for every environment. Bays can be configured with **solid or mesh cladding, dividers, or additional carriers** depending on your storage needs. Whether you need simple shelving for smaller spaces, flexible bays for mixed goods, or a tailored multi-tier system for large warehouses, **Expo can be customised to create the perfect storage setup.**

Delta Plus

Office Shelving System

Delta Plus is ideal for offices, libraries, workshops, and warehouses, making it the ultimate all-rounder. Its attractive, practical design features plain or slotted shelves **adjustable every 25mm for flexibility**. A wide range of dividers and accessories tailors the system to any need, keeping items organised and accessible. **Hidden shelf clips** and wide open bays maximise space and improve efficiency.

Features and Benefits

- Shelves are available in either slotted or solid options to suit different needs.
- Each shelf supports loads of up to 120kg (UDL).
- A wide range of dividers and accessories allows full customisation.
- Shelves can be adjusted every 25mm, with indicators every 100mm for easy setup.
- Hidden shelf clips maximise usable storage space.
- The system is finished in an attractive Pure White (RAL9010) coating.
- Delta Plus is designed in-house in the United Kingdom for quality and reliability.

Product Options

With its steel construction, clean lines, and smart design, Delta Plus blends seamlessly into offices while delivering practical storage. Equally suited to warehouses and distribution centres, it features durable steel shelves supporting up to 100kg (UDL), with shelf indicators for quick, easy installation. The design maximises picking space, making Delta Plus a versatile solution for both commercial and industrial applications.

Midispan

Heavy Duty Steel Racking System

Midispan is a longspan shelving system with pre-galvanised steel decking panels, built for demanding environments. Its smooth-edge profiles ensure safe assembly and use, while a **wide range of sizes** and accessories offers flexibility for varied storage needs, including bespoke automotive solutions. With large stocks ready, including components for **high bay or multi-tier installations**.

Features and Benefits

- Heavy-duty and secure, making it suitable for demanding environments.
- It is easy to build and reconfigure, adapting quickly to changing storage needs.
- Beams adjust every 25mm, giving maximum flexibility in shelf positioning.
- Galvanised beams and decking panels provide strength and durability.
- A wide range of sizes and accessories allows for flexible storage solutions.
- Smooth-edge profiles ensure safe assembly and use without sharp edges.

Product Options

The **Mididspan** profiles are designed in such a way to ensure there are no sharp edges when assembling or in use. The system has a **wide range of profiles and sizes** which provides complete flexibility when designing your warehouse. Along with a range of accessories that make it simple to store many different products as well as **bespoke solutions for the automotive industry**.

TS Longspan Heavy Duty Steel Racking System

TS Longspan is a strong and versatile storage system. Its claw-to-upright fit provides excellent rigidity, while heavy duty “Z profile” beams ensure reliable performance. All levels include deck supports as standard, so chipboard or steel mesh shelves carry the same loads as the beams. Supports lock securely, preventing beam spread or rotation.

Features and Benefits

- Heavy duty racking system for bulk storage
- Exceptional strength & stability – upright-claw fit with heavy-duty “Z” beams
- High load capacity – chipboard, steel, or mesh shelves with reinforced deck supports
- Secure & safe – supports slot into beams, preventing spread or rotation
- UDL max 950kg shelf load, 3900kg bay load
- Adjustable & versatile – reconfigures easily for changing storage needs
- Size options: heights 1984–4016mm, depths 471–1233mm, widths 1229–2754mm
- Guaranteed fast delivery within 5 days

Product Options

TS Longspan is a strong, adaptable racking system designed for a wide range of uses. Its **Divider System** creates tidy compartments for **garment storage**, while **automotive** and **tyre storage** options provide heavy-duty solutions for bulky items. The TS Longspan Racking itself offers flexible, durable storage for both commercial and industrial settings.

Cantilever

Heavy Duty Storage System

Cantilever Racking is a heavy-duty storage system designed for long, bulky items such as **timber, pipes, and steel**. Its open-front design allows easy access, while strong steel arms provide high load capacity. **Adjustable arm levels** offer flexibility for different storage needs. Ideal for warehouses, manufacturing, and construction sites, it ensures efficient and organised storage.

