

Swannndri

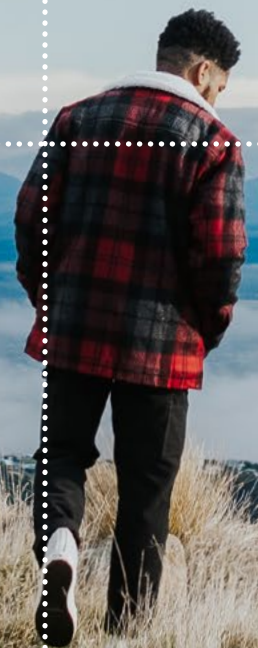

**AUTUMN / WINTER
2022**

*Since 1913 we've been living
the outdoors every day. Every
frostbitten, rain-soaked wintry
morning. Every glorious, wish-it-
would-never-end, summer's day.*

*Our years of experience with
fabrics and fibres means we know
what works. Our gear lasts,
like the memories you make
and the stories you share.*

---	---	--	---	---

A collage of fashion design materials including fabric swatches, sketches, and color palettes. The background is a mix of various textures and colors, with a vertical dotted line running down the center. The word 'Glossary' is written in large, white, sans-serif font, oriented vertically on the left side of the image.

Glossary

Here at Swannndri we're the first to admit we aren't perfect, but we're working hard to be responsible producers of high quality clothing in every way that we can. You can expect to hear more from us over the next twelve months as we make changes and try new things.

Fabric and fibre

Thermolite – Premium recycled insulation

THERMOLITE® EcoMade T-Down is made from 100% recycled PET bottles to create a 500 fill power insulation that offers higher loft, better moisture management and faster drying times than traditional down fill.

This technology is extremely breathable and soft so you'll be warm but not weighed down. It also packs down for easy 'take a jacket just in case' adventuring. We've switched to using THERMOLITE® in a number of existing garments as well as introducing it in new styles for this season.

ZQRX – Give more than you take

We've used ZQ certified wool for many years now, and we are excited to announce that we are taking the next step in our journey with ZQ by stepping up to ZQRX, the new gold standard in wool production.

ZQRX wool growers not only produce the highest quality, most ethical wool in the world, they also work to give more than they take from the natural world, the animals living in that world, and the human communities that interact with it.

Growers use a new platform called the Regenerative Index to help them measure and improve how much they give back as they restore waterways, protect native species, offset carbon, and enhance local communities.

ZQRX wool is essentially a recipe for how we might produce and consume things in the future, where products will not only change our lives for the better, they will change our entire world for the better by giving a little more than they take.

Swannndri Winter 22 Collection

Icon Glossary

Wind resistant fabric keeps the breeze at bay.
