## OUR HISTO

# Greeting Message

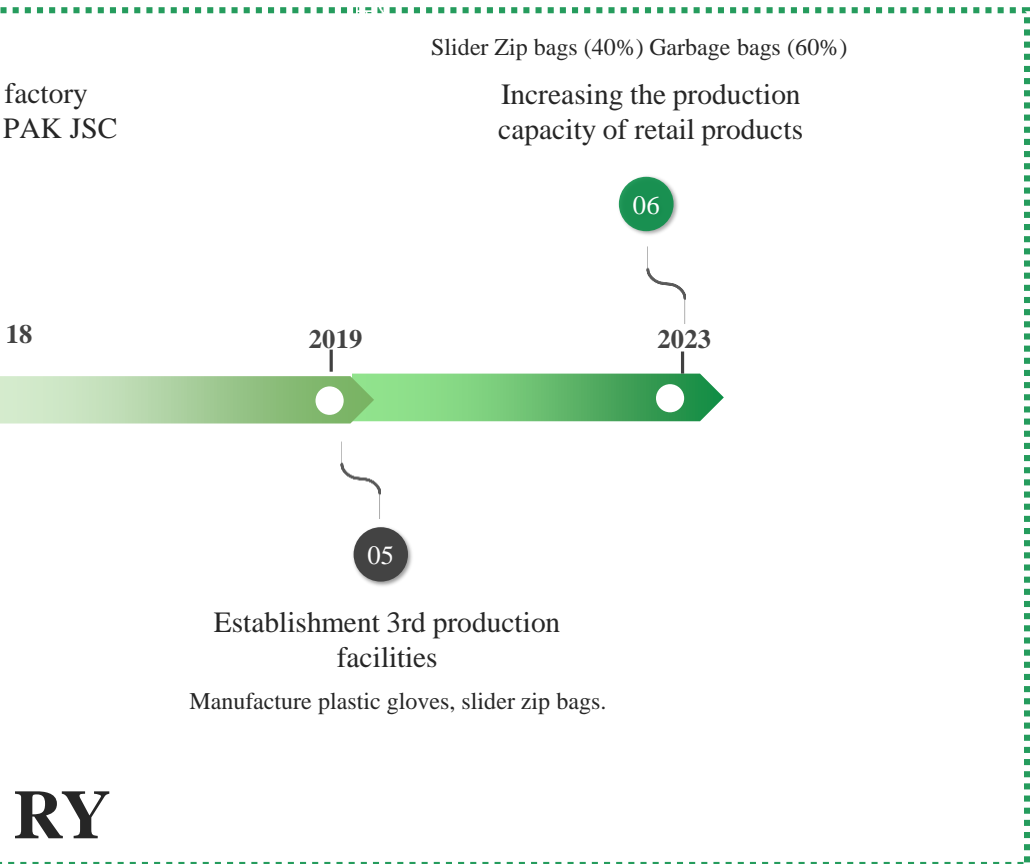

Dear Valued Customer,

An independent, privately-owned, family company, LEEPAK JSC is far-removed from any short-term logic and is very much about building solid relationships over the years with our customers in all over the world.

With a factory equipped with modern technology line, strict production processes, we always meet the the progress and technical quality of the projects according to the requirement of customers with reasonable prices, most reasonable. Besides economic success, transparent and constructive interaction with all the stakeholders and environmentally-friendly production, we will focus on a modified image of plastic, its value added production and its responsible use. In this way, with vision, the company became one of the most biggest plastic bag producers in Vietnam.

On behalf of the Executive Board of Leepak and our people, we look forward to serving you and your company's needs. Thank you for giving us the opportunity to serve you.

Kind regards,

 Staffs: 100  
 Capacity: 2000 MT/month

## 3.1. Standard Factories System

## 3.2. Advanced technology

Our extensive world class manufacturing facilities include three manufacturing units in Hanoi and Bacninh consisting of state of the art production lines employing advanced manufacturing technology and controlled by staff who have over 25 years of experience to produce premium quality plastic bags.

These efficient production capacities ensure scales of operations, consistent product quality and lower production time enabling faster delivery to the customers. We have always believed in investing in newer and more efficient technologies that focus on high quality and cost- competitive manufacturing.

9+ Sets Material Mixing machines.

42+ Sets Inflation/Blowing Film Machine.

20+ Sets Automatic Cutting Machines.

12+ Sets Cold cutting machines

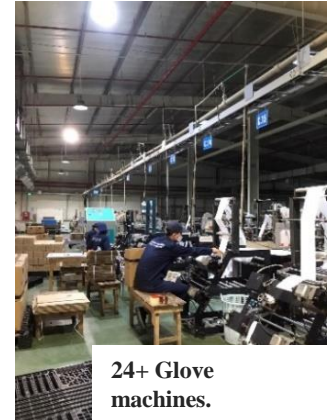

20+ Shopping Bag cutting machines.

22+ Roll bag cutting machines

8+ Slider bag making machines

24+ Glove machines.

# 3.3. Strict Quality Control System

1. Approved Raw material warehousing.

2. Mixing: Raw-materials are mixed to the correct formula.

3. Extrusion: mixed formula is then melted, extruded into tubes of film ready for shaping and sealing.

4. Printing: Adjustable automated processes with up to 6 color printing in line.

5. Quality Control Inspection.

6. Shaping and sealing: the extruded tubes of film are then cut into shape and sealed to create bags.

7. Quality Control Inspection.

8. Packing: the bags are then counted and packed into customer's preferred packing.

9. FG Warehousing: the packed finish goods are stored securely in the warehouse ready for shipment.

10. Container loading: Finished product are loaded into the container and transported to shipping yard.

# 3.4. Well Equipped R & D centre

- ✓ Around 30 technicians in 2 factories optimize existing products or develop new formulations in careful and diligent consultation with our customers.

## Latest Equipment

- ✓ Test procedures and laboratory equipment that represents the latest state of the art.