Features and Benefits

- Modular cantilever bays for cost-effective long item storage.
- Three arms per frame, adjustable levels.
- Optional end stops to prevent product slip.
- Heavy-duty galvanised steel frames and bracing.
- Heights: 1976mm (std), 2432mm, 2964mm.
- Widths: 1000mm or 1500mm.
- Base depths: single 780–1180mm, double 1380–2180mm.
- Arm lengths: 600, 800, 1000mm.

Product Options

Each **Cantilever** bay comes complete with three arms per frame and you can add or deduct the number of levels required. The arms can be fitted with end stops (at an additional cost shown) to secure any loose products from falling off. **The frames are spaced 1000mm or 1500mm apart with bolted on X brace**, so you can easily work out your run using the starter and extension bay

Vertical Racking

Long and Awkward Item Storage

Vertical Racking offers a cost-effective solution for storing long and awkward items. Built from our heavy-duty Midispan system, it provides **strength and reliability** in demanding environments. Supplied in a starter and extension bay format, it allows long runs to be created in the most economical way. **Each bay includes three dividers, frames, base plates, two front beams, one back beam, and a base rail.**

Features and Benefits

- Cost-effective racking designed for long and awkward items
- Built from our heavy-duty Midispan system for durability
- Starter and extension bay design makes long runs more economical
- Supplied complete with 3 dividers, frames, base plates, beams, and base rail
- Excellent value for money without compromising strength
- Simple to assemble and easy to reconfigure as needs change
- Fully adjustable hoop dividers for flexible storage layouts
- Can be securely fixed to the floor for extra stability

Product Options

Vertical Racking is strong, flexible, and easy to expand. Starter bays include frames, beams, base plates, a base rail, and three dividers, while extension bays add frames, beams, and adjustable dividers for longer runs. With 810 mm frame depth, 400 mm dividers, and optional extras such as **additional dividers or floor-fixing kits**, it adapts to a wide range of storage needs.

Pallet Racking

Warehouse Storage Solution

Pallet racking provides a versatile storage solution designed to maximise space and improve efficiency. Because every business has unique requirements, we consider the type of goods you store, the floor space available, throughput demands, and the equipment you use. Using this information, our team recommends the most suitable racking system to support your operation.

Features and Benefits

- Heights up to 6000mm help you maximise available storage space.
- Beam widths from 1350–3300mm suit a wide range of pallet sizes.
- Depths of 900mm or 1100mm give flexibility for different loads.
- Compatible with both UK and Euro pallets for easy integration.
- Designed for heavy, bulky goods in busy warehouse environments.
- Strong steel frames with durable, high-visibility yellow beams.
- Beams support up to 3790kg UDL per pair for reliable strength.
- Improves warehouse organisation, accessibility, and efficiency.

Product Options

Each **Pallet Racking** installation is designed to maximise available space, taking into account the type of goods stored, floor area, throughput requirements, and handling equipment in use. Available systems include Adjustable Pallet Racking, Push Back Pallet Racking, Pallet Live Racking, External Pallet Racking, Narrow Aisle Pallet Racking, and Drive-In Pallet Racking.

Material	Frames: Steel Galvanised Beams: Steel RAL 1003 Yellow
Environment	Warehouse, Distributions Centre, Factory Floor

Rhino Bins

Small Part Storage Solution

Rhino bins provide an efficient storage and organisation solution for small parts and components. **Designed for durability**, they are made from high-quality, impact-resistant plastic and are available in a range of sizes. With stackable and louvred panel-compatible designs, these bins **maximise space and improve accessibility** in warehouses, workshops, and retail environments.

