KEY, VISIONARIES

At Lovon, we believe the tools in your workspace should be as engineered as the projects you create. Our 2026 collection is a study in architectural lighting and precision stationery, designed to bridge the gap between industrial utility and aesthetic soul

In this catalog, you will find our latest batch of atmospheric lighting and high-density workspace essentials. Each piece is crafted for those who demand clarity in their environment

Naahsi Dehna

Editor-in-Chief

THE FUTURE OF PRECISION IS *HERE*

Analog thought meets architectural design. The Foldable Glass Leaf is a study in mobility, featuring zero-ghosting tempered glass and a high-density magnetic hinge for the nomadic visionary

LOVON ATMOSPHERIC

The Orbital Desk Fan is an exercise in atmospheric control. Designed with a bladeless high-velocity turbine and a whisper-quiet motor, it provides a consistent, columnar airflow without disrupting your focus. It is the invisible essential for the high-performance workspace

Illumination on the move. Our collection of portable smart mirrors features 180° folding hinges and touch-capacitive LED rings. Whether you require the tabletop stability of the Circular Glow or the nomadic slimness of the Folding Leaf, we provide studio-grade clarity in any environment

"The modern workspace is no longer a fixed location; it is a portable ecosystem of light and texture."

BY LOVON DESIGN HOUSE

Ergonomics meets architectural discipline. The Obsidian Footrest is engineered to align the lower body, reducing fatigue while maintaining the sharp, professional silhouette of the executive workspace

INFLUENCING THE

NEW TRENDS

Organization is the silent partner of ambition. The 2026 Executive Suite is designed for those who command their time with architectural precision

The Nexus 2026 Planner features a vegan leather exterior and premium 120gsm ivory paper, providing a tactile experience for high-level strategy. Paired with the Precision Flow Marker—featuring a 0.5mm archival ink tip—this set ensures your analog records remain as sharp as your vision. Every stroke is deliberate; every page is an opportunity for clarity

NEXUS EXECUTIVE PLANNER & PRECISION FLOW MARKER

LINEAR MIRROR GLOW

Architectural illumination for the modern sanctuary

Engineered with a high-CRI LED strip encased in anodized aluminum, the Linear Glow provides shadow-free lighting that mimics natural daylight. It is the essential final layer for any refined grooming space

This modular piece features magnetic mounting for effortless installation and a touch-sensitive interface to adjust between warm amber and cool daylight tones

LOVON

LOVON LIGHTING SUITE

THE HORIZON BAR

Precision light for the nomadic executive.

Elevate your audio. The LOVON Stand Series provides a dedicated sanctuary for your acoustics, combining structural integrity with a minimalist silhouette

The Obsidian Square Stand is engineered for stability. Its wide-gauge base ensures a low center of gravity, preventing tip-over even with heavy planar magnetic headphones.

The top cradle is contoured to distribute weight evenly across the headband, preventing long-term material fatigue while keeping your workspace visually aligned

3 ELEMENTS OF THE MODERN WORKSPACE

VERTICAL STANCE

The Executive Stand is a study in geometric balance, providing a solid anodized aluminum foundation for high-performance audio gear. It transforms your headset from a tool into a sculptural centerpiece.

ATMOSPHERIC FLOW

Engineered for total environmental control, the Orbital Flow combines high-velocity cooling with precision humidification. Maintain your peak performance state regardless of the external climate

NOMADIC COMFORT

Personal climate, redefined. Our wearable cooling series uses quiet-motor technology and lightweight polymers to provide hands-free relief for the visionary on the move.

PHOTOGRAPHY BY LOVON STUDIO

Curating the foundation of focus. Our 2026 staples collection focuses on structural efficiency, ensuring your most vital tools are exactly where they need to be, from the vertical axis of your display to the hidden storage of your desk edge.

ARCHITECTURAL LIFTS

Engineered for thermal management and ergonomic alignment. These solid-aluminum lifts feature a dual-pivot design, allowing for infinite height and angle adjustments. The perfect bridge between your primary display and your digital canvas

OBSIDIAN SIDE- MOUNT

Reclaiming the surface. This heavy-duty steel mount provides a dedicated home for your laptop, notebook, and precision writing tools without consuming desk space. It is the definitive solution for the minimalist who requires immediate access

The Stealth Lift is the definitive foundation for the high-performance laptop.

Crafted from reinforced aerospace-grade polymers with a matte obsidian finish, its open-frame architecture allows for maximum passive cooling while elevating your display to the optimal ergonomic horizon.

Designed for the nomadic executive, the Stealth features a high-tension dual-hinge system that collapses into a slim, travel-ready profile.

It doesn't just hold your machine; it integrates it into a professional, high-fidelity ecosystem

THE STEALTH LAPTOP LIFT

Engineered for the silent performer. A study in geometric stability and thermal efficiency.

Precision requires a stable foundation. The Architectural Felt Mat is crafted from high-density synthetic wool to provide a muted, non-slip surface that protects your equipment and softens the workspace aesthetic

The final layer of luxury.

Our 2026 Home Suite introduces tactile warmth to the high-end residence, blending architectural form with uncompromising comfort

Lovon Home is an exploration of texture. The Obsidian Velour Ring (Left) is engineered with high-density memory foam encased in a deep midnight-blue plush, providing ergonomic support that complements the most refined interiors.

Complementing our sanctuary series is the Elevated Faux-Fur Lounge (Right).

Designed for the modern pet, this piece features a structural steel frame and a premium cream-shag surface, ensuring that every inhabitant of a Lovon home experiences the same level of design-led comfort

Performance is a matter of thermal management.

The Obsidian PS5 Cooling Dock is engineered with a high-velocity triple-fan array and an integrated controller charging system. Its low-profile frame provides maximum airflow with a near-silent acoustic signature, preserving the life of your hardware during high-fidelity sessions.

Complementing the suite are the Turbine Mini Fans (Right). Designed with a dual-motor oscillating system and real-time digital temperature displays, these units provide precise, columnar cooling for the immediate desktop environment.