Features and Benefits

- Made from tough, shock-proof plastic with a lifetime guarantee
- Strong, ergonomic design with reinforced side walls and stacking base
- Can be used with louvre panels, racks, and rails
- Slot-in dividers available for larger bin sizes (ARTB30–70)
- Large label area and open front for quick identification and access
- Moulded finger grips for comfortable handling
- Anti-slip stop keeps stacked bins secure
- Available in 10 sizes and 4 colours with matching accessories

Product Options

Designed for efficiency, these bins can be stacked securely or hung on louvre panels and rails, making them perfect for small parts picking. Each bin features a large identification area and a wide open picking face for quick, easy access. Available in 10 sizes and four colours, with matching wall panels, racks, trolleys, and shelving bays, they offer a complete small parts storage solution.

Rhino Tilt Bins

Small Part Storage Solution

Rhino Tilt Bins are carefully designed for applications where products must be stored, viewed, and retrieved quickly while remaining clean and dust-free. The two-component system consists of a cabinet and a tilting bin that pivots at the front bottom edge. Bins are available in four heights, widths, and depths.

Features and Benefits

- Stack or interlock Tilt Bins side by side
- Use free-standing, wall-mounted, or with a Louvre panel via adapter clip
- Large front handles with ergonomic grip for easy access
- Saves space and keeps small parts organised
- Dust-free storage keeps contents clean
- Strong two-component design for durability
- Wide choice of heights, widths, and depths
- Flexible storage that adapts to different applications

Product Options

Designed for efficiency, these bins can be stacked securely or hung on louvre panels and rails, making them perfect for small parts picking. Each bin features a large identification area and a wide open picking face for quick, easy access. Available in 10 sizes and four colours, with matching wall panels, racks, trolleys, and shelving bays, they offer a complete small parts storage solution.

Shelf Trays

Small Part Storage Solution

Our **shelf trays** feature a spring-loaded stop, allowing them to be withdrawn and suspended for up to 90% clear picking. The stop also serves as a carry handle. With **3 depths, 2 widths, and 2 heights**, trays can be configured for high-density storage. They can be sub-divided left to right, with all trays and dividers supplied with white labels.

Features and Benefits

- Strong and rigid construction.
- Ergonomic features to make handling and use easier.
- Spring-loaded shelf stop that also acts as a carry handle.
- Trays can be sub-divided to create flexible storage layouts.
- Provides a high-density storage system to maximise available space.
- Enables fast retrieval times for greater picking efficiency.
- Available in a wide range of sizes to suit different applications.

Product Options

Our ergonomic shelf trays combine strength, durability, and ease of use at a highly competitive price. Featuring a spring-loaded stop that doubles as a handle, they provide **up to 90% clear picking**. Available in multiple sizes and easily sub-divided, they deliver flexible, high-density storage with clear product identification.

Material	Trays: Plastic Light Blue Label Cover: Plastic Clear Transparent Label: White Card Internal Dividers: Plastic Spring Handle: Steel

Kanban

Assembly Line Shelving

Kanban Shelving is the smart solution for organised stock management. Its bolt-free steel frame and angled shelves provide quick, **easy access to parts and bins**, while adjustable levels suit varied storage needs. For **line-side supply**, our **Rivet Racking** Kanban uses a two-bin system for simple stock rotation—when the front bin is removed, the rear moves forward, leaving a clear space for replenishment.

Features and Benefits

- Angled shelves improve stock visibility and picking speed.
- Practical size: 1830mm (H) x 915mm (W) x 610mm (D).
- A heavy-duty steel frame ensures strength and durability.
- Adjustable shelves adapt easily to different storage needs.
- Bolt-free design allows quick and simple assembly.
- Two-bin system streamlines stock rotation and replenishment.
- Reduced downtime delivers cost savings and efficiency.
- Ideal for warehouses, workshops, retail, manufacturing, and automotive storage.

Product Options

Kanban Shelving can be supplied with **Plastic Bins** or **Shelf Trays**, offering the ideal solution for production line-side supply. **Shelf trays** suit **high-density storage** with quick withdrawal and maximum picking access, while **plastic bins** provide versatile, **heavy-duty storage** for packing, assembly, or stockroom use. Both options keep parts accessible, organised, and easy to replenish, boosting efficiency across operations.

Material	Split Uprights: Steel Blue RAL5002 Beams: Steel Orange RAL2002 or Grey RAL7038
